Perhaps "thier" pensions should go status quo as well as the ARS. No annual cost of living raises.

That's just your excuse. It is common belief on RRAP that there was no
combat where you are concerned.

Larry the "Human Resources" student probably single-handedly killed a
career in HR due to the comments he made and archived on RRAP.

>
> How is my opinion wrong?

Becasue there's not been ONE SINGLE INSTANCE when ARES or RACES
has EVER refused or been unable to fulfill it's promised duties for any
reason YOU have suggested...Nor has there ever been ANY reason they've
refused, period.

> > I've asked you SEVERAL TIMES now to show me JUST ONE example
> of
> > some situation where ARES was asked to respond to a situation but

> often how a person is initially notified that they are in an
> emergency
> period. The military relies on them quite heavily.

Cellphones are NOT unlicensed devices. YOU do not have to have a
licnese for it, but the entire cellphone net operates under various FCC
licenses. See "Common Carrier".

Also, when you first made your assertion, I asked you if you meant
Part 15, Part 95, etc, and you said "Yes, of course". So...Still
waiting.

> > You claim, I ask you to validate the claim. You refuse. No
> > facts
> > = invalid claim.
>
> If a fact isn't presented then the opinion is wrong? You da man!

"I believe that ARES will not be able to respond to future
emergencies due to the greying demographic" is an opinion.

"ARES is dependent upon graying old men who can't respond to
emergencies" is an assertion.

> > It really is THAT simple.
> >
> > Steve, K4YZ
>
> It really is quite simple to see that you claim people's opinions are
> wrong. Then you start the "liar, liar" routine. It's all archived.
> Again and again.

And you still have not come completely clean.

You made "statements of fact" that were nothing BUT opinion.

You continue to refuse to validate your assertions unless you are
NOW stating that all they were WAS opinion, and nothing BUT opinion.

However it's taken you MONTHS to get out from under that rock,
which leads me to believe that this is your only perceived avenuse of
escape from your own silly mistakes and unsubstantiated rantings.

The most recent holder of K4CAP never held K0AIR. So one has to
wonder what your point is, Brian...Not that there's ever any
meaningingful point to ANY of it...

> > It's just ENVY on Robeson's part because he's never

You continue to insist that I ahte Lennie. I don't. I
understand him better than he accepts tht I do, and therefore make sure
that OTHERS understand him too.

Just like I do you, Brian.

> > and tries to use it as a semi-
> > perjorative. So few know the meaning of that Yiddish

mind.

Wondering who THAT is becasue there's never been an Amateur KNOWN
as "Reverend Jim" That I am aware of, other than in Lennie's

imagination.

> > What is curious is that Robeson cries/whines/bitches

>
> Steve has single handedly given thes rra.misc idiots a home on rrap.
> Thank you Steve.

They'll soon move on and you and Lennie will have it all back to
yourselves...And it wasn't my doings, Brian...It was Toiddie's
cross-posted rantings, not me, that brought them here.

Please try to keep your "facts" (snickersnicker)straight.

> He fakes "outrage"
> > that others would do such a thing to HIM! :-) On the

I "absolutely hate" that you further humilate yourself counting
nothing, Brian. You have never substantiated the first alleged lie.

Soooooo.....Zero is still zero....

> > retired (from regular hours) electronic engineer person
>
> Oooh! You gonna get Steve all worked up over that last comment.

Why? He (Lennie) still has yet to provide us with so much as one
professional paper with his name on it. So Lennie's claim to having
been a "professional engineer" is vaporware.

Vaporware, Brian. Vaporware.

You claim there are lies. I've been asking you to substantiate
the claim. You have not. You furhter exacerbate your own situation by
making even MORE assertions without corroborating facts. Oh well.

> Brian, so how could this be #10? You
> > and Todd need to see if you can carpool...Him for remedial English,
> > you
> > > for remedial math.
> >
> > There's nothing wrong with my math.

Sure there is. In that line you claim there's "10" lies. You've
yet to substantiate "1".

You can't raise a building without a foundation. And you can't
get to "10" without having started at "1".

> > > > > > > If I cannot trust the information that the participant

>
> You lie. That's enough for me.

You say I've lied.

I've repeatedly asked you to substantiate that claim.

You never have.

That would put the onus of liar upon you, Brian. (Not that it
ever LEFT you...)

Sorry.

> > > > > Looks like there are some empty spots in the schedule.

> Brian?" you linked us to a website that showed that this was a four
day
> exercise. So why are you trying to make it into a two day exercise
> again? More lies and misdirection?

Nope....I can still fill even a 96 hour assignment with six
operators for four days.

YOU keep saying only two. That's even better.

> And without working any one or several individual(s) a double shift,
> and maintaining the requirement of three person shifts of qualified
> communicators...

No all communicators need to be at the mic for the whole 24hours.

> > > Especially if they have 6 people to cover a 48
> > > > hour period that they are participating...
> > >
> > > Correction. Two teams of 3 people each.
> >
> > Two teams...Six people...Yeah...SIX is what I said, Brian.
>
> So show me your 96 hour schedule.

Day one. Team one. Operator 1A comes on duty at 0600 until 1600.
Operator 1B comes on duty at 1000 until 2000.
Operator 1C comes on at 2000 and maintains
watch until 0600

Day Two, Team two. Operator 2A comes on duty at 0600 until 1600

Etc etc etc, with team one on again on day three, and team two on
again for day four. Six people of two teams covering 96 hours. Hours
least likely to have heavy traffic flows were covered with minimal
staffing. The bulk of the day had two operators at the mic with the
third available if needed.

100% coverage of the required hours. Two teams of three operators
each.

Done.

> > > > And you STILL have not shown me ONE instance where ARES

> They do. Unless your experience is so limited that you've yet to see
> it.

My experience is from 1974 when I was first licensed as an
aviator. I've flown everywhere in the United States except North
Central, Alaska and Hawaii. I have never once had an ATC error.

An ATC controller in Memphis in particular saved my bacon from an
uncontrolled, pop-up target, on January 21st, 1975. Split second,
no-BS, "do this now" instructions saved me and two other Marines from a
guy in a Skymaster who had just taken off from an uncontrolled field
and could not see me since he was climbing into the sun and coming up
from behind me.

I have NO complaints with the ATC system!

> You never flew combat air patrols for anyone, but you've got flight
> suits and medals...

Yes I do. The flight suit is PPE...Personal Protective Equipment
as defined by OSHA.

None of any medals I have ever been awarded by either the United
States Marine Corps or the CAP are on that flight suit.

So you STILL have yet to answer the question, Brian....WHAT, in
your opinion, is a "CAP Ace".

Is this yet ANOTHER assertion that will take us a year to get you
to finally admit was an unsubstantiated opinion?

> > > > What lie? And yes it IS what YOU said, Brian. Word for

>
> 10 back. Last week.
>
> And you said that I had a math problem. Hi!

You do.

You also have a "fact" problem.

And a reading comprehension problem.

Not to mention the already existing honesty and character issues.

This continuing "dodge" to cite the alleged "lie" is yet more
proof of MY assertion that you are without facts or honesty. You are
being intentionally deceitful. Same as lying.

> > > For covering all of the shifts.
> >

> > Uh huh.
>
> Remember the customer? The customer that is never, ever, ever
denied?

YOU made the assertion that there is a failure of ARES to respond.

YOU have YET to provide even ONE example where ARES or RACES has
failed to respond for any of the criteria you have suggested...or for
ANY criteria for that matter.

I have been with ARES teams for wildfires in Southern California,
missing children searches in Georgia, public service support in
Pennsylvania and cross country bike races in Tennessee.

> You gotta cover all the shifts with the right number of qualified
ops.

I did.

> > Anyone who has really done any of these knows that's NOT the
> > facts, Brian...Like you...
>
> Three qualified operators per team. Them's the facts.

Yep. Three. See above. You may not like it, but I've "been
there, done that", and it works. Sorry if you don't agree.

By the way, from what PRACTICAL EXPERIENCE in emergency services
are YOU coming, Brian? Just what have YOU done for Amateur Radio?
MARS? CAP? The VFW Ladies Auxiliary?

> > One more example of "Not A Clue Burke" hanging his bacon out to

> You think like a day weanie.

You don't think. At all. You're not capable of "fluid
management". Your planning and execution have to be at someone else's
direction, Brian. Ever hear of "TQM", Brian? It's USAF Core Value.

And I've asked you to define your "day weanie" comment. I say
it's just a Lenniesque diminutive without substantiation.

As usual.

> > > > > > Sorry, Brian...Your contentions are still grasping for

> I do. Every day. I start off by not lying.

Then by denying that you have a problem with honesty is yet
ANOTHER of YOUR lies, Burke.

The kids are going to see this some day.

Why not make them proud by having the intestinal fortitude to
gut-up and admit your problem and move forward...???

> > Start off by TRYING to cite my alleged 11 lies. Then you can
> > provide us with some evidence to support your "ARES won't respond"

I don't need to requote anything, Brian.

YOU need to quit stalling and get your act together.

> > Then move on to your "unlicensed devices" issue.
>
> You need to requote that.

More stalling, Brian.

> We're
> > still waiting for documentation of the legality of your Somalia

not
> the US Air Foce on site commander. You are not the United Nations.
> You are not the ARRL.

Nope. I am none of those.

But I HAVE been the "recipient" of your blatant dishonesty in THIS
forum vis-a-vis your Somalia operations, and I KNOW that you acts were
not legal unless you can pony-up some facts that show that you DID have
valid authority to operate an Amateur Radio transmitter while in
Somalia.

As it stands, you were simply pirating. Toddie would be proud.

> and some evidence of your claims of having worked the

> >
> > Steve, K4YZ
>
> You make claims, Steve. You do it often and loudly. But your claims

> aren't worth spit because they are lies.

No, they are not.

You continue to make unsubstantiated claims. You make those
claims in such manner, tone and repetitiveness as to state them as
fact. To do so over and over when no where there is no substance to
support it (and evidence to the contrary is prevelant) is a lie.
Period.

> Now show me your Top-Off 96 hour duty schedule where all shifts are
> covered with the proper number of qualified radio operators, and
> without abusing the volunteers. You claim you could, so do it.

Did it.

> Best of Luck.

No luck needed.

> >
> Actually I working on getting my Sport's pilot license.

Congratulations. And it's not a "Sport's pilot license" That's
an aviator that is owned by an athletic program. You are training to
be a Sport Pilot. You won't be allowed to fly an aircraft that exceeds
599kg take-off weight (max gross) or be allowed to fly an aircraft with
a max flat-out cruise speed in excess of 120kts. There are other
significant limitations too.

But it's a start.

I've been a pilot since 1974.

If you can keep a civil tongue in your mouth when you do it, feel
free to ask any questions you may have. I certainly don't know all the
answers, but I know where a lot of them are.

If you haven't done it already, may I suggest you consider
membership in the Experimental Aircraft Association. Their new
periodical "Sport Pilot" is a wealth of info for folks in your
category...Not to mention that the new Sport Pilot category wouldn't
exist if not for them...they deserve a lot of thanks and support from
all GENAV pilots.

It's as if you prayed for Steve to appear in a flight suit, and your
prayer was answered. He couldn't be more ridiculous unless he had
medals pinned to it, too.

You can't without abusing the volunteers.

> YOU keep saying only two. That's even better.

Nope. 96 hours. Do you want me to do the math so you'll know how many
days that is?

> > And without working any one or several individual(s) a double
shift,
> > and maintaining the requirement of three person shifts of qualified
> > communicators...

24hours.

Teams of three, Steve, teams of three. Be sure there are three
qualified communicators on shift at all times.

> > > > Especially if they have 6 people to cover a 48

> watch until 0600

Hi, hi, hi! You couldn't even get through the first six hours without blowing it. Then there are gaping holes in the rest of the very first day's schedule.

Phil said they were required to have three qualified operators per shift, and you couldn't follow the rules even this once. You just had to start changing the rules and winging it so that my opinion would be "WRONG!" and you could call me a "LIAR!" again. Poor Steve.

Some supervisor and schedule writer you are. You're fired.

Do you pull these stunts in the ER? Do you pull them in the cockpit? Did you pull them in the USMC?

>
> Steve, K4YZ

Steve, you're so full yourself. You make yourself into fool every time you start jumping up and down demanding proof and facts anytime something you don't like comes up. Too bad no one is taking you seriously, especially me. You make up stuff and keep making up stuff so you don't have to apologize for being such an ass.

Is that more of your "facts," Steve? An electronic engineer must have
published papers. Hi! Be sure to tell that to Congress before they
let hundreds of thousands more of them immigrate to the USA.

Welp, we always did know that you don't know what you're talking about.
And them's the facts.

I have no idea what that rambling BS particular post was trying to say, but I am still waing to hear what exploitation this so-called "smart businessman" engaged his poor, ignorant daughters in in an attempt tomake afe buck trying to sell some cheap radios.

That story is so pathetic, I DARE that miserable piece of sh*t to e-mail me directly (not post on a newsgroup like a chickensh*t) and tell me how much profit he generated from his ignorant daughters' asses. My guess is that if he tells the truth, I can generate that from my friggin' pocket, send it to him, and save 2 or 3 girls that happened to be born to one of the dregs of society from at least a little embarassment.

Let's hear it, BIG-TIME OPERATOR!!!!!!!

Paul Schleck (the extra who "signs" those welcome
e-mails to new names in the newsgroup) is apparently
long gone on some sabbatical or whatever. He doesn't
answer any e-mails...at least to the web address on
those "canned" welcome messages. ???

It would seem prudent for Paul to convene his jolly
troika and have this newsgroup nulled and voided for
a while. That's happened before when certain others
"took over" the place...just like it is now with
Stebie and the Anonymouses battling back and forth.

>
>No doubt that inadequacy is at the root of his hatred for you.

It seems to me that Stebie just CANNOT take any
negativisms on anything he says. That's been the
pattern for years. Oppose him enough and he grows
his hatred in his own little steaming pot and keeps
stirring it. That makes him worse. Tsk.

When Stebie just can't take it anymore, he gets out
the mirror and tells everyone else they are just like
that mirror image...which isn't true...but it's Stebie's
"argument device" and its all he's got. Tsk.

Stebie tries to "insult" me by calling the me of half
a century ago a "military radio mechanic." :-)

I can't find any evidence that the U.S. Army EVER
called radio communication operators and supervisors
as "mechanics." At one large Army depot involved
with electronics overhaul, the CIVILIAN technicians
are referred to as "mechanics" as a job title. That's
an exception as far as titles go. Most everyplace
else, a "mechanic" is someone who works on vehicles.

w3rv wanted to pull my chain some years back in a
long and unnecessary give-and-take about "engineer"
as a title. Kellie insisted one HAD to attend a
college or university and "earn" that degree in only
four years. With Stebie it got worse with him
equating college-accredited night classes as some

kind of "night school" on the level of teaching
citizenship to immigrants wanting to become
citizens. :-)

Stebie is all about CREDENTIALISM, of having all
those pretty (suitable for framing) certificates
on the wall to "show how smart he is" and etc.
Somehow he got the idea that being a purchasing
agent at a mid-size electronics company was
"equivalent to working in electronics engineering."
Tsk...I've been 45 years IN electronics design
engineering just in southern California, by job,
title, responsibility, and (eventually) by
degree.

Stebie is now working a schtick that "I don't
know anything about raising children" (which is
untrue, by example)" again. Tsk, tsk. Stebie
should talk...after fathering at least one
poor deformed child who eventually died. Of
course NONE of that is Stebie's fault. By just
SAYING so, he is an expert, knowledgeable about
everything in pediatrics (his LPN credential is
about that?). :-)

>Welp, The Amateur Formerly Known As Reverend Jim doesn't seem to mind.

Jimmie has been FORCED into a back seat position
on the basis of Stebie's avalanche of postings
plus all those Anyonmouses, all shouting hatred
and e-ganging up like vultures on a few in here.

Jimmie (Who?) is starting to emerge about now,
possibly taking some testosterone supplements
so he can show others what a "man" he is in here.
:-)

>I just learned from him that unless an opinion is fully documented
with
>facts, that it is a lie.

Irrelevant. Stebie determines what is a "lie" and
what is "truth." :-)

If someone else has an opinion contrary to his, it
is (according to Stebie) a "LIE!" complete with an
exclamation mark. :-)

Stebie just CANNOT accept that anyone is contrary
to his glorious being/mind/ego. Can't be! Ergo,
it is a "LIE!" Eventually, EVERYTHING in this
newsgroup has to become Capt. Stebie's own
"battleground" where he can hold forth like some

self-styled feudal warlord. :-)

>> Robeson, but a problem to others since they don't care

Agreed...he can be a "mother" all right. :-)

>> LenAnderson@ieee.org
>>
>> retired (from regular hours) electronic engineer person
>
>Oooh! You gonna get Steve all worked up over that last comment.

TS. :-)

Tsk. I EARNED that IEEE membership the hard way...I
worked for it. Now, as a Life Member, I don't have to
pay dues and remain a full member in a professional
worldwide organization. Joined in '73 and had to have
three members' affidavits to accompany that
application. About the same time Stebie joined the
murines and had to have three DIs shout in his face.
Now he's getting even for all that abuse he took
back then. :-)

Stebie has LIED about my "lackluster career" and "doing
nothing" etc., but the poor guy has NEVER had anything
remotely as good, nor with the income. Tsk. There
was, in his case, not a "lack" but a VOID of "luster"
and one can't polish up something that isn't there.
[Stebie tries very had, but everyone can see he isn't
doing anything but jabbering generalities in his
bragging :-)]

Sooner is later there MIGHT be a recursive move to
talk about "policy" concerning amateur radio in here.
I will remain optimistic. :-)

>work getting the K0AIR call out of the hands of micreants like K4CAP.

Paul Schleck (the extra who "signs" those welcome
e-mails to new names in the newsgroup) is apparently
long gone on some sabbatical or whatever. He doesn't
answer any e-mails...at least to the web address on
those "canned" welcome messages. ???

It would seem prudent for Paul to convene his jolly
troika and have this newsgroup nulled and voided for
a while. That's happened before when certain others
"took over" the place...just like it is now with
Stebie and the Anonymouses battling back and forth.

>
>No doubt that inadequacy is at the root of his hatred for you.

It seems to me that Stebie just CANNOT take any
negativisms on anything he says. That's been the
pattern for years. Oppose him enough and he grows
his hatred in his own little steaming pot and keeps
stirring it. That makes him worse. Tsk.

When Stebie just can't take it anymore, he gets out
the mirror and tells everyone else they are just like
that mirror image...which isn't true...but it's Stebie's
"argument device" and its all he's got. Tsk.

Stebie tries to "insult" me by calling the me of half
a century ago a "military radio mechanic." :-)

I can't find any evidence that the U.S. Army EVER
called radio communication operators and supervisors
as "mechanics." At one large Army depot involved
with electronics overhaul, the CIVILIAN technicians
are referred to as "mechanics" as a job title. That's
an exception as far as titles go. Most everyplace
else, a "mechanic" is someone who works on vehicles.

w3rv wanted to pull my chain some years back in a
long and unnecessary give-and-take about "engineer"
as a title. Kellie insisted one HAD to attend a
college or university and "earn" that degree in only
four years. With Stebie it got worse with him
equating college-accredited night classes as some

kind of "night school" on the level of teaching
citizenship to immigrants wanting to become
citizens. :-)

Stebie is all about CREDENTIALISM, of having all
those pretty (suitable for framing) certificates
on the wall to "show how smart he is" and etc.
Somehow he got the idea that being a purchasing
agent at a mid-size electronics company was
"equivalent to working in electronics engineering."
Tsk...I've been 45 years IN electronics design
engineering just in southern California, by job,
title, responsibility, and (eventually) by
degree.

Stebie is now working a schtick that "I don't
know anything about raising children" (which is
untrue, by example)" again. Tsk, tsk. Stebie
should talk...after fathering at least one
poor deformed child who eventually died. Of
course NONE of that is Stebie's fault. By just
SAYING so, he is an expert, knowledgeable about
everything in pediatrics (his LPN credential is
about that?). :-)

>Welp, The Amateur Formerly Known As Reverend Jim doesn't seem to mind.

Jimmie has been FORCED into a back seat position
on the basis of Stebie's avalanche of postings
plus all those Anyonmouses, all shouting hatred
and e-ganging up like vultures on a few in here.

Jimmie (Who?) is starting to emerge about now,
possibly taking some testosterone supplements
so he can show others what a "man" he is in here.
:-)

>I just learned from him that unless an opinion is fully documented
with
>facts, that it is a lie.

Irrelevant. Stebie determines what is a "lie" and
what is "truth." :-)

If someone else has an opinion contrary to his, it
is (according to Stebie) a "LIE!" complete with an
exclamation mark. :-)

Stebie just CANNOT accept that anyone is contrary
to his glorious being/mind/ego. Can't be! Ergo,
it is a "LIE!" Eventually, EVERYTHING in this
newsgroup has to become Capt. Stebie's own
"battleground" where he can hold forth like some

self-styled feudal warlord. :-)

>> Steve, K4YZ
>
>Is that more of your "facts," Steve? An electronic engineer must have
>published papers. Hi! Be sure to tell that to Congress before they
>let hundreds of thousands more of them immigrate to the USA.

Stebie KNOWS ALL ABOUT ENGINEERING, Brian. After all, he
did work as a purchasing agent for less than half a year.
"real close" to those who were actually doing engineering.
:-)

Poor Stebie hasn't bothered to check the references I posted
in here, hasn't even checked with the hams I've named in here,
hasn't done a literature search other than ham publications.
I could digitize some of those papers and send them out in
private mail attachments...but Stebie would REJECT that just
as he did with my commercial first 'phone license scan. :-)
That's a waste of time. Tsk...I put up some memorabilia on
communications and radio relay on another's website, put
the web address in here, and NO ONE bothered to look.
Dave said it was a waste of time and couldn't be bothered.

Just so's w3rv doesn't chime in with that false argument
again, I am NOT a state-registered Professional Engineer.
I AM an electronics design engineer who works for money
and that makes me a professional person. I am a Life Member
of the IEEE, a professional association. I don't HAVE to
get up and go to work every working day...that's called
"retirement." :-) [sometimes that really pisses off
those who still have a mortgage and loans to pay off, etc.,
but we are NOT all in the same working situation]

Stebie is really working overtime on manufacturing LIES
about me and you and Todd and anyone else who crosses
him in here. Not surprising to me.

>Welp, we always did know that you don't know what you're talking
about.
>And them's the facts.

That's stating the obvious. :-)

how about this :)

理論及びプロジェクト

タッドDaugherty の.
による理論そしてプロジェクトは著作権をとる; 2005
年のタッドはDaugherty 複製権所有

1. 導入

私は説明するあるものがについての私の理論および概念のいくつかの後ろに私の古い考えのいくつかから書き、すばらしい細部でことにした。私の古い考えおよび理論のいくつかの改造の理由は集団が一部には原因であるほとんど情報処理機能をもったがある社会、これらの人々呼出されるAmateur
無線オペレータとである。アマチュア無線オペレータは多く、そして実質の技術しかマイクロフォンを通って話していない認可されたCB
の無線オペレータ何もでない。それはいままで常に私がだれでもへ自分自身を証明することここにいないこと私の哲学だった。、それは半分ウィットの気にされる狭い"認可された"
CB
の無線オペレータに私の考えを共有する私の意思である。

2. エルフバンド、背部穴、電気、電光および重力

alt.sci.physics.new
理論のポストでエルフバンドについての1999
年に支持すれば非常に低周波はバンドが付く。このバンドは1
ヘルツの間でランする。100
ヘルツに。電磁石スペクトルのその部分では引力フィールドまで、電気まで、頭脳波から及ぶ見つけられた色々な放出はある場合もある。人間の脳は40
のサイクルに1.cycle の間で作動する;
ベータ波はであるこの領域に40 から15
のサイクル、それの間であるランするところで強い、精神作業がある警報。14
のサイクルから9
つのサイクルの間でランされるアルファ波はこれ作業を非覚醒させるところにである、または緩められた作業は起こる。8
つから5
つの繰返し範囲では空想にふけり始めるところにのTheta
波はある。4 つから1.5
のサイクルはこれが深いレムの睡眠にいるところのデルタ波である。最終的に、1.5

から0 は脳死である;
これは頭脳の作業が全然ないところである。

電気はまたエルフバンドでランする;
米国の周波数範囲は60
ヘルツである。これはあらゆる浴室で手でヨーロッパの範囲は50
ヘルツであるが、乾燥する見つけることができる。汎用大気電光(ガロン)
は500 キロヘルツの間で作動し、それが1.0 から5.0
メガヘルツ間の大きいクラッシュのより高い短波バンドで"静的なクラッシュ"
聞くことができるであるという広いシグナルである。

ブラック・ホールおよび重力はまたエルフバンドで見つけることができる。私はそれがスペクトルのこの範囲でブラック・ホールの引力フィールドある場合もある検出するであるので両方を同じカテゴリ置いた。ブラック・ホールは14
のサイクルの主要な焦点が付いている10 から20
のサイクルの間で、ランする。それらのエルフの頻度しかしブラック・ホールを受け取る科学者の使用の圧電気装置はまたTHz
バンド引力フィールドを高く出すことができる。

3. 時間旅行

私は時間旅行についてのalt.sci.physics.new
理論で少数の記事を書いた。時間旅行(時間によってすなわち人々の転送)
は理論無線計算機ネットワークでそしてシグナルが送信する30
年にメッセージを保存することの概念に不可能私が書いた基づいていたである。シグナルを聞いている人は(技術がtachyons
の使用によって使用できたら送返せばメッセージをできた。Tachyons
はtachyon
の粒子に大容量がこうしてないという事実のためにより速く移動を離れて光速開始する粒子、そうなったものであり、時間に行くためにそれらを引き起す。多くの人々はだれでも聞いた未来からの伝達をか。なぜ持っていないかこれがそれから働くかどうか尋ねるか。通信手段が15
から20 年今後まだであるのでtachyons が60
年代以来tachyons のずっと使用であるがおそらく井戸2
つの簡単な理由、最初のあることのために。私達が過去に話している未来が第2
理由はspace-time
のファブリックである敏感なシステムであり、実際は私達がそれを知っている、または平行宇宙に、おそらく話している"平行宇宙"
をこうして作成できるように未来からのどの干渉でもスペース時間を破壊できるか。多くのnon-science/ham
の無線オペレータは"平行宇宙"
の概念をおそらくしかし平行宇宙があると、物理学者できる実験によって証明信じない。第2
理論は人間の脳が平行自己からbrainwave
のシグナルを受け取ることができること"時間旅行"
方法の多く実際にでなくであった。これは""
機械によってされるこれがコンピュータで当然人工にされる量に変更できる"量"
。アマチュアの缶の把握は考えというコミュニケーション15
、20 または30
年を将来かもしれない別のロットの地獄である均等にし、tachyons
コミュニケーションは将来使用されるかもしれない(長距離の宇宙通信のために)
。しかしちょっと、アマチュア無線オペレータが知っている唯一の事はアナログ・システムのマイクロフォンの下で調整することである。

I could really give a shit about some ass who supposedly wont feed his kids
, I read this group to get info on Amateur antennas,NOT the local gossip
spewed by another ASS who is pissed off at someone and has to post this shit
across the internet . Get a life moron ! you are no better than he is ,

You are quite correct and yes, it will. Many of the new "Sport Pilot" category aircraft will be every-bit as dependeble and useful and "standard" category for the designed purpose.

Good luck.

> him in here. Not surprising to me.

There's nothing "manufactured" about you, Lennie....Everything
that's been said here has been a direct result of information YOU
provided.

Sorry if that's a problem, but you did provide it.

You do lie, both about Amateur Radio in general and many of us who
are practitioners of that art. You've told us of things you'd do and
of things you've done, yet NO PROOF.

You taught Brian well...Just keep pouring the lies in to try and
further dilute the already muddled pool...Except that some of us can
stay ahead of your silliness and THAT is what YOU hate.

Leonard H. Anderson is a known chronic liar.

I'm not the idiot here, Brian. You are.

You were the one who started this off by insisting that ARES did
not have adequate human resources to fulfil their "duties".

All I have asked YOU is to show some evidence of YOUR examples of
having ever been even remotely plausable or having happened in fact.

Especially today, after literally hundreds of thousands of dollars
have been poured into ARES from Homeland Defense resources to provide
an even more comptetent operator.

> > > > I've asked you SEVERAL TIMES now to show me JUST ONE

Nice fall-back to Lennie's rhetoric, Brian. Failing to stay
aheqad on your own you had to "run hom to Mama".

I made no "conclusions". I HAVE been asking YOU to substantiate
claims and assertions YOU have made that they may be better understood.
All you do is dodge, deceive and try to blow it off by calling me
"nuts" for having dared to challenge you on YOUR claims.

Now you're angry because I won't let go and am backing you into a
corner to answer your own claims. Shudd've either ante'd up some
answers or just said something to the tune of "That was just my
opinion...I really don't have any facts to substantiate it..."

That I could live with as an honest answer. Instead, you've
treated us to months and months of deception and avoidance.

> > You continue to refuse to validate your assertions unless you
> are
> > NOW stating that all they were WAS opinion, and nothing BUT
opinion.
>
> And?

"And" nothing, Brian...Is that all your "unlicensed devices",
"ARES", and other statements were? Unsubstantiated opinion? A simple
yes or no will clear the whole thing up.

> > However it's taken you MONTHS to get out from under that rock,

> so you don't have to apologize for being such an ass.

Hardly, Brian.

You make assertions of fact. I ask you for facts to back the assertions up. Then you claim I am "nuts" for having asked you what the truth is.

If you'd take no other lesson from all of this than to learn the difference between an "assertion", "Statement as fact" and how to express an idea as an opinion, you'd have a far less tumultuous newsgroup experience.

> sayonara, bb

Oh...?!?! You speak Japanese now? Gee...Your mentor seems to always want to try and "ding" me for calling him a "putz" due to his expectation that I don't speak Hebrew. Please...Tell us all about your experiences in Japan and your fluency in Kanjii.

You keep avoiding the truth, Brian.

You've been asked to cite the lies. All you do is make more
cutesy rhetoric about how much I allegedly lie.

In other words, you can't do it. It enver happened.

> > > You lie. That's enough for me.
> >

> You can't without abusing the volunteers.

OK, Brian, what's YOUR definition of "abusing volunteers"...?!?!

I've now provided FOUR scenarios where avaialable resoures could
be employed working shifts of 4, 8, 10 or 12 hours. NEVER with less
hours off between shifts than the number of hours they "worked".

> > YOU keep saying only two. That's even better.
>
> Nope. 96 hours. Do you want me to do the math so you'll know how
many
> days that is?

Doesn't matter, Brian. Two days. Four. Six.

> > > And without working any one or several individual(s) a double

There's no "gaping holes", Brian. Thee ARE periods of overlap and
still using two teams of three.

> Phil said they were required to have three qualified operators per
> shift, and you couldn't follow the rules even this once. You just
had
> to start changing the rules and winging it so that my opinion would
be
> "WRONG!" and you could call me a "LIAR!" again. Poor Steve.

There are three operators there, Brian.

Not all three have to be on the mic, Brian.

The criteria was met, Brian.

> Some supervisor and schedule writer you are. You're fired.
>
> Do you pull these stunts in the ER? Do you pull them in the cockpit?
> Did you pull them in the USMC?

What "stunts", Brian? You mean making sure that the needs of the
mission were met with limited resources in such a way that all
obligations were met?

Sorry you're standing there with egg on your face, Brian...The
numbers work. The format works. YOUR assertion that you could get six
volunteers to cover 48 (or 96) hours DID'T.

Try again, Brian.

Steve, K4YZ

4124. Re: N8WWM won't feed his kids...goes to jail

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-12 13:40:10 UTC

Cross-posted to: rec.radio.cb,rec.radio.amateur.policy,alt.ham-radio.vhf-uhf,rec.radio.amateur.antenna,alt.dogie.is.an.idiot

N8WWM and another individual have been harassing CB'ers
for 5 plus years now in Rec.Radio.CB. Sending threatening Emails, signing
you up for Spam, sending virus, false
accusation, vulgar language, making vulgar web pages all
this while changing screen nics to bypass filters so that you
don't have the chance to filter them out.
Rec.Radio.CB used to talk about radio both legal & illegal,
but these two people came on to the group both supporting
and condoning illegal activities, but found it was mush more
fun to harrass and flood the group with useless posts, sometimes 100 to 200
posts a day!
Being Steveo is close to these people, he's called them on
their offers of, "Go ahead, we invite you to show up". Well
Steveo did just that and the best they could do was peer out
the windows and door, to afraid to stop out into the street.

Landshark

Now watch the responses they throw out ;)

Just reading the "post" can tell you what I wrote and what someone
else wrote, Todd. Please don't try and tell me that you don't know
what I wrote as opposed to a third party wrote.

> Secondly, unlike you I refuse to remove anything from my blog, your
> little buddies on QRZ might do shit like that by I don't.

Then by refusing to remove mistruthful things from your blog, you
are supporting the lying which in turn makes you culpable. You take
resposibility for the comments of others when you refuse to stop them
from making mistruthful comments. Even newspapers clearly define the
line between the comments of third parties and their own editorial
comments.

> I could
> careless what you think, I believe in free speech and since it is
"my"

> newsgroup.

You could "care less", Todd...We KNOW that you are "careless".

I've never used ANY of the vile and profane language you use in
this forum (or ANY forum, for that matter...), Todd.

You profess this greater image of yourself as a patron of the arts
and as at least a hobby-scientist, which is in and of itself cool.

But it's the profanities, obvious lack of grammatical skills and
refusal to take some constructive direction when it's given to you and
rebutted with the aforementioned profanities and misconduct that YOU
put YOURSELF in the position of being the outcast.

Underneath it all, Todd, your LPFM station, flying activities and
at least the fact that you're THINKING about different communication
technologies is admirable.

But your mouth and your attitude need fixing.

And by the way, Todd...As far as your "freedom of speech" goes, I was helping to keep it for you when you were only six years old. My only regret is seeing it so wantonlly misused and abused with sandlot language and obscenities.

Steve, K4YZ

Having to "show" everything is one of Stebie's ploys.

What he is really saying is that you are >>WRONG<<
if and only if you oppose HIM. :-)

Stebie is a BIG player in ARES and RACES, must have
been in many more than seven of those "actions." Not
only that, as a TN CAP "ace", he knows ALL about
DSP because he operated an Icom HT while in that
"service!"

<bring up audio from grammaphone in the corner
playing the Murine's Him...>

<in background on rear screen, scene of service members
engaged in close order Dill, Dill instructors chewing out
those who were unworthy of the corpse>

>> > > I've asked you SEVERAL TIMES now to show me JUST ONE
example

Tsk. Stebie has been told a million times not
to exaggerate! :-)

>> > Practically all first responders use cell phones. Cell phones are
>> > often how a person is initially notified that they are in an
emergency
>> > period. The military relies on them quite heavily.

>> Cellphones are NOT unlicensed devices. YOU do not have to have
a
>> licnese for it, but the entire cellphone net operates under various
FCC
>> licenses. See "Common Carrier".

Tsk. I thought Stebie would go into some harangue about
LICENSES!!! :-)

One can't OPERATE a DEVICE without a LICENSE! etc.

Stebie is all mixed up about "devices" and "nets" and
"licenses." Tsk. Out of the amateur community he
can't talk the talk, has to use poor analogues from
his "ham experience." :-)

Roughly speaking, there's about 100 MILLION cell
phone subscriptions in the U.S. of A. today. That's
like one in three citizens having one. Stebie might
think the VEC ought to "examine" each and every one
of those 100 MILLION cell service subscriptions? :-)

>> Also, when you first made your assertion, I asked you if you
meant
>> Part 15, Part 95, etc, and you said "Yes, of course". So...Still
>> waiting.
>
>Wait away.

Tsk. Barracks Lawyer Stebie doesn't know moot court
is in recess. :-)

Stebie has years on the bench. He was once admitted
to a bar. Thinks that makes him a Barracks Lawyer.
Tsk. He isn't even a master debater. :-)

>> "I believe that ARES will not be able to respond to future
>> emergencies due to the greying demographic" is an opinion.
>>
>> "ARES is dependent upon graying old men who can't respond to
>> emergencies" is an assertion.
>
>Are those your opinions?

Tsk. The master debater is yanking off again. :-)

Stebieworld is rife with tales of glory and heroism
in the face of danger... :-)

>> You made "statements of fact" that were nothing BUT opinion.
>
>You're the one jumping to conclusions, Steve. You expect everything
>that anyone says to be fact verified by Saint Hiram.

In Stebieworld he meets with H.P.M. every day to
Get Da Word from Da Man!

If you no agree with Stebie, you are >>WRONG<<, you
are a >>PUTZ<<, you will live in infamy, and not be
allowed EVER to associate with the Elitist Extras!

>Steve, you're so full yourself. You make yourself into fool every
time
>you start jumping up and down demanding proof and facts anytime
>something you don't like comes up. Too bad no one is taking you
>seriously, especially me. You make up stuff and keep making up stuff
>so you don't have to apologize for being such an ass.
>
>sayonara, bb

Stebie is a Master Debater...by his own definitions,
not that of rational human beings. Stebie MUST have
CONTROL, MUST be in COMMAND, CANNOT tolerate ANY
back-talk, and absolutely poselutely forevermore
HAVE THE LAST WORD in everything. It's the MURINE
WAY!!!

<grammophone in the corner up very loud on the
bars of "from the halls of monty pye-athon to the
shores of Tivoli...">

Absolutely fascinating stuff. Stebie is so hot and
heavy into "his" arguments that it's like an on-line
field trip into the psych wards of an institution.
Problem is that he ain't an MD shrink but one of the
committed ones...weird-ass role-reversal thing!

Ham radio it ain't. Not even close to "policy."
It's like if Kraft-Ebbing had a collection of hobby
deviants bound into a book, not about sex but of
morsemanship gone awry.

It's a wonder that ANYONE gets an "interest" in
ham radio from Stebie's outpourings...da ultimate
murine DILL instructor (pursed lips of disgust at
all the "maggots" around him needing to be swatted
by his swagger stick...except his "stick" is a shortie).

"For the corpse, God, and country." In that order.
Temper fry.

Brian, let's wait and see what the Master Debater
yanks off on later...:-)

Isn't the effectiveness of DSP critically dependent upon the A/D converter;
its dynamic range, it's number of bits and it's sampling speed?

Re: Peter's comment below; I don't know enough about DSPs to answer. I got a few ideas and notions from all that responded. Me? I was most interested to learn whether any DSPs could do noise reduction of any kind. Heterodyne from lid tuner-uppers would be nice, too, and so would passband width and position.

I did google "DSP & ham radio" and quite a bit came up and it will take me some time to check out enough to figure out if it might be worth chucking out $200+ on a decent outboard unit (I can't justify laying out a big chunk of money on a really modern xcvr with built in DSP just for those relatively rare moments when I have pulse noise, hash noise, or a heterodyne, or someone with spillover from an adjacent frequency), so I need something that works pretty good. One guy said there is no "magic" meaning to me that maybe I should not expect rabbits to come out of hats easily and quickly. My friend with whom I have weekly ragchew ssb QSOs told me that just putting on headphones helped him read me when I was weak and his noise level was high. Also, it helped him a lot when I bought a linear and went from barefoot to four 811As. But, if a nearby QSO starts and thier audio is broad, the spillover can be annoying if they are stronger. Thus, if I could "DSP" a narrower passband and shift the frequency (or at least shift the "knee"), that might be useful.

Regarding efficacy, I remember back some 3-4 decades ago they were coming out with audio compandors that "compressed" 2.5+ khz of audio bandwidth into a signal about 1.2 khz wide, thus saving bandwidth but the gadgets never caught on bigtime and some gossip said that the extra "audio punch" and thus power boost (3 db-ish) really didn't end up doing that much. So, that is one example of a fancy-schmantzy gadget that didn't last long. This new PSK-31 audio jazz is also out there (the box is about $500 ?) and you need one at both ends of the voice QSO and I have not yet heard many of them (the review said that if the signal drops too low, the voice info just stops coming through the speaker, so it has its caveats, too).

Again, thanks to all those who made comments.

Art, W4PON

Nyah, nyah, Stebie didn't do it! Brian did it!

Sounds like a lil' kid squalling to mommie...:-)

Stebie NEVER does anything wrong...it's ALWAYS
the "other person."

> All I have asked YOU is to show some evidence of YOUR examples of

>having ever been even remotely plausable or having happened in fact.

Wow! "Other people" have to testify in moot court,
"show evidence," take oaths, etc.

Stebie can pervert the "evidence" anywhichway (and
does) to show the "other person" is da bad guy.
Stebie be Da Man! :-)

> Especially today, after literally hundreds of thousands of
dollars
>have been poured into ARES from Homeland Defense resources to provide
>an even more comptetent operator.

Tsk. Money pit. "Pork barrel" kind of thing?

Besides, that sole "operator" must get awful tired
being on-duty 24/7, big money or no.

Gotta love it...a "competent operator" who must be
a morseman sitting around and waiting for the Big
Emergency so that he can send all that morse (at
high speed, of course) on the ham bands and Save The
Nation!

>> > > > I've asked you SEVERAL TIMES now to show me JUST ONE
example of
>> > > > some situation where ARES was asked to respond to a situation
but
>> > > > couldn't due to any of the criteria YOU cited.

Tsk, tsk, tsk...lil Stebie hasn't yet given US any
data on the When and Where of his famous "seven
hostile action" participations. Not "ONE" even...

Has lil Stebie acknowledged that the DoD directs
MARS? I don't think so. Lil Stebie still thinks
that "MARS >>IS<< ham radio!" :-)

But...lil Stebie cries and cries, demanding everyone
(that disagrees with him) to show how bad they are,
all the mistakes they made, and will never ever admit
he makes ANY mistakes in here. :-)

> Just about exactly what I'd expect from a coward, Brian. Thanks
>for not disappointing me.

Tsk, tsk, tsk. NO camaraderie in the ham ranks, it seems.

Lil Stebie gets Mad As Hell (and can't take it at all) then
resorts to all kinds of name-calling. "Coward" and the like.

Cowardice following bragging is exemplified by his claim
to participation in the "seven hostile actions." Tsk.

>> Are those your opinions?
>
> Nice try. No, they are not.

Lil Stebie got NO opinions? Tsk, tsk.

Lil Stebie just spouts away and WHATEVER he spouts IS
the truth (according to him). SOP for Stebie.

>> > You made "statements of fact" that were nothing BUT opinion.
>
>> You're the one jumping to conclusions, Steve. You expect everything

>> that anyone says to be fact verified by Saint Hiram.
>
> Nice fall-back to Lennie's rhetoric, Brian. Failing to stay
>aheqad on your own you had to "run hom to Mama".

Tsk, tsk, tsk. Invoking another again, plus personal
insults on that other. [usual SOP for Stebie]

Lil Stebie squalling to mama, "I didn't do it...Brian did it!"

[not to mention the angry typing of "aheqad" and "hom"...:-)]

> I made no "conclusions". I HAVE been asking YOU to substantiate
>claims and assertions YOU have made that they may be better
understood.

Tsk. Stebie done agressively get in EVERYONE's face
if that everyone so much as expressed mild disapproval
of Stebie's glorious, noble, "truth" outpourings in here.

Well, this >>IS<< Stebie's playground. Newsgroup was
created expressly for lil Stebie to shout, holler,
bitch, cuss, moan, insult, denigrate others to his
heart's content. Everything in here involves Stebie
allatime and he MUST comment on everything and how
nasty all those others are... :-)

>All you do is dodge, deceive and try to blow it off by calling me
>"nuts" for having dared to challenge you on YOUR claims.

Tsk. You >>ARE<< nuts, big hero seven-hostile-action
man!

Go count all the medals in your cigar box. :-)

> Now you're angry because I won't let go and am backing you into a

>corner to answer your own claims. Shudd've either ante'd up some
>answers or just said something to the tune of "That was just my
>opinion...I really don't have any facts to substantiate it..."

show we all know the "difference" between opinion and
assertion!

> That I could live with as an honest answer.

You CANNOT live with the truth, "Col Jessup." :-)

> Instead, you've
>treated us to months and months of deception and avoidance.

Stebie, this whole newsgroup is a BIG CONSPIRACY
AGAINST >>YOU<<!! :-)

Everyone who doesn't live in Stebieland is a "liar"
and tries to "deceive" and "avoid" and all that other
nastyness you spout.

> "And" nothing, Brian...Is that all your "unlicensed devices",
>"ARES", and other statements were? Unsubstantiated opinion? A simple

>yes or no will clear the whole thing up.

Okay, here's an answer for you: Yes. No.

Happy? :-)

> You make assertions of fact. I ask you for facts to back the
>assertions up. Then you claim I am "nuts" for having asked you what
>the truth is.

Hey, you aren't "nuts." You ARE psycho of some kind.
No problem on observing your constant sociopathic
antagonism against ALL who disagree with you.

But, you are being hypocritical again. Just before you asked
for a "simple yes or no." Now you are switching sides again
and demanding "facts" to "back up" everything. Tsk, tsk.

Stebie a "switch hitter?" Tsk.

> If you'd take no other lesson from all of this than to learn the
>difference between an "assertion", "Statement as fact" and how to
>express an idea as an opinion, you'd have a far less tumultuous
>newsgroup experience.

Ooooooo! Lectures from the bottom of the black pot!

Gotta love it. Stebie presses and presses on folks in
message after message, calling them names of many kinds
and trying to pick fights and flame-wars. NOW he is all
kinds of noble, saintly, heroic "lecturer" on "how to
comport oneself in a newsgroup! :-)

>> sayonara, bb
>
> Oh...?!?! You speak Japanese now? Gee...Your mentor seems to
>always want to try and "ding" me for calling him a "putz" due to his

YIDDISH you schmuck. Geez, I know MORE Hebrew than
Stebie knows Nihon-go. Jewishness passed over Stebie.

> Please...Tell us all about your
>experiences in Japan and your fluency in Kanjii.

Tsk. Honorable Stebie only samurai who was able
to shoot himself in the foot with his sword...

Wakarimasen? [say "hai..." :-)]

Gotta love all the camaraderie among hams. Too bad
none of it gets passed on by Stebie, the ace of the TN
CAP (with his handy DSP-equipped Icom HT).

Okay, Stebie, wanna hear all about how to do REAL
HF comms from Japan? :-) I did three years of
it. Stebie did ZERO, zip, nada, nyet, nothing like
that. Oh, well...say "hai" to all the folks at home.

:

Hey, I know what let's do. Let's put Dan and Brian and Hans and Len and Steve and Larry into their large-waist poopy suits and issue 'em a handheld and send 'em out south of town in the Sonoran and let 'em play sojer instead of pissing and moaning at each other here on rrap. Maybe we could even sign up Todd as an irregular reservist, kind of a camp comfort-boy. Be sure to pack extra batteries, boys, and don't expect the Border Patrol to pity you when they find your desiccated corpse out here in the desert. They got better things to do than to baby-sit a bunch of make-believe vigilantes.

Indeed. Spending money doesn't necessarily get results. There was a report yesterday about Bill Clinton's "100,000 more Police" on the streets. Hundreds of millions spent, a lot was squandered.

> > > > > I've asked you SEVERAL TIMES now to show me JUST ONE

You're nuts for lots of reasons. One of the reasons is that you
constantly jump up and down and call people liars for having an
opinion.

> Now you're angry because I won't let go and am backing you into
a
> corner to answer your own claims. Shudd've either ante'd up some

I owe you nothing. Nothing at all. If you don't like my opinions then
you can just not like them. Oh my, hope that wasn't too much tuff love
for you.

> That I could live with as an honest answer. Instead, you've
> treated us to months and months of deception and avoidance.

You have. Now substantiate the two statements in quotes above.

Sounds like you have a real problem on your hands. No one must comply with your demands, especially me. The sooner you come to that conclusion the sooner you can get a handle on your other problems.

I have no skill in the Japanese language. Thanks for straightening me out that "sayonara" is the Japanese equivalent of the Yiddish word for "penis." I'm shocked to think that all those JA's were were repeating the word "penis" over and over again on the air. And I always thought they were the most polite amateurs.

gee,
I guess you don't live down this way and you sure as hell DON'T understand
the problem.

I do find it rather odd that the Government would tell one of the folks (who
was a government employee) that he was being transfer. said person was also
the radio coordinator for the minuteman project. Strange that. guess the
government doesn't want to get involved.

Someone high up the food chain is playing games with our lives and our
national security. I think the only time anyone will take this seriously is
if a terrorist cell actually does cross the border and start pulling crap
here (such as car bombs, bio terror and other such acts of terrorism).

as for the ham down there, I applaud their efforts (I wish I could go, but
no ride and very little left in funds to eat on). now if only the
government officials would wake up and smell the coffee on this one!

How do you know for sure, Len?

Besides - what does it matter?

I've seen how you talk to those who *have*
served in the US military, and for various
departments of the US government. If the
person disagrees with you on almost any
issue, you treat them *and their service*
with little or no respect at all. You
make fun of them and their service for
no apparent reason other than a failed
attempt at what you consider "humor".

Except it isn't funny.

>Let's all stand up and salute this brave "member of the service."

There you go again! So typical.

>> him in here. Not surprising to me.
>
> There's nothing "manufactured" about you, Lennie....Everything
>that's been said here has been a direct result of information YOU
>provided.

Tsk, tsk. You're going to say it is "all LIES" again,
aren't you? :-)

Is that all you "ahve?" :-)

> Sorry if that's a problem, but you did provide it.

Provide WHAT? :-)

Poor baby...you couldn't STAND a short-form resume',
you thought it all some kind of "brag" exercise.
Tsk, it wasn't. It made you resentful and that
prompted your anger, hatred, and in-group attacks.

I've provided names and callsigns of those who know me, but you have NOT contacted them. Instead, you MANUFACTURE some person at NADC that claims to know me...a decade after I'd been there and a PhD to boot but NOBODY (but you) knows the name. :-)

I sent you a scan of my first 'phone license (the very first one) and you would NOT look at it! :-) Instead you manufactured a clear-libel "personal page" on AOL damning me in no uncertain terms. Fortunately for all concerned (except yourself), AOL took it down as soon as they were informed. :-)

> You do lie, both about Amateur Radio in general and many of us who
>are practitioners of that art. You've told us of things you'd do and >of things you've done, yet NO PROOF.

Tsk, tsk, tsk. Here's the way things go down in the rational world:

"Proof" is provided in the form of unalterable third-party sources...things like employers, friends (preferrably those that aren't within easy driving distance to avoid collusion), publications, local and national governmental records archives, some place that is relatively easy to get at such as Internet sites. [I've given you ALL those "links" in here] The next step is for YOU to check out those third-party references...or anyone else to do it, as they want. That "proof" remains unalterable except when a personal reference passes on (none of mine have yet).

NO ONE MUST give YOU any "proof" of what they WILL do. NO ONE can predict the future. :-)

In any event, you are NOT some kind of "judge" to hand out any "ruling" on anyone, certainly not your e-opponents. :-) You keep crowing that you ARE one, but that is YOUR OWN LIE that you tell the world. A LIE anywhichway it goes.

Now you MUST tell all about this former NADC employee who claims to know me a decade after I was there. You have NOT done so. You LIE.

You haven't told the Where or When of those famous "seven hostile actions" you claim but won't reveal. Tsk. You LIE and then give yourself a pat on the back for imagining that to be "truth!" :-)

You have NOT acknowledged that the DoD directs and supervises MARS, even when informed of the website

and full link details of the directive by DoD (as I
did in here).

In short, sweetums, like the infamous Colonel
Jessup of the film "A Few Good Men," you just can't
handle the truth! You LIE with impunity and then
accuse others of "lying" when they give details
and references. Tsk, tsk, tsk.

> You taught Brian well...Just keep pouring the lies in to try and
>further dilute the already muddled pool...Except that some of us can
>stay ahead of your silliness and THAT is what YOU hate.

You poor psychoed-to-the-max thing. Brian is a
rational human being who can think for himself.
I didn't "teach" him anything in regards to being
rational. We've both observed you in detail and
came to the same agreement...you're some kind of
sick psycho who CAN'T STAND being opposed in
anything.

> Leonard H. Anderson is a known chronic liar.

Tsk, tsk, tsk. Not at all. You are SICK,
sweetums, and all you can do is make all those
personal attacks on everyone who disagrees with
you. You NEED some personal mental counseling
but you've obviously not gotten any. That's a
danger to yourself and your immediate family, not
to mention cutting down on all the hate and anger
your actions ignite in this newsgroup.

Try to keep focussed on the FACT that this
newsgroup is SUPPOSED to be about amateur radio
policy. It is NOT some kind of kiddie sandbox
that was created for Stebie to show his courage
in personal attacks on everyone who disagrees
with him.

>
>Besides - what does it matter?

You want to get all emotional and teary on
World War II? Tsk. Go talk to a REAL WW2
veteran. Better yet, visit a VA hospital and
keep some of them company.

Remember that WW2 ENDED BEFORE you were born.

And, you've NEVER served in any military.

Yet you make this BIG THING about morse code
in a window display...could it be that you
just don't give a damn about WW2 and only want
to make a big emotional showing for morse?

>I've seen how you talk to those who *have*
>served in the US military, and for various
>departments of the US government.

I haven't dissed Bill Sohl about his USN service.
I haven't dissed Brian Burke about his USAF service.

I HAVE dissed those that want to LIE about
their big heroic military "actions" such as
Stebie the wonder murine about his famous
"seven hostile actions" and his failure to
acknowledge that the DoD really does direct
MARS.

Am I supposed to "respect" the infamous Kolonel
Klunk about his very NON-SPECIFIC "service" in
Vietnam? Just because he brags without revealing
any details? Just because he was in the State
Department?

Of course I "should." All those infamous types
are pro-coders and YOU love morse code, so much
so that you think ham radio is all about morse-
manship...and MUST connect morse code to some kind

of imaginary "gallantry in the service." :-)

>If the person disagrees with you on almost any
>issue, you treat them *and their service*
>with little or no respect at all.

Tsk, tsk. Better contact the Department of the
Army of the United States and DEMAND my Good
Conduct medal be given up and sent back! :-)

>You make fun of them and their service for
>no apparent reason other than a failed
>attempt at what you consider "humor".

Tsk, tsk, tsk. Those "veterans" (at least one
with "seven hostile actions") have all been
about as disrespectful to me FIRST. They got
what is known as "return fire." Poor things.
Thought they could pull a snow job on everyone
else and make themselves real "big" in others'
eyes. They should have stayed down at the
Legion Hall bar.

>Except it isn't funny.

Not to you. But, you've NOT served in the military.

Your body too precious to get it harmed in REAL
service for your country?

Couldn't get a dinner date with the Captain
because the King of the Katapults was already
booked on that aircraft carrier?

>>Let's all stand up and salute this brave "member of the service."
>
>There you go again! So typical.

I served. YOU did NOT.

You want to see more of what I did in ARMY service? OK,
go to http://kauko.hallikainen.org/history/equipment and
drop down to "Stations." Once you've downloaded at least
one, we MIGHT have a chat...but then you have this
terrible habit of wanting to message on everything at
long length. Wastes my time.

Stebie be some kind of psycho, for sure...

WE still don't know the When and Where of his infamous
"seven hostile actions." :-)

WE haven't seen one thing where Stebie admits that DoD
does indeed DIRECT all of MARS. Tsk, tsk. Even when
the specific directive is given to point it out to him.

>> If you'd take no other lesson from all of this than to learn

Stebieland does NOT have problems. Poor Stebie doesn't
understand that REALITY is NOT Stebieland. In Stebieland
there are ONLY Stebietruths and whatever Stebie thinks >>IS<<
the truth...all not in agreement with that are "LIARS!"

>I have no skill in the Japanese language. Thanks for straightening me

>out that "sayonara" is the Japanese equivalent of the Yiddish word for

>"penis." I'm shocked to think that all those JA's were were repeating

>the word "penis" over and over again on the air. And I always thought

>they were the most polite amateurs.

Actually, In YIDDISH (not "Hebrew" as Stebie thought), the
word "putz" is used as a pejorative meaning "head/mind is in
his penis." In other words, a HIGHLY uncomplimentary nasty
word that Schmuck Stebie has used sooooooooo many times. [ALL
archived on Google...surprise, surprise! :-)]

Stebie does a tour on Okinawa and thinks he was "in Japan."
Problem is that Okinawans do NOT refer to themselves as
"Japanese" in the strictest sense of the word. Never let
little details worry lil Stebie. :-)

Hai, wakarimas... ["yes, we understand" in conversational
Japanese]

Dear Mr. Busch WA3MOJ, I ask that you please stop changing your
screen nics to by pass newsfilters, per you're ISP's TOS you are in clear
violation doing that just to harrass me.
You have changed you screen nics 3 times this week alone,
with none of them to begin with as valid, so again, please stop
this.

"You cannot answer a question with another question"

You own words, Len.

What does it matter whether I served in any military or not?

> Tsk. Go talk to a REAL WW2
> veteran.

I've done that - many times. From several branches of the
US military.

> Better yet, visit a VA hospital and
> keep some of them company.

That's a good idea!
>
> Remember that WW2 ENDED BEFORE you were born.

Why is that of any significance? If anything, it is
more important that those of us who weren't alive then
keep the history alive.

I live just up the hill from Valley Forge, where Washington's
army survived a terrible winter. Also down the pike from where
the Paoli Massacre took place.

That war ended long before *you* were born, Len.

> And, you've NEVER served in any military.

How do you know for sure?

And what does it matter anyway?

> Yet you make this BIG THING about morse code
> in a window display...

Is it wrong to mention an interesting architectural feature?

Does it bother you, Len?

Here's a hint: The Canadian military forces used Morse Code in
WW2.

> could it be that you
> just don't give a damn about WW2 and only want
> to make a big emotional showing for morse?

Nope - not at all. I find the history of WW2 to be
very interesting. I think it's important to understand
that war, both how it got started and the aftermath, to
understand current history. And technology.

For example, the very first high-speed, general purpose,
digital electronic computer, ENIAC, was developed and built
right here in Philadelphia - in the basement of the building where I
went to EE school. I've actually seen and handled
pieces of it, read the original papers in the library there.

It was built to compute artillery aiming tables for the US Army,
and was used for ten years at the Aberdeen Proving Grounds. There's
also an unconfirmed story that it was used for atom
bomb calculations.

Or let's talk about the lessons to be learned from the US Navy
Mark XIV submarine torpedo, and its problems.

Perhaps the proximity fuse is more to your liking. Incredible
device, made with tubes originally meant for hearing aids.

I could go on about the political and economic effects, but since this
is a radio newsgroup I thought I'd stick to electronic and
radio subjects.

If I did talk about any military service I had, you would
be certain to make fun of it. It's just what you do, Len.
So typical.

> >I've seen how you talk to those who *have*
> >served in the US military, and for various
> >departments of the US government.
>
> I haven't dissed Bill Sohl about his USN service.

Because he doesn't disagree with you about Morse Code testing in
amateur radio. In fact, he pretty much ignores you.

> I haven't dissed Brian Burke about his USAF service.

Because he doesn't disagree with you about Morse Code testing in
amateur radio. In fact, he pretty much idolizes you.

It's only those who disagree with you about Morse Code testing
that get your disrespect, abuse, name calling, and general
jackass behavior.
>
> I HAVE dissed those that want to LIE about
> their big heroic military "actions" such as
> Stebie the wonder murine

There you go - calling names. So typical.

> about his famous
> "seven hostile actions"

Do you know what they are? Where *you* involved in any of
them?

Is there any reason to doubt that Steve, K4YZ, was involved
if he says he was?

> and his failure to
> acknowledge that the DoD really does direct
> MARS.

I see. His mistake somehow justifies *your* behavior?

> Am I supposed to "respect" the infamous Kolonel
> Klunk

There you go again - calling names.

Godwin invoked. You lose.

Why not use the person's name and callsign?

> about his very NON-SPECIFIC "service" in
> Vietnam? Just because he brags without revealing
> any details?

What difference would details make? Your behavior when
details are given doesn't change. In fact, you simply
use the details as a source of more insults.

OTOH, Brian, N0IMD, refuses to give any details about
his claimed amateur radio operation from Somalia, but
that doesn't bother you a bit.

> Just because he was in the State
> Department?

Do you mean Dave, K8MN, who served in the US State Department
at a number of foreign posts as a communications officer?

His service to our country was much longer than your, Len, and
in many more foreign countries. I recall when he was transferred

to right around the same time the US Embassy in the country he was transferring to was bombed. We didn't hear from him for weeks. Luckily he was OK.

Yet you argued with him at length about communications facilities that he used - even though you've never worked for the State Department.

>
> Of course I "should."

Yes, you should.

Perhaps you have forgotten the US Coast Guard radio operator who used to post here? You made fun of his service in that capacity, in your now-famous "sphincter post".

Why?

> All those infamous types
> are pro-coders and YOU love morse code, so much
> so that you think ham radio is all about morse-
> manship...

Len - lest we forget - you're not a radio amateur. You've never been a radio amateur. Yet you see fit to tell all how amateur radio should be. You're not and never have been part of the FCC, either.

> and MUST connect morse code to some kind
> of imaginary "gallantry in the service." :-)

All I did was mention a museum and some windows. That really seems to bother you. Too bad - the fact is, the Canadian armed forces used Morse Code in WW2. Deal with it, Len.

> >If the person disagrees with you on almost any
> >issue, you treat them *and their service*
> >with little or no respect at all.
>
> Tsk, tsk. Better contact the Department of the
> Army of the United States and DEMAND my Good
> Conduct medal be given up and sent back! :-)

I don't demand anything like that, Len.

> >You make fun of them and their service for
> >no apparent reason other than a failed
> >attempt at what you consider "humor".
>
> Tsk, tsk, tsk. Those "veterans" (at least one
> with "seven hostile actions") have all been
> about as disrespectful to me FIRST.

No, they haven't. At least not to anyone rational.

You apparently see any disagreement with your
cherished beliefs about Morse Code testing in amateur
radio as "disrespect", and then proceed in your
completely predictable manner.

> They got
> what is known as "return fire."

For saying good things about Morse Code, apparently.

> Poor things.
> Thought they could pull a snow job on everyone
> else and make themselves real "big" in others'
> eyes. They should have stayed down at the
> Legion Hall bar.

You mean like somebody who tells us the same story,
over and over and over and over again,
about his service at a big radio facility 50+ years
ago? Then gets mad because people point out his
underestimation of distances, and mistakes about
Soviet aircraft deployment dates?

> >Except it isn't funny.
>
> Not to you. But, you've NOT served in the military.

How do you know for sure?

Do *you* think it's funny, Len? Why? Those whom you make
fun of don't seem to be amused.

Besides, the point is that you make fun of the military service of
those who disagree with you about Morse code testing in amateur radio.
Even though you're not an amateur radio operator, never have been, and
probably never will be.

> Your body too precious to get it harmed in REAL
> service for your country?

Why, no, Len. I don't think that at all. Never have.

Is military service the only REAL service, Len? I guess
all those police officers, firefighters, EMTs, and other
uniformed people who go in harm's way don't count, do they?

How about the utility workers who keep the lights on and the water
flowing? Or the highway, airline, transit, railroad and maritime
workers who keep transportation running?

Or health care workers, exposed to who-knows-what every day on the job?

Guess they don't count either - to you.
>

> Couldn't get a dinner date with the Captain

> I served. YOU did NOT.

How does that give you the right to insult others' service?
>
> You want to see more of what I did in ARMY service?

No. You've told us over and over and over again. That's
enough.

It would have difficult to grow up in the times we did and not encounter
larges numbers of World War II vets. My dad was a U.S. Navy veteran of
the Normandy Invasion. A great-uncle was at Bataan. He survived the
Death March and was held by the Japanese until the end of the war.

> > Better yet, visit a VA hospital and
> > keep some of them company.
>
> That's a good idea!

It is a great idea but it isn't necessary to visit just a VA hospital.
I can visit any number here who live quietly with spouses, who are
living alone as widowers or who are in nursing homes.

> > Remember that WW2 ENDED BEFORE you were born.

> It's only those who disagree with you about Morse Code testing
> that get your disrespect, abuse, name calling, and general
> jackass behavior.

To be fair, Len has exhibited jackass behavior toward K0HB and Hans does
not support retention of morse code testing.

> > I HAVE dissed those that want to LIE about
> > their big heroic military "actions" such as
> > Stebie the wonder murine
>
> There you go - calling names. So typical.

...and utterly predictable.

> > about his famous
> > "seven hostile actions"
>
> Do you know what they are? Where *you* involved in any of
> them?

He doesn't have any idea what they were. It kills him.

> Is there any reason to doubt that Steve, K4YZ, was involved
> if he says he was?
>
> > and his failure to
> > acknowledge that the DoD really does direct
> > MARS.
>
> I see. His mistake somehow justifies *your* behavior?

To my knowledge, Steve has never stated that DOD does not direct MARS.
His claim is that if there were no radio amateurs, there'd have been no
MARS program. In that, he is correct.

> > Am I supposed to "respect" the infamous Kolonel
> > Klunk
>
> There you go again - calling names.

Did you really expect otherwise?

> Godwin invoked. You lose.

> Why not use the person's name and callsign?

> > Vietnam? Just because he brags without revealing
> > any details?
>
> What difference would details make? Your behavior when
> details are given doesn't change. In fact, you simply
> use the details as a source of more insults.

That's pretty much why I've left details out. As with Steve's military service, Len doesn't know what I did or where I did it and it kills him.

> OTOH, Brian, N0IMD, refuses to give any details about
> his claimed amateur radio operation from Somalia, but
> that doesn't bother you a bit.

Isn't this about the point at which Leonard or Brian would begin some litany about a double standard?

> > Just because he was in the State
> > Department?
>
> Do you mean Dave, K8MN, who served in the US State Department
> at a number of foreign posts as a communications officer?
>
> His service to our country was much longer than your, Len, and
> in many more foreign countries.

...and Len has invariably demeaned that service. He has always known more about my job that I did. Foreign service tours were dismissed as tropical backwaters, places of insignificance and Cashew capitals.

> I recall when he was transferred
> to right around the same time the US Embassy in the country he was
> transferring to was bombed. We didn't hear from him for weeks.
> Luckily he was OK.

Luckily, he was on holiday between the assignments and was comfy right here in West Virginia when the news broke. I arrived in Tanzania three weeks after the embassy bombing. The embassy was in ruins. Operations were carried out from a residence for six months while a new temporary embassy was constructed. It was my busiest assignment.

> Yet you argued with him at length about communications facilities
> that he used - even though you've never worked for the State
> Department.

Don't leave out his attempts at insult by stating that my name never appeared in any lists of embassy staff. That blew up in his face when I produced a couple of urls in which I was listed. Len's response was to dismiss the lists as some sort of telephone directory.

> >
> > Of course I "should."
>
> Yes, you should.
>
> Perhaps you have forgotten the US Coast Guard radio operator who
> used to post here? You made fun of his service in that capacity,
> in your now-famous "sphincter post".
>
> Why?

Because Len is all about Len. That isn't the important part though.
The important part is where Len's sphincter post speaks of what it is
like to be in battle. Len was never in battle.

> > All those infamous types
> > are pro-coders and YOU love morse code, so much
> > so that you think ham radio is all about morse-
> > manship...
>
> Len - lest we forget - you're not a radio amateur. You've never been a
> radio amateur. Yet you see fit to tell all how amateur
> radio should be. You're not and never have been part of the FCC,
> either.

As far as I'm concerned, amateur radio is about operating any mode I
choose on any band I choose. Len isn't involved on any level.

> > >If the person disagrees with you on almost any
> > >issue, you treat them *and their service*
> > >with little or no respect at all.

> > Thought they could pull a snow job on everyone
> > else and make themselves real "big" in others'
> > eyes. They should have stayed down at the
> > Legion Hall bar.

Len knows more about what others did than those involved. Len knows more about the military. Len knows more about communications. Len knows more about radio operation. Len knows more about the U.S. Department of State.
Len knows more about your work. Len knows more about Brian Kelly's work.
Len knows more about Steve's work.

> You mean like somebody who tells us the same story,
> over and over and over and over again,
> about his service at a big radio facility 50+ years
> ago? Then gets mad because people point out his
> underestimation of distances, and mistakes about
> Soviet aircraft deployment dates?

Whatever Len did at ADA more than a half century ago impacts amateur radio not in the least. Len tells it because he wants to be sure that everyone knows of it.

> > >Except it isn't funny.
> >
> > Not to you. But, you've NOT served in the military.

>> >> Lest WE forget..."N2EY" NEVER served in ANY war in ANY military.

>> >How do you know for sure, Len?

>You don't know for sure, do you, Len?

Tsk. You aren't in the St. Louis database. :-)

>What does it matter whether I served in any military or not?

This newsgroup is amateur radio policy, not WW2. :-)

>> Remember that WW2 ENDED BEFORE you were born.
>
>Why is that of any significance? If anything, it is
>more important that those of us who weren't alive then
>keep the history alive.

...so, you want to keep U.S. amateur radio as a
living museum of morsemanship. Understand.
Understood before, still understand that. :-)

>I live just up the hill from Valley Forge, where Washington's
>army survived a terrible winter. Also down the pike from where
>the Paoli Massacre took place.

That's nice. Been there, seen that. So, WHAT
does that have to do with amateur RADIO?

>That war ended long before *you* were born, Len.

Absolutely...but, the American Revolutionary War
did NOT involve either morse code or radio.

Remember, this IS an amateur radio policy news-
group, not some teary-eyed emotional hangout for
those that NEVER served.

>> And, you've NEVER served in any military.
>
>How do you know for sure?

The St. Louis database does NOT have you in it.

>And what does it matter anyway?

Not to me, personally. But, remember, this isn't
the History Channel and you AIN'T a docent in it.

>> Yet you make this BIG THING about morse code
>> in a window display...
>
>Is it wrong to mention an interesting architectural feature?

Morse code is NOW an "interesting architectural feature?"

So, you are now an amateur "architect?" :-)

>Does it bother you, Len?

Only in that you are such a transparent hypocrite.

>Here's a hint: The Canadian military forces used Morse Code in
>WW2.

Wow! [...that's a BIG Ben Stein "wowwww...."]

>> could it be that you
>> just don't give a damn about WW2 and only want
>> to make a big emotional showing for morse?
>
>Nope - not at all. I find the history of WW2 to be
>very interesting. I think it's important to understand
>that war, both how it got started and the aftermath, to
>understand current history. And technology.

Tsk, tsk. Then you MUST understand that THIS venue
is NOT for "warfare" or the technology of warfare.

You should also realize that morse code has HAD its
day and is now obsolete for modern communications.
Obsolete for everyone but the retrograde self-
aggrandizement elitist PCTA extras who USE morse
skills to show how much "better" they are than all
other "radio operators." Tsk, tsk.

>For example, the very first high-speed, general purpose,
>digital electronic computer, ENIAC, was developed and built
>right here in Philadelphia - in the basement of the building where I
>went to EE school. I've actually seen and handled
>pieces of it, read the original papers in the library there.

Poor baby, still BEHIND the times, reaching for glory
on someone ELSE's work. Look again. Collossus over in
the UK's Bletchley Park beat ENIAC in the time frame.
Not only that, John Atanasoff's little group over at
Ohio State was before BOTH of them. :-)

You really DON'T know your own industry's history well
and you are griping about others. Tsk, tsk, tsk.

>It was built to compute artillery aiming tables for the US Army,
>and was used for ten years at the Aberdeen Proving Grounds. There's
>also an unconfirmed story that it was used for atom
>bomb calculations.

Sounds like you've been irradiated to sterility of the
mind. LOTS of calculation places were busy doing
ordinance table calculations way back then. Bell Labs
had a RELAY calculator...actually three of them in one
of the first computer "networks" in NYC. Before ENIAC
was started. Tsk, tsk. Get WITH the history program!

>Or let's talk about the lessons to be learned from the US Navy
>Mark XIV submarine torpedo, and its problems.

Oh! You are now an Expert Extra on USN ordinance?

Remember, this is an AMATEUR RADIO POLICY newsgroup.

>Perhaps the proximity fuse is more to your liking. Incredible
>device, made with tubes originally meant for hearing aids.

Tsk, tsk. You had a "prox" go off on YOU, sweetums.

Remember, this is an AMATEUR RADIO POLICY newsgroup.

>I could go on about the political and economic effects, but since this

>is a radio newsgroup I thought I'd stick to electronic and
>radio subjects.

Remember, this is an AMATEUR RADIO POLICY newsgroup.

>If I did talk about any military service I had, you would
>be certain to make fun of it. It's just what you do, Len.
>So typical.

But...you did NOT serve...so HOW can you "talk about"
something that NEVER happened?

Remember, this is an AMATEUR RADIO POLICY newsgroup.

>> I haven't dissed Bill Sohl about his USN service.
>
>Because he doesn't disagree with you about Morse Code testing in
>amateur radio. In fact, he pretty much ignores you.

Bill hasn't been here much. That means he "ignored"
YOU, too! :-)

>> I haven't dissed Brian Burke about his USAF service.
>
>Because he doesn't disagree with you about Morse Code testing in
>amateur radio. In fact, he pretty much idolizes you.

Irrelevant for THIS thread, sweetums. :-)

>It's only those who disagree with you about Morse Code testing
>that get your disrespect, abuse, name calling, and general
>jackass behavior.

Ooooooo! Big PCTA EXTRA tossing your weight around?

Hello? Does the "sign-off" word "PUTZ" mean anything
to you? :-)

Does Kolonel Klunk's "you never did any operating 24/7
in the military" mean anything to you? :-)

>> I HAVE dissed those that want to LIE about
>> their big heroic military "actions" such as
>> Stebie the wonder murine
>
>There you go - calling names. So typical.

Ooooooo! Causing you "great pain and anguish" is it?

Poor baby...must be new to the Internet. :-)

>> about his famous
>> "seven hostile actions"
>
>Do you know what they are?

Nope...the big hero sojer in da TN woods won't say!

Are you reading deprived and can't understand what
your pet buddy is saying about others?

> Where *you* involved in any of them?

Now, HOW could I have been "in" them? My service
time was 1952 to 1960. Check with St. Louis archives
if you don't believe that. :-)

>Is there any reason to doubt that Steve, K4YZ, was involved
>if he says he was?

HUNDREDS OF DOUBTS! :-)

>> and his failure to
>> acknowledge that the DoD really does direct MARS.
>
>I see. His mistake somehow justifies *your* behavior?

Just ONE of DOZENS of his "mistakes." :-)

>Godwin invoked. You lose.

Do you go to the House of Godwin on Sundays?

Sorry, sweetums, I've WON but you can't ever admit it.

>Why not use the person's name and callsign?

Why don't others? Tsk, tsk. You are an elitist PCTA
EXTRA double-standard bearer, Jimmie.

>What difference would details make? Your behavior when
>details are given doesn't change. In fact, you simply
>use the details as a source of more insults.

Awwwww...nobody giving you all that "praise" you get
from your admiring neighbors about your "neat radio
setup" and how you can describe your radio in great
detail to show off for them? :-)

>OTOH, Brian, N0IMD, refuses to give any details about
>his claimed amateur radio operation from Somalia, but
>that doesn't bother you a bit.

Why does that matter to YOU? :-)

>Do you mean Dave, K8MN, who served in the US State Department
>at a number of foreign posts as a communications officer?

WOW! TITLES!!! BIG, IMPORTANT!!!!!! :-)

>His service to our country was much longer than your, Len, and
>in many more foreign countries. I recall when he was transferred
>to right around the same time the US Embassy in the country he was
>transferring to was bombed. We didn't hear from him for weeks.
>Luckily he was OK.

ONE "hostile action" that he was NOT in... :-)

>Perhaps you have forgotten the US Coast Guard radio operator who
>used to post here? You made fun of his service in that capacity,
>in your now-famous "sphincter post".

Tsk, tsk, tsk...YOUR sphincter is way too compressed.

He's a "mathematics LECTURER" in Hawaii...like a TITLE
makes him sooooo expert, etc. He ALSO was a MAIL DROP
for ANOTHER extra, one who lived in Rhode Island and
wanted a Hawaii call sign. Tsk, tsk. Highly unethical.

>Why?

I have NO idea why the Rhode Islander wanted a 6 call
from Hawaii...not to mention a half dozen or so "club
calls" there... :-)

>> All those infamous types
>> are pro-coders and YOU love morse code, so much
>> so that you think ham radio is all about morse-
>> manship...
>
>Len - lest we forget - you're not a radio amateur.

How COULD you PCTA double-standard EXTRAs forget? :-)

>You've never been a radio amateur.

Right. And, judging from the behavior of you PCTA
double-standard EXTRAs, the "role models" are pretty
damn poor.

>Yet you see fit to tell all how amateur radio should be.

Ooooo..."Klunk's last gasp" (at arguments) invoked!

I'm wondering WHAT drives you retrograde PCTA double-
standard EXTRAs to so enforce the RETENTION of morse
code testing for U.S. amateur radio licensing. You
all get SO HOSTILE at ANYONE wanting to delete that
regulation! :-)

>You're not and never have been part of the FCC, either.

Here's the heartbreaking NEWS for you: YOU are NOT.
Either. :-)

[are you out of a job? maybe I can get you on Kevin's
staff...help you out...]

>> and MUST connect morse code to some kind
>> of imaginary "gallantry in the service." :-)
>
>All I did was mention a museum and some windows. That really
>seems to bother you. Too bad - the fact is, the Canadian
>armed forces used Morse Code in WW2. Deal with it, Len.

I DID, sweetums. :-) The miliaries (plural) DROPPED
morse code for communications purposes. They started
DROPPING its use when I was in the military. Morse has
been DEAD for years. [except in retrograde amateurism
where the PCTAs worship the dead...]

>> Tsk, tsk. Better contact the Department of the
>> Army of the United States and DEMAND my Good
>> Conduct medal be given up and sent back! :-)
>
>I don't demand anything like that, Len.

Tsk. Feeling GUILTY about mouthing off to a vet?

>> Tsk, tsk, tsk. Those "veterans" (at least one
>> with "seven hostile actions") have all been
>> about as disrespectful to me FIRST.
>
>No, they haven't.

BULLSHIT! You're starting to sound like Stevie the
wonder murine again...[but you LIKE him calling others
by names...that means you don't have to "lower"
yourself to do so...:-)]

>You apparently see any disagreement with your
>cherished beliefs about Morse Code testing in amateur
>radio as "disrespect", and then proceed in your
>completely predictable manner.

Tsk, tsk. Apparently you have a READING disability,
sweetums. You just DON'T (or can't) see that morse-
manship is NOT the ultimate skill in amateurism.

>> They got
>> what is known as "return fire."
>
>For saying good things about Morse Code, apparently.

No, for being total mirrors of the olde fahrts in
ham radio...the double-standard PCTA EXTRA elite
who think they are members of some imaginary
"service" to their country. Tsk, tsk.

>You mean like somebody who tells us the same story,
>over and over and over and over again,
>about his service at a big radio facility 50+ years
>ago?

HF in REAL 24/7 communications...BIG time...in a
professional manner?

Sure looks like it to me. And to others.

>Then gets mad because people point out his
>underestimation of distances, and mistakes about
>Soviet aircraft deployment dates?

Nah. Soviet aircraft weren't my thing at the time.
Still aren't.

Thing is, I was THERE, sweetums. YOU were NOT.

You READ all about Soviet aircraft in a book, long
after the harm they could cause us was over.

>> Not to you. But, you've NOT served in the military.
>
>How do you know for sure?

Stuff it, sweetums. I KNOW. You are NOT in the
military service archives. Of the United States of
America. Makes one wonder WHERE you "served" in the
military?

Remember, this is an AMATEUR RADIO POLICY newsgroup.

>Do *you* think it's funny, Len? Why? Those whom you make
>fun of don't seem to be amused.

Oooooooo! It just breaks my heart! [he said sarcastically]

TS, big shot. Calling all those NCTAs for "dumbed down"
because they don't care for morsemanship is NOT some
kind of funny business.

>Is military service the only REAL service, Len? I guess
>all those police officers, firefighters, EMTs, and other
>uniformed people who go in harm's way don't count, do they?

Police DO count, sweetums. Are YOU a policeman?
Bad folk try to kill police...and police fire back.
Do YOU have the guts to do that?

>How about the utility workers who keep the lights on and the water
>flowing? Or the highway, airline, transit, railroad and maritime
>workers who keep transportation running?

Don't forget the garbage collectors, the newspaper vendors
the factory workers, and the cafeteria servers...the butcher,
the baker, the candlestick makers...:-)

Remember, this is an AMATEUR RADIO POLICY newsgroup.

You want to do a thing on Human Resouces, you get on
Larry Roll. :-)

>> Couldn't get a dinner date with the Captain
>> because the King of the Katapults was already
>> booked on that aircraft carrier?
>
>More name calling - so typical of you.

Wow! Must have really get you pissed off to get turned
down! Bet you didn't get to shoot any bears either!

>> I served. YOU did NOT.
>
>How does that give you the right to insult others' service?

WHO appointed YOU "god" in here to determine who is to
to what? Hummmm?

Howcomeforwhy YOU get to be critical as all get out about
MY working HF comms IN the military a half century ago?
Hummmm?

Oh! I know! The ARMY didn't bother using morse code or
morsemanship for the long-distance HF comms then! That
MUST make you all angry and frustrated. Poor guy.

>> You want to see more of what I did in ARMY service?
>

>No. You've told us over and over and over again. That's enough.

WHO was it that used to quote (or rather misquote) a
baseball player's phrase, "It ain't braggin if ya done it."

I did it. You did NOT. You have been an amateur while
I've been a professional about as long as you've been
alive.

DEAL WITH THAT... :-]

LenAnderson@ieee.org

4150. 5 upcoming ISS school contacts

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-13 05:52:58 UTC
From: no@hotmail.com
Message-ID: <425db34f.2664150@aioe.cjb.net>
Source record: 105566

5 upcoming ISS school contacts

Hi all

The following shows upcoming contacts between the ISS and schools:

4/13/2005 - At 15:46UTC. Maple Ave. School in New Hampshire USA. This is
a direct contact. If I get the audio from them via the Internet, I'll feed
it into the EchoLink AMSAT and EDU_NET servers.

4/15/2005 - At 08:57UTC. Schulhaus Feld 1 (school) in Switzerland. This
is a direct contact. I plan on feeding it into the EchoLink AMSAT and
EDU_NET servers, if I can get the audio through the Internet.

4/15/2005 - At 18:07UTC. Ft. Ross California USA. This is a direct
contact. But, I should get this audio via the phone line and plan on
feeding it into the EchoLink AMSAT and EDU_NET servers.

4/18/2005 - At 08:41UTC. Marconi Institute in Italy. This is a direct
contact. I plan on feeding it into the EchoLink AMSAT and EDU_NET servers,
if I can get the audio through the Internet.

4/20/2005 - At 12:32UTC. ESRIN (don't remember what it stands for) in

Italy. This is a direct contact. I plan on feeding it into the EchoLink
AMSAT and EDU_NET servers, if I can get the audio through the Internet.

During our audio feed into EchoLink this past Friday, a problem
developed. The audio stopped getting into the AMSAT server, or the AMSAT
server did not continue processing it. We have not been able to determine
the point of failure at this time.

For the next contact, I plan on feeding the audio into the Edu_Net server
instead of the AMSAT server, but still connect these two servers
together. Please help to keep everyone quiet during the ISS - School
transmissions, since I can not mute anyone in the EDU_NET server. It will

be interesting to see if it works better that way. Sorry for the lost

audio on Friday.

I hope to see as many of you connected as feasible during future
contacts.

What really get's me is his attempt to make frivolous claims against me and my website. Mr. High and Mighty claims he going to send a lawyer my way if I don't censor my own website. I can see the headline "Amateur Radio Operator forces website to be censored.....Ham Operator's next goal to censor entire internet"

Todd N9OGL

Let's see....

Jim Miccolis, who never served in the Armed Forces, takes a moment to mention a Veteran's memorial that has a cute Morse Code "theme" to it. No big deal. Thanks, Jim.

Then we have Lennie Anderson. Served ONE tour of duty in a soft, non-combatant rear area radio station from 1953 to 1956. Finished his "obligation" as a non-drilling reservist.

Conceptualizes his duty as having jumped on grenades and dragged wounded buddies from withering machine gun fire.

Never rose above Sergeant (E-4 in those days, I believe, but I may be wrong).

NEVER served in combat and NEVER fired a shot in anger. DID, however, attempt to embellish his meager duty by trying to associate HIS service with the sacrifices of Soldiers who were KIA before he was even inducted!

Has not doen a thing to serve anyone BUT Lennie Anderson since...And that by his own admission.

Lennie, who is the King of the Whining Wounded, takes a pot shot at Jim. Why are we not surprised.

This is why Lennie is the creep that he is. Just like the onld "7Up" commercial..."Always was...Always will be..."

Guess Lennie has one more story of how he protected that rear area radio station from those "Hammie Bastards" down at the VFW now...

Steve, K4YZ

NAH. I did it. Jimmie didn't do it.

>To be fair, Len has exhibited jackass behavior toward K0HB and Hans
does
>not support retention of morse code testing.

Tsk. Everyone who disagrees with Davie is guilty of
"jackass behavior?" :-)

Riiiight...only ARRL-speak and the beauty, nobility,
and grandeur of morsemanship is spoken in here...:-)

>> > about his famous
>> > "seven hostile actions"
>
>> Do you know what they are? Where *you* involved in any of
>> them?
>
>He doesn't have any idea what they were. It kills him.

NAH. It only shows what a snow-jobbing laid-off
murine does under the guise of a U.S. AMATEUR radio
extra callsign. Tosses brags like they were bagels.

>To my knowledge, Steve has never stated that DOD does not direct MARS.

>His claim is that if there were no radio amateurs, there'd have been
no
>MARS program. In that, he is correct.

Bullshit. The United States ARMY started MARS...but
under a different name before WW2. Tsk. Davie ought
to read up on the subject...lots of references.

MARS always was and remains a MILITARY radio system.
A small one, about as effective as having special

services put on shows and entertainment. Morale
boosting thing.

>That's pretty much why I've left details out. As with Steve's
military
>service, Len doesn't know what I did or where I did it and it kills
him.

No problem with me. If you ain't got the guts to
tell the details, you AIN'T done it. Simple as that.

>...and Len has invariably demeaned that service. He has always known
>more about my job that I did. Foreign service tours were dismissed as

>tropical backwaters, places of insignificance and Cashew capitals.

Awwwww...you doing a Rodney Dangerfield? Get no
"respect?" :-)

>Don't leave out his attempts at insult by stating that my name never
>appeared in any lists of embassy staff. That blew up in his face when
I
>produced a couple of urls in which I was listed. Len's response was
to
>dismiss the lists as some sort of telephone directory.

Tsk. Sounds like you are bucking for an Intelligence Star.
Couldn't you get a sponsor at the NSA to award you one?

>Because Len is all about Len. That isn't the important part though.
>The important part is where Len's sphincter post speaks of what it is
>like to be in battle. Len was never in battle.

Only ONE very brief exchange of gunfire. Doesn't count
as a "battle," though.

Big Hero Dave...tell us all YOUR "battle experience."

Were you behind the Viet Cong lines sending intel to
HQ via CW?

>As far as I'm concerned, amateur radio is about operating any mode I
>choose on any band I choose. Len isn't involved on any level.

Everyone NOT licensed in amateur radio "isn't involved."

:-)

The point is that some MIGHT want to GET INTO amateur
radio. Dave loses his perspective on that. [age
causing loss of sight...among other things...]

Davie ought to get with Paul Schleck pronto and have
EVERYONE without a valid amateur radio license TOSSED
OFF this newsgroup! Make it "safe" for the double-

standard elitist PCTA EXTRAs to use as their personal
chat room and blog... :-)

>Len knows more about what others did than those involved.

Nope. But...I DO recognize a bullshit artist from a
long distance. Davie be one of those...

>Len knows more about the military.

I know enough to meet THIS level of homo saps. :-)

Been IN the Army...had lots of contact with Army
as a civilian after service time done.

>Len knows more about communications.

Tsk. I know some about that. Been IN that as a
civilian. :-)

>Len knows more about radio operation.

Tsk. I know HOW they work and the protocols needed
in some radio services. You have a need of info on
those radio services, big honcho?

>Len knows more about the U.S. Department of State.

I do? Oh, my, aren't you stepping off into denied
territory! :-)

>Len knows more about your work.

Tsk. Jimmie "works in the transportation field"
according to one Comment in the ECFS. Other than
that, Jimmie do NOT say squat. He afraid others
find out?

>Len knows more about Brian Kelly's work.

I do? Oh, my. News to me. Isn't Kellie retired?

>Len knows more about Steve's work.

Tsk. Stevie follows REAL DOCTORS' orders...which
includes staying OUT of the Sharps box. :-)

>Whatever Len did at ADA more than a half century ago impacts amateur
>radio not in the least.

Riiiiight old-timer. Ham radio NEVER operated on HF, did
it? :-)

>Len tells it because he wants to be sure that everyone knows of it.

You betcha! :-)

The U.S. military did NOT use morse code in long-distance
fixed-point to fixed-point communications a half century
ago and still don't. Tsk. Some of you olde-tyme hammes
need to get your noses out of old WW2 surplus radio books
and inspect the rest of the radio world.

>How does it give him the right to insult those who never served?

Tsk, tsk, tsk. Those with SUCH thin skin should NOT be
ANYWHERE on the Internet!!!! :-)

>Now you've done it, Jim. You've denigrated a veteran.

They are. But the point is you don't know Japanese, yet you feel it's "OK" to say Japanese words in non-Japanese conversation. You and Lennie don't seem to have the same opinions on word useage when non-Lennites are involved in the act.

> Stebie does a tour on Okinawa and thinks he was "in Japan."

I did SEVERAL tours on Okinawa, and yes, since 1972, Okinawa IS a WHOLE part of Greater Japan. I had to stand and salute during evening colors enough to know who's Anthem was playing.

> Problem is that Okinawans do NOT refer to themselves as
> "Japanese" in the strictest sense of the word. Never let
> little details worry lil Stebie.

Too bad YOUR frame of reference is fron the early 1950's, Lennie. I was last there in 1990.

The Okinawan's DO consider themselves "Japanese" in VERY strict sense of the word. In all regards.

> Hai, wakarimas... ["yes, we understand" in conversational
> Japanese]

Glad to see you retained something else from your time in Japan other than your ill-conceived embellishing of your own service record, Lennie.

A phrase you used often when the JNP's directed you from the benjo ditch back to your barracks, no doubt.

Putz.

What I find interesting, Dan, is that on the one hand people scream
about how nothing's being done to seal the border, and how they want
SOMEthing done NOW...

...yet when someone DOES step forward, and does so in a very open,
very public way, they scream "VIGILANTE!"

Personally, the idea that ONLY the government should be doing the
protecting is, to me, scary. That's the very reason the Forefathers
found it prudent to include the Second Amendment to the Constitution.

More power to the guys in AZ. Wudda liked to have given them some
time.

It doesn't matter if it was started by the Hand of God himself,
Lennie.

No Radio Amateurs = No MARS...Army, Air Force, OR NAVMARCORPS.

> MARS always was and remains a MILITARY radio system.
> A small one, about as effective as having special
> services put on shows and entertainment. Morale

As opposed to YOUR making up details, Lennie?

I am not as predisposed to being a braggart about my military
service. There's no need to. Guys who make a point of sticking the
minute details of what they allegedly did in the Armed Forces usually
prove out to be the rear area radio clerks, etc.

> >...and Len has invariably demeaned that service. He has always

Tripping and accidentally discharging your weapon is NOT an
"exchange of gunfire".

> Big Hero Dave...tell us all YOUR "battle experience."

Please, Lennie...P L E A S E retell the tale of YOUR service under
the threat ot the Soviet Bear...And then again your emotional outburst
about how somone else doesn't know what it's like to be under incomming
artillery fire..as if YOU had been at Khe San or Chosin Resivoir! ! ! !

> >Len knows more about what others did than those involved.
>
> Nope. But...I DO recognize a bull@@@@ artist from a
> long distance. Davie be one of those...

No, he's not. But you sure do "bare the scars" of one.

> >Len knows more about the military.
>
> I know enough to meet THIS level of homo saps.

How?

So far, other than reciting the hearldry of the one unit you were
in in 1953, you haven't gotten a single thing about anyone else's
service right yet!

> Been IN the Army...

Yeah. When Dwight D Eisenhower was President.

> ....had lots of contact with Army
> as a civilian after service time done.

Too bad you didn't learn anything about the Army after that.

> >Len knows more about communications.
>
> Tsk. I know some about that. Been IN that as a
> civilian.

Not very successful though. Muddled through to retirement. No
real accomplishments other than having had the good sense to invest
wisely for your leisure years...Of couse at least ONE of your
"employers" reports that you were rather leisurely WHILE you were in
their "employ".

> >Len knows more about radio operation.
>
> Tsk. I know HOW they work and the protocols needed
> in some radio services. You have a need of info on
> those radio services, big honcho?

You know jack squat about "radio operation", Lennie.

You know a lot of theory...but squat about how they are used.

> >Len knows more about the U.S. Department of State.
>

> I do? Oh, my, aren't you stepping off into denied
> territory!

But it's true. You've tried to nip at Dave's heels for years but
still can't seem to land a good bite in there...

Due primarily to your lack of knowledge and experience in such
issues.

I've not found a single bit of fault in anything Dave has
commented on herein...However YOU ahve been caught with your britches
down on numerous occassions.

> >Whatever Len did at ADA more than a half century ago impacts amateur
> >radio not in the least.
>
> Riiiiight old-timer. Ham radio NEVER operated on HF, did
> it?

Neither did you, according to your MOS's, Lennie...Oh, I have no
doubt that in the process of performing your radio mechanic duties that
you caused some RF to eminate on HF, but you were NEVER an HF operator.

> >Len tells it because he wants to be sure that everyone knows of it.
>
> You betcha!

Now if it were only true.....

> >How does it give him the right to insult those who never served?
>

> very first one) and you would NOT look at it!

No, You did not.

You sent me a picute of a person "mooning" in the nose of an A-26.

It was among your many lies.

> Instead you manufactured a clear-libel "personal
> page" on AOL damning me in no uncertain terms.

It wasn't libel. The truth is never libel.

You sent an e-mail professing to be one thing, but it wasn't what
you said it was.

Your "shot" at gaining trust was itself "shot".

> Fortunately for all concerned (except yourself), AOL
> took it down as soon as they were informed.

The only one "fortunate" was you, Lennie. But then I've had
several years of rubbing your nose in your lies, deceit and mistruths
here to make up for it.

Nothing lost for me. Lot's lost for you. Like any chance at ever
being accepted for what you THINK you should be....

> > You do lie, both about Amateur Radio in general and many of us
> who
> >are practitioners of that art. You've told us of things you'd do
and

> Internet sites.

I had all the "proof" I need, Lennie.

A third party with no allegience to protect. A man with a
professional reputation that I can bank on.

Unlike you.

> In any event, you are NOT some kind of "judge" to
> hand out any "ruling" on anyone, certainly not your
> e-opponents. You keep crowing that you ARE
> one, but that is YOUR OWN LIE that you tell the
> world. A LIE anywhichway it goes.

I have never claimed to be a "judge", and I have very specifically
stated that you are not an "opponent". Ranking you as an "opponent"
would suggest you are at some level. You can only "best" me in
chronological years.

> Now you MUST tell all about this former NADC
> employee who claims to know me a decade after I
> was there. You have NOT done so. You LIE.

He didn't know you "a decade after (you were) there". He knew you
WHEN you were there.

And I do not name him because I protect his privacy at his
request.

I have no reason to doubt his assessment or opinion. Your own
conduct, language, demeanor and conduct herein certainly give credence
to his assessment.

> You haven't told the Where or When of those famous
> "seven hostile actions" you claim but won't reveal.
> Tsk. You LIE and then give yourself a pat on the
> back for imagining that to be "truth!"

Nope. I take great pleasure in watching you run in circles with
it, Lennie. Very effective. Between that and trying to bite off more
than you can chew over MARS, you really have nothing left to do.

> You have NOT acknowledged that the DoD directs and
> supervises MARS, even when informed of the website
> and full link details of the directive by DoD (as I
> did in here).

Sure I have. I've said it several times over.

And I have ALSO said, and it reamins true today, that without the
Amateur Radio Service volunteers that flesh out it's ranks, none of the
three branches of MARS would exist in it's present form.

Without the "Amateur" component, there is no one to be
"Affiliated" with.

> > You taught Brian well...Just keep pouring the lies in to try

There is nothing "rational" about adult males repeatedly and
adamandtly lying in public, Lennie. but the two of you keep doing it.

> > Leonard H. Anderson is a known chronic liar.
>
> Tsk, tsk, tsk. Not at all.

See what I mean...There's another one.

> You are SICK,
> sweetums, and all you can do is make all those
> personal attacks on everyone who disagrees with
> you.

You call me "sick" and "sweetums" in the same sentence,
Lennie...?!?!

That is sick!

And P L E A S E tell us ALL ABOUT "personal attacks"....

Would that be like the one you slung at Jim Miccolis in the "Lest
We Forget" thread this same date?

> You NEED some personal mental counseling
> but you've obviously not gotten any. That's a
> danger to yourself and your immediate family, not
> to mention cutting down on all the hate and anger
> your actions ignite in this newsgroup.

You continue to infer that you have adequate training or education in mental health issues to make such referals, however requests for your credentials go unanswered.

And the only "hate and anger" my "actions ignite" in this newsgroup are from folks who deem it necessary to chronically lie or make up scanrios that don't exist.

For the most part, that's you and Brian. Todd has joined in lately, but he's just a developmentally delayed adult with an attitude and a computer.

> Try to keep focussed on the FACT that this
> newsgroup is SUPPOSED to be about amateur radio
> policy.

I am glad to see that after all these years you have at LEAST stopped trying to insist that this group is SOLELY for discussing the Morse Code Test issue.

Now...You are still NOT a licensed Amateur with ANY practical experience (other than this NG) in actual Amateur Radio policy issues, which begs the question as to what YOU think you're doing here!

(Please don't recite the same lie about only being interested in "debating the morse code TEST issue"...You wore that out years ago)

> It is NOT some kind of kiddie sandbox
> that was created for Stebie to show his courage
> in personal attacks on everyone who disagrees
> with him.

But that is >>ALL<< that YOU have used this group for, Lennie.

Why do you always make "rules" that YOU clearly violate, Lennie...???

More facts dispell "billybeeper" AKA Brian P Burke, N0IMD mistruths and deception about his "fellow" Amateurs:

(1) ARES-RACES teams activate in wake of flooding (Apr 12, 2005) -- ARES-RACES teams in Pennsylvania and New York were among those activating after torrential rainfall over the April 2-3 weekend caused rivers to overflow their banks....SNIP

(2) Florida United Way arm recognizes ARES/RACES team (Apr 12, 2005) --

The Volunteer & Community Resource Center (VCRC), United Way of Martin County, Florida, has named Martin County Amateur Radio Emergency Service/Radio Amateur Civil Emergency Service (ARES/RACES) as "Champions of the Community." The award recognizes the team's efforts during the ARRL holiday toy drive in support of the VCRCs White Doves Holiday Project as well as ARES/RACES emergency communication contributions...(SNIP)

(3) High Praise for Amateur Radio Follows ARES' TOPOFF 3 Performance (Apr 8, 2005) --

The role of Amateur Radio Emergency Service (ARES) volunteers in Connecticut in this week's massive TOPOFF 3 exercise has drawn high praise from the American Red Cross, for which ARES provided virtually all radio communication. Sponsored by the US Department of Homeland Security and intended as a realistic test of the nation's homeland security system, TOPOFF 3's goal was to push the system of first responders beyond its limits to find the weak spots. American Red Cross emergency services director Mario J. Bruno extolled ARES' performance

I've known many, many WW2 veterans. Many I got to know quite well.
Some didn't want to talk, others had lots to say.

Just for starters, I know/knew a B-24 navigator who bombed Japan (gave
me some of his maps), a USN submarine torpedoman, a USN radioman (gave
me some of his books - he also served in the Korean War) and a B-24
pilot who bombed Ploesti three times and spent 18 months as "a guest of
the Luftwaffe".

I don't think the latter would find Len's "Kolonel Klunk" insults
to be very funny.

I think the important part is that Len demeaned and insulted
the services of a skilled military radio operator, for no
good reason at all.

That behavior speaks volumes.

> > > All those infamous types

How?

I simply don't want to read Len's story about ADA again. He's posted it here so many times I can recite it from memory. But
he never explains why it has any bearing on amateur radio policy today.

I don't want to read it again.

Yes, and the AGC system that makes maximum use of the A/D and D/A range.
See for example the organization of the Ten Tec Orion.

What bothers Lennie most is that people who DIDN'T get "paid" for
their radio expertise know more about radio than he could hope to know.
Hans has considerable experience, ergo he catches The Wrath of Lennie.

> > > > I HAVE dissed those that want to LIE about
> > > > their big heroic military "actions" such as
> > > > Stebie the wonder murine

What keeps me laughing is that Lennie has mentioned my USMC
service far more than I could ever hope to or want to!

> > > There you go - calling names. So typical.

He's tried to re-open that can of worms on a couple of
occassions...It didn't work the first time...didn't work on the
subsequent passes.

>
> Len doesn't know anything about my work. He could not do my
> job. That *really* bothers him.

Part of Lennie's problem is that he didn't want to do much of HIS
work...At least on one occassion that I have inside knowledge of. Or
rather I SHOULD say he wasn't CAPABLE of doing his job...Hence his
interrupted tenure at Warminster. My bad.

> > > > >>Let's all stand up and salute this brave "member of the

> >
> > How does it give him the right to insult those who never served?
>
> Good question!

Lennie signed on the dotted line and went to boot camp...wore the
uniform, even. But can we call what he really did "serving"...?!?!? In
even the loosest, most liberal interpretations, I guess he did...

And his "I Am A War Hero Because I Served In A Unit That Had KIA's
Before I Ever Got There" embellishments is like "negative points".

My using AOL has nothing to do with the lack of testosterone in
Illinois, Lloydie...

And like I said...Maybe you can see that Todd gets to see it...I
am sure it will make him proud...DOUBLY proud since he's voiced some
very clear racial overtones in the past. He'll looooooooooooooooove
this newsclip!

Lets see, Steve uses AOL and Roger claims to have a Master of Science degree which he earned entirely via correspondence from DeVry.
Theres a connection, but it just isn't clear yet. Do you suppose they both function in a vacuum?

>See for example the organization of the Ten Tec Orion.

If the DSP system really needs some kind of AGC, then it is a useless
toy :-).

If you have a strong and a weak signal in the ADC input bandwidth and
the system gain depends on the strong signal, then the weak signal is
going to be drowned into the (quantisation)noise whenever the
amplitude of the strong signal is increased.

Any properly working DSP system should be designed in a way that it is
capable of properly converting the thermal noise as well as the
combination of all strong signals in the input.

The only justification for using AGC in front of a DSP system is that
if antennas with dramatically different efficiencies are used. For
instance, if the receiver input is switched between a full sized
dipole on 160 m and a ferrite rod (with perhaps -40 dB gain), then it
is quite acceptable to modify the gain with some kind of AGC, but this
could be handled as well with some antenna specific gain presets.

If the system is working an hour on a specific band with a specific
antenna, you should not need any kind of AGC depending on the actual
signal level. If you need AGC for this, then you are going to have
problems, if you are trying to receive any weak signal close to a
strong signal.

What one really needs are ADCs with many bits, say 24 bits,
sampled at least twice the highest signal frequency to be digitized.
One has to avoid saturation (overflow) else the rest of the
signal gets blanked during the overflows.

Nope. Just the facts.

> LOTS of calculation places were busy doing
> ordinance table calculations way back then.

Of course. And ENIAC could do in couple of seconds what
they took days or weeks to do. That's a fact.

> Bell Labs
> had a RELAY calculator...actually three of them in one
> of the first computer "networks" in NYC. Before ENIAC
> was started.

Those relay machines were electromechanical, not electronic. They
worked but were very slow compared to ENIAC - not high-speed at all.

> Tsk, tsk. Get WITH the history program!

Get with the facts, Len.
>
> >Or let's talk about the lessons to be learned from the US Navy
> >Mark XIV submarine torpedo, and its problems.
>
> Oh! You are now an Expert Extra on USN ordinance?

I don't claim to be an expert about anything, Len. But I do know the
lessons of the Mark XIV.

Do you?

>

What good does it do to post a link that's only available to AOL
users?

"Acting on the premise that the amateur bands must flexibly and comfortably accommodate present and future operating modes and technologies over the long haul, the ARRL Executive Committee has reached consensus on recommendations to the ARRL Board of Directors for a regulation-by-bandwidth proposal. Meeting April 9 in Denver, the panel adopted recommendations that will form the basis of a draft ARRL petition to the FCC seeking to govern the usage of amateur spectrum by emission bandwidth rather than by mode. The proposals remain only EC recommendations at this point . . . "

http://www.arrl.org/news/stories/2005/04/13/1/?nc=1

- - - - - - -

This nonsense needs to be killed FAST and killed NOW. It represents gross overregulation. It's HQ trying to fix a system which isn't broken. Again. It's time to rise up against it en masse.

Lets see, Steve uses AOL and Roger claims to have a Master of Science
degree which he earned entirely via correspondence from DeVry.
Theres a connection, but it just isn't clear yet. Do you suppose they both
function in a vacuum?

Shalom,

Rabbi Phil
Chief, San Hedrin Council
....

Now, wait a minute. Roger once said He was "working on" his Master's and
said he was only a few credit hours from obtaining it. Knowing that Roger is
a congenital fibber, these "few credit hours" to which he alludes may be as
few as 12 or, knowing Roger's intellect as we do, as many as those numbered
in years. Only Roger knows for sure and he fibs about everything. (Roger
uses AOL also)
Unlike Roger, Steve can construct any number of cohesive sentences without a
single use of profanity. For Roger this is an insurmountable task.

As has been said before, if you think the ARRL or the FCC have the best interests of amateur radio in mind when they do something, then I have a bridge in Brooklyn and some desert real estate I would like to sell you. And if you think Riley Holligsworth has anything on his mind other than how much money he can make while he's still a FCC employee and what company he will work for after retirement, then you really are simple minded. Then again, informed sources say Riley is greasing the skids after retirement to come back on board as a rehired FCC annuitant.

You are getting way too deep in your psychosis.

Regardless of how much you "believe" the above to be
true, for the purposes of argument in here you must reveal
the name of that person or PUT IT AWAY. I was visiting NADC
34 years ago as an employee of RCA Corporation and stayed
there a total of three months. The former Naval Air
Development Center, NOT NAS Warminster across the road.
I had daily contact with only three NADC engineers in
that group and NONE of them would be "your acquaintence."

> The only one "fortunate" was you, Lennie. But then I've had
>several years of rubbing your nose in your lies, deceit and mistruths
>here to make up for it.

You are living in some fantasy again. Reset.

> Nothing lost for me. Lot's lost for you. Like any chance at ever
>being accepted for what you THINK you should be....

Tsk, tsk. The ONLY thing I've "lost" is thinking you
might be rational. I'm way too optimistic. You aren't
rational.

> I had all the "proof" I need, Lennie.
>

> A third party with no allegience to protect. A man with a
>professional reputation that I can bank on.

You have BOGUS "proof." Non-existant. That "acquaintence"
doesn't exist. You made him up.

> He didn't know you "a decade after (you were) there". He knew
you
>WHEN you were there.
>
> And I do not name him because I protect his privacy at his
>request.

1. You can't name him because he doesn't exist.

2. The ONLY thing you are protecting is your own
bragging LIE about that fantasy individual.

3. "Protecting privacy" is totally bogus. Rationalization
expressed to attempt masking your own LIE.

> I have no reason to doubt his assessment or opinion.

You probably believe your own fantasy. To you it is
"truth." To everyone else it is just your fantasy.

> There is nothing "rational" about adult males repeatedly and
>adamandtly lying in public, Lennie. but the two of you keep doing it.

Then you are your own worst enemy since you are describing
YOURSELF.

The only way you can clear your LYING is to name this
supposed person in order to actually prove something.
Your "word" that he exists is also bogus. He doesn't
exist anywhere except in your own psychotic imagination.
Your "word" is therefore meaningless.

Provide this "name." Without it you have a bogus
"reference" that means nothing.

You are SICK and need help. Go get some.

>I simply don't want to read Len's story about ADA again. He's posted
it
>here so many times I can recite it from memory. But
>he never explains why it has any bearing on amateur radio policy
today.

I've already explained the "bearing it has" years ago.
Let's take it again, from the top...

Back in the beginning of the 1950s, the U.S. military
was NOT using any morse code modes for long-distance
point-to-point communications. Most of that message
"traffic" was written teleprinter that carried the
vast majority of military communications.

NO morse code modes were used on such radio circuits
afterwards. That SHOULD have some meaning to rational
persons insofar as the efficacy of morse code for
communications...in short, morse code was way too slow,
too prone to human errors by its operators, and
generally so inefficient that, by now, EVERY other
radio service has either DROPPED the mode (if they used
it at all in the past) or NEVER CONSIDERED it when that
radio service began. The sole exception is AMATEUR
radio...a hobby pursuit, a recreation, something done
on free time for enjoyment.

For over half a century (actually, since before WW2)
the brunt of messaging in the military has been done
by modes OTHER than morse code. An approximation of
the amount of such military traffic is a minimum of
1 1/2 MILLION messages a MONTH back in 1955. It was
not trivial, it wasn't confined to a few ship's radio
rooms. It was the logistical supply "glue" that

enabled the United States military to support itself worldwide. It was necessary to keep "getting the messages through" as the old, and still current, Signal Corps phrase puts it.

It should be obvious to rational people that there is NO need for any morse code testing for a hobby radio activity. It is NOT a "national service." It is NOT needed to "maintain a reserve of 'skilled' radio operators" for the nation or even a locality.

What morse code testing for a hobby radio activity has become is a travesty, a gross artificiality kept in there by old-timers who managed to pass such tests and keep insisting that all newcomers MUST do as they did. There is NO rational reason for that. There is only the artificiality of some hazing exercise so that those who pass can adopt the artificiality of doing something that few can. Nonsense.

>I don't want to read it again.

Naturally, since you are one of those old-timers who thinks of little else but morse code operation on the HF amateur bands. You want to enforce your own private desires and accomplishment goals on others regardless of their wishes or the irrationality of your demands.

You don't want to read it because someone else was able to be in a position to do REAL HF communications all the time. That's way above the average amateur experience. You resent knowing that another has done it. But...you are going to have to live with it.

"It ain't braggin if ya done it..." I did it.

LenAnderson@ieee.org

today.

I've already explained the "bearing it has" years ago.
Let's take it again, from the top...

Back in the beginning of the 1950s, the U.S. military
was NOT using any morse code modes for long-distance
point-to-point communications. Most of that message
"traffic" was written teleprinter that carried the
vast majority of military communications.

NO morse code modes were used on such radio circuits
afterwards. That SHOULD have some meaning to rational
persons insofar as the efficacy of morse code for
communications...in short, morse code was way too slow,
too prone to human errors by its operators, and
generally so inefficient that, by now, EVERY other
radio service has either DROPPED the mode (if they used
it at all in the past) or NEVER CONSIDERED it when that
radio service began. The sole exception is AMATEUR
radio...a hobby pursuit, a recreation, something done
on free time for enjoyment.

For over half a century (actually, since before WW2)
the brunt of messaging in the military has been done
by modes OTHER than morse code. An approximation of
the amount of such military traffic is a minimum of
1 1/2 MILLION messages a MONTH back in 1955. It was
not trivial, it wasn't confined to a few ship's radio
rooms. It was the logistical supply "glue" that

enabled the United States military to support itself worldwide. It was necessary to keep "getting the messages through" as the old, and still current, Signal Corps phrase puts it.

It should be obvious to rational people that there is NO need for any morse code testing for a hobby radio activity. It is NOT a "national service." It is NOT needed to "maintain a reserve of 'skilled' radio operators" for the nation or even a locality.

What morse code testing for a hobby radio activity has become is a travesty, a gross artificiality kept in there by old-timers who managed to pass such tests and keep insisting that all newcomers MUST do as they did. There is NO rational reason for that. There is only the artificiality of some hazing exercise so that those who pass can adopt the artificiality of doing something that few can. Nonsense.

>I don't want to read it again.

Naturally, since you are one of those old-timers who thinks of little else but morse code operation on the HF amateur bands. You want to enforce your own private desires and accomplishment goals on others regardless of their wishes or the irrationality of your demands.

You don't want to read it because someone else was able to be in a position to do REAL HF communications all the time. That's way above the average amateur experience. You resent knowing that another has done it. But...you are going to have to live with it.

"It ain't braggin if ya done it..." I did it.

I would like to see a comprehensive discussion of this proposed rule making without it degenerating into name calling. This could revitalize a newsgroup that is overdue for getting back on subject, that is, policy.

So far, I have four comments:

1. What experience and expertise do seven or eight old men (ARRL EC) in Newington have, to qualify to make policy for the conduct of Amateur HF operations? Let's see their operating logs or other evidence for the past year where they have made 5 contacts per week avg. in the CW/Data/AutoData/Voice intersection areas in the subject bands they are including in their proposal. OK, let's make it easy, just show logs for just SWLing those areas for 2 1/2 hrs per week. If they cannot produce, then they should be excused from making policy on such far-reaching implications.

2. While it may appear to be "overregulating" as someone pointed out, I take the opposite view. K1ZZ says "Oh, bandwidth is too hard to define, let alone measure, so lets just "say" we are going to restrict AutoDATA to 3.5 KHz and Semi-Auto DATA to 500 Hz, but we won't require measurement for verification.

First of all, does anyone have a copy of the current rules and regs for AutoDATA and Semi-AutoDATA operation on HF? I've been away a while, so someone please point me to that in the Part 97. Let's get that established first. For instance do those stations have to identify in CW or Voice(AM or SSB) at any time? So how about some clear rules and regs for conduct of the Auto and Semi-Auto stations.

Second, if they are going to refarm on "bandwidth", should not "bandwidth" be redefined to a quantifiable measure? K1ZZ claims that bandwidth is not necessary to measure, that it will be self-regulating. Yeah, sure wink, wink! This works on voice HF where you can tune over to the offending frequency and say "QLF", "QSY or QRT". Have you ever tried to tell an unidentifiable robot station that it is running too broad a signal? It is almost as difficult as telling K1MAN to QSY.;-) Everyone knows that there is always great pressure to open up the bandwidth and increase throughput on DATA. Soon you will soon find the HF AutoDATA's going to 16 KHz and Semi-AutoDATA's going to 3.5 KHz. If you ever do catch up with the offender their retort would be: "But, hey, bandwidth is ill-defined, and I don't have to measure it, so sue me!"

3. Am I prejudiced? Yes! My experience, living with AutoDATA's operating in the 7.100 to 7.105 MHz for a few years was this: While I am trying to work new novices and give them a new contact, in the only part of the novice band not savaged by Foreign Broadcast, while gearing down to 5-10WPM, these Auto Cowboys would fire up on our QSO. If you called CQ on "their" frequency, they would turn you in to the FCC. Their idea of "sharing" in the HF band was about the same as K1MAN's or W1AW's idea of sharing their bulletin frequencies. So, in effect, is the ARRL EC campaigning to give the Auto Cowboys their exclusive non-sharable subbands throughout the HF spectrum? Take a look at K1ZZ's chart and add up the total AutoDATA bandwidth across the HF spectrum. Now will we have the Semi-AutoDATA operations spreading out from there? Hmmmmm!

4. Lest I be labeled a Luddite, I think that a robust Amateur HF Data Network across the nation, managed by dedicated Hams, could be the center-piece for revitalizing or defending our reason to exist as a service in the public interest. However, such operations as SemiAuto and AutoDATA need to be regulated in proportion to their inherent liability to wreak havoc and do damage to current operations if unchecked.

You really are in a max-putz mode today, aren't you?

WHERE did Jim EVER claim to be a Veteran? WHERE did he EVER say
he "served" in the Armed Forces?

> > I could go on about the political and economic effects, but since
> this
> > is a radio newsgroup I thought I'd stick to electronic and
> > radio subjects.
>
> And Canadian war museum topics.

That happened to have a connection to radio communications.

You see, Brian, THAT is why you catch the flak taht yopu do for
your behaviour.

Just like Lennie, you like to stop where it serves you to do so
and ignore facts.

> > If I did talk about any military service I had, you would

Sure he does.

You kiss your wife with the same lips you have on Lennie's butt
all the time...Does SHE complain?

> > Is there any reason to doubt that Steve, K4YZ, was involved
> > if he says he was?
>
> Is there any reason to not apply Steve's rules of facts to Steve's
> claims?

There are no "rules of facts".

Things either "are" or they "are not".

Like your ARES claims (are not true). And your Somalia claims
(are not true). Then there's your "unlicensed devices" claims. (are
not true).

> > I see. His mistake somehow justifies *your* behavior?
>
> Mistake? He's had ample opportunity to correct that mistake.
Instead
> he piles up the lies.

Thee was no mistake.

YOU have yet to cite a single error or lie, Brain. You keep
claiming one after another refuse to cite why ANY statement is a "lie".

Brian P Burke and Leonard H Anderson both epitomize all of the
things that give other veterans a black eye. I would not want to be in
a social setting where their status as veterans was known and then
announce that I was a vet too. That's one "guilty by association" that
I will gladly avoid.

No, you didn't. Not how *your* experience at ADA (a military radio
station) has any bearing, or relevance, to amateur radio
policy today.

> Let's take it again, from the top...
>
> Back in the beginning of the 1950s, the U.S. military
> was NOT using any morse code modes for long-distance
> point-to-point communications.

How do you know this for sure?

Granted, you didn't see any "morse code modes" in use at
ADA. But to say there was none used at all, anywhere in the
US military is a different thing.

What's interesting is that you have to qualify the statement
as "long-distance point-to-point communications" - because
Morse Code was then still being used *extensively* by the US
Navy, by the maritime radio services, by aircraft and by many
other radio services such as press services.

Your tunnel vision of "long-distance point-to-point communications" by
the US military is about as relevant as the
fact that Morse Code wasn't in use on the AM broadcast band in the
1930s.

> Most of that message
> "traffic" was written teleprinter that carried the
> vast majority of military communications.

Yep.

And it was on fixed, predetermined frequencies, using equipment
most individuals could not afford to buy.

And it was *not* the kind of communications that make up the vast
majority of amateur radio communications.
>
> NO morse code modes were used on such radio circuits
> afterwards.

At some point, anyway. The US Navy was still using Morse Code long
after the beginning of the 1950s. So was the Coast Guard. They are "US
military".

> That SHOULD have some meaning to rational
> persons insofar as the efficacy of morse code for
> communications...

There you go, Len, assuming your conclusion.

What you're saying is that because the Army didn't use it,
nobody should use it.

Here's a hint: Ham radio isn't the US Army. When Uncle Sam
is willing to buy radios for all hams, then maybe you'll
have a point.

> in short, morse code was way too slow,

For some applications, yes. But not for many applications.

> too prone to human errors by its operators,

All communications modes are prone to operator error. The
person typing on a teleprinter can make a mistake, too.

> and
> generally so inefficient that,

Nope. You just don't like the mode.

> by now, EVERY other
> radio service has either DROPPED the mode (if they used
> it at all in the past) or NEVER CONSIDERED it when that
> radio service began.

So what, Len? That's like saying that since almost all motor vehicles
don't have manual transmissions anymore, no vehicles should have them.
gave up having

The main reason Morse Code was replaced by other modes in
other radio services is that it required skilled operators

at both ends of the circuit. Skilled operators cost money
and have to be taken care of, and the speed and accuracy of
communications is limited to their skill level. So the skilled
operator was eliminated by technology, to save time and money.

What you're saying, then, is that you want to eliminate the skilled
operators from ham radio, too.

> The sole exception is AMATEUR
> radio...
It's all those things - and a lot more.
>
> For over half a century (actually, since before WW2)
> the brunt of messaging in the military has been done
> by modes OTHER than morse code.

Even if true, (it's not) so what? Ham radio isn't "the military",
and amateur radio communications isn't only about "messaging".

You're argument says that since most US Navy ships stopped relying on
the wind for propulsion long ago, nobody should own a sailboat today,
even for "a hobby pursuit, a recreation, something done on free time
for enjoyment."

Very illogical.

> An approximation of
> the amount of such military traffic is a minimum of
> 1 1/2 MILLION messages a MONTH back in 1955.

So what? Hams don't have the same resources, nor the same basis and
purpose.

The old Bell Telephone system handled a lot more than 1.5 million
"messages" a month back then, too.

> It was
> not trivial, it wasn't confined to a few ship's radio
> rooms. It was the logistical supply "glue" that
> enabled the United States military to support itself
> worldwide. It was necessary to keep "getting the
> messages through" as the old, and still current,
> Signal Corps phrase puts it.

And it required how many people to do it all? At a cost of how many
millions of taxpayer dollars?

What possible connection does that have to the self-trained,
self-funded amateur radio operator?
>
> It should be obvious to rational people that there is
> NO need for any morse code testing for a hobby radio
> activity.

There's where you make an illogical jump. You hold up what
the US military allegedly did, then say it's somehow connected
to what hams should do.

But you never say what the connection is. Just that "it's obvious to
rational people" - which it isn't.

> It is NOT a "national service."

Actually, amateur radio is internationally recognized by treaty, and
it's a radio service.

> It is NOT
> needed to "maintain a reserve of 'skilled' radio
> operators" for the nation or even a locality.

Sure it is. Just ask those folks who ran the recent emergency drills.
They were very appreciative of the contributions of amateur radio
operators.

> What morse code testing for a hobby radio activity
> has become is a travesty, a gross artificiality kept
> in there by old-timers who managed to pass such tests
> and keep insisting that all newcomers MUST do as they
> did.

No, that's simply not true at all. It's just your way of
rationalizing your hatred, Len.

> There is NO rational reason for that.

Sure there is. Here ya go:

Since amateur radio operators *do* use Morse Code extensively, today,
on the air, for a wide variety of activities, it is perfectly obvious
to rational people that a basic test of Morse code skill is a
reasonable test requirement for a license.

That's the whole thing, right there.

> There is
> only the artificiality of some hazing exercise so
> that those who pass can adopt the artificiality of
> doing something that few can.

Nope. It's a bout a basic skill, that's all. Almost anyone can do it.

>Nonsense.

Yes, that's what your arguments and insults amount to.
>
> >I don't want to read it again.
>
> Naturally, since you are one of those old-timers who
> thinks of little else but morse code operation on
> the HF amateur bands.

No, that's not true at all. That's just one of my interests.

> You want to enforce your own
> private desires and accomplishment goals on others
> regardless of their wishes or the irrationality of your
> demands.

That's a pretty good description of *your* purpose here, Len!

> You don't want to read it because someone else was
> able to be in a position to do REAL HF communications
> all the time.

So what hams do, and did, isn't "REAL"?

Then why are you so concerned about it?

And even you can't do it all the time, Len.

> That's way above the average amateur
> experience.

No it isn't. It's *different from* the amateur radio experience. Just
like riding in a commercial airliner is different from flying your own
private aircraft.

> You resent knowing that another has done
> it.

I don't resent it at all, Len. I'm just bored by your constant
repetition of the same old story and illogical conclusions.

> But...you are going to have to live with it.

Why?

>
> "It ain't braggin if ya done it..." I did it.

All by yourself? Or were there hundreds - thousands - of others there
too, backed up by the enormous resources of the USA - both civilian and
military?

And you still haven't explained how what happened at ADA a half-century
ago has any relevance to ham radio today.

Here's one more analogy to your alleged logic:

Inexpensive calculators have been around for a couple of decades now.
Almost nobody in business or the professions relies on manual
arithmetic anymore - even the smallest businesses, for example, use
electronic cash registers to do the calculations.
Where such manual calculation was once done, it has been completely
replaced by electronic methods. Manual calculation
is too slow, too error-prone, and too dependent on human skill.

Therefore, we should not require anyone to learn how to do such calculations as addition, subtraction, multiplication or division, let alone square roots or other techniques.

That's what you're saying. And it's nonsense.

>> sampled at least twice the highest signal frequency to be digitized.

The LSB should be less than the band or thermal noise in the _input_
bandwidth, so that it would act as dithering noise. For terrestrial
VHF/UHF/SHF systems, the antenna temperature is close to 300 K and
thus a noise density of -174 dBm/Hz. Assuming 10 kHz ADC input
bandwidth, the equivalent noise power would be -134 dBm. In order to
be able to correctly convert a strong signal _and_ the broad band
noise riding on it correctly, the maximum signal level at the antenna
for 16, 20 and 24 bits would be -38 dBm, -14 dBm resp. +10 dBm or
assuming 50 ohm antenna impedance 2.7 mV, 44 mV resp. 710 mV. Not
very common values on VHF/UHF.

At HF, the band noise is typically at least 20 dB stronger, so the
gain in front of the ADC can be reduced and thus the maximum antenna
voltage would be at least 10 times larger, so even the 16 bit
converter would tolerate a single S9+55 dB signal.

However, in order to be able recover weak narrow band that would be
buried in the 10 kHz broadband noise, quite good linearity is required
for the dithering process. The dithering noise properties are also
critical, e.g. if it contains mostly impulse noise instead of white
thermal noise. You may have to move the ADC LSB deeper into the noise
floor, which would reduce the maximum input voltage allowed or require
more bits.

>> One has to avoid saturation (overflow) else the rest of the

>underflow problem. Modern ADCs typically generate IEEE format
>floating point numbers "on the fly" by using triple or even quadruple
>banks of digitizers, all contained in a small amount of chip real
>estate, and all controlled by a small microprocessor.

The exponent is just the gain in front of the ADC and the mantissa is the real converted data bits. If the exponent bits varies constantly, this just reflects the "AGC" control voltage of the preamplifier. The number of mantissa bits is the critical thing for a radio receiver. The mantissa bits must still be able to represent the broadband noise riding on strong signals. In practical terms, the exponent could only be used to reflect the broadband noise and antenna gain on a particular band and remain constant as long as the receiver is on that band.

Of course, if we could get a true IEEE float data type ADC with 24 significant bits in the mantissa and nearly 1500 dB dynamic range, there would not be much problems in data conversions :-).

While the use of floating point formats greatly simplifies range problems associated with multiplications and divisions, it still does not do any good for additions and subtractions, so you still have to watch for repeated additions of very small values to a large value and possibly regroup the repeated small number additions.

Well since you know so much about kiddy porn toady, I'll bet that's
what you'll put up in place of it! I see you didn't take my advice to
seek professional help, at least try to stay on the meds you use now,
please!
Please try to remember that you are also a ham radio operator on
rec.radio.amateur.policy, so you are just calling yourself names. Why
not show us what you're made of and turn in your licensee just like OTK
did, you don't need it to pirate of experiment! BTW, I think I may have
discovered the Flux Condenser, not to be mistaken with the Flux Capacitor.

Toady, I just looked at your web site. Why do you lie on there and what is your obsession with K4YZ? You talk about being a pilot, but you only have a picture of you with an instructor in an ultralite and your "airplane" is nothing more then a remote control model?

That's a no-brainer, Jim...I've dogged him and dogged him about
his flagrant violations of grammar and reality, and everytime he's
tried to "come back" at me, he's landed flat on his face.

> You talk about being a pilot, but you only

To his credit, Todd owned up to being a student Sport-class pilot.
I'm just surprised he hasn't fired his instructor and called him an
###hole for daring to correct Todd's errors.

It would seem to me that we might find a space for these modes via the
bandplan, same as we have in the past.

I think that making unenforceable rules such as "saying things" is the
breeding ground of disrespect.

> First of all, does anyone have a copy of the current rules and regs for

> Yeah, sure wink, wink!

Agreed. How on earth would someone be in violation of something not
defined? No definition, no rules breaking.

This works on voice HF where you can tune over to
> the offending frequency and say "QLF", "QSY or QRT". Have you ever tried to

Same on PSK31. I've seen those puppies fire up right over top of us,
and wreck the whole segment. Since the nature of PSK31 is such that
QSY'ing isn't as convenient as for SSB or CW, we just shut down or
change bands.

> Their idea of "sharing" in
> the HF band was about the same as K1MAN's or W1AW's idea of sharing their
> bulletin frequencies.

Now that you mention it, W1AW's Morse practice sessions on 80 meters
wreck psk31 too. Most of the time, Morse and PSK coexist pretty well,
but their signa has some nasty looking spurs on it that cover the whole
segment.

> So, in effect, is the ARRL EC campaigning to give the

Dear Glenn,

Question: Can you tell me what you have against little girls? I mean, when you sued Camp Runoia (the little girls camp near your property) just because they stacked cordwood along the road, what were you thinking?

The case was dismissed of course, because the camp removed the wood. According to them it wasn't really interfering with your snow plowing anyway. But my question is this, what kind of syphilitic, rum-soaked moron would stoop to sue a camp for little girls in the first place? Were you trying to teach the gals a lesson? I heard some guys discussing this on 75 meters and they called you a "complete asshole."

Another question from the recent Maine Supreme Court case you lost: Bob Stolt, the attorney at Lipman, Katz, and McKee wrote to Lucas Burke at the Maine Department of Labor. He told Lucas that he advised his clients (the ones who fired you from your engineering job at 95.3 FM in Augusta) not to appear at your unemployment hearing because your behavior was threatening. He thought it would be better to pay the unemployment instead of risk being harmed by you. Did Bob think you might actually be violent toward the people who fired you? He said you had made threats to your fellow employees and your supervisor! Why did you sue Bob Stolt?

I know Bob said he had letters, where you included Lucas in your "conspiracy theory." Bob said you wrote to Lucas and Mr. Wellman and that you discussed your "tantrum" (that's what Bob called it)at the unemployment office. Naturally Bob Stolt had every right (and duty) to warn his clients against someone he thought might harm his clients. Naturally, you lost the case, and then you lost the appeal. Question: What does it feel like to be such a tremendous loser?

Something else has been bothering me about another case you were involved in. I know the court awarded $5,000 to the plaintiff, Kenton Quint, who sued you for $6,000 in promissory notes you failed to pay. I also know Kenton Quint tried to grab stock in Baxter Electronics, and Baxter Associates, in order to try to offset the money you owed, but why did you owe Kenton Quint $6,000 in the first place?

Finally... can you tell me about Charlie Norris? He was the ham who complained to QST about excessive charges you made for your defunct 'Collins Repair and Alignment Service.' Charlie said you removed modifications to his equipment that had nothing to do with the problem in the transmitter. Lee Aurick from QST said he discussed with you the "highly suspect illegal spending of members deposits, with no

communication from you as to when the radios would be repaired and returned." Hmmm, sounds like a familiar story!

While not a league member, I did admire the action they took. In the letter to you, "Unless you can convince me that your operation exists in the best interests of our members, we shall be unable to carry further advertising from you." And to this day, you still can't advertise in QST can you? Is that why you appear to be so angry with the League? Is that why you try to hold yourself up as an alternative to the League? at least the League can afford to pay the bill for their website!!

Your court complaints were dismissed due to insufficiency of service (among other things) weren't they? Remember the time you sued a fellow ham regarding the Manchester Newsletter? That was the Newsletter that referred to you as a pedophile. That case was thrown out insufficiency of service as I recall. I won't even bother asking about the AM power case you completely botched, or the mess you made of your 10 million dollar case against the FCC.

Ha ha ha ha ha. Keep trying old man, someday you just might win one!

Yeah...Let's just forget that this forum has had at least two
participants who had career-length service in military communications

who have testified that Morse Code was INDEED in daily use.

Morse Code is STILL taught to this day in the Armed Forces.

Yep. And since we have drag lines and other "commercial" methods
of fishing, no one may use a hook, line and sinker any more. Who needs
it?

> > An approximation of
> > the amount of such military traffic is a minimum of
> > 1 1/2 MILLION messages a MONTH back in 1955.

I say that was Bravo Sierra. Bravo Sierra in spades.

That would have been 50,000 pieces of traffic A DAY.

> > It should be obvious to rational people that there is
> > NO need for any morse code testing for a hobby radio
> > activity.
>
> There's where you make an illogical jump. You hold up what
> the US military allegedly did, then say it's somehow connected
> to what hams should do.

For CB radio, absolutely.

For Radio Control models, no contest.

For Part 15 experimenters, no doubt.

For an Amateur Radio license on HF...you don't know what you're
talking about, Lennie.

> > It is NOT a "national service."
>
> Actually, amateur radio is internationally recognized by treaty, and
> it's a radio service.

It's an internationally recognized resource that is codified into
law, and, despite Lennie's protestations to the contrary, DOES provide
a service within the United States of America.

His attempts to draw parallels between "The Amateur Radio Service"
and Amateur Radio as a "service" vis-a-vis the Armed Forces is worn,
lame, and ineffective.

> > It is NOT
> > needed to "maintain a reserve of 'skilled' radio
> > operators" for the nation or even a locality.
>
> Sure it is. Just ask those folks who ran the recent emergency drills.
> They were very appreciative of the contributions of amateur radio
> operators.

And again Lennie utters an assertion in the face of FACTS to the
contrary and demonstrates his own utterly failed understanding of what
it's all about...

> > There is
> > only the artificiality of some hazing exercise so

> > that those who pass can adopt the artificiality of
> > doing something that few can.
>
> Nope. It's a bout a basic skill, that's all. Almost anyone can do it.

Blind and deaf persons have passed the Morse Code exam.

Lennie has made occassional statements that he was, at least at
one time, proficient in Morse Code at about 8-10WPM.

If Lennie can do it, then ABSOLUTELY any one else can do it!

> > Naturally, since you are one of those old-timers who
> > thinks of little else but morse code operation on
> > the HF amateur bands.
>
> No, that's not true at all. That's just one of my interests.

I wonder why Lennie keeps trying to bouy that lie when tons and
tons of conversations in this forum have demonstrated otherwise...?!?!

> > "It ain't braggin if ya done it..." I did it.
>
> All by yourself? Or were there hundreds - thousands - of others there
> too, backed up by the enormous resources of the USA - both civilian
and
> military?

We remember the "1.2 million message" claim from two years ago,
Lennie...Back then you tried to make it sound as if it was YOUR doings
alone.

Then you switched gears after a bit of elementary school math
rubbed the numbers in your face and 'admitted' that it was a 'team
effort' at ADA. It still doesn't put YOU in the comm center other than
to change broken black boxes, because YOUR MOS's were as a radio
mechanic.

You were never a radio operator in the Armed Forces.

Now, in THIS post, it was "1 1/5 MILLION messages average for
"military traffic" in 1955", so you've even further diluted your
original boasts.

Before long you'll be claiming how you saved the Postal Service
because you licked a stamp to send mom and dad a letter.

> And you still haven't explained how what happened at ADA a
half-century
> ago has any relevance to ham radio today.
>

>part numbers that are of this type? (E.g., from Analog Devices, TI, etc.)

Most of the folks doing FP (for radar work, for instance) use a pair
of converters and successive-approximation logic to do scaling.

I'm also going to point out here that there are two different kinds of
DSP systems being discussed here.

First of all there are audio processors, which take the demodulated audio
from the receiver, digitize it, and process it. This is what the original
poster is talking about, and these gadgets work pretty well to deal with
heterodyne whistles. Some of them also work pretty well on impulse noise,
at least better than the noise limiter on an R-390. There is a wide
variety of them on the market, each of which has an audio-speed D/A and
A/D pair. The dynamic range required really isn't very high since the
AGC of the receiver has done all the hard part for you. 16-bit converters
are cheap and plentiful and more than enough. For the most part, though,
these devices are noise reduction units and can't do much about improving
receiver selectivity or reducing passband group delay.

SECONDLY, and a totally different animal, there are DSP systems that
directly digitize the receiver IF, and do IF filtration and demodulation
in the digital domain. They may _also_ do some audio processing, but
the big deal with these is that they now have very sharp IF filters
without substantial ringing, and they have extremely good demodulation
without a lot of group delay problems in general. These systems require
much wider input dynamic range, which is usually accomplished with
prescaling. These can be found built into the latest generation of
communications receiver, although folks like Watkins-Johnson also make
retrofit units that you could hang off your old Hallicrafters if you
don't mind paying a few hundred times what the radio costs.

>

No, Hans didn't.

The last significant use of Morse in the Navy was in the late 50's/early 60's. This usage was by small-boys, DD and smaller, on "fox" broadcasts and "A1" ship/shore circuits.

Both uses ended with fleetwide deployment of Jason and Orestes circuits in the early 60's. Morse training for general duty Navy RM's ceased at the same time, and Morse operator became a specialized NEC (MOS to you grunts) held by only a few sailors, mostly in SPECOM branches (intercept operators, etc.).

The single operational Morse use which survived was the VLF SSBN transmissions (two transmitters, one Cutler, ME and the other at Jim Creek, WA). That was a simple slow-speed beaconing system which notified boomers to pop up their satcomm antennas for the actual communications.

Weeeeelp. I don't know why Leonard H. Anderson continues to manufacture/perpetuate the same, worn, lame, and previously disproven lies.

Leonard H. Anderson dealt out weeks of "Nazi", "thug", etc etc endearments by the time I tired of it. His perception of time is pretty poor. At his age, I guess it is to be expected.

I point out that Leonard's frequent insinuations of having been in combat ('I returned fire...' and 'you don't know what it's like to be under incomming artillery fire!') are the very reasons I DON'T discuss my USMC service and won't...at least not in this forum. It's people like Lennie that the virtual "Wall of Shame" was created for U.S. Navy SEAL pretenders.

Maybe we can create a "Wall of Shame" for ex-Army radio mechanics that try to pretend they were really radio operators?

Leonard H. Anderson was never a licensed Amateur Radio operator, yet he "pretends" to know what's in our best interests. He did serve in the Army with a couple of guys who have tickets...One was even allegedly his Best Man. (That musta grated Lennie's nerves knowing the B/M was probably standing there during the vows running 40WPM CW through his mind, wishing the whole mess would get over so he could get home and get on the air!)

Leonard H. Anderson was never a military radio operator, using ANY mode, yet he believes that experience he DIDN'T have in the 1950's Army somehow qualifies his opinions in 21st Century Amateur Radio. He has produced his former Army MOS's in this forum, and not a one of them say "Radio Operator", "Comm Center Supervisor", etc. No doubt he keyed the transmitters in the normal course of his radio mechanic duties, but to call him a "radio operator" is like calling a guy with a Q-Tip in his ear a "brain surgeon".

Leonard H. Anderson was never a pilot (albeit we'll give him the benefit of the doubt on his claim of having been a student pilot...again in the 50's) yet he has professed skill and knowledge of aerial navigation techniques and practice. (He does admit to "DXing" the ATIS and AWOS at LAX...whoopie).

He makes fun of the Civil Air Patrol yet doesn't even know what kind of aircraft they fly. Kinda hard to screw things up...they only have the largest fleet of single engine aircraft dedicated to SAR/DR/Homeland Security. (Lennie...what is CAP's last two acquisitions, and what new technology do they carry?)

On one particular tirade, Lennie went out of his way to call a "farce" domestic Civil Defense programs during WW2, including the aforementioned CAP...Mind you that Lennie had not even reached puberty by then.

Leonard H. Anderson has never been involved in any disaster/emergency services communications program of any agency, service or entity, yet he pontificates at length on how their efficacy. Does post, re-post, and post again the link to a California agency that DOES use Amateur Radio operators to help manage it's program. I know. I knew several of them in the 80's while DOING work with the Riverside, Orange, San Bernadino and Inyo/Kern County EMA's and the California Department of Forestry.

Leonard H. Anderson has never been a parent, yet he has gone on to make suggestions as to how "disruptive" they are, how they are incapable of operating an Amateur Radio station, and they should be prohibited from being licensed prior to the age of 14. I guess this is the point at which Lennie first knew of Amateur Radio, and he figures if HE was not licensed before 14, no one should be.

Leonard H. Anderson does not now, nor to the best of my knowledge ever, had any training or certification in any healthcare or mental health disciplines, yet he routinely demands others "seek help", and ATTEMPTS to extend his non-knowledge into this forum. He alledges to sleep with a woman who had some education in same, so I guess he perceives himself as having that knowledge and experience by virture of mutual exchange of body fluids.

This short laundry list of Lennie's "Didn't Do But Talk Like I Did" is not all inclusive but is certainly representitive of his broggadaccio in this forum.

Then I hope you're not flying it as an ultralight, Todd...That 10
gallon tank takes it out of Part 103.

103.1(e)(2) Has a fuel capacity not exceeding 5 U.S. gallons.

As of today's FAA Registrations, there is no aircraft licensed to
"Todd Daugherty".

Point of interest, Todd..That TEAM is from Tennessee...Ironic,
eh...???

BTW....You look to be an easy 200lbs in the pics you've provided,
Todd. And 10 gallons of gasoline weighs in around 66 pounds. I'm
wondering how that 40hp engine hauls you off the ground and keeps you
at a reasonably safe speed above stall...?!?!

> defined? No definition, no rules breaking.

Not agreed. A digital signal with a nominal bandwidth of 3200 Hz isn't
going to bother anyone noticeably more than a digital signal of 3000 Hz.

> This works on voice HF where you can tune over to
> > the offending frequency and say "QLF", "QSY or QRT". Have you ever tried to

Do you know that for sure, Mike or is the W1AW sig so strong in your
area that it overloads your transceiver? Have you actually switched in
an attenuator after making certain that your noise blanker is switched
off?

You'll note that none of this is currently etched in stone. If you have
questions or comments, now is the time to voice them to the League. If
you don't, you'll have an opportunity to make your views known to the
FCC.

In your view, anyone who does anything not blessed by you is a snow job. Anyone except you who was in the military and is now out of the military is laid off. An Amateur Extra callsign with the "amateur" in capital letters is something to be derided.

> >To my knowledge, Steve has never stated that DOD does not direct MARS.
>
> >His claim is that if there were no radio amateurs, there'd have been

My statement is quite correct.

> The United States ARMY started MARS...but
> under a different name before WW2. Tsk.

I'm well aware of that.

> Davie ought
> to read up on the subject...lots of references.

Lena is the one who should read up on it. AACS and MARS (with the "A" standing for "Amateur" were the names used in the past. The current Military Affliate Radio System would not be in existence without radio amateurs. I first participated in the MARS program in 1969. I last participated in 1985. I participated in the program on the military side in 1969 from the U.S. and in 1971 from Vietnam as a volunteer (quite separate from my other military communications duties.

> MARS always was and remains a MILITARY radio system.

No kidding? Duh.

> A small one, about as effective as having special
> services put on shows and entertainment.

You must be thinking of something different than MARS.

> Morale
> boosting thing.

It certainly was that.

> >That's pretty much why I've left details out. As with Steve's
> military
> >service, Len doesn't know what I did or where I did it and it kills

>
> No problem with me.

Apparently it is a problem for you. You've alluded to it on a number of occasions.

> If you ain't got the guts to
> tell the details, you AIN'T done it. Simple as that.

No, it isn't quite that simple. It has nothing to do with guts. It has to do with having seen how you treat the experiences of others while trumpeting your own.

> >...and Len has invariably demeaned that service. He has always known
> >more about my job that I did. Foreign service tours were dismissed as

They've all been licensed and active in varying degrees for years. Specific, personal activity levels and mode experiences completely aside they are senior members of the League hierarchy who make policy recommendations and decisions. What matters and all that matters is the policy proposals they come up with and whether or not thee, me and the rest of the ~670k of us support their propsals. Or not.

That's not what he said but the net result is the same and it's unacceptable. If the name of the game is mode separation by bandwidth then the bandwidths obviously have to be specified in detail and enforced. These "gentlemens agreement" and "self-regulation" non-rules worked pretty well in days of yore but in today's world they're shaky at best and hopeless anachronisms at worst.

> First of all, does anyone have a copy of the current rules and regs
for
> AutoDATA and Semi-AutoDATA operation on HF? I've been away a while,
so
> someone please point me to that in the Part 97. Let's get that
established
> first.

I don't know if it's carved in stone in Part 97 or if the "listen-before-transmitting" rule falls into the nebulous collection of "good amateur operating practices" but it's out there and the unmanned mailbox-type stations are all in violation of it today. The proposal recommends herding these modes into specific small slices of the bands which is one piece of it I agree with.

> For instance do those stations have to identify in CW or Voice(AM or
> SSB) at any time?

They identify with whatever mode they're using. As long as the FCC monitoring facilities can decipher it.

> So how about some clear rules and regs for conduct of the

Which would do nothing about it. CW would still be allowed from the low edges to high edges of the bands just like it is now.

> Their idea of "sharing" in

No, that's not what's being proposed at all. See the proposal.

> Take a look at K1ZZ's chart and add up the total AutoDATA
> bandwidth across the HF spectrum. Now will we have the
Semi-AutoDATA
> operations spreading out from there? Hmmmmm!

There's a whole lot more to this bag of worms than just the
auto-mailboxes.

> 4. Lest I be labeled a Luddite, I think that a robust Amateur HF
Data
> Network across the nation, managed by dedicated Hams, could be the
> center-piece for revitalizing or defending our reason to exist as a
service
> in the public interest.

That would be nice but unless something very new pops up I don't think
it's a realistic expectation. The history of the rise & fall of the NTS
and the rise of the Internet and it's effects on ham radio is the
reality today.

My own beefs against this proposal are two-fold: Very seldom in the
history of regulation has a thicker rulebook generated an improvement
in the long run. The IRS code is a shining example. Secondly it is my
opinion that modes should to be allowed to duke it out on an equal
basis to sort out which survive and which can't stand the heat and
disappear. With some common-sense limitations like we have today like
the lower edges of the phone bands.

If you roll back to the 1950s a whole plethora of HF phone modes showed
up on the bands and competed with the then-standard AM. We had NBFM,
double-sideband suppressed carrier, single-sideband suppressed carrier
and variants on those. It was a helluva competitive joust spread over
about ten years.

In the end we basically got what we have today: SSB, a few AM stations,
and later some SSTV, etc. The general approach to allowing unfettered
competition worked back then and I don't see what has changed enough to
essentially toss the whole works and start over just because some users
of HF digital modes have shown up on the bands in the past few years.

Seems to me that this proposal is another result of the League being a
whole lot more excited about HF digital modes and their impacts on the
bands than the rest of us are.

Well, I don't know about that.

First off, what, exactly, does the proposal recommend? If I read it correctly, it would subdivide the CW/data bands by signal bandwidth, rather than having anything allowed anywhere, as it pretty much is today. PSK31 on 7003 is legal right now. So is 850 Hz shift RTTY on 14010.

It would also allow the development and use of modes that are now not allowed, or relegated to the 'phone bands.

For example, you can't legally use digital voice outside the voice bands, even if you figure out how to do it in a 500 Hz bandwidth. There's also a rather arcane limit on the symbol rate allowed, regardless of the bandwidth used.

The whole robot/Winlink thing is a related but distinct issue.

The way I see it, the best solution is to have the following:

- Part of the band that's
Take 80 meters:

3500-3575: CW only
3575-3625: "Narrow" data and CW - but no robots
3625-3675: "Wide or narrow" data and CW - but no robots.
3675-3725: All data and CW modes - including robots, Winlink, etc.

What's the dividing line between "wide" and "narrow" data? I'd say 1000 Hz - if it's narrower than 1000 Hz it's "narrow". Otherwise it's "wide".

Existing Generals, Advanceds and Extras keep what they have. Novices and Techs with HF get 3525 to 3725 CW, at the same power level they're currently allowed.

Other bands would be similar. The 40 meter problems will improve as hams outside Region 2 get more kHz - the US should set up its plan for the future (worldwide 7000-7300 exclusive amateur)

Why not?

Too funny if Baxter was to "rebut" your words via placing you on the
wrong end of a defamation suit. Since you are so obsessed with K1MAN,
I don't have to convince how Baxter is pretty skilled at using the legal
system.
ROTFLMAO!

Right. And there hasn't been a fatility yet. After how many years . . .
?

> It would also allow the development and use of modes that are now not
> allowed, or relegated to the 'phone bands.

Might be's and maybes don't count. Making provisions for modes which
don't exist is like a state buying up real estate for highways which
may or may not ever be built. As far as mode development space is
concerned there are vast open spaces in the bands above 30 Mhz which
are begging for experimental work.

> For example, you can't legally use digital voice outside the voice
> bands, even if you figure out how to do it in a 500 Hz bandwidth.
> There's also a rather arcane limit on the symbol rate allowed,
> regardless of the bandwidth used.

Develop it up the spectrum then petition the FCC to take it down into
the HF bands. IF it fits and has real potential for volume use. But I'm
not holding my breath waiting for any such thing to happen. Nine years
ago this month the League petitioned the FCC to allow the development
and use of ham spread spectrum comms at the behest of TAPR and the FCC
obliged. I have yet to hear about the first-ever ham SS QSO. In my
opinion the much-ballyhood "digital revolution in ham radio" is 99% hot
air so far despite the fact that there are no regulatory impediments to
the development of the technologies which could be used on HF.
Including digital voice comms.

> The whole robot/Winlink thing is a related but distinct issue.

I agree with that and the problem of unmanned stations*must* be addressed. But not by playing top-to-bottom 52 Pickup with the HF ham band regs.

> The way I see it, the best solution is to have the following:
>
> - Part of the band that's
> Take 80 meters:

> 3625-3675: "Wide or narrow" data and CW - but no robots.
> 3675-3725: All data and CW modes - including robots, Winlink, etc.

I strongly support boxing in the robots but I'd much rather leave the rest of it alone to allow Darwinian-type evolution take care of the rest of the modes under the existing regs.

By doing what? Most if not all countries outside the U.S. including Canada allow voice all the way down to 7.000. Is that what you're suggesting? And how would that fit the ARRL proposal??

> Why not?

Because what you're suggesting and what the League is suggesting amounts to a welfare system to protect CW and the other narrow modes.

If enough of us say that it's what should be done, maybe they
will listen. Imagine if the committee is deluged with folks promoting
my plan, or a version of it?

In any event, the main target is the FCC. Because *they* make the
rules.

ARRL has a good idea and a bad implementation, that's all.

For what its worth....here is what I sent in to ARRL, Alabama SM and SE
Director, etc.

Below are comments from the South East Contest Club reflector. Written by
K4SB.

I find his arguement very compelling. In particular the part of automatic
control.

Additionally I want to say that I beleive a specific segement of CW only
should
and MUST be applied. I suggest the bottom 20 Khz of ALL HF BANDS, this to
include 160 meters and the so-called WARC bands. Open to ALL those licensed
for HF. There is NO need for a Extra class ONLY segement for CW.
And based on the 5wpm code requirement I doubt the new Extras will be too
concerned about a CW EXTRA ONLY segement.

I believe if there is no restricted segment for CW you will find the digital
modes
of under 200 cycle width taking over and running CW off the bands for good.
Attended or otherwise.

Not completely on subject....I feel CW should be continued in Amateur Radio,
and
by allowing ALL HF licensees to use it in the same place, it could indeed
help
in keeping the mode alive.

Daniel L. Jeswald W4NTI
ARRL Life Member

My own suggestion is to demand that the proposed petition be changed
so that ALL unattended or automatic operations are ONLY allowed in
areas where transmissions over 500 Hz are allowed.

It is important to realize that significance of the 200 Hz, 500 Hz,
and 3000 Hz thresholds is that no signals wider than the threshold
are allowed higher than the threshold frequency, but that signals more
narrow than the threshold are still allowed wherever the wider
signals are allowed.

In practical terms, this means that Winlink could still use Pactor-II
(500 Hz wide) where Pactor-III (2400 Hz wide) is used during the time
Winlink was transitioning from Pactor-II to Pactor-III and SCAMP.

Disallowing unattended transmissions, where either end of the link is
unattended, would
eliminate the QRM from Pactor mailboxes to CW, PSK31, RTTY, MFSK16,
and other digital
modes, that is currently such a problem, without harming Winlink's
ability to handle their 150,000 emails for their currently 0.7% of the
US hams.

There is no guilt in military service, unless you lie about it. Like saying that you have "real military experience" when you don't, or saying that you have "seven hostile actions" when you have none.

Best of Luck.

Just "radio communications?" I thought this was the exclusive domain
of AMATEUR radio communications? Other forms of radio communications
knowledge and experiences have absolutely no bearing on this group.

> You see, Brian, THAT is why you catch the flak taht yopu do for
> your behaviour.

Spell much?

> Just like Lennie, you like to stop where it serves you to do so
> and ignore facts.

You'se guys have repeatedly said that this is about AMATEUR radio. Not
other radios and other radio services.

> > > If I did talk about any military service I had, you would

I would not exist to you, Steve, because you would cease to exist.

How is it that Jim can say to use a person's name and call, yet he
repeatedly snipped Kim's call in his replies to her???

Miccolis invoked. Miccolis loses.

I usually use a microphone to say good-bye or sayonara. The stock
microphone that came with the TS-690S is good, or the Heil headset. I
leave the antenna outside for radiating the signal.

How's the antenna install that your sister did for you on her last
visit?

Hams and non-hams can serve in the military. Which branch did you
serve in?

You know, I recall the ARRL saying that they had no "concensus" wrt
reducing/dropping the morse code exam, but I'll be damned if they
didn't find concensus wrt to this. I'll watch QST for the results of
that "substantive" survey they must've done.

Tsk, tsk, tsk. You don't know anything about what took
place on three successive R&D jobs where NADC was the test
agency for evaluation of SECANT (the RCA acronym for the
anti-collision system back then).

At NO time was I doing anything "for" NADC. NADC was the
federal test agency for that project and a similar one of
Minneapolis-Honeywell. My employer was RCA and that remained
so until 1975. As a field engineer I was representing RCA
for technical support of RCA equipment under test. NADC had
the aircraft and air crews available in 1971 and were directed
by Naval Air System Command to perform the testing of RCA's
and Minny-Honey's systems. USN was requested by the U.S.
government to do the testing (as a disinterested third-
party) and the USN passed that to Systems who passed it to
NADC.

SECANT (SEparation and Control of Aircraft by Non-
synchronous Techniques) performed well on the air-to-air
testing, as did the Minneapolis-Honeywell system. The data
acquisition and data-reduction by NADC was deemed costly (to
NADC) so that group was directed to employ tape-recording
of data instead of using the old-style (at the time) of

phototheater recording on synchronized motion-picure film. The government and USN suggested some slight alterations in threat logic used to provide avoidance manuever warnings as well and both corporations agreed to do a second generation of collision avoidance equipment to be tested in 1973. This generation included bring-outs of signals and logic states to be tape-recorded in a multi-channel tape unit. That second generation equipment was successfully flight-tested but I was spared having to be the on-site field engineer. I did participate in some of the design on that generation and did work with the principal NADC engineering crew that visited Van Nuys (twice) before 2nd gen testing began.

Based on the results of that 2nd gen flight test, RCA was requested to and awarded a contract for a third generation, this time representing a "preproduction" airborne version. A "prepro" is as close as can be to a final production prototype and includes as many specialized circuits as would be considered for a production model. That was done by mid-1975 and I was responsible for the 8-channel (pulse) receiver, front-end to video out (1.6 GHz RF band then) plus co-designer of the (non-flyable) checkout set which presented simulated air-traffic signals to evaluate crowded conditions. Jim Hall, KD6JG, was immediate group manager and Al Walston, W6MJN, was both my office cubicle sharer and the designer on the transmitter (pulse) portion. Packaging shrunk from 3 full-ATR cases of generation 1 to the quarter-ATR single-case of the 3rd generation. Three 3rd generation SECANTs were done and checked out, ready for shipment to PA, when the U.S. government (likely through FAA) canceled any further work or testing on a new aircraft anti-collision system. The government decided on adopting a relatively untried hodge-podge system devised by MIT which supposedly fit inside the RF spectrum of present-day ATCRBS frequencies.

>Now suck it up and move along,
>old man! You ran your mouth off about all your hot jobs.

Wasn't a "hot" job. Was an everyday kind of design job.

It was "hot" only in the SAW filters used to make it possible to have "brick-wall" response matched filters in a terribly small size in the 50 to 65 MHz region. RCA corporate back east funded one of the labs there to do the design and aluminum deposition on quartz plates (first time I ever put a purchase order in on BLANK quartz...kind of a novelty). In 1974 that was truly state of the art. Once they were shipped in to Van Nuys I had to mount them on something...RTV on epoxy PCB with compression-bonding wires connecting aluminum film contact ends to PCB lands. Luckily, Van Nuys had a

good thin-film lab at the time. Skirt response on the
filters was (to me) unbelievable...50 db drop in less
than 100 KHz at the edges, very nearly flat across the
top in the mid-VHF range.

> You happened
>to drop one name where I had an "in". I found you out.

Steve Robeson was *NEVER* "in" on either the RCA or
Minneapolis-Honeywell aircraft anti-collision systems.
Steve Robeson wan't even AT NADC in 1971 to 1975. He
was a jarhead who never got beyond Warminster NAS on
the other side of the road A DECADE LATER.

>> You are living in some fantasy again. Reset.
>
> Reset yourself, old man. About 50 years worth.

No, just two hours worth...had a good sandwich for lunch
and it tasted like more. I'll settle for another cup of
coffee, though. :-)

Tsk. I have a copy of the FINAL report on SECANT. I
helped write it (name is on the cover). NOWHERE in there
is any mention of any "Steve Robeson" as part of the
government personnel at NADC. The document identifier is
VNES-74-TR-001 and was then marked "company confidential."
It's somewhere in the General Electric archives now.
Considering it is 31 years later, I doubt that presence
of the revealed document number is going to hurt the
RCA Corporation. :-)

> That you try and redirect from YOUR misfortunes by making such
>claims is ludicrous and transparent.

Tsk. Lil Stevie can't name detail one on what went down
at NADC, has NO knowledge of the SECANT or Minny-Honey
System testing. You can't even name the military aircraft
at the NAS or which ones were used for anti-collision
testing. [one was shared with NAVSTAR...which would later
become GPSS...:-)] Tsk, tsk, tsk.

>> > I had all the "proof" I need, Lennie.
>> >
>> > A third party with no allegience to protect. A man with a
>> >professional reputation that I can bank on.
>>
>> You have BOGUS "proof." Non-existant. That "acquaintence"

>
> Nope.
>
> What I TRULY know is that YOU find it hard to believe that there

>really are people in the world who didn't develop a life-long devotion
>to your wisdom, knowledge and skill.

Tsk, tsk, tsk. :-) The only person "devoted to me" is my
wife...as I am devoted to her. Nothing else is requested in
life. The only "credential" needed is that marriage
certificate. :-)

>> > He didn't know you "a decade after (you were) there". He knew
you
>> >WHEN you were there.

Amazing. After a total of six trips to NADC and a total
time there of about three months, this (fantasy) person
"knows" me? 34 years AFTER the fact?!? :-)

Incredulosity uber alles! :-)

>> >
>> > And I do not name him because I protect his privacy at his
>> >request.
>>
>> 1. You can't name him because he doesn't exist.
>

Total BULLSHIT, bluffmeister! :-)

>> 2. The ONLY thing you are protecting is your own
>> bragging LIE about that fantasy individual.
>
> That is not a truthful statement. And no matter how many more
>times you repeat it, Lennie, it STILL will NOT be true.

Sweetums, NOBODY can "prove" the non-existance of a
non-existant entity. NOBODY. :-)

All you have is a BLUFF. A LIE. :-)

>> 3. "Protecting privacy" is totally bogus. Rationalization
>> expressed to attempt masking your own LIE.
>
> No rationalization. A promise to a friend.

QUIT bullshitting us, Little Big Man. You tried a BLUFF.
You CANNOT BACK IT UP. :-)

Name the department this (fantasy) "friend" worked in at
NADC. Name some DETAILS that ONLY an NADC worker would
know. You have NOT revealed a thing.

>> > I have no reason to doubt his assessment or opinion.
>>
>> You probably believe your own fantasy. To you it is

>> "truth." To everyone else it is just your fantasy.
>
> Again, Lennie, you may repeate that over and over if you think it
>will salve your ego...But the bottom line is that people at NADC did
>not find you very effective.

No problem! I WILL "repeate" it (better, I'll just repeat
it) that I could care less how "that [sic] people at NADC
did not find..." I never worked for NADC, never worked for
the USN as a civilian, never even applied for any job at
NADC. :-) I was an employee of RCA Corporation at the time
and REMAINED an employee until the RCA shut-down of the Van
Nuys, CA, Electromagnetic and Aviation Systems Division's
Position Locating Systems Group in November, 1975.

> My "word" is bogus to YOU since claiming it is so is the ONLY way
>you have of escaping the fact that you ran your mouth off one time too
>many.

Your "word" is bogus. Period. You can't name a thing about
that (fantasy) "reference" individual...not a thing about
what went on at NADC in 1971-1975, not a thing about any
other projects under Naval Air Systems Command then.

You are FABRICATING a falsity. You have NO references
except what I reveal. YOU can't describe a damn thing
except your bogus "outrage" at "not being believed." :-)

>> Provide this "name." Without it you have a bogus
>> "reference" that means nothing.
>
> Here's a name that is bogus and means nothing: Leonard H.
>Anderson.

Tsk, tsk, tsk. Emotionalism and name-calling.

Not to worry. Your buddies Jimmie Miccolis and Davie Heil
will support you. PCTA extra Double Standard MUST be
operative to you and them! :-)

>> You are SICK and need help. Go get some.
>
> I am quite well, thank you. You, on the otherhand, still have
>issues to deal with.

No "issues to deal with." Haven't submitted any
manuscripts to any publications having "issues" in the
last year. Not expecting any proofs on those. :-)

> Accepting that not everyone thinks you're the
>genius and expert YOU think you are is one of them.

Poor baby. Getting all petulant and snoddy again?

I COULD CARE LESS. :-)

Electrons, fields and waves don't much care for human emotions like "love" or "personal desire." One works by THEIR laws, not yours, not by somebody else's ideas.

Similarly, when trying to "prove" someone "wrong," you have to REALLY PROVE them by REAL references, details, information, VERIFIABLE sources. Trying to use some unspecified, unnamed imaginary person is just bluffing BULLSHIT. Quit doing that. You will be better off doing so.

> You're outted, Lennie. Get over it.

Tsk. I was out this morning. Nice day. Still is. Tomorrow will be a repeat of that. I will not "get over it," since I like that kind of weather. :-)

Let me just repeat what your buddie Jimmie Miccolis used to write in here: "It ain't bragging if ya done it!" Okay, I did it.

Not only that, I KNOW what was done and have valid references as to what I did there. Not a problem to me. Seems to be a helluva problem to you, though, and you have your psychotic imagination in afterburner and you can't get off the ground. Tsk, tsk.

Get some mental help. You need it.

in
>a social setting where their status as veterans was known and then
>announce that I was a vet too. That's one "guilty by association"
that
>I will gladly avoid.

Tsk, tsk. You had BETTER avoid it! Once you step away
from the Legion Hall bar YOU are liable to not make it out
of the parking lot! :-)

Sweetums, I have an HONORABLE discharges from military
service. Kellie ain't got a one! Kellie couldn't make it
in or got away with staying out (take a pick, prick).

What have YOU got? A medical discharge. You claim, and then
try to bluff everyone into believing "it was changed to an
'honorable' discharge." Do WE have "proof" of that? NO!

Tsk. I can digitize my 1960 HONORABLE discharge and send it
(have to get it out of the bank's safety deposit box). It can
be verified at the St. Louis military records archives. It can
probably be verified through the VA...but I've had NO need to
do that myself. My employers have all checked and verified
such was true for me, as has Social Security after my 65th
birthday. Not a problem in my case.

So...we've got BIG MOUTH Cuss-Everyone-Out Stevie bad-mouthing
every one who disagrees with him and his claims of "seven
hostile actions" and other bullshit. We have to take his

"word" that all he say is "true." :-) Like his "reference" to my "employment with NADC." [which never happened since I was never employed by the USN in any capacity]

Poor Stevie doesn't like to "associate" with myself or Brian. Tsk, tsk, tsk. Poor baby. He should stay at the Legion Hall bar and keep telling his fantasy stories. Maybe someone WILL believe him (if they've had enough to drink). "Belief" is Stevie's BIG PROBLEM. He can't live with it...makes every-one else "prove" theirs and then keeps bad-mouthing them when they do! Psychotic Psteve. Tsk.

Me, I got NO problems associating with REAL military veterans. Done it much...and NOT at some Legion Hall bar. Done it for years. I'm proud of what I did and there are NO blemishes on my military record. I'm sure Brian has a good record, too. "It ain't braggin if ya did it."
I did it.

Get some mental help, Psychotic Pstevie. You need it.

LenAnderson@ieee.org

ex-RA16408336, U.S. Army 1952-1960, HONORABLE discharge

In his "heart" he served in everything...

>> Here's a hint: The Canadian military forces used Morse Code in
>> WW2.
>
>Oh, now I see the connections. Because you saw photos of Ham soldiers
>in QST, and you're a ham, you "served" by extension. The coat-tail
>connection.

Of course. [he does expert "tailoring" on that coat-tail]

Don't forget that Jimmie "served" in every morse combat
situation...before and after "pioneering the airwaves"
with all the first radiomen...not to mention being a
personal assistant to Reggie Fessenden. :-)

>> I could go on about the political and economic effects, but since
this
>> is a radio newsgroup I thought I'd stick to electronic and
>> radio subjects.
>
>And Canadian war museum topics.

...and ANYTHING else that has emotional appeal to all
those MORSEMEN out there. If it has MORSE in it,
Jimmie MUST stamp it "approved for r.r.a.p. use." :-)

Stevie's "facts" are right out of Twilight Zone.

Stevie is the National Enquirer's wanna-be reporter
who was rejected by the editorial staff en masse as
"being too fanciful for National Enquirer's
standards." :-)

>> I see. His mistake somehow justifies *your* behavior?
>
>Mistake? He's had ample opportunity to correct that mistake. Instead
>he piles up the lies.

It must be eternal spring...whatever Stevie says, Jimmie
approves. [kiss, kiss...]

>> Godwin invoked. You lose.
>>
>> Why not use the person's name and callsign?
>
>Kim, W5TIT.
>
>Miccolis invoked. You lose.
>
>Rest of your double-standards snipped.

Jimmie is thinking along Henry Ford lines...viz, the
old quote about the Model T Ford: "You can have any
color you want...as long as its black."

Anyone can say anything positive about morse code in
here...in any manner the pro-coder wants...and Jimmie
will "judge" them "approved" and even "praise" the
"manly manner" the pro-coder boosts the glory of
Morse. :-)

>
>73, de Hans, K0HB
>Master Chief Radioman, US Navy

Thank you for factual corroboration, Hans.

As far as I know now, the VLF stations evolved into ELF
but at different locations. According to a USN Fact
Sheet those locations are at Clam Lake, WI, in the
Chequamegon National Forest (operational since 1985)
and Republic, MI (operational since 1989). The Republic
station is synchronized in time with Clam Lake, all
under operational control of NCTAMS LANT headquarters
at Norfolk, VA. Their transmission protocol is "Deep
Black" slow-speed data and the Boomers' (and Shark's)

electronics rooms (what used to be a tiny "radio room" cubicle in WW2 boats) have "Black" ELF receivers always on-line (as are their automatic decoders) for Alerts. For an illustration of a Boomer electronics room, go to the www.fas.org site and search down through a maze of internal links to USN stuff; take info there as old and not containing all the juicy details but has the appearance of unclassified USN documents.

My nephew-in-law was an electrician's mate on a shark, involved with reactor power plants, not radio. All he said about his shark boat's electronics room was "we couldn't hang around in there." :-) There was no such thing as a "nuclear boat/ship" in Canada or any other Navy during WW2. The only encryption used by the USA (and Canada as well as the UK) was the "Sigaba" as shown on the USS Pampanito floating museum and at the NSA on-line Museum. The "Sigaba" system (TTY), upgraded to post-WW2 standards was severely compromised by the capture of the USS Pueblo off the North Korean coast in 1968. The replacement system was compromised by CWO Walker who was convicted of espionage and is serving a federal life term. The present encryption methods are apparently two generations later than the Walker-compromised crypto systems...and quite secure.

The original "Sigaba" on-line TTY crypto terminal was first installed in the 1940s and used to relay intercepts of the infamous "14-part" diplomatic message of Japan that was supposed to be the formal start of the Japanese declaration of a state of war. "Sigaba" was later used to coordinate USN fleet movements to enable the success of the Battle of Midway. That TTY encryption was never compromised through intercepts. It was compromised by actual capture of later-generation hardware on the USS Pueblo.

The "Sigaba" encryption looked like severely distorted TTY to any standard, non-crypto TTY terminal, totally unreadable. The Far East Command Hq (Pershing Heights, Tokyo, Japan) had their crypto room in the sub-sub-basement of the main Hq building, the former Japanese War Ministry Hq. The post-WW2 improved "Sigaba" (known by various other names) was used by US Army Field Radio units in "Angry-26" huts during the Korean War. A few M-209 Code Coverters (WW2 non-electric devices in small cases of the portable typewriter kind) were used in the field in Korea for small-radio encryption but that ceased by the time of the active phase beginning in Vietnam.

By interviews and other correspondence, the U.S. Army maintained morsemanship as a requisite for Field Radio MOSs ("NEC" to swabbies?) up to about 1972. USA had several different communications MOSs then, especially in TTY over various systems and including the first of the military satellite communications links. However, tactical use of morse code in the Army was essentially nil at that time. Encrypted voice in the field was first tried operationally during the Vietnam War over the PRC-25s and PRC-77s through peripheral boxes. Such is now easily selectable by front panel controls on the SINCGARS manpack and vehicular sets (COMSEC is built-in to nearly every radio now, including military HTs). During the First Gulf War, Special Forces had slightly old "threes" having 1200 BPS "chiclet" keyboards and LCD text display working on the military aviation band of 225-400 MHz. The mil av band was also relayed by mil satellites as well as "Joint Stars" relay aircraft. Moderate crypto system built-in on the "threes." There was no movie-style "behind enemy lines" use of morse in the 1990-1991 period...or afterwards.

[etc., etc., etc...]

>Granted, you didn't see any "morse code modes" in use at
>ADA. But to say there was none used at all, anywhere in the
>US military is a different thing.

Tsk, tsk, tsk. Changing the subject.

Long-distance point-to-point communications bore
the brunt of ALL military branchs' message traffic
to an amount of GREATER than a million messages a
month.

>What's interesting is that you have to qualify the statement
>as "long-distance point-to-point communications" - because
>Morse Code was then still being used *extensively* by the US
>Navy, by the maritime radio services, by aircraft and by many
>other radio services such as press services.

"Extensively?!?" HOW DO YOU KNOW? :-)

Sweetums, I WAS PART OF IT. :-) Army station ADA, as
assigned to Far East Command Headquarters, carried not
only Army traffic, but some USN traffic, some USAF
traffic, some Press Services, even some Red Cross
message traffic. ALL on TTY. Not a bit of morse
code. And ADA was just the third largest station in
ACAN (Army Commmand and Administrative Network). That
"little" station (36 transmitters, all over 1 KW and
on 24/7) relayed 220 thousand messages a month (1955).
WAR (Washington Army Radio) handled over a million a
month then.

Sweetums, that "extensively" is just your wishful
thinking. Of course there was SOME morse being used
by all branches in 1953. But, HOW MUCH? YOU DON'T
KNOW! YOU WERE NEVER IN. YOU NEVER DID IT FOR THE
MILITARY.

>Your tunnel vision of "long-distance point-to-point communications" by
>the US military is about as relevant as the

>fact that Morse Code wasn't in use on the AM broadcast band in the
>1930s.

Tsk. A reducto ad absurdum. You must be getting
rattled, sweetums.

You are too young to have listened to Walter Winchell's
"news broadcasts" on radio. He "used morse code" at
every opening...apparently for some weird "authenticity"
since ol' Walt was getting on towards Alzheimers at the
time.

>And it was on fixed, predetermined frequencies, using equipment
>most individuals could not afford to buy.

Tsk, that's called PROFESSIONAL COMMUNICATIONS, sweetums.
When one is IN the Cold War and trying NOT to let it
develop into a nuclear confrontation, one uses absolutely
the BEST stuff to "get the message through."

I'm sure the Canadian military did the same within their
budget constraints.

You want the U.S. military to act like amateurs? :-)

Some of us think that POLICY of the U.S. government
is "done by amateurs" but that's a whole other story.

So, famous historian of radio, DID THE CANADIANS USE
MILITARY RADIO LIKE AMATEURS?

>And it was *not* the kind of communications that make up the vast
>majority of amateur radio communications.

Don't misdirect, sweetums.

YOU started this thread with an emotional message about
"morse code in the window" at a CANADIAN MILITARY
museum. Try to stay within a few light-years of the
subject.

>At some point, anyway. The US Navy was still using Morse Code long
>after the beginning of the 1950s.

HOW DO YOU KNOW? YOU DIDN'T SERVE.

>So was the Coast Guard.

HOW DO YOU KNOW? YOU DIDN'T SERVE.

>> That SHOULD have some meaning to rational
>> persons insofar as the efficacy of morse code for
>> communications...
>
>There you go, Len, assuming your conclusion.

>
>What you're saying is that because the Army didn't use it,
>nobody should use it.

For the VAST MAJORITY of message traffic in the U.S.
military - ALL BRANCHES - morse code mode was NOT
used "extensively."

What the heck, Jimmie Noserve, you weren't IN any
military, not even in Canada. Why are you all upset?

>Here's a hint: Ham radio isn't the US Army. When Uncle Sam
>is willing to buy radios for all hams, then maybe you'll
>have a point.

OH! OH! ERROR! MISTAKE!

First of all, your buddie and pal, Stevie he say
that "MARS >>IS<< amateur radio!" Tsk. MARS' first
letter in that acronym means MILITARY.

Secondly, check with a REAL MARS civilian volunteer.
You will find out that the military GIVES them radio
goodies. No need to "buy." Military already bought
the stuff and used it. Be NICE to MARS folks,
Jimmie, maybe they'll GIVE you an AN/FRC-93 for
nothing; it's a Collins KWM2 Commercial transceiver
with a military nameplate.

>> too prone to human errors by its operators,
>
>All communications modes are prone to operator error. The
>person typing on a teleprinter can make a mistake, too.

HOW DO YOU KNOW? Don't see any TTY in that picture of
YOUR ham shack! :-)

>Nope. You just don't like the mode.

Sweetums, I just don't LIKE the TEST for it. :-)

Tsk. You get SO confused when someone doesn't "like"
EVERYTHING about morse code!

>> by now, EVERY other
>> radio service has either DROPPED the mode (if they used
>> it at all in the past) or NEVER CONSIDERED it when that
>> radio service began.
>
>So what, Len? That's like saying that since almost all motor vehicles
>don't have manual transmissions anymore, no vehicles should have them.
>gave up having

"...give up having..." Tsk. Got so flustered you couldn't
finish the sentence? :-)

Hello? Have you taken a state driver license exam?

Lately?

Look again and see how many questions there are on
MANUAL TRANSMISSION automobile operation.

Sweetums, I was talking about the morse code TEST.

You began this whole thread with an emotional thing
about "morse code in the window" at a Canadian
military museum. I wasn't talking about automotive
design. There's a rec newsgroup on that but I don't
know it's name. Automotive design doesn't belong in
here anyway.

>The main reason Morse Code was replaced by other modes in
>other radio services is that it required skilled operators
>at both ends of the circuit. Skilled operators cost money
>and have to be taken care of, and the speed and accuracy of
>communications is limited to their skill level. So the skilled
>operator was eliminated by technology, to save time and money.

Riiiight, Jimmie, but you've de-emphasized "other modes"
to try and make your case. You didn't for a lot of
reasons.

Day-in, day-out morse mode manual comms can probably
handle 20 WPM rates. If the morsemen are good. I'm
talking SUSTAINED hour-by-hour operation, NOT burst
mode stuff which CAN be faster.

The OLD teleprinters could chug along CONTINUOUSLY at
60 WPM from the 1930s onward. Paper tape could be
prepared ahead of time and used in automatic transmitting
distributors, be punched at the receiving end also.
By the 1960s the NEWER teleprinters were chugging along
at 100 WPM SUSTAINED. No problem. Teleprinter makers
did excellent electromechanical designs. Just think,
SUSTAINED THROUGHPUT at 100 WPM! 24/7 if there were
folks to keep feeding the machines paper, p-tape, and
electricity. No bathroom breaks, no need to sleep,
no need for food breaks.

By the 1970s the electromechanical systems were being
replaced by DATA, teleprinting by electronics, first
with rates of 300 WPM, then 1200 WPM, then 2400 WPM,
and finally at 56000 WPM over voice-grade circuits.
[getting close to Shannon's limit on today's modems]

>What you're saying, then, is that you want to eliminate the skilled
>operators from ham radio, too.

NO, sweetums. What I've ALWAYS SAID is to toss, throw
away, eliminate the morse code TEST for amateur radio
license. THE TEST.

In the United States, "ARS" does NOT stand for "Amateur
RadioTELEGRAPHY Service." There is NO requirement for
any U.S. amateur licensee to operate on morse code mode.
ALL allocated modes are optional to use for any class.

Why do you keep insisting that the ONLY SKILL in ham
radio is morsemanship?

If morsemanship is such a wonderful thing, then it should
be optional for any ham to become a good morseman ON HIS
OR HER OWN. Since the U.S. government doesn't require
exclusive morse use, it shouldn't be ON the TEST.

>> For over half a century (actually, since before WW2)
>> the brunt of messaging in the military has been done
>> by modes OTHER than morse code.
>
>Even if true, (it's not) so what?

HOW DO YOU KNOW? YOU'VE NEVER SERVED IN THE MILITARY.

>You're argument says that since most US Navy ships stopped relying on
>the wind for propulsion long ago, nobody should own a sailboat today,
>even for "a hobby pursuit, a recreation, something done on free time
>for enjoyment."

Sweetums, this newsgroup is NOT about BOATING.

YOU started this thread with an emotional message about
"morse code in the window" at a Canadian military museum.

Now you want to hoist a sail on your lil sabot? :-)

Show me the SSBN that uses "sail" as an alternate means
of propulsion...or the USS Kennedy aircraf carrier. :-)

Better yet, tell us how the USCG appreciates the use of
morse modes on harbor and river VHF communications? :-)

>Very illogical.

Sweetums, you almost take the prize for today's reducto
ad absurdum message content!

>The old Bell Telephone system handled a lot more than 1.5 million
>"messages" a month back then, too.

HOW DO YOU KNOW? WERE YOU A TELEPHONE OPERATOR?

>What possible connection does that have to the self-trained,
>self-funded amateur radio operator?

WHAT POSSIBLE "CONNECTION" does a NON-VETERAN, NON-
CANADIAN have with a Canadian military museum that
has "morse code in the window?" :-)

>> It should be obvious to rational people that there is
>> NO need for any morse code testing for a hobby radio
>> activity.
>
>There's where you make an illogical jump. You hold up what
>the US military allegedly did, then say it's somehow connected
>to what hams should do.

There's NO "allegedly" going on, Sweetums. It is recorded
history. I was THERE, DOING IT. You were NOT.

>But you never say what the connection is. Just that "it's obvious to
>rational people" - which it isn't.

I never said morsemen are "rational." :-)

>> What morse code testing for a hobby radio activity
>> has become is a travesty, a gross artificiality kept
>> in there by old-timers who managed to pass such tests
>> and keep insisting that all newcomers MUST do as they
>> did.
>
>No, that's simply not true at all. It's just your way of
>rationalizing your hatred, Len.

"Hatred?" Ain't NO "hatred," Jimeee.

You must think the ARS stands for Amateur RadioTELEGRAPHY
Service. You cannot conceive of the possibility that
U.S. amateur radio could ever exist without that beloved
code TEST and all the "importance" "skill" "grandeur" and
"nobility" of morsemanship. :-)

>Since amateur radio operators *do* use Morse Code extensively, today,
>on the air, for a wide variety of activities, it is perfectly obvious
>to rational people that a basic test of Morse code skill is a
>reasonable test requirement for a license.
>
>That's the whole thing, right there.

NO! ERROR! MISTAKE!

The FCC has NOT *REQUIRED* morse use over an above any
other mode, any class licensee, for years. ALL allocated
modes are OPTIONAL for use. Since all those allocated
modes are OPTIONAL, then there is NO reason to require
a morse code test for a license.

Of course, that is a rational reason. Since some
morsemen are irrational in their absolute DEMAND to
RETAIN morse code testing, you might not approve. :-)

>> You resent knowing that another has done
>> it.
>
>I don't resent it at all, Len. I'm just bored by your constant
>repetition of the same old story and illogical conclusions.

Poor baby. Just like your buddie and pal, Psycho Psteve.

Anything against your Godlike judgement is an "error" or
"mistake" and you DISALLOW all such arguments. :-)

>And you still haven't explained how what happened at ADA a
half-century
>ago has any relevance to ham radio today.

Oh, my, you are still "unconvinced?" ADA, as well as AHA,
AGA, and lots of other Army stations used vacuum tube
transmitters. Seems to me that station N2EY uses TUBES!
Tsk, over half a century later and Jimmie still relies
on TUBES! :-)

Oh, and the SAME principles of physics applied to RADIO
then as well as now, regardless of human-designated
radio "service." ADA did its operation on HF. By odd
coincidence (or is it?) station N2EY also uses HF!

Sunnuvagun! :-)

>Here's one more analogy to your alleged logic:

Now, now, Jimmie, you are getting testy... :-)

>Inexpensive calculators have been around for a couple of decades now.
>Almost nobody in business or the professions relies on manual
>arithmetic anymore - even the smallest businesses, for example, use
>electronic cash registers to do the calculations.

Wowee...such "extensive" analogy building. However, some
ERRORS!

"Pa" Watson, the one who began IBM, began as a cash register
salesman for NCR. All-mechanical cash registers. Those
worked real well for SMALL businesses before I was born.
The HP-35 and all the rest of the scientific calculators
that followed obliterated the demand for "slide rules!"

>Where such manual calculation was once done, it has been completely
>replaced by electronic methods. Manual calculation
>is too slow, too error-prone, and too dependent on human skill.

Oh, my, yes!

>Therefore, we should not require anyone to learn how to do such
>calculations as addition, subtraction, multiplication or division, let
>alone square roots or other techniques.
>

>That's what you're saying. And it's nonsense.

Now, now, Jimmie, you are falling into the reducto ad absurdum "argument" again. :-)

Maybe there's some situation where a cash register or calculator was "necessary" for radio communication, but dang if'n I know of one. Try to remember I've been doing radio communications for a long time now...longer than you've been alive (or at least born, that is). Never heard of a radio license exam that REQUIRED demonstrating basic arithmetic skills to get that license. :-)

Tsk. Anyone wanting logs or trig functions to better than 5 figures needs to do a Taylor Series or other polynomial equations to get an accurate answer?!? That's DUMB, Jimmie, and you SHOULD know that is a complete waste of time. Let the little scientific calculator do it...good to 12 digits...double-precision computer calculations are good to 14 decimal digits.

But, you are trying to make an "analogy" of basic math skills to RADIO LICENSING! Good grief. Not ONE bit of morse code involved in basic math skills! Tsk. You ought to get all ARS licensees to WORK SPARK TRANSMITTERS! VERY BASIC! THE *FIRST* TRANSMITTERS FOR AMATEURS! Tradition and all that...long before you were born, Jimmie.

Yes, I know "spark" is not allowed as an emission. So, why are you constantly emitting all that nonsense about the NEED TO KNOW morse code? Why do you force your personal desires on all newcomers? Why can't you live and let live...allow the ARS to ADVANCE beyond the "Archaic Radiotelegraphy Society?"

LenAnderson@ieee.org

4259. Do You Want To Know For Sure That You Are Going To Heaven? The reason some people don't know for sure if they are going to Heaven when they die is because they just don't know. The good news is that you can know for sure that you are going to Heaven which is described in the Holy Bible as a beautiful place with no death, sorrow, sickness or pain. (newsgroup-post 138)

The reason some people don't know for sure if they are going to Heaven when they die is because they just don't know.

The good news is that you can know for sure that you are going to Heaven which is described in the Holy Bible as a beautiful place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is to be saved so that we can live forever with Him in Heaven.

"For if you confess with your mouth Jesus is Lord and believe in your heart that God raised Him from the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth in the person of Jesus Christ to shed His blood and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to a virgin Jewish woman named Mary and lived a sinless life for thirty-three years.

At the age of thirty-three Jesus was scourged and had a crown of thorns pressed onto His head then Jesus was crucified.

Three days after Jesus died on a cross and was placed in a grave Jesus rose from the dead as Jesus said would happen before Jesus died.

If someone tells you that they are going to die and in three days come back to life

again and it happens then this person must be the real deal.

Jesus Christ is the only person that ever lived a perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds) with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have redemption through His blood, the forgiveness of sins..." (Ephesians 1:7)

If you would like God to forgive you of your past, present and future sins just ask Jesus Christ to be your Lord and Saviour.

It doesn't matter how old you are or how many bad things that you have done in your life including lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven with You when I die. I agree with You that I am a sinner. I believe that You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins and that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thanks Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God to save you. Now you are a real Christian and you can know for sure that you will live in Heaven forever when this life comes to an end.

As a child of God we are to avoid sin(wrongdoing), but if you do sin the Holy Bible says, "My dear children, I write this to you so that you will not sin. But if anybody does sin, we have one who speaks to the Father in our defense Jesus

Christ, the Righteous One."

Those of you that have not yet decided to
place your trust in the Lord Jesus Christ
may never get another chance to do so
because you do not know when you will die.

This means that if you die without
trusting in Jesus Christ as your Lord and
Saviour you will be forever separated from
the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of
eternal torment, suffering, pain and agony
for all those who have rejected Jesus Christ.

The good news is that you can avoid Hell by
allowing Jesus Christ to save you today.
Only then will you have true peace in your
life knowing that no matter what happens you
are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ
Ronald L. Grossi

*Show this to your family and friends so
they can know that they have a choice
where they will spend eternity. Thanks!

Lennie's use of the sacrifice of life for his own glorification is
one of the most "intolerable sins" amongst veterans.

Period.

> Best of Luck.

None needed, but thanks.

Steve, K4YZ

> Sweetums, I have an HONORABLE discharges from military
> service.

Yes, you do. But it's your self-serving use of the deaths of
others for your own glorification that dishonored whatever you DID do
good, Lennie.

> Kellie ain't got a one! Kellie couldn't make it
> in or got away with staying out (take a pick, prick).

You've been asked this before, I am asking again: WHAT LAW DID
BRIAN KELLY VIOLATE BY NOT SERVING IN THE ARMED FORCES...?!?!

(Caps not for yelling, but to make it easier for the old man to
read...he has obviouly had a hard with it!)

> What have YOU got? A medical discharge.

Nope. Same Honorable you've got, Lennie.

> You claim, and then
> try to bluff everyone into believing "it was changed to an
> 'honorable' discharge." Do WE have "proof" of that? NO!

It was never "changed" to an Honorable, Lennie. It was Honorable
all along. I was discharged.

> Tsk. I can digitize my 1960 HONORABLE discharge...(SNIP)

Sure you can. Two problems, though. One, you've already done the
"I am going to send you an e-mail" trick wherein you DIDN'T send what
you promised you were going to do.

Trust blown.

Secondly, as I have said over an over, I don't doubt that you have
an "Honorable" discharge. But what I HAVE said over and over it's HOW
YOU DISGRACED YOUR SERVICE WITH YOUR SELFISH USE OF OTHER'S SACRIFICES
THAT MAKE YOU THE SCUMBAG YOU ARE!

> Me, I got NO problems associating with REAL military
> veterans. Done it much...and NOT at some Legion Hall bar.
> Done it for years. I'm proud of what I did and there are
> NO blemishes on my military record. I'm sure Brian has a
> good record, too. "It ain't braggin if ya did it."
> I did it.

You also "did it" when you tried to embellish YOUR "record" with
the deaths of Soldiers who died in combat before you were even
inducted.

> Get some mental help, Psychotic Pstevie. You need it.

Not even remotely as much as you, old man.

> LenAnderson@ieee.org
>
> ex-RA16408336, U.S. Army 1952-1960, HONORABLE discharge

Pathologiocal liar and teller of Tall Tales. User Of Other's
Sacrifices.

Putz.

> anti-collision system back then).

It doesn't matter, Lennie. I know what happened on ONE of them.

> At NO time was I doing anything "for" NADC...(SNIP)

But you were there and your performance was lackluster.

You got a bad "fit rep". Oh well. We can't all be "100%" 100% of
the time. Deal with it.

One of my first fitreps in the Corps was less than what it could
have been. Not bad, but certainly a wake-up call. I took my
"spanking", did what I needed to do to correct the shortcomings, and
moved on. No big deal.

> SECANT (SEparation and Control of Aircraft by Non-
> synchronous Techniques) performed well...(SNIP

Has nothing to do with Amateur Radio policy or that you were
deemed less than adequate at NADC.

> Based on the results of that 2nd gen flight test...(SNIP)

Twenty one lines of non-relevent story telling.

> >Now suck it up and move along,
> >old man! You ran your mouth off about all your hot jobs.
>
> Wasn't a "hot" job. Was an everyday kind of design job.

One you didn't do well at. Oh well.
>
> It was "hot" only in the SAW filters...(SNIP)

Great. Ohhhhhhhhhhh...Ahhhhhhhhhhhh....Stuff that extend's an
engineer's slide rule, I am sure.

Of no relevence to Amateur Radio policy at ANY level or you
behaviour herein.

> > You happened
> >to drop one name where I had an "in". I found you out.
>
> Steve Robeson was *NEVER* "in" on either the RCA or
> Minneapolis-Honeywell aircraft anti-collision systems.
> Steve Robeson wan't even AT NADC in 1971 to 1975. He
> was a jarhead who never got beyond Warminster NAS on
> the other side of the road A DECADE LATER.

Nope...wasn't in those programs.

I did have an "in" with a gentleman who was, however.

Outted you nicely.

> >> You are living in some fantasy again. Reset.
> >
> > Reset yourself, old man. About 50 years worth.
>
> No, just two hours worth...had a good sandwich for lunch
> and it tasted like more. I'll settle for another cup of
> coffee, though.

Perhaps all that coffee is your undoing, Lennie.

At your age more thyan one cup a day is a sure bet for premature
cardiac demise.

> Tsk. I have a copy of the FINAL report on SECANT...(SNIP)

I am sure the Anderson household is ripe with files of old
projects that have absolutely nothing to do with Amateur Radio.

Fifteen more lines of non-relevent stuff snipped for brevity.

> > That you try and redirect from YOUR misfortunes by making such
> >claims is ludicrous and transparent.
>
> Tsk. Lil Stevie can't name detail one on what went down
> at NADC, has NO knowledge of the SECANT or Minny-Honey
> System testing. You can't even name the military aircraft
> at the NAS or which ones were used for anti-collision
> testing. [one was shared with NAVSTAR...which would later
> become GPSS...:-)] Tsk, tsk, tsk.

And not a bit of it relvent to the fact that Leonard H. Anderson
was at NADC, was a less than stellar performer, and when I asked around
about him, I got a "hit"...

I've not once "challenged" that any of that occured at NADC, nor
have I "challenged" that you were there. I KNOW you were there,
Lennie.

> > What I TRULY know is that YOU find it hard to believe that
there
> >really are people in the world who didn't develop a life-long
devotion
> >to your wisdom, knowledge and skill.
>
> Tsk, tsk, tsk. :-) The only person "devoted to me" is my
> wife...as I am devoted to her. Nothing else is requested in
> life. The only "credential" needed is that marriage
> certificate.

A marriage certificat is NO guarnatee of devotion, Lennie. It was
only legal permission for the two of you to get maried.

An old high school acquaintence of mine has been "cohabitating"
with his high school sweetheart for over 25 years now. No marriage.
They are as devoted as any couple I've ever known.

> >> > He didn't know you "a decade after (you were) there". He
knew
> you
> >> >WHEN you were there.
>
> Amazing. After a total of six trips to NADC and a total
> time there of about three months, this (fantasy) person
> "knows" me? 34 years AFTER the fact?!?

Actaully at the time I found you out it was only 20-some years,
and no, he didn't "know" you off the top of his head. He did some
research, however, on contractors who had been there.

You were there. You weren't the best "engineer" in their
estimation.

> > I WON'T name him becasue I promised.
>

> Total BULL####, bluffmeister!

No "BS", Lennie....I won't name him. No bluff intended.

> >> 2. The ONLY thing you are protecting is your own
> >> bragging LIE about that fantasy individual.
> >

> know. You have NOT revealed a thing.

I have revealed that you were less than spectacular at atleast ONE
of your "jobs".

And there will be no further "details" forthcomimg. You can't
squeal and whine all you like, Lennie, but just like your promises to
us, that's all you'll get from me on this subject.

> >> > I have no reason to doubt his assessment or opinion.

> that (fantasy) "reference" individual...not a thing about
> what went on at NADC in 1971-1975, not a thing about any
> other projects under Naval Air Systems Command then.

And I could care less about them, Lennie.

I inquired about YOU, and YOU are what I got answers about.

> You are FABRICATING a falsity.

Nope.

> You have NO reference except what I reveal.

Your "refrences" where what lead me to find out what I did.
Thanks.

> YOU can't describe a damn thing
> except your bogus "outrage" at "not being believed."

Oh, Lennie, I am farrrrrrrrrrrrrrrrr from "outraged"! YOU, old
man, are the one with the outrage issues!. To the tune of thousands of
lines of irrelevent rhetoric over the last several years meant only to
blunt the damage of what I discovered.

Too late! Shudda kept your mouth shut!

> >> Provide this "name." Without it you have a bogus
> >> "reference" that means nothing.
> >
> > Here's a name that is bogus and means nothing: Leonard H.
> >Anderson.

Nope. Fact. Established by YOUR track record of lying, deceit,
misconduct and dishonesty.

> Not to worry. Your buddies Jimmie Miccolis and Davie Heil
> will support you. PCTA extra Double Standard MUST be
> operative to you and them!

"Jimmie" Miccolis? Jim has a little son? Whether or not N2EY or
K8MN "support" me is also irrelevent. I know what I know because YOU
shot your mouth off and I just happened to know someone in a postion to
verify it.

> >> You are SICK and need help. Go get some.

How can you expect a "proof" on something that doesn't exist?

On the otherhand, the foregoing rant and spin-doctoring you just
hit us with IS evidence of your "issues" with your own condcut.

> > Accepting that not everyone thinks you're the
> >genius and expert YOU think you are is one of them.

posession?

You ignored the phrase "...according to Lennie".

Okinawa is a prefecture of Japan...a "state", just like Hawaii,
Rhode Island, or Texas is to us. They are very much a part of Japan,
CONTRARY to what Lennie would have other believe.

"Sayonara" is completely appropriate.

Why is it that we spend lifetimes accumulating "knowledge and
experience" only to have someone else try and dismiss it when we no
longer look like someone in the centerfold of "GQ" or "Cosmo"...?!?!

> at best and hopeless anachronisms at worst.

The advent of PSK31 et al is only further evidence that we need
appropriate subbands. Mike's experiences with W1AW are not unique, nor
is it any "evidence" of poor operating practice on the wider mode
station's part. Just like oil and water, there are some things you can
mix, others you can't, no matter how aggressively you stir the
contents.

> which is one piece of it I agree with.

And sometimes even when the control operator listens dilligently,
he's going to miss something and someone's going to get stepped
on...Not "maliciously", but it's going to happen.

I've had occassions where I listened, sent "..--.." before my CQ,
then started my call, only to get a terse "QSY QSY" after the fact.

Oh well.

> > For instance do those stations have to identify in CW or Voice(AM
or

>
> They identify with whatever mode they're using. As long as the FCC
> monitoring facilities can decipher it.

I am still of the opinion that some "standard" form of ID should
be included for the benefit of those who DO get interfered with in
order that they may contact the "offending" station in order to work
out differences without FCC involvement.

I'm 50/50 with you on this one, Brian...I am not in favor of
thickening up that rule book like you illustrated, however there should
be SOME lines drawn for protecting those very-narrow and ultra-narrow
modes.

Side issue here but I agree with Dave, something 'snot right in State College. The W1AW bulletins and code practice sessions are transmitted by big-bucks squeaky-clean commercial Harris SW transmitters. Yank the PL-259 out of the back of yer xcvr and stuff the end of ten feet of wire into the xcvr coax receptacle and tune around W1AW again and see if you're still hearing spurs from W1AW. If yes your xcvr front end probably has "issues".

****
My profound apologies to those I may have offended by the "old men" term.
This term Old Men, Old Man, or OM used to convey respect or endearment of
fellow operators back in the day. I will add OM to my PC filters.
****

>> is the
>> breeding ground of disrespect.

****
My ARRL Handbook is from the last century, but nonetheless states:
"According to FCC Rules, occupied bandwidth is: The frequency bandwidth such
that, below its lower and above its upper frequency limits, the mean powers
radiated are each equal to 0.5 percent (-23dB) of the total mean power
radiated by a given emission". ..."Occupied bandwidth...can be measured on

a spectrum analyzer,...". "Occupied bandwidth can also be calculated..."
It is interesting to note that Part 97.3 (a) (8) uses 0.25 percent or
(-26dB). Maybe this definition needs to be refined. But it is there now.
****

>>
>> dunno...
>
> Part 97 is available for free online.

****
After laboring through several passages of the June 2004 version of Part 97,
it is clear that the entire reg. needs a major overhaul. I think the ARRL
EC proposal should state the Part 97 text "before" and "after" to
demonstrate their changes. Otherwise it is not clear at all what is
intended. I do not see Semi Auto DATA defined anywhere in the Part 97
text, but K1ZZ refers to this in his write-up. It would appear that the
entire "Definition" section needs some rework to include these "new" data
terms. Part 97.221 (c) (2) states that the Auto's bandwidth is to be
limited to 500 Hz. K1ZZ, in the full write-up over on arrl.org turns this
around and states that this paragraph doesn't apply to Auto DATA, but only
applies to Semi Auto DATA. Does this need to be changed to accomodate the
ARRL EC plan? 97.305, 307, and 309 also need some revision to remove the
obfuscation, ambiguities, and circuitous logic.
****

> The plan moves automatically controlled stations to a specific area. If
> I want to ragchew, I'll stay outside those segments.

****
The ARRL EC plan only tweaks the existing specific areas for Auto Data

stations on HF. They are currently defined in 97.221 (b). Sorry, I did not realize that before I read the June 2004 version. It appears the major change for the Autos is to allow expansion of occupied bandwidth 7 fold.

So, by YOUR logic, a guy who spent 2 years on KP knows more about
Morse Code usage in the Armed Forces than Jim Miccolis!

> >So was the Coast Guard.
>
> HOW DO YOU KNOW? YOU DIDN'T SERVE.

So, by YOUR logic, a guy who spent 2 years on KP knows more about

The REAL QUESTION, Lennie, is HOW DO >>YOU<< know...?!?! You were
NEVER a military radio operator, and yet you "served" in the Army.

> OH! OH! ERROR! MISTAKE!
>
> First of all, your buddie and pal, Stevie he say
> that "MARS >>IS<< amateur radio!" Tsk. MARS' first
> letter in that acronym means MILITARY.

And the SECOND letter is AFFILIATE...As in affiliated with the
Amateur Radio Service...From which this MILITARY program draws it's
operators.

And Lennie...what MARS calls have YOU held?

I was NNN0VVU from 1977 to 1982. I was a guest op briefly for
NNN0MOQ in 1980, then CHOP of NNN0MOF in 1981 and ANCOIC of the Okinawa
Island-Wide MARS Program in that same time frame.

I was also AFA1OQ from 1983 to 1987. I joined ARMY MARS briefly
in 1999 just before my daughter passed...AAT4SA.

> Secondly, check with a REAL MARS civilian volunteer.
> You will find out that the military GIVES them radio
> goodies. No need to "buy."

BBBWWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
! ! ! !! ! ! ! !

MARS allows participants who have ALREADY met certain
PARTICIPATION goals to draw equiment from surplus stock!

In other words, you operate YOUR gear on MARS assignments BEFORE
you EVER get to "go shopping"... ! ! ! !

And MARS "issues" of surplus radios dwindled to less than a
trickle YEARS AGO! ! ! !

BBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
! ! ! ! ! !

> Military already bought
> the stuff and used it. Be NICE to MARS folks,
> Jimmie, maybe they'll GIVE you an AN/FRC-93 for
> nothing; it's a Collins KWM2 Commercial transceiver
> with a military nameplate.

And most likely they never will. Nor are they about to issue any
other gear to anyone who hasn't already established dedicated
participation to warrant ANY "equipment issue".

Big snip of usual divergant rhetoric...

> >> For over half a century (actually, since before WW2)

> >> by modes OTHER than morse code.
> >
> >Even if true, (it's not) so what?
>
> HOW DO YOU KNOW? YOU'VE NEVER SERVED IN THE MILITARY.

What does serving in the Armed Forces have to do with it, Lennie?

YOU constantly insist that since EVERYTHING you could possibly
want to know about "radios" , military or otherwise, is on the net,
it's not necessary for you to be a licensed Amateur to know about
Amateur policy issues.

However your FREQUENT errors, including the ones above vis-a-vis
MARS is GLARING PROOF that your LACK OF PRACTICAL EXPERIENCE make you
ill-prepared, yea incompetent, to make INFORMED opinions on the
matter...

Yet you still bombard this NG with tons of rants pontificating on
matters you are't qualified to discuss.

> >You're argument says that since most US Navy ships stopped relying
on
> >the wind for propulsion long ago, nobody should own a sailboat
today,

It's "NOT" about a LOT of things that YOU feel free to discuss at
length when the mood strikes you. But you do it anyway.

Anderson, you keep delivering corroborating evidence to my claims
of your ignorance and incompetence in Amateur Radio (and MARS) issues,
and for that I thank you!

What a PUTZ!

>
> "Extensively?!?" HOW DO YOU KNOW? :-)

Same way you know about most things. Others told me, I read source
material, etc.
>
> Sweetums, I WAS PART OF IT. :-)

Part. But not all. Your personal experience was just a small part of
the big picture.

> Army station ADA, as
> assigned to Far East Command Headquarters, carried not
> only Army traffic, but some USN traffic, some USAF
> traffic, some Press Services, even some Red Cross
> message traffic. ALL on TTY.

Some of that traffic. Not all of it. So you can't really
speak for what was done through other channels other than by
what you've read and been told - same as me.

> Not a bit of morse
> code. And ADA was just the third largest station in
> ACAN (Army Commmand and Administrative Network). That
> "little" station (36 transmitters, all over 1 KW and
> on 24/7) relayed 220 thousand messages a month (1955).

But you weren't at those places, were you?
>
> Sweetums, that "extensively" is just your wishful
> thinking. Of course there was SOME morse being used
> by all branches in 1953.

That's all I'm saying.

> But, HOW MUCH?

A lot. Enough that all branches were training radio operators to use
the mode.

> YOU DON'T
> KNOW!

You don't know, either, Len. You weren't there, were Morse was being
used.

> YOU WERE NEVER IN.

So what? You were never a radio amateur, but you claim to know
all about what hams do and what amateur radio is all about.

> YOU NEVER DID IT FOR THE MILITARY.

You mean operate Morse Code? Neither did you!

> >Your tunnel vision of "long-distance point-to-point

Reductio ad absurdum is a valid argument tool. I'm not rattled at all,
Len. You're the one shouting and carrying on in a very immature way. So
typical, so predictable.

> You are too young to have listened to Walter Winchell's
> "news broadcasts" on radio. He "used morse code" at

>
> You want the U.S. military to act like amateurs? :-)

No. But you seem to want amateurs to act like the US military.
>
> Some of us think that POLICY of the U.S. government
> is "done by amateurs" but that's a whole other story.

OK, Len. Who did you vote for in the US presidential elections
of 2000 and 2004? You've spoken of President Bush's "coronation
day" - so I think you voted for one of the other guys.
>
> >And it was *not* the kind of communications that make up the

How do you know? You didn't serve in those other branches. You weren't
there.
>
> What the heck, Jimmie Noserve, you weren't IN any
> military, not even in Canada. Why are you all upset?

I'm not upset, Len. You're the one shouting and carrying on like a
jackass all over the place, over the mention of the use of Morse code.
>

So *some* hams get the castoffs from the military. Not *all* hams, and
not complete stations.

> Be NICE to MARS folks,
> Jimmie, maybe they'll GIVE you an AN/FRC-93 for
> nothing; it's a Collins KWM2 Commercial transceiver

Been there, done that.

> Don't see any TTY in that picture of
> YOUR ham shack! :-)

I've done RTTY, Len. At an amateur radio station.

> >Nope. You just don't like the mode.
>
> Sweetums, I just don't LIKE the TEST for it. :-)

No, you just don't like the mode. Your behavior proves it.

Lennie was squat. He was a radio mechanic at a rear-area radio
station. His knowledge of the "big picture" was "tunnel vision", at
best when he was "in", and would be no more today if not for the
research resources of the Internet today.

> > Army station ADA, as

>
> But you weren't at those places, were you?

Of course not.

But he SERVED! By simple virtue of having gone through boot camp,
he was given all military knowledge of all services in the pre/post
Colonial days and ever since...

> > Tsk, that's called PROFESSIONAL COMMUNICATIONS, sweetums.
> > When one is IN the Cold War and trying NOT to let it
> > develop into a nuclear confrontation, one uses absolutely
> > the BEST stuff to "get the message through."
>
> You didn't have to pay for it yourself, though.

But he SERVED! Again, by simple virtue of having gone to boot
camp, Lennie was given all knowledge of all things "military". He was
also made sole owner, heir and heir apparent to all materiel past,
present and future. Nothing has ever happened in the Armed Forces that
didn't get his explicit consent or approval first.

> > I'm sure the Canadian military did the same within their
> > budget constraints.
> >
> > You want the U.S. military to act like amateurs?
>
> No. But you seem to want amateurs to act like the US military.

But of course! That's the way Lennie learned how to do it, and by
golly, that IS how everyone else is going to do it...

Wait...where have I heard THAT before..?!?!

OH YEAH! Lennie accusing US of making that "demand" of
prospective Amateurs!

> > Some of us think that POLICY of the U.S. government

"Simple facts" are not Lennie's forte.

> > What the heck, Jimmie Noserve, you weren't IN any

code.

Lennie brags about "serving", which I would assume to mean that he
adamandtly supported and defended the Constitution of the United
States...

....the SAME Constitution that doesn't REQUIRE military service.

Yet he's yelling and hollering about people NOT "serving"...

What's this putz's problem, Jim? Guess he only supports those
parts that suit him...

> > Secondly, check with a REAL MARS civilian volunteer.

If MARS just "gave" stuff to Hams, then the MARS rolls would be a
lot more robust than they are today, what with folks getting in line
for free radios and all.....

> > Sweetums, I just don't LIKE the TEST for it.
>
> No, you just don't like the mode. Your behavior proves it.

Actually, it was a diversional lie...to cover up his greater
hatred and disdain for all things "Amateur". Leonard H. Anderson
"likes" nothing but himself.

It is a strong signal, but the waterfall display shows spikes that
extend across the whole display. They cut right through any psk signals,
and tend to garble the transmissions. PSK31 is a nice mode, but 10 to 25
watts has a tough time competing with a big and possibly dirty signal.

The NB is off, and although I haven't put in attenuation, the signal
isn't so strong that it desenses the reciever. I'll try that.

>>>So, in effect, is the ARRL EC campaigning to give the

Or the other areas. When W1AW fires up, we all go away.

The W1AW bulletins and code practice sessions are transmitted
> by big-bucks squeaky-clean commercial Harris SW transmitters.

Okay, so it isn't possible for W1AW's signal to have a problem. Of
course there is the possibility that we there are all lids. Many people
there note the problem. 8^)

Well you sound very confident. Why waste your time here in a
petty bickering forum? Oh, BTW, what law school did you
graduate from?

73,

Lloyd

Can you supply a link to the article in The Manchester Newsletter
or at least a snail mail address where one could write for a copy of
the article?

One of the things I forgot about in responding to Mike is that there are
some newer rigs in which the noise blanker is never really out of
circuit despite the position of its on/off switch. Your idea of the
short piece of wire would certainly help, especially if Mike has one of
those rigs.
I've never detected spurs on W1AW's sigs on any band.

As of my most recent participation in the MARS program, that equipment
was loaned, not given. It was issued on a hand receipt.

> In other words, you operate YOUR gear on MARS assignments BEFORE
> you EVER get to "go shopping"... ! ! ! !

> And MARS "issues" of surplus radios dwindled to less than a
> trickle YEARS AGO! ! ! !

I knew some fellow in the Shreveport/Bossier City, Louisiana area who
were already long time MARS participants in the late 1960's. Some of
them had items like R-390 receivers, VHF FM gear and the like. None of
them had any transmitting equipment provided by MARS. There was not
much in the way of equipment available from AF MARS at that time.
Nobody with with only a year or two of participation was eligible to
receive any equipment at all. I did snag some lengths of really, really
old coaxial cable. My AF MARS activities were done with equipment I
bought and paid for myself.

I'll chalk this up as something else which Leonard Anderson knows little
about.

NEWSLETT.TXT]
!!! WARNING !!!
K1MAN RADIO BROADCAST ON
3885AM/3975LSB/14.275USB

ALL RADIO ENTHUSIAST, WHETHER YOUR A HAM OPERATOR OR SHORT-WAVE RADIO

LISTENER, YOU SHOULD BE ADVISED ABOUT K1MAN, GLENN BAXTER, IARN/AARA.
Don't be duped by this individual. Glenn Baxter's only interest in Ham
Radio
is to make a profit at your expense. He uses the Ham Radio Frequencies
to
advertise his organization, when in reality,he wants unsuspecting
people
to dial into his WEB Site so he can sell you his Bill-of-Goods! Why pay

Glenn Baxter when the ARRL, (American Radio Relay League) will help you

for free, and is a well known, established service, known for many
years!

When you get Glenn's info package, it is a classic PYRAMID SCHEME !!!!
Broadcasting slamming the ARRL, defending personal issues, is
not
conducive to Ham Radio !!!
Glenn Baxter has been on for 10 years; Ask yourself this, what
has he
done for Amateur Radio?
K1MAN broadcast on the Ham Bands might sound legitimate, but don't get
duped! There are many allegations about Glenn Baxter, and his
organization,
that warrant controversy, from him being a convicted Child Molester, to

operating a Pirate Radio Station off the Coast. Glenn Baxter is using
Ham
Radio to fill his illusions of grandeur of having his own Radio
Station,
which in reality, is a garage operation. He is using a loop-hole in the
FCC
rules to continue on with this worthless broadcast that causes
interference
and dissension in the Amateur Radio Community. Talk Radio on Ham Bands,
give
us a break, Amateur Radio does not need this! Amateur Radio is a Hobby
designed for two-way communications, not one-way. Don't let yourself
get

involved with this lying, ego idiot and his organization, which is designed
to extort your money, and damage the reputation of Ham Radio.
ALL GLENN BAXTER HAS IS A TRANSMITTER AND A BIG MOUTH !
This is not a SMEAR campaign as Glenn Baxter claims. NEWS LETTER gets the
truth about someone who is destroying our wonderful Hobby because he has a
grudge against the ARRL, and anyone who does not agree with his views on how
Amateur Radio should be, according to Glenn Baxter. JUST BE AWARE !
Glenn Baxter's only concern is to get your Dollar! This is a business for
IARN, Just see for yourself.
AARN/AARA Does not represent the Majority of Ham Operators in
the World !
SEE FOR YOURSELF, DIAL INTO HIS WEB SITE, CHECK IT OUT !
Also, Walter Cronkite, KB2GSD is not part of the IARN
Organization
It has been revealed to us Glenn Baxter references Walter Cronkite when

fraudulently applying for Government Grants to make his organization look
good so he can extort funds for his own personal use to keep his station on
the air. IARN/AARA is not financially solvent and is on the brink of
Bankruptcy.
** IARN/AARA is NOT recognized by CBS, ABC, BBC, or any other
Net-work
affiliation **
IARN: (I)t's (A)nother (R)adio (N)utcase !!!
HOURS AHEAD,
AND NOBODY CARES

After you have received our Flyer, check it out, call Glenn Baxter at
(207/495-2215) and let him know your heard from News Letter. You will be
amazed of the response you will receive. As a matter of fact, since you are
paying for this call, ask Glenn why he does not have an 800 number. Then call
Walter Cronkite, 212-975-3627, and speak with Marline Adler. Ask her about
Glenn Baxter and why he promos Walter on his WEB Site and Broadcast to
further his credibility of his organization, and if Walter is a part of
IARN/AARA. The Cronkite camp wants Glenn to stop. When you call Glenn, ask:

1. Who is his representative in Washington, DC to lobby for AARA/IARN?
Also,

what is his Dun & Bradstreet rating of his organization. (Watch Glenn waffle
on that one)

2. Ask how many Radio Ham Clubs uses IARN as their Club Affiliate? Where are
they, and who is the President of that particular Radio Club, and what is
his/her call sign?

Why doesn't he broadcast this information?

3. Which one of Glenn's Organizations is a Maine Corporation registered with
the Secretary of State? Who are the Corporate Officers (besides his own

family, if any)?

Ask Glenn what really happen to him at Dayton?
4. Why doesn't IARN/AARA attend major Ham Fest in New England area? (Don't
buy this bullcrap he doesn't have the time). What Ham Fest overseas does he
attend?

Why does Glenn pack a Gun these days?
5. How many Jump Teams does he have? Ask for a list of names of the Hundreds
of personnel he can use in an International Disaster. (If you get 10 names,
your lucky)
News Letter knows what really happen during Hurricane Marilyn!

6. Besides his big mouth, ask Glenn what AARA/IARN has actually done for Ham
Radio?
(That should be a good one, you'll get an ear-full of bullcrap and
dribble from that question)

7. Ask Glenn why he got fired from Collins Radio (Another good one, we know
the truth)
(Then ask about his days at Vermont Academy and why he was considered
such a nerd!)

8. Why is Chris Murdock's call, WA1HOD, have the same QTH as K1MAN? See

Callbook

You will notice a cloy-babble, rhetoric, insipid reply (if any) from Glenn,
and his usual crying and whining about all he is doing for Ham Radio,

and
the ARRL is so evil and bad for the common Ham Operator. Of course you
will
get this response that he doesn't have to give names and addresses of
people
that represent his organization (because he has none!). ARRL list the
names
in the front of their QST Magazine. Any legitimate Corporation makes
the
Names of their Officers & Sponsors open for public scrutiny.

Just sit back and look what is going on here, Glen Baxter, K1MAN is a
fraud.
This Organization of his will never replace the ARRL, or even come
close to
representing the majority of Hams in the World. Just beware! After you
talk
to Glenn, if you have a Computer, check into his WEB Site, that is
where the
real BullCrap is. Watch your wallet!
Glenn always brags on the air it doesn't cost (and the term he uses)
dues, to
join IARN; however, you have to pay 10 Bucks for a stupid T-Shirt, and
$35.00 a year for a full membership to listen to this worthless
Broadcast.
WOW, Look at me, I are an AARA Member. Go to your local Ham Fest and
wearing
that T-Shirt, you'll be the toast-of-the- town! Do yourself a favor,
get
away from this idiot, talk to other Hams, enjoy the Hobby! The ARRL may
not
be perfect, and not for everybody, but at least it is a creditable
organization that has been the backbone of Ham Radio for a long time,
and is
well known!
HELP BEAUTIFY THE AIRWAVES, GET RID OF K1MAN
****************************** ******************************
****
#42 THE MANCHESTER NEWS LETTER Aug 98

Newsletter Information Bulletin Service coming up in 3
minutes---------News
Letter information bulletin service coming up in 2 minutes--------10
seconds---------This is News Letter, World Headquarters, reporting from

Manchester, New Hampshire, man-kinds answer to get information out
about our
local raving lunatic, alleged Child Molester, noted pervert, general
nuisance on the Ham Bands, Glenn Baxter, Chief honcho of IARN (It's
Another
Radio Nutcase), of a broadca$h, than any normal human being on the

Planet
Earth could just-care-less. So sit back, join the fun, read this
edition of
News Letter.....

Week of 20 April 98: As you may of noticed, good old Glenn Baxter has
stopped
airing the full Names, addresses, phone numbers, of his callers that
call
his show. I guess the Warning Flyers we send out about AARA/IARN got
the
supreme irritant a little upset. I guess Glenn can't deal with the
truth, and
has to hide his callers so News Letter won't contact them. Gee Glenn,
did we
upset your programming, and World conquest of dominating Ham Radio with
your
bullcrap? Sorry, but it won't slow us down on getting info out to the
public
about your stupid, insipid, organization. Your creditability is shot!
Too
bad, Ha, Ha, Ha! We just thought of something, I bet it takes a lot
more
work to edit programming tapes, screen the callers, so Glenn-baby can
get the
correct information out on the air. Talk about hiding behind the
microphone
!!!
Glenn's new format by editing personal information shows, again, IARN's
level
of Creditability. When you listen to these interviews, you can tell
parts
are being edited out. It was funny because the week of 27 April 98,
Glenn was
talking to a Ham from Worcester, MA and stated the majority of letters
we
receive are pro his broadcast. Boy, we know that's bullcrap. Here's the

drill: Caller, what's your first name and location?. Glenn Baxter is so

scared that News Letter is going to let someone know the truth, he
can't
stand it! Hey Glenn, next time you get an anonymous call, or letter,
remember, you are now doing the same thing! Your are a fake,
bullcrapper,
and a worthless Scumbag. You readers ask yourself this. Glenn stated
his
Letters & Callers are 10 to 1 pro his broadcast, if that is so, why did
Glenn
discontinue giving out names and address of his callers??? The next
thing

you will notice, Glenn will probably have the same people call, (since he
doesn't have to air their names), and brag how great IARN is. Just remember
you saw this first here in News Letter. To confirm all this, call up
yourself, see if Glenn will air you comments!
Remember, IARN/AARA is not a talk-Radio show, and is not the first News
Line broadcast service.

HOSS-TRADERS HAM FEST: Rochester, NH weekend of 9, 10 May 1998 , I was not
able to attend; however, several area local Hams went, and they said it was
great. This is their report: Looks like most of the AM'ers were there. There
was Tim, Pete, Dale, Dale, Eric, Jim, Jim, Bill, Bill, Bill, Jeff, Mark,
Chuck, Dave, Carl, John, Kenny, Ken, Steve, Warren, Mike, Chris, the regular
crew. There were several AM groups. Tim arrived in style with the
Cadavilac, Dales was setup with his Military Gear, and Bill was set up in
his Van with his Johnson Ranger. The Deer Meat was cooking, the Beer was
flowing, the Cigars were glowing, all-in-all, everyone was having a good
time. Nobody had any Flyers about K1MAN, but the conversations were still
going around about the supreme irritant. I was told the real story about
KA1OGM and his dealings with Glenn Bastard, and got more info on other Hams
in dealing with the alleged Child Molester. Everybody was still talking

about the Ice Storm that hit this year and the fact Glenn Bastard did
nothing, and his broadcast was still a nuisance to the AM community.
Disappointing with the Equipment at Rochester, it seems these Ham Fest are
getting more junk than the good-old stuff we used to see years ago. Also,
the big news I heard, it did not rain at Rochester. Boy, of all the ones to
miss, every time I have gone in the past, it has rained. The personal
reports I heard, and was to ask: How much did Carl Drink? Who took the
Picture of the AM Gang? (we want a copy). Who wore the ugliest Hat? What
Car had the biggest Bug Catcher? Who Plays the best guitar music? (was Jimmy
Hendrics really there?), What Clown??? Must of been fun, we'll be there in

the Fall. Since I was leaving for Dayton, I could not attend Hoss Traders
this Spring, excuse if this report is not accurate, all this info was second
hand, but my sources are pretty accurate! Thanks guys, great job. You can
check in on Steve, WB3HUZ, Web Site for further info, pictures on this, and
other past Ham Fests. By the way, if you love the AM Mode, this WEB Site is
great along with WA1SOV. That reminds me, whatever happen to
Jerome Prestal, KA9BSD, (News Letter #22) WEB Site? He use to have a segment
on Glenn until he got threatened by the supreme irritant. Its time to start
surfing the WEB again and see what's going on!

(2)
DAYTON HAMVENTION: Week end of 15 May 98. What a Zoo! This Ham Fest is too
big, but we had a great time and the WX was good and hot. It was definitely
not one to miss. Prices were ridiculous, food was greasy, but I'm glad we
went. We stayed at the Crowne Plaza Hotel, visited Kettering Tower (great
view), attended the QCWA Dinner at Alex's Restaurant, Watched the SSTV
Seminar at the Ramada Inn, took in the AM Forum at the Hara Arena, and
watched Ronnie Milstrap Concert. Also, Ronnie, WB4KCG, is an did a great Job
as a guest speaker at the Banquet (note: Ronnie gets News Letter). If you
think Glenn Bastard did good, don't be duped by his broadca$h, the guy was
the laughing stock of Dayton. You can't believe the crap Glenn Baxter was
pouring out, and I am truly amazed Glenn could ever show his
face in public at Dayton ever again. First of all, I personally never saw
Glenn, (who was the idiot manning his booth?), and many, many, people were
looking for him, and I can't tell you how many ARRL members I saw went by
his booth laughing at this idiot. Here is some of the scoop, what I could
tell. Glenn had a lot of people go by his booth, but more than half did not
agree with his organization, and people we saw later on, and questioned,
thought he was a garrulous idiot, and just listened to him pontificate

to be
polite. Most of his literature went into the garbage. Hey Glenn, I
was
standing about five from a guy that was ready to punch-your-lights-out
while
coming out of the building! I had to laugh at the Wall Street Article
concerning IARN. Also, there is a rumor going around that Walter
Cronkite is
suing Glenn Baxter due to Glenn using his picture on his WEB Site, is
this
true? Can someone confirm this, and for how much?. Hey Glenn, will CBS,
AP,
& BBC, or NEWSLINE get that info? We also heard another rumor there was
a
representative from the Cronkite camp secretly checking up on Glenn to
see if
he used Walters name and credentials to further IARN credibility. Also,
who
is the individual Ham that is sueing Glenn? Oh, many of the Vendors we
had
sent Flyers to were aware of the situation with IARN and Glenn Baxter.
One
Vendor was passing our info to people stopping by his booth. THAT WAS
GREAT,
Here I am the Editor, and some complete stranger hands me our flyer.
Boy,
did that make my day. I wanted to take pictures of the supreme
irritant, but
I never saw the four eyed weasel himself (was he hiding?). The ARRL had
many
functions going on, and I'll tell you one thing, Glenn Baxter AARA/IARN
will
never replace the ARRL. Oh, Oh, Another item. We were given a Letter,
or
Flyer, I guess it is what Glenn sends out to people that call his
show, or
addresses he sometimes gets, but this Flyer was a hoot. There was a
Paragraph about News Letter, and Glenn telling everyone it's a Felony,
and
to send your copies to the FBI, Blah, Blah, Blah, and of course the
same old
rhetoric about how the ARRL is going out-of-business, and he will
replace it
in 5 years, Ha, Ha, Ha, Ha. I thought my spelling and format was
basic,
Glenn's (so-called) News Letter is like a first grader's weekly reader!
Glenn
must be using Window's Write as his word-processor, and a Radio Shack
Dot
Matrix printer. You know, after seeing what the ARRL can do at Dayton,

comparing the nobody- nothing IARN/AARA really is, Baxter is finished. Glenn,
tell us about the problems you are having with Hotel Security, are you packing these days? What is the story dealing with the Maine District Courts? Can you file anymore frivolous Law Suites? What info does the

Dayton Police Department have on you, and what do the State COPS think of
you in Maine? By the way, how are you and Walter getting along lately? Did
you subscription to Stern Magazine expire? I saw Tim, WA1HLR , Dale, KW1I ,
and Bill wondering around, Tim, did you see Glenn and did he interview you?
and how do you like your MFJ Antenna Analyzer? The place was so packed, my
Mother could of been in the next booth, and I wouldn't of see her. The AM
Forum had over 70 participants (very interesting). To wrap this up, Glenn
Bastard made a complete fool of himself. News Letter did a great job on

getting info out, and to all you Hams out there that inquired about News
Letter, there is no way we accommodate everyone that wants to be on the

Mailing list, so our best obtain is the INTERNET, so please pass News Letter
around to all, and rest assured, we will continue to get the word out about
Glenn Bastard, who I feel is going to crack-up under the strain of being the
most hated Amateur Operator of all times !!! Hey Glenn, take your medication,
get shock treatment, and stay home, and do the Amateur Radio Community a
favor, get off the air, forget your delusion of conquering Ham Radio with
you insipid ideas, get a life. You will never replace the ARRL, and once
people realize you really can't do anything for Ham Radio, they will turn on
you and your stupid organization. Dayton finished you! Unfortunately we did
not buy anything big, but did find allot of parts while looking around in
the vast bone yard. Cars were packed in like Sardines. I left Sunday
afternoon to drive back to New Hampshire to be at work that following
Tuesday, it was a looooong trip, but all-in-all, I had a great time. Who
bought the Gates Transmitter that was there? I heard it was purchase by

someone in Massachusetts? Oh Well, next time! For Pictures of Dayton Hamvention, be sure to check into K8CX Web Site, He does a great job showing Dayton Hamvention. Our thanks to the ARRL for making such a great event fun, the true spirit of Ham Radio was representative at Dayton. By next year News Letter hopes to have a booth set-up (under a different name). Glenn, watch out! We might be right next to you, please use some deodorant and mouth wash, and make yourself visible. I can't believe we never once saw you, were you there, or just had somebody represent your organization? How were you greeted at the reception booth? We know officials got our Flyers! A recent update, I just got off the internet with some of my email buddies, and they claimed they never saw Glenn Bastard at Dayton either. Man I wonder, was the supreme irritant even there? You know, we haven't heard any recorded interviews on Glenn's broadca$h either. Did something happen we don't know about? Something weird is going on at AARA/IARN ! I think Glenn knows he's finished, and is keeping a low profile.

INTERESTING CONVERSATION: While at Dayton, I ran into a person that is associated with FEMA & MEMA. He was one of the crew that was sent to Maine to help out during the big Ice Storm that hit New England back in January. He was coordinating information and communications with FEMA, as well as the Red Cross, CAP, RACES, MARS, and volunteer groups going from town to town, house to house, to assess damage. He knows of Glenn Bastard and advised us that Glenn's Group never once contacted any agency to help out, and if he did, he wasn't welcome. It seems that Glenn's bashing of several groups in the past has left a bad taste concerning his organization. It was also revealed to us that Glenn has no local help or volunteers that are willing to help out on any type of disaster representing AARA/IARN. Also, (and this was interesting), there have been a lot of Police Reports on Glenn, and problems he as had with Hams in the past. Boy, Glenn has a trail of problems for a long time. It just goes to show you, and this confirms, Glenn's organization is nothing, and he will never be a creditable entity to represent Hams anywhere!. The funny thing about all this, and truly, we are not trying

to
be biased, after talking to many people, I have yet to run into someone
that
approves of Glenn's Broadcast. I have heard people state they
would like to see the ARRL change, and it would be nice to have another

organization represent Hams, but AARA/IARN will not be that entity.
Glenn
Bastard went about it the wrong way, too much bullcrap and arrogance!
This same individual also stated he believes Glenn is dangerous, and
for
people to watch out if they happen to run into Glenn. He is mentally
unbalanced and is on the verge of a Mental Breakdown. Man, do we ever
know that !!! The guy is nuts. You know, look what is going on here.
People
that once knew Glenn, or even called him a friend, now believe he has
gone
over the edge! Hey Tim, WA1HLR, do you agree with this? When was the
last
time you talked to Glenn? Has he really cracked??

WHAT EVER HAPPEN to Glenn's caller of the week? News Letter issue #31,
special
Edition Nov 97, Glenn had stated he was going to have a caller of the
week.
It was also going to be News letter Wacko of the Month. Another
programming
fantod? Glenn can't make up his mind. I can hear it now, uhhhh, Bonnie,
do I
get the rubber doll, or go to the closet? How many more changes are we
going
to see? Glenn's programming consist mainly of News Line, ARRL, Rain
Bulletins,
few callers (now with no full names and address, call signs), but still
the
constant praising of himself and his stupid organization. Glenn keeps
this
constant rhetoric that the ARRL will financially go under in five
years. I
think he has got his brain wires crossed-up, I believe it will be
AARA/IARN
that will financially fail, and based on what we know here at News
Letter,
it won't be long. Funds are running short up there in the Fortress of
Solitude !!!

NEW TACTIC FOR INFORMATION: Since Glenn has stopped giving Names & Ham
Call
signs of people calling his show, we are going to take another approach
for
getting info out. After each weeks broadcast, we are going to randomly

select 10 Hams from each State, send a NEW type of Warning Flyer with the
latest, or current, issue of News Letter. Some of my Staff has recommended
we get AMATEUR CLUB CALL SIGNS, look them up in the latest Call Book, and
Blanket each State so they will get our information package. What a great
idea! As you realize, Clubs out there will pass the info along, and more &
more Hams will get this info. I'm surprised I haven't thought of this in the
past. This idea, along with several members putting News Letter out on an
E-Mail list, has really spread the word about K1MAN, IARN/AARA. The ones we
will miss targeting info will be the Shortwave Radio Listeners
(because they just don't know any better), but we feel once they get
involved with AARA/IARN, and get into the real world of Ham Radio, they will
realize what's going on. Speaking of Ham Clubs, is there any
Club out there that's uses AARA/IARN as their affiliate? Come on Glenn, since
your so popular, give us (at least) one Club that represents your
organization! What's the matter, are you afraid, or just a lying ego, four
eyed weasel, that is nothing but a big bullcrapper??? I didn't see any
Clubs for AARA at Dayton! As a matter of fact, there is not one Ham
Publication that ever mentions IARN/AARA!

PAST TAPES: All this reminds me of one of the Tapes I listened to (as you
past readers know, we have about 200 hours of past tapes of Glenns
programming). This one tape, about 1995, the guy that called was a pro
Golfer that was just getting started in Ham Radio. He was talking about 2
meters, and how important Golfing was to his career, but he was able to find
time for Ham Radio, be a Golf Pro, and teach the game to young kids (get
this): Then Glenn comes back with this stupid statement, I am the head of an
International Radio Organization, that is much more important than playing
Golf. Then a brief silence, then Glenn went on-and-on about how great he is,
etc., etc., etc., and how he heads up IARN/AARA and is know all over the
World (you know the drill). It's the same old stuff! Glenn could care

less
what you do, or what your interest are. It's just another method he can
use
to get on his soap box on how great he, and IARN is. I guess those days
are
over. Either Glenn is too afraid of News Letter, or the FCC put a stop
to his
method. You know, it seems to me that in one of the earlier News
Letters, we
advised Glenn his broadcast would not be so bad if all he did was the
News
Line Bulletins, and stop all this personal garbage he airs. Maybe Glenn
has
seen the light here, you think? Is this a first step? I'll tell you
this, if
Glenn could cut back on the broadcast time wise, stop these insipid
analogies
of the ARRL, and everyone else who disagrees with him, tell the truth,
admit
he has been wrong in the past, give a public apology for deceiving
everybody
about his organization, maybe then, Hams will forget/forgive, and can
start
on a fair level playing ground. Also, Glenn has to stop using Walter
Cronkites promo ID, Walter has worked too long and hard to obtain the
reputation he has, and Glenn knows Walter does not want him to use his
name,
or picture, with his organization. Come on Glenn, can you do all this?
Get
with the program. Nobody cares if you want to start another
organization to
replace the ARRL, but get real here. The ARRL will never be replaced,
but
there is no reason someone could not start up another group. You, will
not
be this person the way you are going now. You cannot cut people down
and
expect them to side with your views under the threat of being
persecuted by
you insipid dialog. Lets face it Glenn, you are AARA/IARN, nobody else,
no
Board of Directors, no tax exempt group, no Corporation under the
Secretary
of State, no lobby group in Washington DC, no hundreds of people, just
you,
yourself, and ego. If you died today, no one else would take your
place. So
why not admit this, get organized, tell the truth, and come back to the

Human Race. Stop this stupid vendetta against the ARRL (because you will
never win). Only an insane person would continue on the way you are doing
now. We were just trying to help, but I think your too far gone !!!

50 YEARS OF CBS: Wednesday, May 20th, 1998, there was a special TV program
on 50 years of programming of CBS. The interesting attribute was on Walter
Cronkite, KB2GSD, and how he was the icon for CBS News. It took a career and
lifetime for Walter to do what he did, and it irritates us Glenn Bastard
plagiarizes this individual to further his creditability for AARA/IARN. Glenn
Bastard is a pathetic individual, and a real lo-life scumbag for doing this.
It is up to all of us to save the reputation of Walter Cronkite and let

everybody know Walter is not part of AARA/IARN and wants nothing to do with
same! It is important that all Hams write to Walter Cronkite and air their
opinion about Glenn Bastard !!!

WEEK OF 25 MAY 98: Glenn started giving out names of callers. We have noticed
this pattern over the years. Right before Dayton, Glenn cleans up his act.
Right after Dayton, he starts back his usual insipid programming, stupid
editorials, and Worthless Boring Dribble, to run his program out of time!
Regardless of his tactics, News Letter will continue on to get info out.
Also, we noticed this year, at Dayton Hamvention, Glen did not pre-record
people, or interview anyone to replay back on his future broadcast. In the
past, Glenn usually used three weeks of boring dribble recordings. Since we
did not see Glenn at Dayton, it's possible he didn't show his face, or he was
put in his place. Believe me, nobody we talked to at Dayton supported
IARN/AARA, or even knew what his organization was. Glenn did not do
well !!! Week of June 29th, Glen did nothing but News Line Broadcast and
stupid promos. Hey Glen, do you get PMS?

WHINER AWARD: Goes to Kevin Rose, KA1FTW. Another Bozo that thinks he knows

all about Ham Radio. Week of 6/9/98, Kevin's stupid Letter to Glenn show what
an idiot this hobby produces. These people must be the biggest bunch of

Nerds on the face-of-the-planet. Of course you realize who Kevin Calls.

Another Whiner goes to Pete, WZ2X, again, for his insipid email to Glenn. I
think Glenn, Pete, and Kevin should all move to Hawaii and get married. Then
all-for-one, one-for-all, can dominate Ham Radio! Oh, and I forgot to
mention W. Continelli, W2XOY, Boo whooo, Snif-snif, whaaaaaaa, the ARRL is
not welcome out here in western New York. Just a bunch of mean-old men, and
I am developing a trauma. Guys, get a life !!!!! If you want to help Ham
Radio, Lobby with the ARRL & FCC for changes! Do any of you idiots that call
Glenn actually think Glenn is going to change Ham Radio? What has Glenn done,
what has he accomplished, what has he contributed to this hobby? NOTHING but
a worthless, boring, broadcast that has no value to anyone but Glenn Bastard.
His illusions-of-grandeur of having his own Radio Station!
Gee, look at me. My name is Glenn Bastard, God like figure to Ham Radio,
aren't I cool? Please send me money so I can keep my worthless, boring,
dribble to my 3 fans (wife, Chris Murdock, and his hand). W2CE, Robert Reed
(week 7/6/98). This guy gives handicap Hams a bad name. I used to be a VE,
and believe me, handicap Hams get a fair shake. Nobody is labeling, or
attacking, handicap individuals as an inferior class of people. This guy
wants something for nothing. Go buy a CB Radio and stop complaining!

WORTHLESS-BORING-DRIBBLE AWARD: Goes to Allen Hattsfield, Milton Florida.
Another idiot, who is not even a Ham Operator, thinks he has all the
answers. Your typical CB operator that is too stupid to pass a Ham Test,
then blames it on the ARRL. Gee Glen, the test is so hard, and I can't do
CW! Ham License should be like CB Radio License, there should be none! No
test, just get on-the-air. The FCC needs to expand the CB 11 meter band,
and I know many Hams that have turned in their license (yea right). I

got to
admit one thing, Glenn did not agree with this Bozo, but wasting all
this air
time on this nonsense is pathetic! How come after the Dayton Hamvention
Glenn
didn't get any recordings? I thought for sure we would be listening to
a
months worth of taped dribble-crap on how great Glenn did at Dayton.

ATTA-BOY AWARDS: None this quarter. Glenn is too Chicken-Sh.. to air
the
truth. The Hallmark of Glenn's organization is falling apart, and
everyone is
starting to see this. Smoking mirrors here, right?

PROMOS: I don't know about you, but I am getting sick and tired of
the same
ole stuff. Glenn needs to get some new promos to ID his station. The
Hams he
uses are the same old nerds we have listened too over the past few
years. Of
Course we don't consider Walter Cronkite a nerd, it amazes us he has
the
gall to continuously use his voice when he has been asked to stop. I
think
we need WA1HLR to give an ID, HiHi.

BERRY GOLDWATER, K7UGA. 5/29/98, A great Ham has passed away. I had
the
privilege to work Berry many years ago and was even more thrilled to
receive
a QSL Card from him. This was an individual that Hams can look up to
and be
proud of. A great testimonial to Ham Radio. It just goes to show you
there
are many individuals out there that truly make a difference in the
world.
Berry Goldwater will be missed. Lets just hope Glenn Bastard does not
exploit
the late Berry Goldwater for his own personal use for his stupid
organization! He has already tricked Walter Cronkite, who is next? What
a
pathetic liar !

GIVE GLENN A TAMBOURINE AND BOX OF KLEENEX. Week of 7/13/98. Well, if
there
is a controversy, Glenn Bastard will be the head-honcho to led the pack
of
crying wackos on the march. What amazes me is, these leftist people,
hams,
write to AARA/IARN to gripe about problems with the ARRL instead of

taking
it to the source, the ARRL. WHAT CAN AARA/IARN DO??? N-O-T-H-I-N-G !
! !
This is the proposed Voluntary Band Plan the ARRL is trying to submit
to the
FCC. Glenn broadcast some comments by KF7VY, Ed Mitchell, N6NB, Wayne

Overbeck, & WA6VSE, Carl Stevenson. As I can understand their
concern,
writing to Glenn Baxter is a waste-of-time, because the FCC, and ARRL,
do not
take IARN/AARA seriously. Who Does??? Here is my take on this Voluntary
Band
Plan. Amateur Radio has changed over the last 50 years with the
advances of
new technology, and more Hams coming on to the spectrum. The one nice
thing
about this hobby is, there is something for everybody. There has to be
a
Band Plan because if you don't have this in-place, somebody can run HF
Packet right on top of K1MAN's Broadcast on 3890KHz/AM. (Of course,
we
here at News Letter would not mind that); however, with all the new
modes
out there, we need to have a Band Plan in effect so the Side-Banders
can
have their slot, the AM'ers can have there slot, the APRS can have
their
spot, CW operators can have their slot, and so-on and so-on. A
gentlemen's
agreement is fine, but as you know, there is always the idiot that will

run USB on the AM window, or FM simplex on a Packet window. There needs
to
be a band plan in-place to insure harmony on the overcrowded spectrum
we
already have! To all you Hams out there that think you can write to
IARN/AARA
to accomplish anything, direct your energy to an entity that can
really
make a difference. This controversy just gives Glenn another soapbox
derby
to further give his organization creditably when there's no
creditability
to begin with! The finest, Blah, Blah, Blah, (go barf!)

WEEK OF 7/20/98: We here at News Letter were impressed with KJ7FC, Beth

Harris, for her outstanding ability as a young Ham on her attributes
towards
Ham Radio, and her thoughts about the ARRL, meeting people in the

community
and overseas, teaching other young people about Ham Radio. It is nice to see
that someone can use this hobby for what it was intended for, and not use it
as a political tool to further their own cause (like someone we know, right
Glenn?). This same week, there was a piece on KC9RP, Hap Holly, about his
life and his involvement with Ham Radio. We were very moved by this, and it
just goes to show you there are true individuals out there that can
represent this Hobby, and show the real worth on what Ham Radio is all
about. Individuals mentioned above will keep this hobby going, and it makes
me proud to be a Ham Operator. Hopefully, idiots like Glenn Baxter are few
and in-between!

LATE BREAKING INFO: 7/20/98. What happen to Glenn at Dayton? We have some
juicy information we just received on the supreme irritant. See next
addition of News Letter for info. Also, have you noticed Glenn does not give
any more editorials on his programming? How come Glenn? Does this tie in on
the information we just received? Why aren't you giving out callers names,
etc? Why do you keep airing Walter Cronkites promo when the Cronkite camp
has asked you to stop? How come you don't have any new Hams give out a promo
with their callsign? Did you have an unwelcome visit? Worked anymore
International Emergencies lately? Face it Glenn, Hams have got your number
and know the truth !!! Also, does anyone know about 2 video tapes going

around on Dayton and Rochester? We want a copy ! Also, it has just been

brought to our attention, the Rochester Ham Fest is going to be seen on

Channel 5, in Boston, on a local program called Chronicle. We do not have
the info when this is going to be aired, or if it has already been aired at
the time of this publication. One of my staff members told us they were

filming.
We do know that the Dayton Hamvention was on local area News in the Dayton,
Cleveland, Ohio area. Did any of our readers see this? How come Glenn
Bastard

didn't get on a TV News Broadcast?, Isn't AARA/IARN recognized by CBS?,

Uhhhhh, Helllwoooo, my name is Glenn Bastard, I are intellergent !

HEY GLEN, We didn't bite, better luck next time. Your really an idiot if
you though we would fall for that one, nice try. Oh, and by the way, we

know! You know what we're talking about, you Bozo!

EDITORIAL
You know, It has been about three years now since News Letter has been on
this campaign to get info out on Glenn Baxter. We have heard allot of crap
from Glenn Baxter over the years, and his thrust to trash the ARRL is getting
old, and the constant rhetoric about what he can do for Amateur Radio is a
Joke at best. The main problem of Glenn Baxter is his Broadcast itself.

Amateur Radio does not need this. Amateur Radio was designed for two-way
transmissions, not one-way. Whether it is the ARRL, or K1MAN, these
so-called bulletin services are not necessary on the Ham Bands. Glenn Baxter
uses the argument: if it's Ham Radio related, why not transmit on the Ham
Bands? This is a stupid analogy! The Ham Bands are crowded enough without
some yo yo broadcasting, causing interference to people that want to use the
hobby for what it was intended for. Glenn will then state: Well, the ARRL
does it. That's right, the ARRL does broadcast, but for education purposes
only. CW Practice, propagation reports, etc., and they don't do
it 18 hours a day, and slam other organizations, makes threats to Hams, or
force their way of thinking to Amateurs that have different opinions. Talk
Radio, give me a break! This is total nonsense. It would be one thing if
Glenn was really doing this for the betterment of Ham Radio, but he's not.
Glenn Baxter has a grudge against the ARRL and he will say, or do, anything
to discredit that organization to further his own cause. Glenn also hates the
AM'ers, because this particular group has been battling Glenn for the
frequency space he trashes when his broadcast is on the air. His modulation

is distorted, his frequency is too wide, and his switchover timer is not
correct. Glenn purposely transmits on the AM Window to make the AM community
mad because of all the heckling he has gotten over the years. This is not
conducive to good engineering practices, and Glenn forcing his personal

views, under this so called bulletin service, is not beneficial to Ham
Radio, or even Ham Radio related. Comparing the ARRL to Hitler, Stalen,

Communist Russia, making a Ham Operator publicly apologizing over the air,
airing a bounty on a publication, is not in the best interest of this hobby
and it should be stopped !!! This is a MONEY MAKING OPPORTUNITY FOR GLENN
BAXTER! Just dial into Glenn's Web Site and see for yourself. He is doing the
same thing the ARRL is doing, and he is a hypocrite when he says anything
different!. The Hams Bands are nothing but a media to advertise his Web Site
to make money! Plus, use it as a political tool to further his cause !

Glenn Baxter keeps telling everybody his survey results 10 to 1 pro his

organization. This is not true, and Glenn knows this. He is using the
technique like a legion. You know, if you keep repeating a statement, or
rumor, one day it becomes true. This is Glenn's method on making his
organization look good, when in reality, the results are probably 50 to 1
against his organization. I'll tell you this, and I mean this, in over three
years I have not found even one person, or organization, that supports
IARN/AARA. Most of the Hams at Dayton that showed an interest in his
organization were either new Hams, or Short-wave Radio Listeners that are
not familiar with the hobby. Can't you just see Glenn foam-at-the-mouth when
someone ask him about his organization? Dollar signs appear in his eyeballs,
and his mouth starts to tremble!. You just have to laugh when Glenn claims he
gets over 400 applications per week to join his stupid organization. This
guys is a sick puppy. Remember when Glenn stated he had over 140 thousand
listeners as a result of an independent survey? Of course Glenn never

stated
who did this survey, and when.

You old time readers of News Letter have seen me say this over, and
over,
and over. There is know change, and I have more important things to do
with
my life then to wonder about the antics of a raving lunatic; i.e.,
Glenn
Bastard. Over the next few months, we are going to make a decision
whether
to continue to distribute News Letter individually. The actual writing
of
this publication takes no time at all, but the distributing of it is
long,
and takes time. If it was not for my staff, I could not do this alone.
We
are going to seek out individuals (such as K1IV), that have extensive
E-Mailing lists, and INTERNET access to get our publication out. Glenn
cannot
file suite on the truth, and mailing a Flyer, or publication, is not
against
the Law because we are not seeking any monitary funds from this. All
allegations on Glenn Baxter can be backed up, and he has no legal
grounds to
stand on. He might cry, and whine, about how News Letter is ruining his

reputation, but this is not true. Glenn's own mouth is ruining his
character
and his organization. Its slander when Glenn's hears anybody talk bad
about
himself, but its okay for him to trash ARRL, and everybody else, when
they
don't conform to his way of thinking. A double-standard here. A Class
individual, or organization, does not bad-mouth the other guy. Who ever
said
I was a class act? I don't mind getting on Glenn's level, because it
exposes
this idiot and his organization for what it really is! Glenn Baxter has
lost
many supporters, friends, and I suspect family before too long. What I
am
hearing from sources that know Glenn, he is on the verge of a mental
collapse. His finances are stretched, and if it is a fact that Walter
Cronkite is suing AARA/IARN, Glenn Baxter will be financially ruined,
and his
organization will be finished. I seriously doubt someone else will step
in
and continue on with this bullcrap! The sad thing is, Glenn could of
really
started something here, I think allot of people would like to see

another
organization like the ARRL. Competition is good; however, Glenn won't
be that
entity!

Anyways, we shall see. We are not too sure when the next issue of News
Letter will be. I will be taking many trips this summer, and I am
planning
to go out and see my daughter who just moved to the San Francisco area.
I
have received many tips on Hams that want to put News Letter out, but I

realize allot of Hams are not on the NET, and many do not even have a
computer. My Staff is thinking up new ways to
get info out, and I get more volunteers every week. I think it's funny
Glenn's
stupid Reward did not phase anybody, because most normal people know he
will
never be able to pay-out (plus the fact all my Staff think what we are
doing
is great). Many Hams I talk too enjoy the rag. I guess the people that
hate
News Letter are Glenn, and the Whiner Award winners. I guess we can't
please
everybody. There won't be much to report on if Glenn keeps his
programming
the way it is (I think this is Glenn's way of fighting back). That's
fine with
us because it was our intention for Glenn to change his programming.
News
Letter accomplished a major victory doing this. I think it's great that
we
don't have to listen some insipid editorial by Glenn Baxter, or listen
to
some stupid Ham talk about his shoe-laces. It must be heart breaking
for Glenn not to be able to air the names and addresses of his callers.
Now
that we know he is editing all calls, his creditability is ruined. We
won
anyway you look at it. Whether Glenn will ever take his broadcast
off-the-air, or not, is something we will have to wait. The day K1MAN
is
shut down will be the biggest celebration of Hams in the World.
Hopefully,
one day, the FCC will step in and do same. Glenn is on the edge of Part

97-111B6, I am amazed Glenn gets away with what he does. If you ever
get a
chance to read these rules and regulations, read the whole chapter and
tell
me K1MAN is not violating FCC Regulations.

Have a good Summer for all, next publication should be in October or November. Just say NO to IARN!

IARN: (I)t's (A)nother (R)adio (N)utcase, Hours ahead and nobody cares
!!!

YOUR LISTENING TO IT NOW, This is NEWS LETTER, signing off

HELP BEAUTIFY THE AIRWAVES..... GET RID OF K1MAN !!!!

You know NOTHING. :-)

All you do in here is try to demean and denigrate others
who HAVE some experience in radio...especially those
who have done MORE than you ever have. Tsk.

>
> You got a bad "fit rep". Oh well. We can't all be "100%" 100%
of
>the time. Deal with it.

Tsk. You have NO frame of reference in trying to compare
industry with your personal experience in the military.

To reiterate - because you can't understand how industry
works - I was NOT EVER an employee of the USN and NOT
EVER at NADC. I was an employee of RCA Corporation then
and remained so until 1975. At NO TIME did any NADC
people do any performance reviews of my work. They
couldn't. I was NOT an employee there. :-)

Industry doesn't have "fitreps" as you call them. They
are called performance reviews and are periodic, the
period of review times dependent on local corporate
policy. [see any Personnel department...or "Human
Resources" - same thing under a new buzzword]

> One of my first fitreps in the Corps was less than what it could
>have been. Not bad, but certainly a wake-up call. I took my
>"spanking", did what I needed to do to correct the shortcomings, and
>moved on. No big deal.

The electronics industry is NOT "the corps." :-)

I've not had a bad performance review in my whole
career in southern California aerospace. That career
started in 1956. Not anywhere close to what you
think deserves a "spanking." :-)

The only "wake-up calls" I've had were from
operators at motels and hotels I was staying at
while on field trips for my employers. :-)

>> SECANT (SEparation and Control of Aircraft by Non-
>> synchronous Techniques) performed well...(SNIP
>
> Has nothing to do with Amateur Radio policy or that you were
>deemed less than adequate at NADC.

Tsk, tsk, tsk. Still trying to spin your undetailed
yarn of "less than adequate" performance at NADC?

Idiot. I was never employed by NADC. I was never
employed by the USN in any capacity. No part of
the USN ever rated me for any "performance review"
and certainly not a "fitrep" a la the murines. :-)

You are still trying a snow job on everyone in a
vague effort to cover up your original LIE. Tsk.

The ONLY way you can right your terrible wrong is
to give enough detail into what was actually done
while I was at NADC as "contractor personnel,"
aka field engineer. You can't do that. You have
NO real information to base your personal attack,
don't know how contracts are carried out, have NO
idea what this particular project was about (even
if explained in detail to you), have NO
understanding of research and development with
Department of Defense contractural procedures.

>> Based on the results of that 2nd gen flight test...(SNIP)
>
> Twenty one lines of non-relevent story telling.

Tsk. VERY relevant and necessary to counter all
your pitiful little LIES told about others.

>> >Now suck it up and move along,
>> >old man! You ran your mouth off about all your hot jobs.
>>
>> Wasn't a "hot" job. Was an everyday kind of design job.
>
> One you didn't do well at. Oh well.

Tsk, tsk. You have NO idea of what was involved,
don't understand the technology, don't understand

the way contracts are performed, don't understand
the way individual performance is rated by the
electronics industry.

As I said, I've had NO bad performance reviews in
the aerospace industry. [research that all you
want...if you say you "found" something, then that
would be FALSE, a LIE]

Proof of performance is that equipment works
according to pre-established specifications. In
the case of Research and Development contracts,
test data may turn up some need to change the
original specifications (not unusual). Such
changes may be instituted by the contractee (or
testing agency assigned by contractee) or the
contractor. In the case of the first generation
SECANT, the testing agency (NADC) found that
their data recording methods (phototheater) was
inadequate. That was solved on the second
generation by incorporating a multi-channel tape
recorder formatted for the on-site NADC computer
(can your mythical "reference" name that main-
frame computer, hmmm?). That condition applied
to the Minneapolis-Honeywell collision avoidance
system also under test (separate contract).

>>
>> It was "hot" only in the SAW filters...(SNIP)
>
> Great. Ohhhhhhhhhhh...Ahhhhhhhhhhhh....Stuff that extend's an
>engineer's slide rule, I am sure.

Tsk. Improper use of pluralities. :-)

"SAW" is an acronym for Surface Acoustic Wave. Those
are frequency-domain filters using the phenomena of
very ultrasonic wave propagation on surface of
piezo-electric material such as quartz or lithium
niobate. Interdigital SAW filters can be made
with extreme sharpness of skirt selectivity at the
passband edges. As such they make ideal "matched"
filters; i.e., their passband is equivalent to the
reciprocal of a pulse width...resulting in an RF
envelope output shape close to a cosine-squared
(very low harmonic content) waveform. SAW filters
are common as "roofing filters" or the very first
filter of multiple-conversion receivers. You will
find SAW filters in common use in cell phones due
to their very small size...as well as cell site
terminal equipment...and now TV receivers,
especially those for DTV. In 1974 SAW filter use

was "cutting edge" technology, especially in the
mid-VHF frequency range. 31 years later it is
rather common and Murata (among many makers) have
produced hundreds of thousands of SAW filters on
lithium niobate substrates.

> Of no relevence to Amateur Radio policy at ANY level or you
>behaviour herein.

"Behaviour?" :-)

Since when has YOUR name-calling, denigrations, and
attempts at defamation of character ever concerned
"amateur radio policy?" Tsk, tsk, tsk.

>> > You happened
>> >to drop one name where I had an "in". I found you out.
>>
>> Steve Robeson was *NEVER* "in" on either the RCA or
>> Minneapolis-Honeywell aircraft anti-collision systems.
>> Steve Robeson wan't even AT NADC in 1971 to 1975. He
>> was a jarhead who never got beyond Warminster NAS on
>> the other side of the road A DECADE LATER.
>
> Nope...wasn't in those programs.
>
> I did have an "in" with a gentleman who was, however.
>
> Outted you nicely.

An "in?" Tsk. You've been talking to YOURSELF, busy
telling your various personalities tall tales.

You are so far OUT you couldn't get "in" anything
but your own sociopathic psychotic activity of
constantly trying to denigrate ANYONE who opposes
you in any way. You keep compounding your own LIES.

You can NOT produce any DETAIL at all of what I was
doing at NADC or even whatever I did at any time in
my career in electronics design engineering. You
haven't a clue as to what is done in industry on a
regular basis. You can't describe NADC or Warminster
NAS across the street, you can't describe how one
crosses that road, the shape of the NADC buildings,
their special NASA astronaut test facilities (only
one), any of the broadband HF radio antennas outside,
the fact that the original building and airfield was
constructed for Brewster Aircraft (the only aircraft
corporation known to go bankrupt DURING WW2), or the
curious taxiway from ramp area to runway at the NAS.
You can't name anything about the NADC computer

center, can't identify the curious little tracks
on part of the ground floor buildings that were at
NADC, don't understand that the NAS was all-Navy but
NADC was largely civilian. You can't describe the
cafeteria at NADC or the "O club" right above it nor
the various little offices that can serve both NADC
and contractor personnel, can't describe their
internal police arrangement, or even their playing
of reveille at an unusual time.

All you can say is that you "knew somebody" there
who "gave me a bad fitrep" and said I did "lackluster"
work for NADC. You LIE and compound that LIE.

>> Tsk. I have a copy of the FINAL report on SECANT...(SNIP)
>
> I am sure the Anderson household is ripe with files of old
>projects that have absolutely nothing to do with Amateur Radio.

The proper word is "rife." Yes, I have enough from a half
century of working IN electronics and radio, but a small
part of it DOES have to do with hobby electronics (such
as amateur radio. I converted a spare 3rd bedroom into an
office/library for my wife and myself years ago...in the
southern house (not the northern one in WA)...one 13-foot
wall has three rows of bookshelves (and that isn't enough).

> And not a bit of it relvent to the fact that Leonard H. Anderson
>was at NADC, was a less than stellar performer, and when I asked
around
>about him, I got a "hit"...

You got SHIT. Bad word or not, that describes what you do
to EVERYONE who disagrees with you. You SHIT on their
person, defecating on them verbally in a momentous
display of your rage and hatred if they so much as say
anything negative against you. All you do is practice
sociopathic verbal defecation.

> And the people at NADC that had to evaluate the performace of the
>contract weren't impressed with YOU, Lennie.

Idiot. A TESTING AGENCY "evaluates the performance" of
the TEST. It doesn't "evaluate contractor personnel."

For the last time: "Contractor personnel" do NOT work
FOR any federal test agency. They work FOR their
employer. Employers do the performance reviews of their
employees. If a contractor's employee does not perform
as they are required to do, the contractor removes them.
I've NEVER been removed for such a reason. I've never
been removed from a field test location for ANY reason.

You have to TRY and stop SHITTING on people you don't like. It isn't productive, it isn't civil, it isn't according to The Amateur's Code.

All you've done so far is to dig yourself deeper into your original LIE. You have NO proof. You can't supply ANY details. You have so many misunderstandings about defense contracts and procedure that it shows you are totally BOGUS in all that SHITTING on others.

You are SICK. You have diss-temper. You need a vet... a veterinarian...or something. GET HELP for yourself.

Just as an aside, Leonard, would it be possible for you to come up with
any details about my work overseas at U.S. Embassies in Helsinki,
Finland;
Bissau, Guinea-Bissau; Freetown, Sierra Leone; Gaborone, Botswana or Dar
es Salaam, Tanzania? Could you describe just one of the embassies or
one of the comm centers in any one of them? Would you be able to
outline what my typical day might entail or what equipment I used?

Would you be able to do the same for my Air Force tour in Vietnam?

> The proper word is "rife." Yes, I have enough from a half

> > nothing; it's a Collins KWM2 Commercial transceiver
> > with a military nameplate.

> Don't want one. And it's a KWM-2A, with the extra crystal positions.

It certainly is the KWM-2A.

Nearly a year ago, Len told us:

"The exception was the procurement
of the AN/FRC-93 HF transceiver, the commercial version (full
crystal bank) of the Collins KWM2. [I have the TM on it and can tell
where to get it for free PDF download...even for Canadians... :-)] "

The commercial version of the Collins KWM-2A is the Collins KWM-2A.
I have a government surplus unit. It has no military nameplate
identifying it as an AN/FRC-93. The units I used in Vietnam had no
military nameplates identifying them as AN/FRC-93 units. The manuals we
had on hand were Collins KWM-2A manuals.

Dave K8MN

4284. N9OGL'S RESPOND TO THE MANCHESTER NEWSLETTER ABOUT K1MAN

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-15 22:27:03 UTC
From: N9OGL <toddaug@consolidated.net>
Message-ID: <1113604023.017949.265930@o13g2000cwo.googlegroups.com>
Source record: 105800

The Manchester Newsletter and N9OGL respond.

!!! WARNING !!!
K1MAN RADIO BROADCAST ON
3885AM/3975LSB/14.275USB

ALL RADIO ENTHUSIAST, WHETHER YOUR A HAM OPERATOR OR SHORT-WAVE RADIO LISTENER, YOU SHOULD BE ADVISED ABOUT K1MAN, GLENN BAXTER, IARN/AARA. Don't be duped by this individual. Glenn Baxter's only interest in Ham Radio
is to make a profit at your expense. He uses the Ham Radio Frequencies to
advertise his organization, when in reality, he wants unsuspecting people
to dial into his WEB Site so he can sell you his Bill-of-Goods! Why pay
Glenn Baxter when the ARRL, (American Radio Relay League) will help you
for free, and is a well known, established service, known for many years!

Really, I think it rather funny that K1MAN can't have goods to sale but the ARRL can. If anyone violates the law it's the ARRL, and I'm sure there is come whiney little ARRL lovers out there that would say, OH K1MAN IS ADVERTISING HIS GOODS DIRECTLY. Well you lazy fat bastards the rules state that amateur station cannot make money direct or indirect, So the K1MAN may be telling people in his bulletins to go to his website, where he is selling goods (DIRECT) the ARRL is selling goods (INDIRECT). And for you fat lazy bastards out there here is the rule:

§97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

(2) Communications for hire or for material compensation, direct or indirect, paid or promised, except as otherwise provided in these rules;

So while K1MAN is doing it directly, W1AW is doing it indirectly. I often find it funny that it's the ARRL members who are whining about it...hmm do you think the ARRL and it's members are trying to set up a monopoly???

When you get Glenn's info package, it is a classic PYRAMID SCHEME !!!!
Broadcasting slamming the ARRL, defending personal issues, is not

conducive to Ham Radio !!!
Glenn Baxter has been on for 10 years; Ask yourself this, what
has he
done for Amateur Radio?
K1MAN broadcast on the Ham Bands might sound legitimate, but don't get
duped! There are many allegations about Glenn Baxter, and his
organization,
that warrant controversy, from him being a convicted Child Molester,
to
operating a Pirate Radio Station off the Coast. Glenn Baxter is using
Ham
Radio to fill his illusions of grandeur of having his own Radio
Station,
which in reality, is a garage operation. He is using a loop-hole in
the FCC
rules to continue on with this worthless broadcast that causes
interference
and dissension in the Amateur Radio Community. Talk Radio on Ham
Bands, give
us a break, Amateur Radio does not need this! Amateur Radio is a Hobby

designed for two-way communications, not one-way. Don't let yourself
get
involved with this lying, ego idiot and his organization, which is
designed
to extort your money, and damage the reputation of Ham Radio.
ALL GLENN BAXTER HAS IS A TRANSMITTER AND A BIG MOUTH !

As I've stated many times before where in the FCC rules does it state
that a person can't run opinionated information bulletin? The problem
is that these low life fat bastard ARRL member believe that "oh,
informational bulletins must be news". No where in the FCC rules does
it stated that you fat bastards, the rules and the FCC; has through
warning letters stated that and information bulletin only has to be
information relating to amateur radio and directed to the amateur radio
service, there is also no time limit on bulletins. By the way you fat
bastards Glenn has been on the air not ten years but more like 17
years. I really think it funny here is a bunch of ARRL / QUEER RZ
people who want to suppress someone speech. It is also funny that this
group and their little buddies at the ARRL and QUEER RZ are make up
this paranoid claims about this guy by claiming he is doing all this
stuff from child molesting to running a pirate radio station off the
coast. Then they say "oh he found a "loophole" in the FCC rules,
listen you stupid fat bastards remove the dildo with the rusty razor
blades from your ass and hear me well, there was no "loophole" as
you claim, the rules has always been there, your just pissed off that
he's using the rule and you don't have the mental capacity to use
them. It funny that some fat bastards are allowed to say what they want
on the air but when K1MAN wants to this fat bastards from the Hitler

youth jump in on these newsgroups, chat rooms, and message boards whining "oh, what K1MAN is doing is illegal ..... boo hoo". Don't radio too serious and get a life you fat bastards.

This is not a SMEAR campaign as Glenn Baxter claims. NEWS LETTER gets the truth about someone who is destroying our wonderful Hobby because he has a grudge against the ARRL, and anyone who does not agree with his views on how Amateur Radio should be, according to Glenn Baxter. JUST BE AWARE ! Glenn Baxter's only concern is to get your Dollar! This is a business for IARN, Just see for yourself.
AARN/AARA Does not represent the Majority of Ham Operators in the World !
SEE FOR YOURSELF, DIAL INTO HIS WEB SITE, CHECK IT OUT !
Also, Walter Cronkite, KB2GSD is not part of the IARN Organization

It has been revealed to us Glenn Baxter references Walter Cronkite when fraudulently applying for Government Grants to make his organization look good so he can extort funds for his own personal use to keep his station on the air. IARN/AARA is not financially solvent and is on the brink of Bankruptcy.
** IARN/AARA is NOT recognized by CBS, ABC, BBC, or any other Net-work affiliation **
IARN: (I)t's (A)nother (R)adio (N)utcase !!!
HOURS AHEAD, AND NOBODY CARES

It seems to me that this "Newsletter" is that a smear campaign against this guy. One of this day you fat bastards while your enjoying each other company with dildos with rusty razor blades embedded in them. So poor ass smock is going to write a newsletter about you and your little group and gather information about you and your group and spread all your dark secrets over the internet, you fat bastards. What about the ARRL? So the son of bitch doesn't like them, BIG FREAKING DEAL!!!! So does a huge population of the amateur service. Everyone who hates the ARRL has that right, you fat bastards. Despite what you and all your little fat bastard friends think my Baxter has the right to voice his even on the radio.

After you have received our Flyer, check it out, call Glenn Baxter at (207/495-2215) and let him know your heard from News Letter. You will

be
amazed of the response you will receive. As a matter of fact, since
you are
paying for this call, ask Glenn why he does not have an 800 number.
Then call
Walter Cronkite, 212-975-3627, and speak with Marline Adler. Ask her
about
Glenn Baxter and why he promos Walter on his WEB Site and Broadcast to

further his credibility of his organization, and if Walter is a part
of
IARN/AARA. The Cronkite camp wants Glenn to stop. When you call Glenn,
ask:

1. Who is his representative in Washington, DC to lobby for AARA/IARN?
Also,
what is his Dun & Bradstreet rating of his organization. (Watch Glenn
waffle
on that one)

2. Ask how many Radio Ham Clubs uses IARN as their Club Affiliate?
Where are
they, and who is the President of that particular Radio Club, and what
is
his/her call sign?

Why doesn't he broadcast this information?

3. Which one of Glenn's Organizations is a Maine Corporation registered
with
the Secretary of State? Who are the Corporate Officers (besides his
own
family, if any)?

Ask Glenn what really happen to him at Dayton?
4. Why doesn't IARN/AARA attend major Ham Fest in New England area?
(Don't
buy this bullcrap he doesn't have the time). What Ham Fest overseas
does he
attend?

Why does Glenn pack a Gun these days?
5. How many Jump Teams does he have? Ask for a list of names of the
Hundreds
of personnel he can use in an International Disaster. (If you get 10
names,
your lucky)
News Letter knows what really happen during Hurricane Marilyn!

6. Besides his big mouth, ask Glenn what AARA/IARN has actually done
for Ham
Radio?
(That should be a good one, you'll get an ear-full of bullcrap

and
dribble from that question)

7. Ask Glenn why he got fired from Collins Radio (Another good one, we know
the truth)
(Then ask about his days at Vermont Academy and why he was considered
such a nerd!)

8. Why is Chris Murdock's call, WA1HOD, have the same QTH as K1MAN? See

Callbook

You will notice a cloy-babble, rhetoric, insipid reply (if any) from Glenn,
and his usual crying and whining about all he is doing for Ham Radio, and
the ARRL is so evil and bad for the common Ham Operator. Of course you will
get this response that he doesn't have to give names and addresses of people
that represent his organization (because he has none!). ARRL list the names
in the front of their QST Magazine. Any legitimate Corporation makes the
Names of their Officers & Sponsors open for public scrutiny.

Just sit back and look what is going on here, Glen Baxter, K1MAN is a fraud.
This Organization of his will never replace the ARRL, or even come close to
representing the majority of Hams in the World. Just beware! After you talk
to Glenn, if you have a Computer, check into his WEB Site, that is where the
real BullCrap is. Watch your wallet!
Glenn always brags on the air it doesn't cost (and the term he uses) dues, to
join IARN; however, you have to pay 10 Bucks for a stupid T-Shirt, and

$35.00 a year for a full membership to listen to this worthless Broadcast.
WOW, Look at me, I are an AARA Member. Go to your local Ham Fest and wearing
that T-Shirt, you'll be the toast-of-the- town! Do yourself a favor, get
away from this idiot, talk to other Hams, enjoy the Hobby! The ARRL may not
be perfect, and not for everybody, but at least it is a creditable
organization that has been the backbone of Ham Radio for a long time, and is

well known!
HELP BEAUTIFY THE AIRWAVES, GET RID OF K1MAN
****
#42 THE MANCHESTER NEWS LETTER Aug 98

Newsletter Information Bulletin Service coming up in 3 minutes---------News Letter information bulletin service coming up in 2 minutes--------10 seconds---------This is News Letter, World Headquarters, reporting from Manchester, New Hampshire, man-kinds answer to get information out about our local raving lunatic, alleged Child Molester, noted pervert, general nuisance on the Ham Bands, Glenn Baxter, Chief honcho of IARN (It's Another Radio Nutcase), of a broadca$h, than any normal human being on the Planet Earth could just-care-less. So sit back, join the fun, read this edition of News Letter.....

Week of 20 April 98: As you may of noticed, good old Glenn Baxter has stopped airing the full Names, addresses, phone numbers, of his callers that call his show. I guess the Warning Flyers we send out about AARA/IARN got the supreme irritant a little upset. I guess Glenn can't deal with the truth, and has to hide his callers so News Letter won't contact them. Gee Glenn, did we upset your programming, and World conquest of dominating Ham Radio with your bullcrap? Sorry, but it won't slow us down on getting info out to the public about your stupid, insipid, organization. Your creditability is shot! Too bad, Ha, Ha, Ha! We just thought of something, I bet it takes a lot more work to edit programming tapes, screen the callers, so Glenn-baby can get the correct information out on the air. Talk about hiding behind the microphone
!!!
Glenn's new format by editing personal information shows, again, IARN's level of Creditability. When you listen to these interviews, you can tell parts are being edited out. It was funny because the week of 27 April 98, Glenn was

talking to a Ham from Worcester, MA and stated the majority of letters we
receive are pro his broadcast. Boy, we know that's bullcrap. Here's the
drill: Caller, what's your first name and location?. Glenn Baxter is so
scared that News Letter is going to let someone know the truth, he can't
stand it! Hey Glenn, next time you get an anonymous call, or letter,
remember, you are now doing the same thing! Your are a fake, bullcrapper,
and a worthless Scumbag. You readers ask yourself this. Glenn stated his
Letters & Callers are 10 to 1 pro his broadcast, if that is so, why did Glenn
discontinue giving out names and address of his callers??? The next thing
you will notice, Glenn will probably have the same people call, (since he
doesn't have to air their names), and brag how great IARN is. Just remember
you saw this first here in News Letter. To confirm all this, call up
yourself, see if Glenn will air you comments!
Remember, IARN/AARA is not a talk-Radio show, and is not the first News
Line broadcast service.

HOSS-TRADERS HAM FEST: Rochester, NH weekend of 9, 10 May 1998 , I was not
able to attend; however, several area local Hams went, and they said it was
great. This is their report: Looks like most of the AM'ers were there. There
was Tim, Pete, Dale, Dale, Eric, Jim, Jim, Bill, Bill, Bill, Jeff, Mark,
Chuck, Dave, Carl, John, Kenny, Ken, Steve, Warren, Mike, Chris, the regular
crew. There were several AM groups. Tim arrived in style with the
Cadavilac, Dales was setup with his Military Gear, and Bill was set up in
his Van with his Johnson Ranger. The Deer Meat was ...

To me you fat bastards are a bunch of whinny little babies who have
nothing better to do with your time but send out this bullshit ARRL
loving newsletter while you insert dildo's with rusty razor blades
embedded in it deep into each other asses.

~FAT BASTARDS!!!~

Both I and my OM were MARS operators for a short time in the early 1990s,
there was never even a hint that they might offer equipment to either one of
us. Nor did any of the promotional material, training material, etc ever
mention such a possibility.

NEW FROM N9OGL BLOG

THIS WAS A POST BY SOMEONE CLAIMING TO BE K4YZ

k4yz says

And another thing.

Stop making hang up phone calls to my house. We know that it is you and
we have already told the police about what we suspect.

Toddyboy, my 7 year old, first grader grandaughter could teach you how
to spell and structure sentences properly, when to and when not to use
plural vs singular. Shall I have her type up a tutorial for you? If she
does can you get someone to read it and explaine it to you?

It's very hard to understand anything that he's written. I have to guess
at which word he meant to use, not just the misspellings.
Look at the topic, does he mean RESPONSE? A spell checkers not going to
help at all.

You can tell them anything you want, Todd.

Making such an accusation, even in Illinois, is known as "Making A False Police Report". It's a crime. But then you really don't have a hard time with breaking the law, now do you? Your posts here clearly indicate you feel completely at ease violating whatever law you want to.

Feel free to give me the name of the filing police officer and I will gladly give them my home number and have them do a call dump.

Did you really think that a silly stunt like this was going to work?

You're more stupid than you look.

Thanks for the confirmation, Dee. I think the equipment gravy train dried up a long time ago. When it existed, the equipment was loaned. I understood that after it was in the possession of an individual for some time, it was occasionally written off. I know of several occasions when those who were loaned gear were requested to return it.

Lennie, if you'd stop doing the very same thing in THIS forum
under the guise of your self-conceptualized superior intellect and
breeding, people would stop doing it to you.

You ran your mouth off. I was able to do a bit of research and
came up with the money card. Sucks to be you.

No matter how much you scream, how many profanities you peel off,
and how you try to bog down the basics with technical dissertations
that have NOTHING to do with the underlying comments, you'll still be
you and no one really cares about you or your anti/hate Amateur Radio
rantings.

> > And the people at NADC that had to evaluate the performace of
the

If yuo don't do the job they expect of you, yes, they put things
in writting.

> For the last time: ...(SNIP)

You never do ANYTHING for "the last time".

As a matter of fact, you haven't done ANY of the things you said
you'd do in this forum. So WHY do you think any of your screaming,
foot stomping, profantities and insults will change anyone's mind,
Lennie...?!?!

> You have to TRY and stop ####TING on people you don't
> like. It isn't productive, it isn't civil, it isn't
> according to The Amateur's Code.

YOY are the very epitome of "not productive", Lennie.

> All you've done so far is to dig yourself deeper into
> your original LIE. You have NO proof. You can't
> supply ANY details. You have so many misunderstandings
> about defense contracts and procedure that it shows you
> are totally BOGUS in all that ####TING on others.

It's not bogus.

Call it whatever you want, Lennie. It doesn't change anything.

> You are SICK.

Nope. I'm doing quite well, actually.

> You have diss-temper. You need a vet...
> a veterinarian...or something. GET HELP for yourself.

Take your own advice, Anderson. Before you lacerate your
fingertips banging on the keyboard like that......

To Steve, K4YZ, an asshole without a life:

I'm not here to play games with you. You accuse me of "disappearing." I see that it never occurred to you that perhaps I read this group exactly ONCE PER WEEK (time permitting) and that I may have been done for that day. Unlike you, I have a life - I don't sit in front of a computer 24 hours per day waiting for the next post I can troll a response from like you apparently do.

Of course, any REAL concept of what point I had actually raised is so far over your head, monkeys have a better chance of typing out Shakespeare's works before you will ever understand it - or ANY point raised by anyone else, intelligent or not, ever. Therefore, it is pointless trying to explain it to you for you will NEVER understand. You lack such a capability.

Your own, continuous ranting has shown this to the world. Poor Steve, who permanently and publically branded himself a fool.

Todd...I know this has been addressed to you before, but since you refuse (or don't know how) to show attributes, who can tell who you're trying to be obscene to?

As for you not wanting to be "inbred"...Oooops...Too late.

I also point out that the Civil War was over 140 years ago. You weren't around for that conflict. You didn't kick anything. You obviously can't kick whatever it is you're taking tonight, either.

Sober up and come back later.

little asshole....someone's pretending to be you, you fucking slut

why the fuck would I want to pretend to be some fucking inbred asshole
from tenn. I live Illinois home of abraham Lincoln, you the guy who
kick your pussy asses during the civil war

you fucking asshole

/ / /

My, oh my, Toddie. You seem to be slipping.

You seem to be suffering from IBS, Irritable Bowel Syndrome.

There ARE professionals to whom you can go for counseling, Todd. It may
behoove you to seek out one of these counselors before you blow one or more
veins in your 'abraham Lincoln' head and start seeing double. Ruptured veins
can also cause Tourette Syndrome, which you seem to be on the verge of.
http://members.tripod.com/~tourette13/

Get help quick, Todd!

we
>had on hand were Collins KWM-2A manuals.

Well there ya go! :-)

Everybody ought to run right over to LOGSA (that
stands for LOGistical Supply Agency) and tell them...

THE AN/FRC-93 DOESN'T EXIST!

Gosh yes...and TM 11-5820-554-12 doesn't exist, either!

Guess that LOGSA ought to destroy that particular CD
of TMs because Davie's (in-country?) KWM2 didn't have
an "official" nameplate, just the Collins thing. :-)

Oh, and there are about a half dozen versions of this
non-existant transceiver plus several separate TMs
(that's TM for Technical Manual for you civilians) for
ancilliary Collins units to work with it.

Would you like the NSN (National Stock Number) for this non-existant-nomenclature radio set? :-) [before you burn all those CDs in your outrage, or whatever]

Oh, and the manual produced by Collins Radio was reproduced for most of this TM. That's rather common for COTS (Commercial Off-The Shelf) electronic equipment (and other things) and has been done for many, many years.

Oh, yeah, and TMs are now also distributed on CDs to all branches of the military. Saves space and paper plus the weight on shipping the printed versions. All the branches have computers now, even stuff in the field. Those computers have "AN" numbers and "NSNs" also but I don't DARE write them in here due to the hostile environment presented by die-hard PCTAs. Those can't exist if Davie says they don't exist! :-)

Temper fry...

LenAnderson@ieee.org

4322. Re: N9OGL'S RESPOND TO THE MANCHESTER NEWSLETTER ABOUT K1MAN

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-16 07:00:20 UTC
From: N9OGL <toddaug@consolidated.net>
Message-ID: <1113634820.314814.228910@g14g2000cwa.googlegroups.com>
Source record: 105838

here's the fixed version

The Manchester Newsletter and N9OGL respond.

!!! WARNING !!!
K1MAN RADIO BROADCAST ON
3885AM/3975LSB/14.275USB

ALL RADIO ENTHUSIAST, WHETHER YOUR A HAM OPERATOR OR SHORT-WAVE RADIO
LISTENER, YOU SHOULD BE ADVISED ABOUT K1MAN, GLENN BAXTER, IARN/AARA.

Don't be duped by this individual. Glenn Baxter's only interest in
Ham
Radio
is to make a profit at your expense. He uses the Ham Radio
Frequencies
to
advertise his organization, when in reality, he wants unsuspecting
people
to dial into his WEB Site so he can sell you his Bill-of-Goods! Why
pay
Glenn Baxter when the ARRL, (American Radio Relay League) will help
you
for free, and is a well known, established service, known for many
years!

Really, I think it rather funny that K1MAN can't have goods to sale
But the ARRL can. If anyone is violates the law it's the ARRL, and I'm

Sure there is some whiney little ARRL lovers out there that would say,

OH K1MAN IS ADVERTISING HIS GOODS DIRECTLY. Well you lazy fat
bastards, the rules state that amateur station cannot make money direct
or Indirect, So K1MAN may be telling people in his bulletins to go to
His website, where he is selling goods (DIRECT) while the ARRL is
selling
Goods (INDIRECT). And for you fat lazy bastards out there here is the
Rule:

§97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

(2) Communications for hire or for material compensation, direct or
Indirect, paid or promised, except as otherwise provided in these
Rules,

So while K1MAN is doing it directly, W1AW is doing it indirectly. I
Often find it funny that it's the ARRL members who are whining about
him.. hmm do you think the ARRL and it's members are trying to set up
A monopoly???

When you get Glenn's info package, it is a classic PYRAMID SCHEME !!!!
Broadcasting slamming the ARRL, defending personal issues, is
not

conducive to Ham Radio !!!
Glenn Baxter has been on for 10 years; Ask yourself this, what
has he
done for Amateur Radio?
K1MAN broadcast on the Ham Bands might sound legitimate, but don't get

duped! There are many allegations about Glenn Baxter, and his
organization,
that warrant controversy, from him being a convicted Child Molester,
to
operating a Pirate Radio Station off the Coast. Glenn Baxter is using

Ham
Radio to fill his illusions of grandeur of having his own Radio
Station,
which in reality, is a garage operation. He is using a loop-hole in
the FCC
rules to continue on with this worthless broadcast that causes
interference
and dissension in the Amateur Radio Community. Talk Radio on Ham
Bands, give
us a break, Amateur Radio does not need this! Amateur Radio is a
Hobby

designed for two-way communications, not one-way. Don't let yourself
get
involved with this lying, ego idiot and his organization, which is
designed
to extort your money, and damage the reputation of Ham Radio.
ALL GLENN BAXTER HAS IS A TRANSMITTER AND A BIG MOUTH !

As I've asked many times before where in the FCC rules does it state
that a person can't run opinionated information bulletin? The problem
is that these low life fat bastard ARRL members believe that "oh,
Informational bulletins must be news". Nowhere in the FCC rules does it
state that you fat bastards. The rules and the FCC, has through warning
letters stated that and information bulletin only has to be information
relating to amateur radio and directed to the amateur radio service.
Plus, there is also no time limit on bulletins. By the way you fat
bastards Glenn has been on the air not ten years but more like 17
years. I really think it funny that here is a bunch of ARRL / QUEER RZ
people who want to suppress someone speech. It is also funny that this

group and their little buddies at the ARRL and QUEER RZ are make up this paranoid claims about this guy, by claiming he is doing all this stuff from child molesting to running a pirate radio station off the coast. Then they say "oh he found a "loophole" in the FCC rules. Listen you stupid fat bastards remove the dildo with the rusty razor blades from your ass and hear what I have to say. There was no "loophole" as you claim, the rules has always been there, you're just pissed off that he's using the rule and you don't have the mental capacity to use them. It funny that some fat bastards are allowed to say what they want on the air, but when K1MAN wants to these fat bastards from the Hitler youth jump in on these newsgroups, chat rooms, and message boards whining "oh, what K1MAN is doing is illegal..... Boo hoo". Don't take radio too serious and get a life you fat bastards.

This is not a SMEAR campaign as Glenn Baxter claims. NEWS LETTER gets the
truth about someone who is destroying our wonderful Hobby because he has a
grudge against the ARRL, and anyone who does not agree with his views

on how
Amateur Radio should be, according to Glenn Baxter. JUST BE AWARE !
Glenn Baxter's only concern is to get your Dollar! This is a business

for
IARN, Just see for yourself.
AARN/AARA Does not represent the Majority of Ham Operators in
the World !
SEE FOR YOURSELF, DIAL INTO HIS WEB SITE, CHECK IT OUT !
Also, Walter Cronkite, KB2GSD is not part of the IARN
Organization

It has been revealed to us Glenn Baxter references Walter Cronkite when
fraudulently applying for Government Grants to make his organization look
good so he can extort funds for his own personal use to keep his station on
the air. IARN/AARA is not financially solvent and is on the brink of
Bankruptcy.
** IARN/AARA is NOT recognized by CBS, ABC, BBC, or any other
Net-work
affiliation **
IARN: (I)t's (A)nother (R)adio (N)utcase !!!
HOURS AHEAD, AND NOBODY CARES

It seems to me that this "Newsletter" is that a smear campaign against this guy. One of this days you fat bastards will be enjoying each other company with dildos with rusty razor blades embedded in them cram in your asses and some poor smock is going to write a newsletter about you and your little group and spread all your dark secrets over the internet, you fat bastards. What about the ARRL? So the son of bitch

doesn't like them, BIG FREAKING DEAL!!!! So does a huge population of the amateur radio community. Everyone who hates the ARRL has that right, you fat bastards. Despite what you and all your little fat bastard friends think Mr. Baxter has the right to voice his opinion, even on the radio.

After you have received our Flyer, check it out, call Glenn Baxter at (207/495-2215) and let him know your heard from News Letter. You will

be
amazed of the response you will receive. As a matter of fact, since you are
paying for this call, ask Glenn why he does not have an 800 number. Then call
Walter Cronkite, 212-975-3627, and speak with Marline Adler. Ask her about
Glenn Baxter and why he promos Walter on his WEB Site and Broadcast to

further his credibility of his organization, and if Walter is a part of
IARN/AARA. The Cronkite camp wants Glenn to stop. When you call Glenn,
ask:

1. Who is his representative in Washington, DC to lobby for AARA/IARN? Also,
what is his Dun & Bradstreet rating of his organization. (Watch Glenn

waffle
on that one)

2. Ask how many Radio Ham Clubs uses IARN as their Club Affiliate? Where are
they, and who is the President of that particular Radio Club, and what
is
his/her call sign?

Why doesn't he broadcast this information?

3. Which one of Glenn's Organizations is a Maine Corporation registered

with
the Secretary of State? Who are the Corporate Officers (besides his own
family, if any)?

Ask Glenn what really happen to him at Dayton?
4. Why doesn't IARN/AARA attend major Ham Fest in New England area? (Don't
buy this bullcrap he doesn't have the time). What Ham Fest overseas

does he
attend?

Why does Glenn pack a Gun these days?
5. How many Jump Teams does he have? Ask for a list of names of the
Hundreds
of personnel he can use in an International Disaster. (If you get 10
names,
your lucky)
News Letter knows what really happen during Hurricane Marilyn!

6. Besides his big mouth, ask Glenn what AARA/IARN has actually done
for Ham
Radio?
(That should be a good one, you'll get an ear-full of bullcrap
and
dribble from that question)

7. Ask Glenn why he got fired from Collins Radio (Another good one, we
know
the truth)
(Then ask about his days at Vermont Academy and why he was
considered
such a nerd!)

8. Why is Chris Murdock's call, WA1HOD, have the same QTH as K1MAN? See

Callbook

You will notice a cloy-babble, rhetoric, insipid reply (if any) from
Glenn,
and his usual crying and whining about all he is doing for Ham Radio,

and
the ARRL is so evil and bad for the common Ham Operator. Of course
you
will
get this response that he doesn't have to give names and addresses of

people
that represent his organization (because he has none!). ARRL list the

names
in the front of their QST Magazine. Any legitimate Corporation makes
the
Names of their Officers & Sponsors open for public scrutiny.

Just sit back and look what is going on here, Glen Baxter, K1MAN is a
fraud.
This Organization of his will never replace the ARRL, or even come
close to
representing the majority of Hams in the World. Just beware! After
you

talk
to Glenn, if you have a Computer, check into his WEB Site, that is
where the
real BullCrap is. Watch your wallet!
Glenn always brags on the air it doesn't cost (and the term he uses)
dues, to
join IARN; however, you have to pay 10 Bucks for a stupid T-Shirt,
and

$35.00 a year for a full membership to listen to this worthless
Broadcast.
WOW, Look at me, I are an AARA Member. Go to your local Ham Fest and
wearing
that T-Shirt, you'll be the toast-of-the- town! Do yourself a favor,

get
away from this idiot, talk to other Hams, enjoy the Hobby! The ARRL
may not
be perfect, and not for everybody, but at least it is a creditable
organization that has been the backbone of Ham Radio for a long time,

and is
well known!
HELP BEAUTIFY THE AIRWAVES, GET RID OF K1MAN
****************************** ******************************
****
#42 THE MANCHESTER NEWS LETTER Aug 98

Newsletter Information Bulletin Service coming up in 3
minutes---------News
Letter information bulletin service coming up in 2 minutes--------10
seconds---------This is News Letter, World Headquarters, reporting
from
Manchester, New Hampshire, man-kinds answer to get information out
about our
local raving lunatic, alleged Child Molester, noted pervert, general
nuisance on the Ham Bands, Glenn Baxter, Chief honcho of IARN (It's
Another
Radio Nutcase), of a broadca$h, than any normal human being on the
Planet
Earth could just-care-less. So sit back, join the fun, read this
edition of
News Letter.....

Week of 20 April 98: As you may of noticed, good old Glenn Baxter has
stopped
airing the full Names, addresses, phone numbers, of his callers that
call
his show. I guess the Warning Flyers we send out about AARA/IARN got
the
supreme irritant a little upset. I guess Glenn can't deal with the
truth, and

has to hide his callers so News Letter won't contact them. Gee Glenn,

did we
upset your programming, and World conquest of dominating Ham Radio
with your
bullcrap? Sorry, but it won't slow us down on getting info out to
the public
about your stupid, insipid, organization. Your creditability is shot!

Too
bad, Ha, Ha, Ha! We just thought of something, I bet it takes a lot
more
work to edit programming tapes, screen the callers, so Glenn-baby can

get the
correct information out on the air. Talk about hiding behind the
microphone
!!!
Glenn's new format by editing personal information shows, again,
IARN's level
of Creditability. When you listen to these interviews, you can tell
parts
are being edited out. It was funny because the week of 27 April 98,
Glenn was
talking to a Ham from Worcester, MA and stated the majority of
letters
we
receive are pro his broadcast. Boy, we know that's bullcrap. Here's
the
drill: Caller, what's your first name and location?. Glenn Baxter is
so
scared that News Letter is going to let someone know the truth, he
can't
stand it! Hey Glenn, next time you get an anonymous call, or letter,

remember, you are now doing the same thing! Your are a fake,
bullcrapper,
and a worthless Scumbag. You readers ask yourself this. Glenn stated
his
Letters & Callers are 10 to 1 pro his broadcast, if that is so, why
did Glenn
discontinue giving out names and address of his callers??? The next
thing
you will notice, Glenn will probably have the same people call,
(since
he
doesn't have to air their names), and brag how great IARN is. Just
remember
you saw this first here in News Letter. To confirm all this, call up
yourself, see if Glenn will air you comments!
Remember, IARN/AARA is not a talk-Radio show, and is not the first

News
Line broadcast service.

HOSS-TRADERS HAM FEST: Rochester, NH weekend of 9, 10 May 1998 , I was not
able to attend; however, several area local Hams went, and they said it was
great. This is their report: Looks like most of the AM'ers were there.
There
was Tim, Pete, Dale, Dale, Eric, Jim, Jim, Bill, Bill, Bill, Jeff, Mark,
Chuck, Dave, Carl, John, Kenny, Ken, Steve, Warren, Mike, Chris, the regular
crew. There were several AM groups. Tim arrived in style with the
Cadavilac, Dales was setup with his Military Gear, and Bill was set up
in
his Van with his Johnson Ranger. The Deer Meat was ...

To me you fat bastards are a bunch of whinny little babies who have
nothing better to do with your time but send out this bullshit ARRL
loving newsletter while you insert dildo's with rusty razor blades
embedded in it deep into each other asses.

~FAT BASTARDS!!!~

TODD O'DOCHARTAIGH N9OGL

Frequencies
to
advertise his organization, when in reality, he wants unsuspecting
people
to dial into his WEB Site so he can sell you his Bill-of-Goods! Why
pay
Glenn Baxter when the ARRL, (American Radio Relay League) will help
you
for free, and is a well known, established service, known for many
years!

Really, I think it rather funny that K1MAN can't have goods to sale
But the ARRL can. If anyone is violates the law it's the ARRL, and I'm

Sure there is some whiney little ARRL lovers out there that would say,

OH K1MAN IS ADVERTISING HIS GOODS DIRECTLY. Well you lazy fat
bastards, the rules state that amateur station cannot make money direct
or Indirect, So K1MAN may be telling people in his bulletins to go to
His website, where he is selling goods (DIRECT) while the ARRL is
selling
Goods (INDIRECT). And for you fat lazy bastards out there here is the
Rule:

§97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

(2) Communications for hire or for material compensation, direct or
Indirect, paid or promised, except as otherwise provided in these
Rules,

So while K1MAN is doing it directly, W1AW is doing it indirectly. I
Often find it funny that it's the ARRL members who are whining about
him.. hmm do you think the ARRL and it's members are trying to set up
A monopoly???

When you get Glenn's info package, it is a classic PYRAMID SCHEME !!!!
Broadcasting slamming the ARRL, defending personal issues, is
not

conducive to Ham Radio !!!
Glenn Baxter has been on for 10 years; Ask yourself this, what
has he
done for Amateur Radio?
K1MAN broadcast on the Ham Bands might sound legitimate, but don't get

duped! There are many allegations about Glenn Baxter, and his
organization,
that warrant controversy, from him being a convicted Child Molester,
to
operating a Pirate Radio Station off the Coast. Glenn Baxter is using

Ham
Radio to fill his illusions of grandeur of having his own Radio
Station,
which in reality, is a garage operation. He is using a loop-hole in
the FCC
rules to continue on with this worthless broadcast that causes
interference
and dissension in the Amateur Radio Community. Talk Radio on Ham
Bands, give
us a break, Amateur Radio does not need this! Amateur Radio is a
Hobby

designed for two-way communications, not one-way. Don't let yourself
get
involved with this lying, ego idiot and his organization, which is
designed
to extort your money, and damage the reputation of Ham Radio.
ALL GLENN BAXTER HAS IS A TRANSMITTER AND A BIG MOUTH !

As I've asked many times before where in the FCC rules does it state
that a person can't run opinionated information bulletin? The problem
is that these low life fat bastard ARRL members believe that "oh,
Informational bulletins must be news". Nowhere in the FCC rules does it
state that you fat bastards. The rules and the FCC, has through warning
letters stated that and information bulletin only has to be information
relating to amateur radio and directed to the amateur radio service.
Plus, there is also no time limit on bulletins. By the way you fat
bastards Glenn has been on the air not ten years but more like 17
years. I really think it funny that here is a bunch of ARRL / QUEER RZ
people who want to suppress someone speech. It is also funny that this

group and their little buddies at the ARRL and QUEER RZ are make up this paranoid claims about this guy, by claiming he is doing all this stuff from child molesting to running a pirate radio station off the coast. Then they say "oh he found a "loophole" in the FCC rules. Listen you stupid fat bastards remove the dildo with the rusty razor blades from your ass and hear what I have to say. There was no "loophole" as you claim, the rules has always been there, you're just pissed off that he's using the rule and you don't have the mental capacity to use them. It funny that some fat bastards are allowed to say what they want on the air, but when K1MAN wants to these fat bastards from the Hitler youth jump in on these newsgroups, chat rooms, and message boards whining "oh, what K1MAN is doing is illegal..... Boo hoo". Don't take radio too serious and get a life you fat bastards.

This is not a SMEAR campaign as Glenn Baxter claims. NEWS LETTER gets the
truth about someone who is destroying our wonderful Hobby because he has a
grudge against the ARRL, and anyone who does not agree with his views

on how
Amateur Radio should be, according to Glenn Baxter. JUST BE AWARE !
Glenn Baxter's only concern is to get your Dollar! This is a business

for
IARN, Just see for yourself.
AARN/AARA Does not represent the Majority of Ham Operators in
the World !
SEE FOR YOURSELF, DIAL INTO HIS WEB SITE, CHECK IT OUT !
Also, Walter Cronkite, KB2GSD is not part of the IARN
Organization

It has been revealed to us Glenn Baxter references Walter Cronkite when
fraudulently applying for Government Grants to make his organization look
good so he can extort funds for his own personal use to keep his station on
the air. IARN/AARA is not financially solvent and is on the brink of
Bankruptcy.
** IARN/AARA is NOT recognized by CBS, ABC, BBC, or any other
Net-work
affiliation **
IARN: (I)t's (A)nother (R)adio (N)utcase !!!
HOURS AHEAD, AND NOBODY CARES

It seems to me that this "Newsletter" is that a smear campaign against this guy. One of this days you fat bastards will be enjoying each other company with dildos with rusty razor blades embedded in them cram in your asses and some poor smock is going to write a newsletter about you and your little group and spread all your dark secrets over the internet, you fat bastards. What about the ARRL? So the son of bitch

doesn't like them, BIG FREAKING DEAL!!!! So does a huge population of the amateur radio community. Everyone who hates the ARRL has that right, you fat bastards. Despite what you and all your little fat bastard friends think Mr. Baxter has the right to voice his opinion, even on the radio.

After you have received our Flyer, check it out, call Glenn Baxter at (207/495-2215) and let him know your heard from News Letter. You will

be
amazed of the response you will receive. As a matter of fact, since you are
paying for this call, ask Glenn why he does not have an 800 number. Then call
Walter Cronkite, 212-975-3627, and speak with Marline Adler. Ask her about
Glenn Baxter and why he promos Walter on his WEB Site and Broadcast to

further his credibility of his organization, and if Walter is a part of
IARN/AARA. The Cronkite camp wants Glenn to stop. When you call Glenn,
ask:

1. Who is his representative in Washington, DC to lobby for AARA/IARN? Also,
what is his Dun & Bradstreet rating of his organization. (Watch Glenn

waffle
on that one)

2. Ask how many Radio Ham Clubs uses IARN as their Club Affiliate? Where are
they, and who is the President of that particular Radio Club, and what
is
his/her call sign?

Why doesn't he broadcast this information?

3. Which one of Glenn's Organizations is a Maine Corporation registered

with
the Secretary of State? Who are the Corporate Officers (besides his own
family, if any)?

Ask Glenn what really happen to him at Dayton?
4. Why doesn't IARN/AARA attend major Ham Fest in New England area? (Don't
buy this bullcrap he doesn't have the time). What Ham Fest overseas

does he
attend?

Why does Glenn pack a Gun these days?
5. How many Jump Teams does he have? Ask for a list of names of the
Hundreds
of personnel he can use in an International Disaster. (If you get 10
names,
your lucky)
News Letter knows what really happen during Hurricane Marilyn!

6. Besides his big mouth, ask Glenn what AARA/IARN has actually done
for Ham
Radio?
(That should be a good one, you'll get an ear-full of bullcrap
and
dribble from that question)

7. Ask Glenn why he got fired from Collins Radio (Another good one, we
know
the truth)
(Then ask about his days at Vermont Academy and why he was
considered
such a nerd!)

8. Why is Chris Murdock's call, WA1HOD, have the same QTH as K1MAN? See

Callbook

You will notice a cloy-babble, rhetoric, insipid reply (if any) from
Glenn,
and his usual crying and whining about all he is doing for Ham Radio,

and
the ARRL is so evil and bad for the common Ham Operator. Of course
you
will
get this response that he doesn't have to give names and addresses of

people
that represent his organization (because he has none!). ARRL list the

names
in the front of their QST Magazine. Any legitimate Corporation makes
the
Names of their Officers & Sponsors open for public scrutiny.

Just sit back and look what is going on here, Glen Baxter, K1MAN is a
fraud.
This Organization of his will never replace the ARRL, or even come
close to
representing the majority of Hams in the World. Just beware! After
you

talk
to Glenn, if you have a Computer, check into his WEB Site, that is
where the
real BullCrap is. Watch your wallet!
Glenn always brags on the air it doesn't cost (and the term he uses)
dues, to
join IARN; however, you have to pay 10 Bucks for a stupid T-Shirt,
and

$35.00 a year for a full membership to listen to this worthless
Broadcast.
WOW, Look at me, I are an AARA Member. Go to your local Ham Fest and
wearing
that T-Shirt, you'll be the toast-of-the- town! Do yourself a favor,

get
away from this idiot, talk to other Hams, enjoy the Hobby! The ARRL
may not
be perfect, and not for everybody, but at least it is a creditable
organization that has been the backbone of Ham Radio for a long time,

and is
well known!
HELP BEAUTIFY THE AIRWAVES, GET RID OF K1MAN
****************************** ******************************
****
#42 THE MANCHESTER NEWS LETTER Aug 98

Newsletter Information Bulletin Service coming up in 3
minutes---------News
Letter information bulletin service coming up in 2 minutes--------10
seconds---------This is News Letter, World Headquarters, reporting
from
Manchester, New Hampshire, man-kinds answer to get information out
about our
local raving lunatic, alleged Child Molester, noted pervert, general
nuisance on the Ham Bands, Glenn Baxter, Chief honcho of IARN (It's
Another
Radio Nutcase), of a broadca$h, than any normal human being on the
Planet
Earth could just-care-less. So sit back, join the fun, read this
edition of
News Letter.....

Week of 20 April 98: As you may of noticed, good old Glenn Baxter has
stopped
airing the full Names, addresses, phone numbers, of his callers that
call
his show. I guess the Warning Flyers we send out about AARA/IARN got
the
supreme irritant a little upset. I guess Glenn can't deal with the
truth, and

has to hide his callers so News Letter won't contact them. Gee Glenn,

did we
upset your programming, and World conquest of dominating Ham Radio
with your
bullcrap? Sorry, but it won't slow us down on getting info out to
the public
about your stupid, insipid, organization. Your creditability is shot!

Too
bad, Ha, Ha, Ha! We just thought of something, I bet it takes a lot
more
work to edit programming tapes, screen the callers, so Glenn-baby can

get the
correct information out on the air. Talk about hiding behind the
microphone
!!!
Glenn's new format by editing personal information shows, again,
IARN's level
of Creditability. When you listen to these interviews, you can tell
parts
are being edited out. It was funny because the week of 27 April 98,
Glenn was
talking to a Ham from Worcester, MA and stated the majority of
letters
we
receive are pro his broadcast. Boy, we know that's bullcrap. Here's
the
drill: Caller, what's your first name and location?. Glenn Baxter is
so
scared that News Letter is going to let someone know the truth, he
can't
stand it! Hey Glenn, next time you get an anonymous call, or letter,

remember, you are now doing the same thing! Your are a fake,
bullcrapper,
and a worthless Scumbag. You readers ask yourself this. Glenn stated
his
Letters & Callers are 10 to 1 pro his broadcast, if that is so, why
did Glenn
discontinue giving out names and address of his callers??? The next
thing
you will notice, Glenn will probably have the same people call,
(since
he
doesn't have to air their names), and brag how great IARN is. Just
remember
you saw this first here in News Letter. To confirm all this, call up
yourself, see if Glenn will air you comments!
Remember, IARN/AARA is not a talk-Radio show, and is not the first

News
Line broadcast service.

HOSS-TRADERS HAM FEST: Rochester, NH weekend of 9, 10 May 1998 , I was not
able to attend; however, several area local Hams went, and they said it was
great. This is their report: Looks like most of the AM'ers were there.
There
was Tim, Pete, Dale, Dale, Eric, Jim, Jim, Bill, Bill, Bill, Jeff, Mark,
Chuck, Dave, Carl, John, Kenny, Ken, Steve, Warren, Mike, Chris, the regular
crew. There were several AM groups. Tim arrived in style with the
Cadavilac, Dales was setup with his Military Gear, and Bill was set up
in
his Van with his Johnson Ranger. The Deer Meat was ...

To me you fat bastards are a bunch of whinny little babies who have
nothing better to do with your time but send out this bullshit ARRL
loving newsletter while you insert dildo's with rusty razor blades
embedded in it deep into each other asses.

~FAT BASTARDS!!!~

(1) If that was your intent, Todd, then I can offer you a very narrow apology for that...However if you were attributing like myself and others have been prodding you about all along, the confusion would have not occured.

(2) You have one name on your legal documents then "sign" another to your posts, yet insist you'd never pretend to be someone else.

(3) I was born and raised just "south" of Cleveland, OH, which if you'll take the time to look is farther NORTH than YOU are, Todd.

Now sober up and try again.

Well, Dieter, the LAST time you exchanged posts it was over several days.

Also, you often pull this "I can't talk becasue I am better than you" routine when you're getting your virtual nose bloodied in your OWN trolls and accusations.

Like this one...

You popped into the group after several weeks absence, called me a back stabber and ###hole for having allegedly posted "secretly" to some other newsgroup reader.

I told you I didn't post to the reader and you called me more names without provocation.

I found the posts, QUOTED THEM WITH HEADERS FROM THIS FORUM where they had been cross-posted, and not a word of apology from you after you had been proven wrong not once, but THREE TIMES, DIETER!

> Of course, any REAL concept of what point I had actually raised is so far over

> you for you will NEVER understand. You lack such a capability.

Your POINT in those particular exchanges, initiated by you, by the way, were about how I was allegedly talking about you on some third party newsgroup reader.

It's been proven that I didn't do what you accused me of doing, Dieter.

You've not apologized.

Kinda makes you the ###hole, now doesn't it, Buddy...?!?!

> Your own, continuous ranting has shown this to the world. Poor Steve, who
> permanently and publically branded himself a fool.

In your opinion.

Of course that's ALSO the opinion of a cowardly, low-life who jumps in with accusations of others allegedly "dissing" him, yet when proven otherwise, skulks off and stays out of sight for three weeks.

It's also the opinon of "Mr I'm Going To Turn Bill Pasternak Into The Feds", speaking of "continuous ranting.....

Try again, Dieter...And start the next one off with "I erroneously accused you of talking behind my back and I apologize..."

Steve, K4YZ

Since those posts didn't show up at my ISP's copy of the newsgroup, it was a
valid conclusion.

> I told you I didn't post to the reader and you called me more

Completely clueless once again. I referred to the violations of law by AR Newsline in how they solicit donations then use the funds for a function unrelated to the purpose they solicited for; not some petty backstabing post you made in some other forum about me. You're simply too stupid to even follow that - and you just proved it above.

> It's been proven that I didn't do what you accused me of doing,
> Dieter.

I already know you're a liar, so what's another lie?

> You've not apologized.

Nor SHOULD I.

Again, clueless that someone else may have a life. Let's see: Steve knows that I'm a tax expert and my return coincides with the passing of a major tax deadline. Was that too hard for him to comprehend? Must be - since he completely missed it as noted above.

> It's also the opinon of "Mr I'm Going To Turn Bill Pasternak Into
> The Feds", speaking of "continuous ranting.....

You'll be kissing my ass after he gets convicted.

> Try again, Dieter...And start the next one off with "I erroneously
> accused you of talking behind my back and I apologize..."

Wrong. I CAUGHT you doing it, weasel, and everyone else knows it. If I were actually wrong, SOMEONE other than you would have said something; no one has.

A more temperate person would have asked, "Hey, what's going on..."

You jumped in with "weasel" and "backstabber", then ignore
step-by-step proof that your accusations were wrong.

> > I told you I didn't post to the reader and you called me more

You made a big mistake.

Your error was pointed out to you...three times.

Now you claim no apology is due despite the fact that very clear
proof was provided of YOUR error.

So if you don't have the manhood to ante up an apology, then I
guess that pretty well 'sets' my opinion of you, Dieter.

It will pretty well set it for anyone else reading this too.

I understand it just fine, Dieter.

I also understand that you have a personal axe to grind with Bill Pasternak. That this entire ranting of yours is nothing more than ego run amok.

You keep claiming you're this "connected" ex-IRS agent, yet you're in here boo-hooing about the whole thing, also claiming you're going to "file charges".

In almost 3 years now, nothing's happened.

I say you're a whining little putz with a chip on his shoulder.

Sucks to be you!

>
> Nor SHOULD I.

Sure you should. You accused me of doing something that has been clearly proven that I DIDN'T do.

I've made errors big and small here and "took my licks" and apolgized where appropriate.

What's your problem?

> > Kinda makes you the ###hole, now doesn't it, Buddy...?!?!

erroneously
> > accused you of talking behind my back and I apologize..."
>
> Wrong. I CAUGHT you doing it, weasel, and everyone else knows it.
If I were
> actually wrong, SOMEONE other than you would have said something; no
one has.

Who else needed to tell you you were wrong, Dieter?

You accused me of wrong doing.

I provided you the exact attributes that showed what you read in
that other newsreader was just a cross-posting from here. >>I<< never
posted what you read.

You are STILL calling me an ###hole and a "weasel" where no offense
occured.

Soooo....That pretty much leaves us at you being a lying, cowardly,
ignorant putz that can't follow simple attributes to their conclusion.
You're profane, narrow minded and selfish.

No problem. If you can live with it, so can I.

Steve, K4YZ

I'd be interested in learning where in Dave's post he said it
didn't exist.

I only saw where he said the KWM-2A didn't have a name plate with
that nomenclature on it.

I used KWM-2A's at NNN0MOQ, MOF and at "NZJ". No AN/FRC-93 plates on them either.

Just stock KWM-2A's with Stock Collins operator and repair manuals. (We did our own repairs at MOF.) (plus cryastals)

He never said "they don't exist".

I haven't seen him say "they didn't exist".

He just said they didn't have a nameplate with that nomenclature.

Of course YOU wouldn't know since YOU weren't there to see it for yourself. Again, Lennie making accusations without practical experience to back it up. You DIDN'T SERVE when/where he did.

Nor where I did, for than matter.

Ok Gang, Plans are final. My wife and I will be there to service our friends, old and new.

We are setting up a blow job booth in the parking lot. I will be there to suck off all Cb users as well as freebanders.

My wife will service the cocks of all amateur radio operators of all clases. CUM one CUM all !!

Inneresting. The difference between 34 years after the fact and 20
years is ~14 years. And Steve claims he hasn't been on RRAP even a
decade. So somehow, more than 4 years before Steve was on RRAP and
ever heard of Len, he was having a conversation with a former colleague
of Lens, discussing Len's performance reports.

"Captain, I find it Quiteillogical" Spock

So, is lie #16 the conversation with a former colleague of Len's? Or
is lie #16 Steve's tenure on RRAP? Or is it actually lies #16 and #17?

You...Me...Anyone who happens to read through here...

> > "Sayonara" is completely appropriate.
>
> And "putz" is not.

Absolutely not. Nor would I use it one the air.

I had a blast from Okinawa in 81...But the "new" sequential
callsign system was still new in the States, and a lot of folks seem to
skip by the "KA6" calls...UNTIL, that is, that we got wise and started
signing /JR6. Then the pile-ups started! I was KA6CM on Oki.

die.

So do construction workers who build bases, or mechanics that
manufacture tanks.

The fact of the matter is that except in the most aggrevious
warfare, more Americans die on the highways at home than do Servicemen.

>
> Didn't people who didn't serve make selfish use of other's
sacrifices?

Oh come on, Burke...Building upon the sacrifices others made is
one tthing...That's how America got to BE America.

Your "mentor" intentionally tried to get away with making it
appear as though HE had "served" with the Soliders who were KIA.

THAT is DISGUSTING.

> > You also "did it" when you tried to embellish YOUR "record"

4348. Re: ARS License Numbers

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-16 14:14:20 UTC
From: N2EY@AOL.COM
Message-ID: <1113660860.520821.254260@f14g2000cwb.googlegroups.com>
Source record: 105864

These are the numbers of current, unexpired amateur licenses held
by individuals on the stated dates:

As of May 14, 2000:

Novice - 49,329
Technician - 205,394
Technician Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750

Total Tech/TechPlus - 334,254

Total all classes - 674,792

As of April 15, 2005:

Novice - 28,817 (decrease of 20,512)
Technician - 267,926 (increase of 62,532)
Technician Plus - 50,524 (decrease of 78,336)
General - 137,093 (increase of 24,416)
Advanced - 76,647 (decrease of 23,135)
Extra - 106,557 (increase of 27,807)

Total Tech/TechPlus - 318,450 (decrease of 15,804)

Total all classes - 667,564 (decrease of 7,228)

Note that these totals do not include licenses that
have expired but are in the grace period. They also
do not include club, military, RACES or other
station-only licenses.

Note also that effective April 15, 2000, new Novice, Technician Plus or
Advanced licenses are no longer issued, and that all existing
Technician Plus licenses are being renewed as Technician.

What brags, Len? Look at American foreign policy since the
end of the USA's involvement in Vietnam. Plenty of "hostile
actions" for active-duty, career military personnel to be a part of in
a variety of roles.

And that's just the "hostile actions" we civilians know about.
>
> >To my knowledge, Steve has never stated that DOD does not

Well, you're certainly the authority on *that* subject, Len! ;-)

> The United States ARMY started MARS...but
> under a different name before WW2.

Nobody disputes that. The claim - more like an opinion - is that
the program wouldn't have existed without radio amatuers. It's
really unprovable either way, because there *were* radio amateurs long
before the MARS program existed, and radio amateurs have always been
involved.
>
> MARS always was and remains a MILITARY radio system.

But most of the participants aren't in the military.

> A small one, about as effective as having special

Haw, that's funny. Len, you pretty much come unglued at the slightest
opposition to your cherished statements, or when
someone refuses to feed your insult machine.

> If you ain't got the guts to
> tell the details, you AIN'T done it. Simple as that.

Then you must think that Brian Burke, N0IMD-allegedly-/T5, "ain't done
it", because he won't give any details about his amateur radio
operation in Somalia.

What you're saying, Len, is that something isn't real unless people
tell you all the details. That's called "subjective reality" and it's a
complete crock. Rational people use
objective reality, which exists whether people talk about it or not.

Orwell did a good job describing the subjective reality mindset in his
classic "1984". You remind me of "Big Brother", Len, in the way you
want to rewrite history to fit your mindset.

If a person does something, they've done it whether they talk about it
or not. Or whether you believe it or not. Simple as that.

If N0IMD/T5 really happened, then it happened regardless of whether
details are given or not.

If the State Department really used Morse Code in the 1980s to
coordinate RTTY operations, then it happened regardless of whether you
believe it or not.

And if K4YZ really did participate in seven hostile actions,
then it happened regardless of whether details are given or not.

Now you can say you don't believe something happened, but your belief
is simply an opinion.

>mode I
> >choose on any band I choose. Len isn't involved on any level.
>
> Everyone NOT licensed in amateur radio "isn't involved."
>
> :-)

No, Len, that's not true. FCC is involved - but you're not FCC. Amateur
radio manufacturers are involved - but you're not one of them, either.

You're not involved.
>
> The point is that some MIGHT want to GET INTO amateur
> radio.

Who? Not you, of course. You're not involved.

> >Len knows more about what others did than those involved.
>

It's what you claim.

> But...I DO recognize a bullshit artist from a
> long distance.

You can just look in the mirror....;-)

> >Len knows more about radio operation.
>
> Tsk. I know HOW they work and the protocols needed
> in some radio services.

But not amateur radio. Not Morse Code. Your knowledge is all theory, no
practice, when it comes to amateur radio. Sidewalk superintendent
stuff. All hat and no cattle, all talk and no action.

You did some articles for a now-long-defunct New England-based ham
radio magazine 22+ years ago. None of them were about building or
operating an amateur radio station.

> >Len knows more about your work.
>
> Tsk. Jimmie "works in the transportation field"
> according to one Comment in the ECFS.

Do you mean me, Len?

> Other than
> that, Jimmie do NOT say squat. He afraid others

> find out?

Why no, Len. I'm not "afraid" of others finding out. I just choose not to give out that information.

Who did you vote for in the presidential elections of 2000 and 2004, Len?

Are you "afraid" of others finding out?

Perhaps you think that if you don't give the details, you didn't really do it....

> >Whatever Len did at ADA more than a half century ago impacts
> >amateur radio not in the least.
>
> Riiiiight old-timer. Ham radio NEVER operated on HF, did
> it? :-)

>
> The U.S. military did NOT use morse code in long-distance
> fixed-point to fixed-point communications a half century
> ago and still don't.

Even if that's true - what does it matter to amateur radio policy? Amateur radio isn't the US military.

> Tsk. Some of you olde-tyme hammes
> need to get your noses out of old WW2 surplus radio books
> and inspect the rest of the radio world.

Is that an order?

Why should what other radio services do be more important to amateur radio policy than what hams do?
>
> >How does it give him the right to insult those who never
> >served?
>
> Tsk, tsk, tsk. Those with SUCH thin skin should NOT be

Wrong, kind elderly Gentleman. It wasn't the "only encryption used by the USA".

SIGABA (KL-29/BACCUS) was only ONE of SEVERAL encryption systems used by the USA during WWII. In fact, it wasn't even the most commonly used one (KL7/ADONIS holds that honor).

Wrong again, SIGANDERSON. SIGABA (and it's "upgrades") were retired from service in 1959, almost a decade before the Lloyd Bucher shamefully struck his colors to the Koreans..

Hans is typical of radiomen. The more he runs his mouth, the more
his gross ignorance shows. His earlier statement about Morse no
longer being widely taught or used in the U.S. armed forces is but one
case in point. Now he attacks Lloyd Bucher! Is there any doubt
the Navy was correct in disbanding the Radioman rating? Good
riddance! How's the story telling going down at the Legion Hall
Hans?

73,

Lloyd

The reason some people don't know for sure if they are going to Heaven when they die is because they just don't know.

The good news is that you can know for sure that you are going to Heaven which is described in the Holy Bible as a beautiful place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is to be saved so that we can live forever with Him in Heaven.

"For if you confess with your mouth Jesus is Lord and believe in your heart that God raised Him from the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth in the person of Jesus Christ to shed His blood and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to a virgin Jewish woman named Mary and lived a sinless life for thirty-three years.

At the age of thirty-three Jesus was scourged and had a crown of thorns pressed onto His head then Jesus was crucified.

Three days after Jesus died on a cross and was placed in a grave Jesus rose from the dead as Jesus said would happen before Jesus died.

If someone tells you that they are going to die and in three days come back to life

again and it happens then this person must be the real deal.

Jesus Christ is the only person that ever lived a perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds) with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have redemption through His blood, the forgiveness of sins..." (Ephesians 1:7)

If you would like God to forgive you of your past, present and future sins just ask Jesus Christ to be your Lord and Saviour.

It doesn't matter how old you are or how many bad things that you have done in your life including lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven with You when I die. I agree with You that I am a sinner. I believe that You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins and that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thanks Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God to save you. Now you are a real Christian and you can know for sure that you will live in Heaven forever when this life comes to an end.

As a child of God we are to avoid sin(wrongdoing), but if you do sin the Holy Bible says, "My dear children, I write this to you so that you will not sin. But if anybody does sin, we have one who speaks to the Father in our defense Jesus

Christ, the Righteous One."

Those of you that have not yet decided to
place your trust in the Lord Jesus Christ
may never get another chance to do so
because you do not know when you will die.

This means that if you die without
trusting in Jesus Christ as your Lord and
Saviour you will be forever separated from
the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of
eternal torment, suffering, pain and agony
for all those who have rejected Jesus Christ.

The good news is that you can avoid Hell by
allowing Jesus Christ to save you today.
Only then will you have true peace in your
life knowing that no matter what happens you
are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ
Ronald L. Grossi

*Show this to your family and friends so
they can know that they have a choice
where they will spend eternity. Thanks!

The Death of John Paul II

John Paul II gained the whole world but
forfeited his soul. Year after year he
was the most loved and admired man in
the world. The idolatrous veneration
and adoration of this man was
unprecedented. His devotees, who are now
singing his praises, are probably
ignorant of the strong rebuke of Jesus
who said, "Woe to you when all men speak
well of you" (Luke 6:26). Had the pope
been devoted to Jesus Christ and His
Gospel of grace, he would have been
hated and persecuted by the world.
No one can judge John Paul's heart but
we are all called to judge the fruit of
our spiritual leaders. Clearly this man
was blinded by the prince of this world
and never saw the light of the gospel or
the glory of Christ. I mourn the death
of this man, not for the reason the
world mourns, but because he rejected
Jesus as God's only provision for his
sins. I also have a solemn compassion
for those who blindly followed this pope
and his man-centered religion. My heart
is painfully burdened to see so many
"professing" Christians unable to
discern truth from error and genuine
Christianity from its counterfeit.

First of all, if your name is Lloyd, Todd, Roger, or Glenn, or any of their other nyms, don't bother replying to this thread, because you are an asshole and you bring nothing to the party. Second, if you want to post about heaven, pleae go to rec.religious.bullshit and post there because the rest of us don't give a fuck about your spiritual opinions.

Now, let's talk about Amateur policy. I'd like to hear what Phil Kane has to say on this topic since he has a good head on his shoulders and years of relevant experience. He may have to recuse himself if he is acting as ARRL volunteer counsel but that will be unlikely in this case.

Glenn Baxter's ham licenses expire this year. Will the FCC let him renew? They inspected his station, and we are still waiting for the report on that situation. They asked him for more information, twice, and he stonewalled them twice. He broadcast obscenites - the F word actually - all week last year. He qrmed boy scouts during the jamboree on the air, and he qrms people on 75 meters nightly. He broadcast a stupid Baxter Associates infomercial, and his station has been obviously out of his control several times.

When will we see some concrete action from the FCC? What is the timetable for a nonrenewal proceeding? When will Baxter need to be notified that a hearing has been scheduled?

What are the legal ramifications of nonrenewal? Baxter has said he will not go off the air unless he is physically taken off the air? Can the FCC do it, will they do it? Will Baxter mount one of his famous pro se failure defenses? Inquiring minds want to know!

Ham

They had ample opportunity to serve. Jim says he "served in other
ways." Kelly says he has "real military experience."

> Your "mentor" intentionally tried to get away with making it

Now you are telling me that your service didn't matter. Hans' service
didn't matter. Len's service didn't matter. Roll's service didn't
matter. Morgan's service didn't matter.

Yeh, yeh. You talked on a radio. Is that what you're calling a
hostile action? Did the radio topple off the field desk and dent your
spit-shined boot?

That's right, Gunny. You can't trust anyone. That's one sign of a
mentally ill person (paranoia).

Steve, you lied. The only question is which time?

The conversation with a former colleague of Len's?

The length of tenure on RRAP?

Or both.

Fess up.

What about spread spectrum modes? Supposedly such a
mode could use the entire data subband of a HF band
but have only minimal QRM to other users?

> but have only minimal QRM to other users?

Doesn't work that way. It's more like "QRM to almost all other users".

There was a clear discussion of this by KE3Z (IIRC) here some years back. The interference potential of SS on HF was clearly demonstrated. I can google it for you if you want.

Here's a quick synopsis:

Suppose I'm listening on 3825 with a 2.5 kHz wide receiver. A local fires up right on frequency with a signal that's 2.5 kHz wide. He's S9 + 20 dB, so unless I'm listening to someone even stronger than that, there's harmful interference.

Now the local switches to an SS mode that is 250 kHz wide. To make the math easy we'll assume the transmitted energy is evenly distributed over the 250 kHz.

The transmitted energy that was formerly packed into 2.5 kHz is now evenly spread over 100 times that spectrum, so the energy that gets into my receiver is 1/100th of what it was before. The S9+20 local's signal drops 20 dB - to S9. Only now he's S9 on 250 kHz of the band, rather than just a few kHz.

Even if he drops his power 18 dB at the same time he goes SS, he's still S6 (assuming 6 dB per S unit).

If a station runs 100 W to a dipole at a decent height, and the band is in good shape, that station will be S9 + 20 over a pretty wide area on 80/75.

>From the QRP list:

(begin quote)

Today's edition of the UK Times newspaper has the following heading on
page

11:
A race to the wire as old hand at Morse code beats txt msgrs

An Australian museum set up a race between CW operators and teenage
text messagers.

Message (randomly selected)
Hey, girlfriend, you can text all your pals to tell them where you are
going and what you are wearing.

CW
Transmitting - Gordon Hill aged 93.
Receiving - Jack Gibson aged 82.
No abbreviations used.

Text
Sent by - Brittany Devlin aged 13 - using text slang. Also three other
teenagers. Miss Devlin had two years of texting experience. Using text
message shorthand.

Timed Results
CW - 90 seconds to a correct written message.
TEXT - 108 seconds to a correct message.

In three further contests with three further teenagers CW was the
winner.

(end quote)

Even when not allowed to use abbreviations, and when required to write
it down, the CW (Morse Code) ops won.

>is lie #16 Steve's tenure on RRAP? Or is it actually lies #16 and
#17?

Psychotic Pstevie is doing a MARVELOUS job of back-
pedalling! :-) But...his LIE is still a LIE.

There were three contract numbers involved in SECANT.
I have the exact number on the first two generations;
I was at NADC on the first contract...representing RCA
Corporation, the REAL "contractor." Adminstratively
and for the purpose of my VISITING there, I was NOT
listed as "the" contractor. "Contractor personnel,"
perhaps...for the on-site security group (civilians
at NADC) and for the project reports, if then (I was
NOT listed as anything but one of the visitors in
the NADC report, a rather low-rank at that! :-)

Somewhere in the dusty archives of someplace MIGHT be
a few mentions of me 34 years ago signing for a
VISITOR badge plus a VISITOR parking placard for the
rented vehicle I had plus a sign-off on a two-page
standard form for VISITORS on-site. I could care

less, been there and done that at other sites. :-)
While VISITING there, I worked daily with only two
NADC engineers on a regular basis, maybe every two
days with the lead engineer, met the group leader a
couple times, the pilots of the test aircraft, and
the maintenance officer at the NAS. Pstevie thinks
I was "supposed" to do "stellar" things there, but
doesn't understand that I was simply a representative
of the contractor who knew the whole system under
test. There was no time or budget for a "technical
manual" (seldom is on an R&D program), just a tech
rep and a bunch of ozalid copies of schematics plus
a few photos of the system as set up. There wasn't
any chit-chatting "off-duty" nor was there any
"hoisting a few after hours." Neither did we "get
liberty" but were on our own recognizance as to
working hours. [must be amazing fact to a
conditioned military mindset like Pstevie's...:-)]

Pstevie uses the word "colleague" as if I was working
for NADC. Was NOT the case. I tried to explain that,
but to no avail. :-) So..."performance reports" of
civilian contractor personnel are NOT done by
contractees. If they don't like a tech rep's
whatever, they can simply call up the contractor and
complain, probably have the tech rep replaced. Did
not happen with me...there were NO "reports" filed by
NADC as to behavior, demeanor, performance skills or
anything else except for a brief mention of my name
in an NADC internal project report.

So...not only is Pstevie all forked up on his
arithmetic but he don't know fecal matter from shoe
polish on how contracts with civilian firms are
handled...he doesn't really know much about anything
what happened across the street from the NAS.

As to REAL arithmetic on his LYING, it's hard to pin
that down. Most of his blabbering on personal
attacks after the first one is simply attempts at
rationalizing (badly) on his original LIE. Tsk.

Er, Brian, Psychotic Pstevie NOW says his discharge was
"honorable all along!" :-)

Gosh, I wonder if some medical tech ever did a culture
on what was in that "discharge?" [might be a medical
breakthrough! :-)]

Pstevie doesn't drink? Gosh and golly, from the looks
of things in here, I think he strains out the pickles
(KOSHER of course) from those jars and enjoys the dill
juice. Keeps his "Gunnery Sgt command voice" in the
proper sour tone, the lips pursed in proper Dill
Sergeant disapproval. :-)

>> > Sweetums, I have an HONORABLE discharges from military
>> > service.
>>

>> others for your own glorification that dishonored whatever you DID
do

>> good, Lennie.
>
>Jim asked what difference it makes if he served or not? Soldiers die.

Pstevie MUST get his "insult quotient" of the day in. He MUST "avenge" his "outrage" (at being caught LYING to others and not having his brags believed). The original thread subject is of no consequence to Pstevie. He MUST take REVENGE!!! :-)

Quite so...soldiers, sailors, airmen may ALL die in the performance of their military duty. MAY. All of us who wore the uniform know that, in greater or lesser degree depending on the individual. We do honor those who gave their lives...or who had their lives taken from them in the course of duty.

"Civilians" (those who never served in the military) don't have a rapport with that. They only have the emotional, second-hand viewing of movies, TV, and published accounts, at best a vicarious "experience" based only on their emotional take on it. Because of that emotion-only input, they cannot comprehend being IN any such situation. Because their input is only second-hand and emotional, they will confuse that with whatever other emotions they have. A case in point is Jimmie's apparent glorification of morse code use on radio in WW2 with warfare itself. All grand and glorious but the warfare happening well before his lifetime. He can't really comprehend what it means to be IN a true warfare situation OR in a military situation of any kind. He has no baseline from which to judge. At best, all he can do is an intellectual exercise of words, of imagination, so that he can give the appearance of "knowing" what it is like.

Now we've got Psychotic Pstevie who claims "insult" that others can actually honor those who died in the performance of their military duties...especially those of the same military unit. Jimmie has NO sense of "unit cohesiveness" that grows in every military unit, the bond of all who serve in a unit. Such a bond is not easily explainable in words but it can be felt deep inside. It is visceral, deep in the psyche. It can't be fully realized until one has done it.

Psychotic Pstevie the Psonofabitch perverses such honoring of a unit's dead in order to produce his interminable insult-throwing. He is a special case, perhaps one who should be IN a case, locked away.

When I've stood Retreat at sundown with the special order of honoring those 19 of the 71st Battalion who died on 1 July 1950, I was not thinking ahead to many years later of "bragging" about personal exploits. Those 19 were ALL "rear area" communications Signalmen; the 71st served the Far East Command Headquarters directly and General Mac had ordered that group to Korea to reinforce the partly overrun communications system at the start of the Korean War. Their transport crashed on landing, killing not only them but also the four in the aircrew. Stuff happens and none of them expected that. Army Central Command honored two of the 19 by naming the Battalion's billet as Hardy Barracks, later the new transmitter site as Camp Tomlinson. That is the best that the military can do besides the "insurance" money and consoling of their families. The media had not yet come up with "body counts" of the later Vietnam War, that sorry excuse to make warfare sound like some pro football game...which it definitely is not.

Jimmie and Pstevie have made much of "rear area" military service, as if that is a disreputable thing. About six out of seven military personnel ARE "rear area" and not DIRECTLY involved in actual "battle." Yet, with the mobility of modern warfare ANY ONE of those six may be thrust into some kind of "battle" or, in the case of the 19 from the 71st Signal Battalion, dying for no cause of theirs or the enemy. "Rear area" service is necessary to prosecute the mass logistics of warfare...to coordinate supplies arriving to replenish consumables, to get reinforcements or replacements...even to perform ground service on aircraft such as helicopters. None of us "rear area" personnel are expected to be "in the thick of battle" (as Jimmie may think, never having served and getting input only from mass media). We did our tasks as assigned, following the orders passed down along chain of command. We did our DUTY and took pride in what we did, even if we didn't get our names in magazines or amass "scores" to show "how good/superious" we were. Most of us survived to continue life outside of the military.

A few of us "lucked out" in doing our duty, such as my getting assigned to a big communications station. I had NO hand in getting such, had to accept what happened. Some, like myself, availed themselves of the opportunity to learn, to grow in

knowledge of communications arts, technology.

>> You've been asked this before, I am asking again: WHAT LAW DID
>> BRIAN KELLY VIOLATE BY NOT SERVING IN THE ARMED FORCES...?!?!
>
>Kellie lied about it. He claimed to have "real military service."

Kellie once said he had "26 patents." Actually,
he had only ONE, the other 25 being grants in
other countries for the SAME patent. Same as
I did although my single patent may have had 28
foreign grants; exact number varied depending on
who was contacted at RCA Corporation Legal.

>> It was never "changed" to an Honorable, Lennie. It was
Honorable
>> all along. I was discharged.
>
>Was Kelly discharged? Jim?

They "served in other ways."

However, Pstevie contradicted himself. In here, Pstevie
said he had a Medical discharge "from an accident."
Discharges for enlisted personnel are either Honorable,
Dishonorable, or Medical.

>> > Tsk. I can digitize my 1960 HONORABLE discharge...(SNIP)
>>
>> Sure you can. Two problems, though. One, you've already done
the
>> "I am going to send you an e-mail" trick wherein you DIDN'T send
what
>> you promised you were going to do.

Poor Psycho Pstevie, still ANGRY over another accident.
He neglected (deliberately) to say that he was sent the
correct file later, not once but twice. Pstevie was SO
angry and upset that he REFUSED to look at the correct
file. [his RAGE is legendary...]

>Why do you use the word "promised?" Is it a cheap Robeson trick to
>make greater your injury? Hi!

Pstevie thinks ALL exist to SERVE HIM! :-)

Pstevie is a warlord-wannabe (or some kind of self-
professed nobility person) who demands OBEDIANCE
from those he threatens.

>> Secondly, as I have said over an over, I don't doubt that you
have
>> an "Honorable" discharge. But what I HAVE said over and over it's
HOW

>> YOU DISGRACED YOUR SERVICE WITH YOUR SELFISH USE OF OTHER'S
SACRIFICES
>> THAT MAKE YOU THE SCUMBAG YOU ARE!
>
>Didn't people who didn't serve make selfish use of other's sacrifices?

Psycho Pstevie the Psonofabitch would think that my
periodic placement of flags on veteran's graves is an
INSULT!!! He may think that placing my hand over my
heart (in civilian salute) to the flag of the USA is an
INSULT!!!

Pstevie makes Memorial Day less memorable...

>> You also "did it" when you tried to embellish YOUR "record"
with
>> the deaths of Soldiers who died in combat before you were even
inducted.
>
>What? No marines ever died in combat prior to your service? You
>enlisted because it was safe and you knew you'd get back in one piece
>(didn't happen, did it?)

The USMC uniform was pretty...two colors of blue,
white hat, flashy red stripe on the outside of each
trouser, shiny chromed SWORD! Wowee!

Pstevie says I was "inducted." ERROR. I volunteered.
I was sworn into service. There's a difference.

In the 50s the Army had its own "ASN" or Army Serial
Number. Mine was RA 16 408 336. The "RA" prefix stood
for "Regular Army" and denoted volunteer enlistment.
Draftees (those inducted) had "US" prefixes, standing
for "Army of the United States." Activated National
Guard had "NG" prefixes. Commissioned officer ASN
prefixes were simply "O."

>Jim asks what difference serving or not serving in the military makes?
>I'd like to see you explain it to him.

I wonder if Pstevie will order him to "GET DOWN AND
GIVE ME TWENTY!!!" :-)

>> > Get some mental help, Psychotic Pstevie. You need it.
>>
>> Not even remotely as much as you, old man.
>
>Let the professionals make that determination.

Pstevie gonna say "HE has the 'professional qualifications!'"

:-)

Pstevie still hasn't "picked up the phone to tell
'authorities' to come pick me up for mental stuff!"
He said he "could do that" (apparently by the powers
that be in Pstevieland).

>> Pathologiocal liar and teller of Tall Tales. User Of Other's
>> Sacrifices.
>>
>> Putz.
>>
>> Steve, K4yz
>
>What about your claim of seven hostile actions?

Pstevie gave his life for his country seven times?

He must have cat DNA...but only two lives left!

Psychotic Pstevie should call the VA and ask them
who had ASN RA16408336. Tsk. Not a "tall tale."

>And that's just the "hostile actions" we civilians know about.

How does that tie in with the use of morse code in
museum windows?

Oh, yes, Jimmie Noserve KNOWS all about "hostile
actions." Sure...READING about them, WATCHING
movies and TV. Wow!

>> >To my knowledge, Steve has never stated that DOD does not
>> >direct MARS.
>>
>> >His claim is that if there were no radio amateurs, there'd
>> >have been no MARS program. In that, he is correct.
>>
>> Bullshit.
>
>Well, you're certainly the authority on *that* subject, Len! ;-)

I know TRUTH as opposed to snow-job braggadoccio.

Psycho Pstevie is an "extra class" snow-jobber.

And, mister wizard, you REWROTE what Robeson wrote.

"Sorry, Hans, MARS >>IS<< amateur radio."

In NO way did Pstevie write what YOU say he wrote.
In NO way did Pstevie's single sentence say what
you IMPLY it did. He is NOT "correct."

>> MARS always was and remains a MILITARY radio system.
>
>But most of the participants aren't in the military.

How do YOU know? Are you now working for the Army
MARS Hq at Fort Huachuca? Or any of the other service
branch MARS Headquarters? Didn't you READ the DoD
directive visible to anyone on the given link?

>Haw, that's funny. Len, you pretty much come unglued at the slightest
>opposition to your cherished statements, or when
>someone refuses to feed your insult machine.

"Insult machine?" Jimmie Noserve wants the exclusive
use of that "machine?"

Oh, yes, that ties right in with a Canadian museum
having morse code in its window...sure...

>> If you ain't got the guts to
>> tell the details, you AIN'T done it. Simple as that.
>
>Then you must think that Brian Burke, N0IMD-allegedly-/T5, "ain't done
>it", because he won't give any details about his amateur radio
>operation in Somalia.

Then you must be as nuts as Psycho Pstevie. Tsk.

Pstevie pervertedly pejorated hisself at least a
couple orders of magnitude with his alleged
"poor repfit" of NADC on my visit there 34 years
ago...and is still trying (vainly) to rationalize
his LIE as some kind of "truth."

I'm just showing what a damn LIAR he is. But,
Pstevie is your BUDDIE and therefore can do NO
wrong. He is PCTA extra Double Standard class
and can therefore say ANYTHING he wants in
your complete approval.

>Orwell did a good job describing the subjective reality mindset in his
>classic "1984". You remind me of "Big Brother", Len, in the way you
>want to rewrite history to fit your mindset.

Pizz off, sweetie. You are going hot and heavy
into this personal insult thing and Brian Burke is
NOT a part of it.

>If a person does something, they've done it whether they talk about it
>or not. Or whether you believe it or not. Simple as that.

Tsk. Turn your phrase around. If a person TALKS
about something, that isn't "proof" that they've
DONE it. :-)

Psycho Pstevie still hasn't come up with a SINGLE
detail of "proof" on his insult of my "fitrep" at
NADC.

>And if K4YZ really did participate in seven hostile actions,
>then it happened regardless of whether details are given or not.

HOW DO YOU KNOW THAT IS TRUTH? :-)

You've NEVER served OR done any "hostile actions"
other than petty intellectual arguments on Internet.

>No, Len, that's not true. FCC is involved - but you're not FCC.

James P. Miccolis is NOT FCC. :-)

>Amateur radio manufacturers are involved - but you're not one
>of them, either.

James P. Miccolis is NOT a "manufacturer of radios."

>You're not involved.

OH! "Not involved!!!"

The U.S. Government gives me the RIGHT to vote, on
anything up for a vote!

I am NOT "involved in government" yet I can vote on
government officials! [really!]

I am NOT "involved" in any of the proposals to be
voted on yet I can VOTE on them!

Wow! I'm "not involved" in so many things!!!!

BULLSHIT, sweetums. The FCC determines who gets a
radio license and sets the standards. The ARRL does
NOT. Jimmie Noserve does NOT. Davie Heil does NOT.
The "ham community" does NOT. It's the FCC, sweetie.
[and that's the absolute truth...pbthththt]

The "F" in FCC stands for "Federal." That means that
ANYONE can make themselves and their opinions known to
them (see the 1st Amendment of the U.S. Constitution).
The FCC does NOT limit itself to amateur regulation
input SOLELY from amateurs. It isn't an exclusive
clubhouse...even though you try to convey that idea.

>Who? Not you, of course. You're not involved.

What? Paradoxical. According to that, one can't
get INTO amateur radio WITHOUT being "involved,"
BUT...to BE "involved" one has to ALREADY be IN
amateur radio.

Tsk. If you don't like paradoxes, all you are doing
is trying to make it all into a private clubhouse.
Sorry, the Communications Act of 1934 took that away
when the FCC was created to regulate ALL civil radio
in the USA. ALL, Jimmie.

>> >Len knows more about radio operation.
>>
>> Tsk. I know HOW they work and the protocols needed
>> in some radio services.
>
>But not amateur radio. Not Morse Code. Your knowledge is all theory,
no
>practice, when it comes to amateur radio. Sidewalk superintendent
>stuff. All hat and no cattle, all talk and no action.

Okay, so you DON'T think that amateur radio works by
the same principles of physics as all other radio
services. Electrons, fields, and waves all work in
in an "amateur fashion" if you have an AMATEUR radio
license! An AMATEUR radio "won't work" unless it has
a valid, certificated amateur radio operator operating
it? Wow. Learn something every day.

Well, no sweat. Someone who doesn't KNOW the "ham way"
should be FIRED, right? Give up their ham job? Be
prosecuted if they don't behave according to YOUR set
of regulations?

Sweetie, I've designed and built those "sidewalks,"
and the "buildings" they are in front of, done the
"civil engineering" testing on those "buildings" to
make sure they are in-spec. Let your aphorisms fly
where they may Luke Skysulker, "may the aphorism be
with you!"

>You did some articles for a now-long-defunct New England-based ham
>radio magazine 22+ years ago. None of them were about building or
>operating an amateur radio station.

Poor baby. Still sulking about NOT getting published
in anything but "Electric Radio?" :-)

Still pissed because I was an Associate Editor there,
and so listed on their masthead?

Awwww...the opportunity could have been YOURS, sweetie.

Better luck, next time.

>> Other than
>> that, Jimmie do NOT say squat. He afraid others
>> find out?
>
>Why no, Len. I'm not "afraid" of others finding out. I just choose not
>to give out that information.

Can't blame you. :-)

>Who did you vote for in the presidential elections of 2000 and 2004,
>Len?

Where there RADIO issues proposed by the candidates
then? I watched the debates on TV rather than listening
to the radio. Fill me in.

HOW is such information REQUIRED to discuss amateur radio
regulations and how to get INTO amateur radio by licensing?

WHO did you VOTE for in Canada on their last election?

Are you "afraid" to say? :-)

>> The U.S. military did NOT use morse code in long-distance
>> fixed-point to fixed-point communications a half century
>> ago and still don't.
>
>Even if that's true - what does it matter to amateur radio policy?

Sorry, Jimmie, under YOUR "rules," if I SAID it, then
it must be true! :-)

Actually, it IS true, but YOU are AFRAID to find out.
The fantasy that the rest of the radio world "still
uses morse code" is way too strong a mental narcotic
for you. You can't go cold turkey.

>Amateur radio isn't the US military.

MARS is military. "Sorry, Hans, MARS >>IS<< amateur
radio!" :-)

Amateur radio is NOT Private Land Mobile Radio Service.

Amateur radio is NOT Mass Media Radio Service.

Amateur radio is NOT Maritime Radio Service.

Amateur radio is NOT Aviation Radio Service.

Amateur radio is NOT Personal Radio Service.

Etc.

>> Tsk. Some of you olde-tyme hammes
>> need to get your noses out of old WW2 surplus radio books
>> and inspect the rest of the radio world.
>
>Is that an order?

Are you afraid to take orders? Is that why you never
volunteered for military service? :-)

>Why should what other radio services do be more important to amateur
>radio policy than what hams do?

Why should amateur radio policy be dictated SOLELY by
already-licensed radio amateurs? That's in direct
VIOLATION of both the 1st Amendment and the Communications

Act of 1934.

>I see. Well, Len, you have the thinnest skin of all those here,
because
>you get insulted by *any* opposition..

What "opposition?" :-)

There's Jimmie Noserve who likes to make out that he
KNOWS ALL about the military...but never served.

There's a psycho-sick whacko inventing "fitreps" about
me that never happened...

There's a few more and have been lots more. Not a
problem. Lots of you knowitalls and control freaks on
the Internet who "get off" on being "superior" on their
screens. Tsk. Been that way since computer-modem
communications got going over three decades ago. :-)

>Who did you vote for in the presidential elections of 2000 and 2004,
>Len?

Maybe I've forgotten! :-)

What Prime Minister candidate did you vote for in
Canada, Jimmie?

What military did you serve in up in Canada, Jimmie?

Did you do any morse code in their military?

Were you in any Canadian "hostile actions?"

Or did you forget?

How did the Morse-o-Meal taste this morning?

[have some crow for supper...]

Bye... :-)

The point beig, Brain, that civilians die in the course of both
"peacetime" and states of war too.

Do a bit of history research on "Maritime Marine", "Civil Air
Patrol" and "Office of Civilian Defense" during WW2.

CAP "civilians" still lose their lives "in the line of duty", and
they weren't even getting paid for it.

> radio!"

No Amateur Radio = No MARS. The "A" in MARS stands for
"Affiliate", as in "Affiliated" with Amateur Radio.

> Amateur radio is NOT Private Land Mobile Radio Service.

But Amateur Radio is used as an emergency adjunct to it, so sayeth
the FCC. (You know, Lennie...the FEDERAL Communications Commission...)

> Amateur radio is NOT Mass Media Radio Service.

But under certain circumstances may be used to assist in that
pursuit...so sayeth the FCC.

> Amateur radio is NOT Maritime Radio Service.

But Amateur Radio is routinely carried aboard both commercial and
pleasure vessles of many types...Including warships of the United
States Navy...So sayeth the FCC >>AND<< the Deaprtment of Defense.

> Amateur radio is NOT Aviation Radio Service.

But with the permission of the pilot-in-command, Amateur Radio
activities may be conducted from both private and commercial
aircarft...So sayeth the FCC >>AND<< the FAA.

> Amateur radio is NOT Personal Radio Service.

But Amateur Radio may be rotinely used for many of the same
purposes of the Personal Radio Service...So sayeth the FCC...

So...so far we have at least three federal agencies telling us
that Amateur Radio CAN be used under all of the flags above that Lennie
said Amateur Radio "wasn't".

Sheeeesh.

Leonard H. Anderson is a putz. A loser again...\

How does that compare to BPL? BPL is allowed on the ham bands.

Of this I have no doubt, Jim. I think the CW the experimenters are
using on 150 KHz will beat cell phone text messaging. It is an awful method.

BUT! that gave me an idea. If a cell phone mfg. were to offer a method of keying morse messages, some of these kids may "discover" Morse code. Imagine, a little iambic key on a cell phone.....

Of course it's "wrong," you are always "right." :-)

Never had a crypto clearance in the service, certainly
not in WW2. You have one then? [of course you did...]

Have to "dot the i and cross the t" to the EXACT
number or else be sentenced to a capital-crime
felony in here? :-)

All I know is the basic principle of the system,
obtained in a couple of interesting books by
CIVILIANS! :-) Also an article by the Chief
Cryptographer of the U.S. Army...a civilian! :-)

>> The "Sigaba" system (TTY), upgraded to post-WW2 standards
>> was severely compromised by the capture of the USS Pueblo
>> off the North Korean coast in 1968.
>
>Wrong again, SIGANDERSON. SIGABA (and it's "upgrades") were retired
from
>service in 1959, almost a decade before the Lloyd Bucher shamefully

>colors to the Koreans..

No problem, Super Chief. :-)

Until around 1964 I didn't KNOW the EXACTNESS of
the systems or even how it was done. The crypto

stuff would roll in looking for all the world as way-off-bias-distortion-prone TTY on any standard TTY...on what I saw in the Army.

I'm sure you think that the Army sent everything "in clear" using morse code (to confuse the 'enemy') and all that. That's another subject of course and I'm not allowed to talk of that; I need an AMATEUR RADIO license in order to talk about military/all-Navy encryption. :-)

The system used then was a "rotor" type (familiar name). Essentially a set of rotary switches turning at different rates (according to key settings, crypto key, not key on a manual keyboard operation). Those rotary switches ("rotors") scrambled the normal TTY in synchronism with the TTY motor and would also UN-scramble received TTY. Neat thing about that, even with the "wrong" name and all the EXACT number and letter designators, was that NOBODY COMPROMISED IT! Sunnuvagun!

Lots and lots of cryptologists and historians have tried to see if anyone compromised it on any intercepts during WW2 and somewhat afterwards (I won't say the EXACT year because you want to snarl and argue about it if I do) but haven't come up with anything yet.

Of course you are on this wonderful, traditional, "do or die," "death before dishonor" bullshit attitude in regards to Commander Bucher. Riiiiight...the USN thoughtfully "armed" the USS Pueble with a single machine gun and a few personal arms of some of the personnel. NOT ENOUGH destruct flares on board to destroy equipment. Pueblo was surrounded in shallow water...not a big problem to have NORTH Korean divers raise enough equipment to sell to the USSR. But... "being there" (in your heart) you would want everyone to FIGHT TO THE LAST MAN! Wow, lot of "good" that was goint to do.

By the way, since you are so picky-picky about EXACT names and things, the USS Pueblo was captured by NORTH Koreans. Korea isn't unifed yet, hasn't been since the USSR jumped in on the tailboard of WW2 and "occupied" the North and sticking in their communist government ideas there. As a separate Korean nation, that is.

The crew of the USS Pueblo (officially a USN ship, an "oceanographic research vessel" according to our government) pretty much survived captivity. [do

you need an EXACT body count?] Bucher survived. But, Bucher died not too long ago. No problem for you, huh? The USN didn't haul him up for any courts martial. He was allowed to retire. [you were allowed to retire, right?]

CWO Walker, USN, STOLE whole technical manuals (by photographic copying) and Key Lists while SERVING in the USN. Sold the material to the USSR. Walker was eventually caught, tried, and sentenced to life in a federal pen. [do you need the EXACT details on that, too, and if no one supplies them, are they "all wrong?"] Walker is STILL ALIVE! Sunnuvagun!

You don't posit that as a "terrible thing," do you? You want to try and convict (in absentia) a USN commissioned officer stuck in an untenable position in his command...but you don't give a shit about ANOTHER USN officer, a Warrant, doing deliberate TREASON while SERVING! That's okay?

>73, de Hans, K0HB
>Master Chief Radioman, US Navy

Good grief, you didn't "cross the tee" in your manuevers properly. You should have pointed out that the USN closed down ELF transmitters in Clam Lake, WI, and Republic, MI, at the end of September 2004!!! No more 76 Hz at 1 MW. [too many in the U.S. north country want to "save the environment" and "preserve world peace" by withholding the use of *nuclear* (horrors!) missles] Riiiight...76 Hz is terribly harmful to the ecology they think!

Tsk, tsk! You could have had a FINE time doing the pillory bit on me...but you NEGLECTED to do so!

Missle submarines and attack submarines have to use alerts from VLF stations NAA, NLK, NPM, NML, NAU, NRK, NWC...frequencies from 19.8 to 40.8 KHz. But, I almost hesitate to list those since you will NO DOUBT want the EXACT details, the EXACT locations, and the EXACT mode, protocol, and all that...or ANY listing is TOTALLY WRONG!!! :-)

Cool it, Master super-duper Chief (USN). I'm still a citizen of the U.S. of A. and served in MY country's (USA) military BEFORE you did. I know that doesn't count for much in this din of inequity but it's all I got. :-)

By the way, for EXACTNESS, my surname was NEVER "SIGANDERSON." You made a "mistake" but I won't

hold anything against you. Well, maybe a bayonet
or such... :-)

Temper fry...

Of course Lennie's reading the riot act to someone about
experience and "seniority", yet is first and loudest to cry foul if
Amateurs point out HIS lack of "experience and seniority".

> By the way, for EXACTNESS, my surname was NEVER

Awww.... c'mon. Play nice, Chuck.

By all means, you ought (and you've done right) to tell Ron he's being a total - and totally unwelcome - pain in the ass with his proselytizing of a faith he can't support rationally among thinking people...

... but *please*, Chuck...

... I'm absolutely certain you know that it's not fair (and it's bad mannars) to wish for his demise until he's been offered - and has refused - a fair chance to apologize for trying (and for having failed utterly) to inspire any of us to abandon our "false gods".

Therein lies MY dilemma.

It's bad enough that Todd has grammar and spelling issues, but his
organization and lack of attributes makes it even worse.

And that with intoxication on substances unknown, and it's really
a challenge to know WHO he was talking to, what he was saying, or what
he what he was trying to accomplish.

To his credit this time, I >>THINK<< he was trying to show that
someone was parroting my screen name and he was being up front about
it...But I am not sure...

Of course if he REALLY wanted to be "stand-up", knowing those
posts are bogus, he'd remove them. He know's the difference between my
posts and others. I'd cetainly remove posts to any "blog" I had that I
knew weren't his...But that's just me...

Shameful is in the eye of the beholder. Captain Bucher was not punished for surrendering, just as the US didn't punish the Jews who attacked his sister-ship, USS Liberty on a similar mission. Probably because then the Navy would have needed to punish those who sent those ships in harms way without proper means to defend themselves, and further because when Pueblo signalled for help other forces in the area (7th Fleet, CINCPAC, 5th AF at Fuchu/Kadena/Clark, etc.) engaged in a messy cluster-fuck deciding whether and who should send air assets to cover his retreat. Enough shame to go around!

Well well...Looks like I made an error in math. My bust.

Lennie's ex-colleague is stil in PA and still remains anonymous,
however. As for your allegeations of lies 1-17, Brian, you still have
yet to document a single one.

Now...About those unlicensed devices...?

About your Somalia "operation"...?

About your assertions about how poor ARES is...?

About that "worked DXCC from HL and KH"...?

It's real easy steve, go to the top of the tread and click the link
that says show tree and from there you can see which message is
directed to who. I know with little mental capacity you have it would
be hard for to click that link and show the message tree.

"...top of the tread..."...???

No, Todd, the "tree" has nothing to do with it. And the "tree"
does not show who a message is directed "TO", only "FROM".

What DOES have anything to do with my comments is YOUR failure to
use proper attributes WITHIN THE TEXT of your messages.

For example, in THIS message the very first line is "N9OGL
wrote:". No one has any doubt that I am quoting and responding to YOU.

That link supposes that the fcc will delete the Morse requirement.

Other insiders suggest fcc will NPRM will delete Morse only for General
license, and will INCREASE the test to 20WPM for renewed Extra class,
downgrading all current "Extra Lite" licenses to resurrected Advanced
license (the second time this license has risen from the ashes). ARRL
giveaway program will be denied.

KC8GXW,

If you are google go to the top of the thread and click view as tree
which is a link and it will show the message tree.
Todd N9OGL

Let me get this straight.
Todd says, "if you are google" go to the top.

Toddie...get it right. Use a spell check. Failing that, it may behoove you
to simply shut up.

Your spelling, or lack thereof, is already legend, and your inability to
post cohesive sentences is painfully apparent.

You really should grow up, Todd. Your airheaded comments, poor spelling, and
otherwise disjointed meanderings are becoming the laughing stock of the news
groups.
You should:

1. Grow up
2. Learn to spell, or at least use a spell checker.
3. Shut up.
4. Did I mention the spell checker?

Sorry, Todd, but you just aren't making it.

Why?

They ARE a Commonweatlh of the United States, more properly known
as the Central Northern Marianas Islands. They have the same status as
Puerto Rico.

Hans is right...they are NOT a "possession".

Such as...?!?!

People die every day doing whatever it is they do 100% safely.

Like the local mother of two who was stopped at a traffic light.
She was sober, alert, had her seat belt with shoulder belt on. A drunk
driver careened through the intersection and struck her sqaure in the
door.

3000+ people died three years ago just becasue they went to work
that day.

Did THEY do something "horribly, horribly wrong"...?!?!

There's absolutely no guarantee to life other than you are going to die. What you do with your life until you do is to some degree in your own hands. The rest is the roll of the dice.

All it really says is that the FCC is working on an NPRM that may be
out as soon as next month or as late as July. That NPRM will obviously
contain what FCC wants to do as a result of WRC 2003 and the 18
restructuring petitions.

Once the NPRM becomes public, there will be a comment period, then a
reply comment period. Couple of months at least, maybe longer. Probably
the end of 2005 before comments close.

Then FCC will decide what to do and formulate a Report and Order. Last
time they did this it took almost a year. Which translates to fall
2006. Then a couple months before the new rules become effective -
maybe end of 2006.

Of course it could take even longer, or maybe a bit less. But I
wouldn't expect any changes before summer 2006 - and wouldn't be
surprised if it were summer 2007.

Those who defy wanting to learn the code jump at any chance to perpetuate
rumors of code being eliminated. You're right, it will take a while, even if
they were to decide to write a NPRM to do such. If these people jumped into

Alligator infested waters as fast as they do rumors, the population would take a sudden drop. I'm not a "lover" of code, but I have hold a license which required code. 5 WPM is not impossible to learn. It only takes a few minutes a day and about 2 weeks at least to get enough to pass a test. 2 weeks is not long, you probably drove longer on a permit before being allowed to drive on your own. Probably studied the book longer too! It takes little effort. The biggest problem with most is "laziness". Maybe you never will use it again. There are many things you learn in life and may never use again, unless you plan to play on Jeopardy. Many people learned the skeletal system in health class, microorganisms in Biology class. It doesn't mean they use it now. Probably forgot it as soon as they graduated. But, it was "required". It's not a big deal people. Once you get past the "do I have to" and start doing it, you'll amaze yourself at how fast and easy it can be. I DO use code now and then, but not daily like many others do. Everyone has their own thing. Some are into Packet, RTTY, AMTOR, etc, I'm not... To each his own. But we all had to learn "something" about those modes to pass an exam.

SSB off and on from noon to 5p calling CQ.
CW from about 5pm for 1/2 an hour calling CQ with no takers.
SSB from about 10:30 to midnight with a couple of short 10 minute excursions
to CW.

When I and the OM work together, it's SSB as he doesn't work CW.

Sorry to have missed you.

Steve makes an "assertion of fact" and when he's shown to be wrong, he
calls it a "mistake."

Anyone else states an opinion, and if they don't jump through hoops to
Steve's satisfaction, gets the K4YZ "LIAR" stamp of disapproval.

And people say there's no dougle-standard here. Hi!

Apparently it does matter. You're the one who jumped in here with
"Always at a deficit for information, aren't you, Brian?"

If it didn't matter, why did you take it as an opportunity to take a
jab at me?

Oh, I see. It only matters when other people make a mistake. Doesn't
matter when you do it. And people say there's no dougle-standard here.
Hi!

You don't know that. The exercise planners specified "Teams of Three"
for a reason. But of course you know better how to run "thier"
exercise than they do.

> > > > > > Especially if they have 6 people to cover a 48

and
> still using two teams of three.

Overlap??? Overlap would be having "Two Teams of Three (six qualified
operators)" on duty at the same time, as in during shift change.

OK, let me put it plainly.

1. You have absolutely no one on duty from 0000 to 0559hrs.

2. You're first manned shift has an UNDERlap of 2 Operators for a
period of four hours.

3. And it just gets worse.

You blew it. If you can't follow the plan, you need to excuse yourself
from the operation. Cowboys like you aren't wanted.

> > Phil said they were required to have three qualified operators per

>
> There are three operators there, Brian.

I'm sure the world is full of operators.

> Not all three have to be on the mic, Brian.

When did you decide this? Oh, I see. You're treating this as an
unimportant Command Post exercise where you only have to pay lip
service to supporting it.

> The criteria was met, Brian.

You failed.

> > Some supervisor and schedule writer you are. You're fired.

> obligations were met?

Limited resources? You told us that ARES always gets what they want.
Why did you short them on requirements? Who said you get to decide
what ARES needs?

> Sorry you're standing there with egg on your face, Brian...The
> numbers work. The format works. YOUR assertion that you could get
six
> volunteers to cover 48 (or 96) hours DID'T.

You were the one who said that you could get it to work. You couldn't.
You failed. You left your customer completely unsupported for some of
the exercise, and woefully undersupported for the remainder of the
exercise.

Looks like a sea gull flew over your position.

Hello? Hello? Anybody in there?

What happened to all of the K4YZ apologists? Jim? Anybody?

More and more it looks like Steve stands alone. Wonder why that happened?

And what I said before S T I L L applies.

It's too bad you didn't take the time and do what I suggested and
GO BACK AND READ WHAT I ORIGINALLY POSTED.

What I had said THEN had nothing to do with THIS NARROW THREAD,
Brian, but rahter Lennie's history of newsgroup antagonism both towards
me in particular and the group in general.

> > Brian P. Burke continues his characteristic deceit and lying.

There's no "double standard", Brian. I made a mistake on the math
AND apologized for it.

However YOU have never been even as REMOTELY forthcoming with any
such "admissions of error"...

The most recent of which was YOUR assertion of how "overblown"
(your words" ARES and it's value as an emergency asset was and how it
wouldn't be able to respond for various reasons.

In the last 72 hours, give or take, I've posted no fewer than four
references that have proved you WRONG on so many levels...

But not a single word of acknowledgement of error.

> > OK, Brian, what's YOUR definition of "abusing
volunteers"...?!?!

And you were. Still are, as far as I can see.

> If it didn't matter, why did you take it as an opportunity to take a
> jab at me?

Because you provide so many of them, Brian...

> Oh, I see. It only matters when other people make a mistake.
Doesn't
> matter when you do it. And people say there's no dougle-standard
here.

Why do you keep saying "Hi!"...?!?!

And there's no "double standard" here.

> > > > > And without working any one or several individual(s) a double

Unless the exercise starts at 0000, Brain, you're way wrong.

> 2. You're first manned shift has an UNDERlap of 2 Operators for a
> period of four hours.

"You're"...?!?! You keep slapping me with some "double standard"
about stuff, but seem to forget it when you make typos.

The first operator starts at 0800. S/he goes until 1600. (10
hours)

The second operator comes on at 1000 and goes until 2000. That's
double coverage from 1000-1600. We can reasonbly stretch that to
double coverage until 1800 if the first operator works a 12 hour shift.
Again, not an unreasonable expectation.

The third operator comes on at 2000 until 0800. I have yet, in
over 30+ years of Hamming, to participate in an "exercise" that
required anything more.

Team "A" covered 24 hours.

And I have the SAME 30+ years of ACTUAL experience at various
"missions" that worked with similar parameters "just fine".

> 3. And it just gets worse.

How?

> You blew it. If you can't follow the plan, you need to excuse
yourself
> from the operation. Cowboys like you aren't wanted.

No, Brain...YOU just have the expectation that you'll get to the
EOC, have a couple donuts, a cup of coffee, have an eyeball QSO with

"the guys" then head on home, having "worked all day" after four hours.

YOU consider anything more as "abused".

> When did you decide this? Oh, I see. You're treating this as an
> unimportant Command Post exercise where you only have to pay lip
> service to supporting it.

Nope.

The first operator is the Team Leader. S/he arrives to make the
morning brief, get tasking assignments, and ensure the station's ready
to go.

The second opertor arrives ready to go to work after getting a
brief from the team leader. By this time the mission is in motion.

The third operator arrives to wrap up the afternoon and maintain
radio watch through the night.

> > The criteria was met, Brian.
>
> You failed.

No I didn't. You don't like the numbers, but oh well..They work.

> > > Some supervisor and schedule writer you are. You're fired.

WHOA ! ! !

YET ANOTHER EPISODE OF CRANIAL FLATULANCE ON THE PART OF BRIAN P
BURKE!

WWW HHH EEE RRR EEE did I >>>EVER<<< say "ARES always gets
what they want"...?!?!

And all that was stated herein was YOUR suggestion that it
couldn't be done with the resources available.

I said it could and mapped it out.

You keep stompping your feet going "NO NO NO!", but it's too late.

> > Sorry you're standing there with egg on your face, Brian...The
> > numbers work. The format works. YOUR assertion that you could get

I've shown where it actually OVERLAPS, Brian...

> Looks like a sea gull flew over your position.

If he did, I'll never know.

Nice try, Brian. You stompped, you whined, you called me liar and
tried to un-do the numbers despite the fact that they work.

Sucks to be you.

Now...About this assertion of yours that ARES won't respond and is
"overblown"...?!?!

Steve, K4YZ

Well, well. So much for your "strength of conviction."

You won't do what you know to be right because someone else isn't doing
what you know to be right. I'm just glad the world isn't full of
people like you. Actually, I thank my lucky stars every night that the

world isn't full of people like you.

I am reading and re-reading that and wondering from what lonely
corner of the world you must be, Brian.

You won't sign your own name to your posts because you don't have
the guts to do so.

YOUR mistruths and refusals to acknowledge your glaring errors are
legend and archived.

You insist OTHERS "apologize" for errors and alleged deceit, but
your own DOCUMENTED errors and deceit go unanswered.

There are no "apologists", here, Brain, except for you and Lennie,
who insist that the whole world is "down" on you for your
"opinions"...No kidding...You're both deceitful. What did you
expect...???

No one needs to "apologize" on my behalf, Brian.

But thanks anyway.

Steve, K4YZ

Lennie is YEARS BEHIND coming clean on his errors, lies and deceit, Brian... Y E A R S ! ! ! !

> You won't do what you know to be right because someone else isn't doing
> what you know to be right.

I AM, repeat AM doing "what's right".

You and Leonard are lairs, Brian. You don't tell the truth. YOU make glaring errors, and then when I make a simple one, all of a sudden you think your slates are wiped clean.

Sorry...Doesn't work that way.

I already count two acknowledgements of errors I have made this week.

I haven't seen a single one from you acknowledging your ARES errors alone...

> I'm just glad the world isn't full of
> people like you. Actually, I thank my lucky stars every night that the
> world isn't full of people like you.

As well you should. It's got to be embarrassing getting your nose rubbd in all the errors YOU make by just little ole me...You'd not withstand more than one.

Here's your sign, Brian >>LOSER<<

I do not "antagonize" anyone.

I DO hold you and Lennie, and lately Todd, up to your own
deceitful, mistruthful and erroneous assertions...That would NOT be
possible if what you were saying was true.

This week alone I've posted at least four other items that
patently undermined your allegations of the "overblown" ARES and how
they will never "respond" in a crisis.

If you find that "antagonizing", Brian, I am sorry, but hey, it
was YOUR false assertion and running off at the mouth that brought
things to this stage.

Don't like it? STOP RUNNING OFF AT THE MOUTH WITH EASILY
DISPROVEN ASSERTIONS, BRIAN! ! ! ! ! ! !

Really? Like what encryption systems the US Navy used in WW2?
>
> Psycho Pstevie is an "extra class" snow-jobber.

So you're saying he wasn't involved in "seven hostile actions"?

> And, mister wizard, you REWROTE what Robeson wrote.

Not me. You must be thinking of someone else.

> "Sorry, Hans, MARS >>IS<< amateur radio."

That's not what I wrote.
>
> In NO way did Pstevie write what YOU say he wrote.

What did I say he wrote?

> In NO way did Pstevie's single sentence say what
> you IMPLY it did. He is NOT "correct."
>

You're misquoting all over the place, Len. But it doesn't matter. Here,
I'll clear it up:

MARS and amateur radio aren't the same thing. But many radio amateurs
are involved in MARS.

That's my position. If Steve says different, argue with *him*.

> >> MARS always was and remains a MILITARY radio system.
> >

> "Insult machine?"

Yes, that's right. It's what you're all about here.

> Jimmie Noserve wants the exclusive use of that "machine?"

Do you feel insulted by my posts, Len? It seems so - you seem to find
insult in everything.

> Oh, yes, that ties right in with a Canadian museum
> having morse code in its window...sure...

Those windows really seem to bother you.

> >> If you ain't got the guts to
> >> tell the details, you AIN'T done it. Simple as that.

>
> Then you must be as nuts as Psycho Pstevie. Tsk.

Not me, Len. I'm not the one calling people names and telling them to shut up. You are.

> Pstevie pervertedly pejorated hisself at least a
> couple orders of magnitude with his alleged
> "poor repfit" of NADC on my visit there 34 years
> ago...and is still trying (vainly) to rationalize
> his LIE as some kind of "truth."

What has that to do with your claim that:

"If you ain't got the guts to tell the details, you AIN'T done it. Simple as that."

That's what you wrote, Len. Does it only apply to Steve and not to Brian.

> I'm just showing what a damn LIAR he is.

What lie?

The claim he has made is that he found someone who knew you from when you were allegedly at NADC. And that someone says you didn't do such a great job there.

Now maybe it's true and maybe it isn't. But it's basically your word against that of some unknown person.

> But,
> Pstevie is your BUDDIE and therefore can do NO
> wrong.

That's not true at all.

> He is PCTA extra Double Standard class
> and can therefore say ANYTHING he wants in
> your complete approval.

Not true at all, Len, but you would rather claim so than to face the facts.

> >Orwell did a good job describing the subjective
> >reality mindset in his
> >classic "1984". You remind me of "Big Brother", Len,
> >in the way you
> >want to rewrite history to fit your mindset.
>
> Pizz off, sweetie.

What's the matter, Len? Are you insulted? I'm simply telling you how you appear in this newsgroup.

You claimed:

"If you ain't got the guts to tell the details, you AIN'T done it. Simple as that."

which is a pretty good definition of subjective reality, where if
something isn't described, it doesn't exist. Which is what you're
telling us *you* believe.

> You are going hot and heavy
> into this personal insult thing and Brian Burke is
> NOT a part of it.

The personal insults are your bag, Len. Brian plays a related but
slightly different game.
>
> >If a person does something, they've done it whether they talk >
>about it
> >or not. Or whether you believe it or not. Simple as that.
>
> Tsk. Turn your phrase around.

No. The converse of a true statement isn't necessarily true. The
contrapositive is.

> If a person TALKS
> about something, that isn't "proof" that they've
> DONE it. :-)

Which applies to *you*, Len...

>
> Psycho Pstevie still hasn't come up with a SINGLE
> detail of "proof" on his insult of my "fitrep" at
> NADC.

Nor have you proved him to be mistaken.
>
> >And if K4YZ really did participate in seven hostile actions,
> >then it happened regardless of whether details are given or
> >not.
>
> HOW DO YOU KNOW THAT IS TRUTH? :-)

It's basic logic, Len. If K4YZ really did participate in seven hostile
actions, then it happened regardless of whether details are given or
not. That's objective reality.

He hardly stands alone. However there is no need for others to repeat what he has already said or to throw in a multitude of posts that simply say "I agree."

Dee D. Flint, N8UZE

4457. public safety frequencies more important than Morse

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-17 17:59:17 UTC

For countries still with Morse code exams, I propose that more useful would be having the examinee list his local police, fire, ambulance, helicopter, water rescue, utility crews, volunteer units, civil defense, etc. etc. frequencies. Yes, he would have to get these non-amateur frequencies from his local scanner club, etc. in order to qualify for his amateur licence, but at least he would be more useful in emergencies if asked to help out listening in on the situation. Yes, he would have to acknowledge these are for listening only, etc.

Perhaps for Morse we might still ask him to identify some local NDB airport beacons, repeated as long as needed.

>
> James P. Miccolis is NOT a "manufacturer of radios."

Actually I'm an "amateur radio manufacturer" - you're not.
>
> >You're not involved.
>
> OH! "Not involved!!!"

That's right. You're not involved in amateur radio - other than some
newsgroup rantings and spamming FCC's ECFS.

> The U.S. Government gives me the RIGHT to vote, on
> anything up for a vote!

Same as me. But Part 97 isn't up for a vote.
>
> I am NOT "involved in government" yet I can vote on
> government officials! [really!]

Me too.

Who did you vote for in the presidential elections of 2000 and 2004,
Len?

Or don't you "have the guts" to "give the details"?

> I am NOT "involved" in any of the proposals to be
> voted on yet I can VOTE on them!

No, you can't, Len. You can comment on them but that's not the same
thing as voting.

> Wow! I'm "not involved" in so many things!!!!

That's right, Len. You're not involved in amateur radio beyond your rantings here and to FCC.

> BULLSHIT, sweetums.

That pretty much describes your involvement, Len.

> The FCC determines who gets a
> radio license

That's what I've said all along, Len.

>and sets the standards.

The standards to get a license, that is.

> The ARRL does NOT.

Len Anderson does NOT, either.

> Jimmie Noserve does NOT.

Len Anderson does NOT, either.

> Davie Heil does NOT.

Len Anderson does NOT, either.

> The "ham community" does NOT.

Len Anderson does NOT, either. He's not even part of the amateur radio community.

> It's the FCC, sweetie.

And nobody else. Not even you.

> [and that's the absolute truth...pbthththt]

Whoever said differently, Len?
>
> The "F" in FCC stands for "Federal." That means that
> ANYONE can make themselves and their opinions known to
> them (see the 1st Amendment of the U.S. Constitution).

Of course. Not the same thing as voting, though.

> The FCC does NOT limit itself to amateur regulation
> input SOLELY from amateurs. It isn't an exclusive
> clubhouse...even though you try to convey that idea.

I've never said anything different, Len. Why the lecture? You can comment all you want. That doesn't make you "involved in amateur radio" to any significant extent.
>
> >Who? Not you, of course. You're not involved.

>
> What? Paradoxical. According to that, one can't
> get INTO amateur radio WITHOUT being "involved,"
> BUT...to BE "involved" one has to ALREADY be IN
> amateur radio.

No, that's not it at all. You're not involved beyond your rantings here
and spamming of ECFS.
>
> Tsk. If you don't like paradoxes, all you are doing
> is trying to make it all into a private clubhouse.

Not at all. You could be involved, but you choose not to be. That's
fine, to each his own. Amateur radio doesn't need you, Len Anderson.

> Sorry, the Communications Act of 1934 took that away
> when the FCC was created to regulate ALL civil radio
> in the USA. ALL, Jimmie.

So what? Nobody denies that FCC makes the rules. That fact does not
mean *you* are somehow *involved in amateur radio* beyond a newsgroup
or two and voluminous nonsense sent to FCC.

> >> >Len knows more about radio operation.
> >>

> services.

No, that's not true at all.

> Electrons, fields, and waves all work in
> in an "amateur fashion" if you have an AMATEUR radio
> license!

Nope.

> An AMATEUR radio "won't work" unless it has
> a valid, certificated amateur radio operator operating
> it? Wow. Learn something every day.

That's simply your way of avoiding the real issue, Len. The fact is,
you're not knowledgeable about amateur radio "protocols" nor Morse Code
nor are you experienced in amateur radio.

> Well, no sweat. Someone who doesn't KNOW the "ham way"
> should be FIRED, right? Give up their ham job? Be
> prosecuted if they don't behave according to YOUR set
> of regulations?

You're still not involved and not qualified.
>

Not on the street called "amateur radio", Len.

> >You did some articles for a now-long-defunct New England-based >

Not me. I've been published elsewhere. So what? You're not involved. I
am.

> >Who did you vote for in the presidential elections of 2000 and >
>2004, Len?
>
> Where there RADIO issues proposed by the candidates

>
> HOW is such information REQUIRED to discuss amateur radio
> regulations and how to get INTO amateur radio by licensing?

It's a demonstration of your own concept, Len.

You wrote about having the guts to give details. And about voting.
Don't you have the guts to tell us who you voted for? I guess not.
>
> WHO did you VOTE for in Canada on their last election?

I'm not allowed to vote in Canada - I'm not a Canadian citizen.

Are you an American citizen, Len?
>
> Are you "afraid" to say? :-)

Not at all. I didn't vote in the last Canadian election because I'm not
a Canadian citizen. In fact, I've never been to Canada.

> >> The U.S. military did NOT use morse code in long-distance

> >

> >Even if that's true - what does it matter to amateur radio
> >policy?
>
> Sorry, Jimmie, under YOUR "rules," if I SAID it, then
> it must be true! :-)
>
Why not just answer the question, Len?

What does it matter to amateur radio policy whether the U.S. military
did or did NOT use morse code in long-distance fixed-point to
fixed-point communications a half century ago and still don't?

> Actually, it IS true, but YOU are AFRAID to find out.
> The fantasy that the rest of the radio world "still
> uses morse code" is way too strong a mental narcotic
> for you. You can't go cold turkey.

Not at all, Len. The question remains: What does it matter to amateur
radio policy whether the U.S. military did or did NOT use morse code in
long-distance fixed-point to fixed-point communications a half century
ago and still don't?
>
> >Amateur radio isn't the US military.
>
> MARS is military. "Sorry, Hans, MARS >>IS<< amateur
> radio!" :-)
>
> Amateur radio is NOT Private Land Mobile Radio Service.
>
> Amateur radio is NOT Mass Media Radio Service.
>
> Amateur radio is NOT Maritime Radio Service.
>
> Amateur radio is NOT Aviation Radio Service.
>
> Amateur radio is NOT Personal Radio Service.
>
> Etc.

Then you've just proved my point, Len. Since amateur radio isn't any of
those, what those services do isn't what should determine what hams do,
nor what the license requirements for an amateur license should be.

> >> Tsk. Some of you olde-tyme hammes
> >> need to get your noses out of old WW2 surplus radio books
> >> and inspect the rest of the radio world.
> >
> >Is that an order?
>
> Are you afraid to take orders?

Not at all - from duly authorized people. You're not in charge, Len - you're not even involved.

> Is that why you never
> volunteered for military service? :-)

How do you know I never volunteered?

> >Why should what other radio services do be more important to
> >amateur radio policy than what hams do?
>
> Why should amateur radio policy be dictated SOLELY by
> already-licensed radio amateurs?

Nobody says that. Also, you cannot answer a question with another question.

You're avoiding the important question: Why should what other radio services do be more important to amateur radio policy than what hams do?

Try answering that one. Or are you afraid?

> That's in direct
> VIOLATION of both the 1st Amendment and the Communications
> Act of 1934.

Nobody says that only hams should make the rules.

> >I see. Well, Len, you have the thinnest skin of all those here,

> >you get insulted by *any* opposition..
>
> What "opposition?" :-)

Any opposition.
>
> There's Jimmie Noserve who likes to make out that he
> KNOWS ALL about the military...but never served.

Gee, Len, you gave us a lecture here about US Navy communications and encryption recently. But *you* never served in the US Navy - and there were several mistakes in your little lecture.
>
> There's a psycho-sick whacko inventing "fitreps" about
> me that never happened...

Here's a clue, Len: I'm not him.

> There's a few more and have been lots more. Not a
> problem. Lots of you knowitalls and control freaks on
> the Internet who "get off" on being "superior" on their
> screens. Tsk. Been that way since computer-modem
> communications got going over three decades ago. :-)

That pretty much sums up what *you* do here, Len. That's what *you* are involved in...
>
> >Who did you vote for in the presidential elections of 2000 and > >2004,Len?
>
> Maybe I've forgotten! :-)

I don't think so. More likely, you "don't have the guts" to say so in public. But I think I know who you voted for.

> What Prime Minister candidate did you vote for in
> Canada, Jimmie?

None - I'm not allowed to vote in Canada. Are you, Len? Are you an American citizen?
>
> What military did you serve in up in Canada, Jimmie?

I've never been to Canada, Len.

Yes indeed....basically laziness.

I have been thinking back to the late 50/early 60s when I started on my trek down Morse Code lane.

You know what THE MAIN reason was that I learned it? Because I was curious as to what all those beeps and bops were saying that I was hearing on my Zenith.

And it has been a blast ever since.

Look at it this way......how many people do you know that can talk with their fingers?

>Now where is Len's apology?

Psycho Pstevie doesn't issue apologies.

The reason is simple: This "witness" (or "reference" or
whatever) does NOT exist. It's not possible for anyone
to "apologize" for someone that doesn't exist. Ergo,
Psycho Pstevie "does not need" to apologize.

You have to approach this denizen of Pstevieland as
you would a cryptologic attack. Work the puzzle and
try to think in terms of those who REFUSE to yield
to ANYONE. With years and years of experience (several
reading this newsgroup is more than adequate), it
becomes easier to do, but less easier to take. Toss
out logic, use great heaping shovelfulls of their
ego, pride, and sociopathy and it becomes clearer.

Pstevie IMAGINES this individual "exists" and, furthermore, INSISTS he (or she) "knows all about me through 'reports'" all of which don't exist. By Pstevie "logic" all of it is "correct" even though:

1. There's no evidence.

2. It's all hearsay, mostly hearing from one of Pstevie's voices in his head talking to him.

3. He has "made promises to not reveal the identity." THAT is the top-notch rationalization...used often on computer-modem communications yet is totally WORTHLESS in reality from the following:

A. It relies on some curious "honesty" and "loyalty" factor which is supposed to be followed by all newsgroup communicators in which Pstevie self-describes himself as "honest, loyal, trustworthy," etc., etc., etc. which has been shown to be bunkum.

B. A non-existant person cannot be evidenciary of anything but extreme imagination on the part of the imaginator. No one else can disprove something that doesn't exist but the imaginator cannot prove the imaginary to actually exist.

C. The excuse of existance is that the imaginator expresses "outrage" that anyone could imagine him telling a "lie." He HAS told a LIE to begin with, so all the following rationalization is nothing but MORE LIES.

D. During the rationalization posting, the imaginator will MISDIRECT the thread hoping to take viewers' minds off his own lies and put some blame on the person of the challenger. That's a common ploy in computer-modem communications, been around since before BBSs on the old ARPANET. It serves no argument but does take some of the heat away from the lying imaginator. AKA "smoke-screening" in trying to mask any challenge to the LIE.

4. There can be an endless recursion back to (3) depending on the intensity of the psychosis of the LIAR. They profess "being wounded" by a challenge and must "avenge" such "personal

insult" (of being called a liar in the first place) by more and more and more misdirection and outright name-calling against challengers.

Some years ago (about 1986 give or take) I logged into a Bulletin Board System that specialized in all sorts of paranormal subject, conspiracy theories and "majic" (apparently a modern version of magic). This was out of curiosity on how people behaved when they thought they couldn't be found out. On the subject that "The U.S. Air Force Academy in Colorado teaches the existance of extra-terrestrial beings and has textbooks on the subject," a person made what I consider to be the ultimate rationalization for the lack of evidence of that:

"After it was found out, the Air Force removed and destroyed all the textbooks. Of course you can't find any evidence of such books, they were all confiscated and destroyed, but they did exist!"

So, despite NO evidence remaining, the claimant remained adamant that such books DID exist. No one can disprove it. But, given in such "outrage" of being challenged (misdirection ploy), readers of the message got an impression that they did. The claimant could NOT prove his case no matter how he tried...had to resort to emotional excuses and his alleged "honesty" (claimant had not gone to the USAF Academy but "knew someone who did").

The analogy applies directly to Robeson's claim of having a "trustworthy reference" to my character (as it was 34 years ago). He cannot prove this "reference" exists yet demands he be "believed." No one else can check up on this because nothing but vague generalities about this invisible man are presented.

This "fitrep" report-writer is either a LIE or he might be some alien being from outer space. We don't know about the latter so the former must be a better bet. Psycho Pstevie told a LIE and just tried to cover it up...again and again and again. A clear and open role-model for today's Amateur Extra class amateur radio licensee?

:-)

Speaking of keyboards, that is a perfect example. MANY who are online now - otherwise would never know how to type. BUT to own a computer and/or get online, they "had" to learn - OR - at least they're in the process of learning. It becomes "automatic" after so many hours of use. Same with code.... All it takes is the application of it. Sure, just in computers, many may not become proficient in computer programming, etc (just like not "wanting" to use the code), but they're still learning at some point along the way.

Great idea Dan, if the license is for vhf/local use only. What would any
of this have to do with HF use?

As well as the NSA/USN brass who, when queried by the Israelis,
adamantly denied that the Liberty was a U S Naval vessel even after
being told that the vessel wiil be blown out of the water if it
wasn't a US Naval vessel. The Israelis had every reason to believe
that the Egyptians or their mentors, the Soviets, would fly the US
flag to avoid destruction if they could get away with it.

And the NSA kept denying...

Guess that explains Creationism. They either forgot or just
never did get biology class. And get upset when science
contradicts a trivial off topic section of the Bible.
But there is hope that some people will "get it" and
be able to do something with it. Of course the school
or FCC has to pick and choose what the kids should try
to learn. Spending less time on European medieval kings and
more on Vietnam would make sense, as modern governments are
no longer kings sitting around in castles getting bored
and deciding to have wars for the fun of it. Well, today kings
are called "dictators" anyway. Now to bring this back to
ham radio, is requiring code worth the time prospective
hams would have to spend on it, or maybe more theory should
be asked for today?

I seriously doubt that the FCC would increase code speed for
extras. The medical wavier issue would crop up again, and
the FCC found that to be a PITA. Besides it would be hard
for the FCC to tell old extras from newer extras as IIRC they
didn't keep track of who was who as old extras came up for
renewal.

YOU ARE A LIAR! You were not there. You have no information.
You are just repeating hearsay from some Jew. There are USS Liberty
survivors who have described what happened many times. The Jews
NEVER queried the U.S for the identity of the Liberty, but the Jews did
recon the Liberty for almost a day prior to the attack, during which time
the
Liberty was flying an oversized American flag, a holiday ensign. The Jews
had no reason to believe Egyptians or any other country would impersonate a
U.S. vessel. The attack was deliberate by the Jews. The Jews knew full
well that the Liberty was intercepting communication which would reveal
that Israel had committed war atrocities and was illegally in territory they
had promised not to enter. The Jews did want the U.S. or the world to
know the truth. Jew jets machine gunned innocent American sailors on
the decks of the U.S. Liberty, sailors who were frantically waving
American flags. Egypt and other enemies of the Jews did not have a single
ship in their inventories which resembled the USS Liberty, and the Jews
knew this. Innocent American blood will always be on the hands of the
Jews, because of the USS Liberty incident.

USS Liberty survivors quickly will set forth facts which they were
EYE WITNESS to, and they are very active on the web. If
necessary, they will step forward, identify themselves, and set the
record straight, whenever and wherever they see lies like this and/
or distrotions of the truth, as to what happened during the deliberate
murderous attack on the USS Liberty by Jews who full well knew
it was an American ship, operating in international waters.

By your approach, all the Jews in the world should be brought to account for that event rather than the country of Israel. It is your type of thinking that perpetuates discrimination. The fault was with the Israeli government and military not the Jewish people. There are Jewish people in many nations of the world, including the US, and there were not responsible for this attack. It would be just as silly and wrong to say that the Christians, rather than the United States, overthrew the Taliban in Afghanistan.

Swell! and a great topic for a college classroom debate. When the
jew bullets were raining down on innocent American sailors, they perhaps
should have taken your suggestion for action and identified which
bullets were jew or Israeli?

Like I said, go tell your theories to the surviving family members of the
innocent American sailors. Another clueless idiot shoots their

clueless mouth off.

No you are the clueless idiot. For if you insist on using the term Jew instead of Israeli, then you believe that the Jewish people here in the US are responsible. If you insist on using the term Jew instead of Israeli, you are saying that the Israelis who are Christians are innocent simply because they are Christians.

The attack was wrong. There is no doubt about that.

And are you saying that the USS Liberty had NO Jewish members of her crew? It's a large enough ship that the odds would indicate that some of the US crew probably was Jewish. Who knows, perhaps even some of the fatalities were Jewish Americans?

Are you saying that there are NO Christians or people of other religious/cultural beliefs in the Israeli population, the Israeli government, or Israeli military?

> renewal.

I'm not so sure "more" theory is the answer either. Used to be, you HAD to know electronics when you went for the exams. NO ONE told you what was on the exams. Then some lazy bastard got some political pull and they started to dumb down the theory and put "ALL" possible questions and answers in a book - for someone to read and recall. That isn't teaching anyone - anything. Any idiot can learn that way, to the extent needed. It doesn't do anything to reinforce it in their heads as to what to do with it after. IF they make it more theory, then they'll just make the "idiot" books cover it, and again, you'll have a bunch of people who learned A, B, C or D, not the real meat and potatoes of Electronics. I've seen them come away and not know what a fuse does or some of simplest of schematic symbols they "should" know. Give me a break. Those books today teach them NOTHING. They're nothing

more than the sugar coating of it all. Just enough to get by and HOPE they plan to pursue it further on their own, which MOST - DO NOT. Again, due to LAZINESS.

You're right about the History though, not to lay so much on the past, but work on current affairs. Past is good, but often TOO much time is spent on it. That stuff is building blocks to some extent, history does have a propensity to repeat itself, so you can't "ignore" it as a whole, but spending say a week learning about King Arthur just doesn't get it. I recall our teacher trying to drill shit in our heads about Genghis Khan (sp?). I could give a shit less what he did. What I DID come to ignore and have a need for later in life, was that stuff covered in Health class. I ended up using it a few years out of school.
I wished then I had paid more attention to it. So, I had to "relearn" most of it. Some things DO have their uses.

As to code, actually, it isn't so bad to know - really. Think about it. You have sign language for deaf. IF you plan to talk to a person who is deaf, you better learn it real fast. If you plan to travel - you may need to learn some foreign language, even though most can speak English now. Code "can" have benefits. We had 9 miners trapped about a year ago. They communicated that there were nine, by 9 raps on the pole stuck in the ground. Had someone in the ground and above ground knew code, a more detailed description could have been issued. It could have helped. Before they got the elevator in to get them, they had no idea what "physical" shape the guys were in or any pending dangers under the ground. Maybe you won't use code again once learned, but at some point, it may save a life with the user's intervention. If you're in an auto accident, down in a gully, you have a radio. The mic is broken, so you can't talk. You could key the radio with a key or something and send a message. Hopefully someone knowing code would hear it and be able to let others know. There are many reasons people can give to "not" learn code, but there are just as many as to it's benefits. If it saves only one life, it is worth it.

> MARS and amateur radio aren't the same thing. But many radio amateurs
> are involved in MARS.

As a matter of fact, most MARS operatives are licensed Amateur
Radio operators who are civilians. A few are members of the uniformed
Armed Forces of the United States who are also licensee, and
participate in MARS independent of their duties in the Armed Forces.
The remainder are either uniformed mmebers assigned to work in post
stations or are DoD civilians who run the program.

But the FACT remains that under current regulations and staffing
requirements, without Amateur Radio, there would be NO MARS programs.

Period.

The old, "two wrongs makes a right" defense.

> > You won't do what you know to be right because someone else isn't
> doing
> > what you know to be right.
>
> I AM, repeat AM doing "what's right".

Repeating something doesn't make it any more true or false. But in this case, it makes lies #19 and #20.

> You and Leonard are lairs, Brian. You don't tell the truth. YOU
> make glaring errors, and then when I make a simple one, all of a
sudden
> you think your slates are wiped clean.

Lessee? 30 hours before Len makes an appearance in one of your demented threads, you're chiding him for disapproving of what you said. Then you have a conversation with a claimed colleague of Len's years and years before you ever heard of Len. Both cases were smear campaigns against Len, and you say you make simple errors???

> Sorry...Doesn't work that way.

That's right Steve, it doesn't work that way. What you said was an outright lie.

> I already count two acknowledgements of errors I have made this
> week.

Errors? Simple mistakes? Nobody thinks that, not even you.

> I haven't seen a single one from you acknowledging your ARES
> errors alone...

There's a profound reason that you haven't seen such an acknowledgement from me...

I made no error. You fudged the entire exercise (lied) so that you could "prove" me wrong, but nobody's buying it. You chalked up quite a few lies in that little fiasco. Quit before you reach the point of no return.

> > I'm just glad the world isn't full of

Steve, lest you forgot, the question was, "I asked how NOT giving someone lumps can make them the antagonizer?"

As you are so fond of saying, "Answer the man's question."

Steve needs lots of things, but the only apologist he requires is
himself. Best of Luck.

A few hundred, myself: consider the people who use American Sign Language, for one set, plus all the folks who fingerspell, those who use Signed English, and so on. Not all of 'em are deaf, either: I promised my wife I would learn ASL if she passed Element 1. I'm getting a head start in my promise, because she's doing very well -- and she's working full-time and just a Master's in Education.

Sleep? What's that?

It may be impossible for some. I learned it over a considerably longer
period of time with frequent practice.

> you probably drove longer on a permit before being
> allowed to drive on your own. Probably studied the book longer too!
It takes
> little effort.

I disagree. It took a great effort.

> The biggest problem with most is "laziness".

Was that your problem? If you hadn't been so lazy you could have
learned the code in under a week?

Maybe you never
> will use it again.

Perhaps. I've found little use for it so far. Maybe once I'm an old
fart, have loads of time, and wax nostalgic for things that never were,
I'll take it up and enjoy it, and demand that all learn it.

> There are many things you learn in life and may never use

be.

Indeed. I never had the "do I have to?" attitude as there was no
code-free license when I became a ham. Yet it took me about 9 weeks of
daily practice.

I
> DO use code now and then, but not daily like many others do. Everyone

Wunnerful. Dee goes on record that a person who DOESN'T give someone else "lumps" is an antagonist.

Thanks Dee, always knew you were a free thinker.

Another, "me, too." I never realized that NOT giving someone grief made them an antagonist. I think Orwell wrote on this very subject.

> I can't get inside their head.

I used to teach Novice classes, and I always assumed that anyone could
learn the code if they really wanted to. I found that some people had
difficulty telling the difference between a dit from a dah unless it was
sent very slowy and the dah made a lot longer than the dit, but when
sending a character that contained several dits or dahs or combinations,
they simply could not tell one from the other. It wasn't that they
lacked the skill to learn the code, I could right out characters in dits
and dahs on the board and they could recoginize them, it was an
interpertation problem with the brain of telling the sound of a dit from
the sound of a dah. People with hearing aids often had a difficult time.

And you are still a liar, by your own statements. You are parroting
Jew hearsay. You were not there. The eyewitnesses on board
the USS Liberty were there, being attacked. Israeli high-command
ordered the attack, full well knowing they were attacking an
American ship in International waters. Liberty intercept operators
recorded Israel high command orders to attack the *American*
ship. U.S. submarines in the area filmed the entire deliberate attack.
You are *still* a liar and you *still* don't have a clue as to what you are
talking about.

www.ussliberty.org read it fool, you might learn the truth!
Then read Jim Ennes's Book. Ennes *does* know what he is
talking about, unlike you, because Ennes is a USS Liberty
survivor.

And how about some FACTS, instead of your lame retort
"I was there."

Will you go toe to toe here with Liberty survivors, if I can get one
or more to come on board here?

I am going to have to contest your declaration - only because there's another candidate who is clearly in the running: K4YZ, Steve Robeson.

You need to prove that K1MAN is the "King" by election. :-)

> Now, let's talk about Amateur policy....

Oh-my-god! Someone who actually wants a conversation on topic instead of someone's personal attack on someone else. Obviously, this isn't the place to have such a discussion (and for that reason, I shall also be dropping this group very shortly).

Sad that many folks will likely never give themselves the opportunity to bag some of that rare DX that seems to only show up on the bottom of the bands.

Just bagged HZ1EX on 7013 kHz. 99.999% CW op and luvin' it.

Oh my! Isralei government "COMMINT" (sic)?
I bet Jim Ennes would love to interview this guy. Incidentally, for anyone who does not already know, Jim Ennes is the author of
"Attack On The Liberty." He is also a Liberty survivor, who is still quite active in USS Liberty affairs.

I have never been able to see the difference between reading a book
that contains the answers to questions, and reading a question pool.
Both are entered into my memory the same way. Did you know the answers
are often scrambled, that is that the letter answer on the test is not
the letter answer in the pool?

> I've seen them come away and not know
> what a fuse does or some of simplest of schematic symbols they "should"

Wow! I've got a copy of the "Now You're Talking" book. A person would
have to work pretty hard do learn nothing from that.

Morse code is VERY good to know. Good enough that it should continue to
be a part of the test.

Yup, one of so many reasons that Morse code is a good thing. Hams are
all about communication, and communications in all manner of situations.
I love the latest technology, but that technology is sometimes fragile.
Sometimes life and death, health and welfare might just come down to two
skilled operators who can make an old communications method on primitive
equipment sing its simple yet powerful song.

Took me 45 minutes a day for over 6 months, plus one failed test to get
to 5 wpm.

I'm all in favor of Morse code testing, but you guys have to show some
understanding that it isn't that easy for a lot of people.

I aced the writtens, without a whole lot of study by comparison to a
lot of people. I don't go around calling them retards or stupid.

For some - it may! One argument I've heard, is that those musically inclined pick it up quicker than others, yet I knew some who "were" musically inclined and claimed to have a hell of a time with it. Reason? I don't know. I can't get inside their head.

>> The biggest problem with most is "laziness".

Eh - I had the code down in 2 weeks for the Novice exam. AND I'm now an Extra. Been licensed since the early 80s.
Yeah, I probably could have learned it in under a week, if I pushed myself. Most anyone will tell you - it isn't good to do such. Besides, at that time, I was chasing rug rats - so study time was premium. Most recommendations are 15 minutes to a half hour a day. That hardly makes it possible in a week. I used the words " "AT LEAST" 2 WEEKS". Some are faster learners than others, that is a given. BUT my point was, you have to get started to learn ANYTHING. You can't absorb it through osmosis. Back to the timing thing, I hope someone from the military can step in to tell us how much time they were given to get the code down. I think they had to "Cram".

Probably the same age bracket as me. I do listen to call signs now and then on the scanner to pick out the services they represent - if I don't immediately know who the service is. I do listen some times to code on the H.F. Bands.

And you stuck with it!!!!!!!! You didn't quit, and it got you where you wanted to be. OR had to be - for your class of license. 2 weeks, 9 weeks, so what... you did it. A milestone to be proud of. No one can fault you for that effort.

Funny thing is, we're all arguing pros and cons and in the end, it won't matter. WE do not have control. So, if we're going to debate the issues we have no control over, may as well keep it clean. Hardly any of us know the other and it isn't worth making enemies over. Certainly not worth name calling.... Whether I'm right or wrong, I do value opposing view points. Everyone has a right to his/her own opinion. It sure will be interesting to see how it all unfolds. I think in the end, we both know the answer to that. Pro or con, it is a matter of time. May be a year, may be 5, but it will come to pass.

Testing is one thing, "studying"' is another. Most "tests" don't give you
the answers in a book. Rather it is a conglomeration of books which a person
has had to read to ascertain the knowledge. IF it is coming to that, then it
is no wonder this country is dumbing down.

>> That isn't teaching anyone - anything. Any idiot can learn that way, to

Those books do not cover electronics in great detail. They gloss over
subjects. There was a time you had to "build" a working circuit - to pass.
Yes, I'm well aware that the answers are mixed up in the test pools as
opposed to the books. Back when Heathkit was in business, they had books for
each class of license. Those books had a similar pattern, but they drilled
stuff into your head. They seemed to explain things a lot better and in more
detail. Maybe I'm just too used to the "learning" methods of yesteryear.

I try to help! And yes, as we age, we do forget things. I used to have
several dozen frequencies memorized and as to service. I'm lucky if I can
recall 10 of them - now. I'm sure there are symbols people can forget. But
my example of the fuse, it is sad when you don't know what a fuse is for!
That is like the most basic principle.

>> Give me a break. Those books today teach them NOTHING. They're nothing

The Now Your Talking - Book, is probably one of if not "thee" only in depth books out there at this time. I was referring - and should have been a bit more specific, to the question and answer guides with something like a 2 sentence explanation of a procedure, theory, etc. In my opinion, they don't teach a thing. They just provide the questions and answers. Study it long enough, you'll get enough memorized to pass, yes... but then you're stuck because you know little "background". I believe it used to be, if a person had the minimum of an Advanced license, he/she could use that as somewhat of a credential for a job in electronics. Now, "I" wouldn't dare think of hiring anyone with just having used the Q/A books. That is my opinion - for what it is worth.

You can't be serious! (And here I was under the impression you made you
living in an educational environment.) No wonder "Johnny can't read"!

The purpose of the examination is to determine if the prospective licensee
understands some things about amateur rules, about elementary transmitter
and receiver functions, basic electricity, amateur communications procedure,
and safety.

Knowing ahead of time the VERBATIM questions and VERBATIM correct answer
reduces the test to a simple test of memory. The applicant need not
UNDERSTAND a damned thing, but only have normally developed memorization
skills.

I have no problem with Q&A study aids containing sample questions which
guide the student through the appropriate study material, but the actual
VERBATIM examination material should NOT be available to the student
(applicant), or there is no reason to UNDERSTAND the material --- just
memorize the test.

>> How does that tie in with the use of morse code in
>> museum windows?
>
>The same way your service at ADA ties in with amateur radio policy.

"My service at ADA" was NOT ever presented as any
form of "justification" about "amateur radio policy."

What I originally presented was factual information
based on personal experience in regards to USE OF
MORSE CODE by a large Army communications station.

Army station ADA (it still exists, by the way) USE OF
MORSE CODE MODE was nil, none, nada from 1953 onwards.

World War II ended in 1945.

Further, I stated that (based on Pacific Stars & Strips
published story of 1955) ADA relayed 220 thousand
messages a month in 1955. ADA (also known by the
TTY message identifier of "RUAP") was only the third
largest Army station in ACAN (Army Command and
Administrative Network). Such traffic operation took
place around the clock, every day ("24/7").

Further, I stated (correctly, from Army documents)
that the ONLY morse code operator training in the
1950s was for Field Radio Operator. Field Radio is
exemplified by operations of Regimental-level
AN/GRC-26 self-contained transmitter-receiver huts
on the bed of a 2 1/2 ton truck. "Angry-26s"
were in use at much lower traffic levels, by unit
command, and also used TTY much more than any morse
code...in Korea, in Japan, or anywhere else in the
Far East Command in the early 1950s. Field radio
did not normally communicate with Far East Command
Headquarters directly, but had the capability.
Such was never witnessed by myself, nor appeared
in any operations orders of the station.

The brunt of military messaging is done by the
(relatively, speaking in 1950s terms) high-speed

TTY that can carry message traffic 24/7. All of that constituted the NORMAL means of logistical communications...all of that necessary for troop movements, shipping of supplies, operational orders, etc., etc., etc. The total personnel and installations in the Far East Command then was akin to a small state, therefore the amount of communications was quite large. At NO TIME was any bank of morse code operators seen OR KNOWN serving either the FEC Hq or Army Central Command ("central" insofar as Japan). Did I "know" all that? Yes. It was part of my duty there to not only be at a part of the communications station but to make trips to nearby units. Do I have absolute proof of all of it by referencible documents? No. Only some. Am I "lying" in stating any of the above? No. There is NO reason for me to "lie" about anything there. There is no reason for N2JTV to say anything about it, yet Gene was there at the same time I was, the same station but on a different operating team. [Gene doesn't access this group]

The gist of all that is that: MORSE CODE WAS NOT IN USE FOR MAJOR COMMUNICATIONS TRAFFIC. Not in The Far East Command at the time. That Command included USAF and USN.

I've seen documents that stated the communications plans from 1948 onwards would handle ALL normal message traffic by TTY for the future. I do not have such a document to "prove" it but can state that, from 1953 onwards, it WAS TRUE by example, by all operational orders between 1953 and 1956, by various Army documents published since 1956, by various Signal Corps photographs (none of which show any morse code operators at work) in the Far East Command.

Was there ANY morse code used in the U.S. military? Of course. All in Battalion or smaller units for field radio in the Army...on board ship in what Hans Brakob describes as "small boys" such as DDs (destroyers) or lesser-tonnage vessels. Morse code skill was required by some airborne radio units (ASW and the like) and for aircraft on long, over-water flights...also for the (then) Distress and Safety (international) frequencies shared by everyone. I do not have any specific cites of morse code use by SAC units of the 50s or 60s, but TAC does not include it. Long over-water flights

my USAF military transports required morsemen on board. What you have to understand is that the cruiser or heavier class ships had carried RTTY since first starting with that in 1940. That was necessary to insure the secure "rotor machine" encryption terminals (on-line or off-line capable) for Command orders and responses. Regardless of nit-picking on the names of such systems or their absolute, exact nomenclature, their existance was acknowledged in at least two civilian books first published in the 1960s (David Kahn's "Codebreakers" was on the NYT non-fiction bestseller list for several months, a seminal text on history of cryptography).

Morse code use in small-unit radio decreased and decreased from the 1950s onward. All branches, even the USCG. TTY rates jumped from 60 WPM to 100 WPM, then morphed into "data" in various forms at rates up to 2400 WPM over HF radio links. By 1978 the USAF (one of the remaining strong users of HF) was shutting down HF as a spectrum component in favor of the new satellite relay and troposcatter, VHF and UHF (they'd had the 225-400 MHz "military aviation band" since shortly after WW2). By then the sole use of morse code was limited to emergency communications as a secondary. It MAY have been used for ALERT messaging of submarines but another (with actual experience of such communications) will have to give details. By the 1980s, the ALERT messaging to boomers and sharks was done by some form of encrypted DATA. As to the SAC messaging on "oil burner routes" or otherwise on loitering flights, I can't comment on those formats or content other than to say morse code was NOT used for those.

So, there has been a lessening NEED for any "trained morsemen" in the U.S. military over the past HALF CENTURY. It has VANISHED for use in actual communications in the military...since the International Distress and Safesty system was implemented a few years ago worldwide, the USCG has stopped monitoring 500 KHz. The military has had MILLIONS of U.S. citizens in service in all that time, still has a million-plus serving. Morse code use in the military is limited solely to INTELLIGENCE INTERCEPTS (one-way, "silent listening").

GONE is the NEED for "trained morsemen" of any kind by the United States government. There is NO NEED of any sort of "trained pool" of such morsemen for the national use. That lessening began about 57 years ago although it was already happening during WW2 when HF commercial SSB was carrying TTY messaging to Europe and Asia.

What is left is a lot of daydreaming by amateurs based on myths begun in WW2 of glorious use of morse "in battle zones" or as the valiant radio operators of B-17s and B-24s (actually more gunners than radio operators) and "fighting men" in ship radio rooms, etc. Generations of day-dreaming amateurs passed them on to succeeding generations until the mythos became almost palpable. The only radio service in the USA that requires morsemanship skills is Amateur Radio Service and that ONLY for privileges below 30 MHz.

When it comes to "handling traffic" on HF, *NO* amateur radio group or net can come even close to the amount handled by the third-largest radio communications station of the Army did a half century ago. Not even if you use mulltipliers to make up for the (usually specious) claim that amateurs "use only their own purchased equipment." Further, amateurs do NOT do it 24/7 for months on end, "CW" or not.

You are getting very tiresome on this petulant complaint about one other radio activity on HF or bitching about someone who was there. Put an end to it. All your petulant whining about the glory and efficacy of morse code is of NO value in the whole wide world of radio communications today. All you have left is the mythology of "greatness in morsemanship" to rationalize keeping the morse code test for a HOBBY use of radio by amateur radio hobbyists.

This is NOT a court of law and "exactness" of quoting
is NOT required...except by those who live for the
pitiful "word battle" and self-glorification.

>MARS and amateur radio aren't the same thing. But many radio amateurs
>are involved in MARS.

The MILITARY Affiliate Radio System is DIRECTED by the
Department of Defense. They function quite well by
sole use of military personnel. See the links to the
actual words of the DoD DIRECTIVE posted in here...see
the links to several of the "Grecian Firebolt" radio
exercises posted in here.

>That's my position. If Steve says different, argue with *him*.

Considering that James P. Miccolis is a "good buddie"
of that wonderful representative of a modern U.S.
Amateur Extra, that is a specious comment of yours. :-)
You HAVE supported him in the recent past and not long
ago disavowed any attempt to control his emotional
outbursts.

>> >> MARS always was and remains a MILITARY radio system.
>> >
>> >But most of the participants aren't in the military.
>>
>> How do YOU know?
>
>I have sources, Len.

Tsk, tsk, tsk. That is acceptible ONLY to reputable
journalistic practice. YOU are NOT a "reputable
journalist." You do NOT have the qualifications.
You are NOT INVOLVED in journalism. :-)

>Do you feel insulted by my posts, Len? It seems so - you seem to find
>insult in everything.

Not me. You are the one with daydreaming about the
"need" of morsemanship in amateur radio licensing
test.

>> Oh, yes, that ties right in with a Canadian museum
>> having morse code in its window...sure...
>
>Those windows really seem to bother you.

? I wash windows. I like Microsoft windows.

What "bothers" me is that a NON-SERVUNG (EVER) person
tried to make out like he was the "expert" on the
United States military use of radio.

You are NOT QUALIFIED for such a judgement. <shrug>

>What has that to do with your claim that:
>
>"If you ain't got the guts to tell the details, you AIN'T done it.
>Simple as that."
>
>That's what you wrote, Len. Does it only apply to Steve and not to
>Brian.

Simple. Brian has NOT insulted me personally, not even
many times over. Robeson HAS and continues to do it.

>> I'm just showing what a damn LIAR he is.
>
>What lie?
>
>The claim he has made is that he found someone who knew you from when
>you were allegedly at NADC. And that someone says you didn't do such a
>great job there.

That's the LIE you are referring to.

Why do you say "allegedly" there? If you don't believe I
was there (I was), then Robeson's claim is irrelevant.
Why do you feel you are INVOLVED with Robeson?
You've already disavowed any capability of controlling
his emotional tantrums in here.

>Now maybe it's true and maybe it isn't. But it's basically your word
>against that of some unknown person.

IMAGINARY person.

I can't "disprove" something that doesn't exist.

If you wish a reference to the fact that I WAS at NADC
or that I worked with NADC engineers in the 1970s, you
can verify that with KD6JG.

Jimmie boy, you are getting VERY tiring with all this "intellectual word gaming" in here. All you are doing is WASTING TIME of others. I have plenty of time but grow tired of your constant petulance. You have NO return on any investment. All you seem to do is follow your buddie's word and SUPPORT him. You have NO proof that this imaginary "reference" of Robeson exists, can NOT present it to anyone else. Why bother with all your foolish word games in here? Are you that hard up for something to do?

Bye. Off.

>> HOW DO YOU KNOW THAT IS TRUTH? :-)>
>
>It's basic logic, Len. If K4YZ really did participate in seven hostile
>actions, then it happened regardless of whether details are given or
>not. That's objective reality.

Sorry, Jimmie, that's just plain BULLSNIT. :-)

The only thing that "happened" is that Robeson tried
to imply that he was an experienced combat veteran.

You have tried to make that an ABSOLUTE TRUTH. Can't
be done.

That's neither "objective" nor "reality."

What seems to be operative here is that you are a BUDDIE
or Robeson and will support him in whatever he says in
here. [do I have to elaborate on what "buddie" means?]

You have presented NO PROOF to anyone on this subject.

If Robeson had merely stated the WHERE and WHEN of those
"seven hostile actions," he MIGHT be believable. He has

not done that yet. Ergo, after months of claiming such
he can only be considered a simple braggart. HE has NO
PROOF at all. Just a simple brag.

Robeson has had ample time to embellish his BRAG or to
PRESENT PROOF to others. He has NOT done so.

Put this matter to rest. You have NOTHING on that subject.
You are wasting everyone's time manufacturing an "issue"
that doesn't exist.

That Robeson insults ANYONE who speaks negatively about Him is
evidenciary enough for anyone (but buddies of Pstevie). Google
has enough archives of his antagonistic postings to fill a few
volumes. :-)

His problem is exascerbated by all the LIES he has told about
others...in addition to or aligned with his personal insults
of others.

>> I DO hold you and Lennie, and lately Todd, up to your own

>miserably to show my opinion to be wrong.

Robeson FAILS (miserably) to show ANYONE's opinions to be
wrong. Still, he keeps on with the personal defamations
and insults. Tsk.

Note that his antagonistic and hateful manner MUST include
those of his "enemies" who, like myself, weren't a part of
a thread. That is extended antagonism, a desire to FIGHT
and much less than a discussion on a subject.

>> This week alone I've posted at least four other items that
>> patently undermined your allegations of the "overblown" ARES and how

>> they will never "respond" in a crisis.
>
>"Never respond?" Who said that??? Post it or accept Lie #24.

Robeson hasn't posted ANYTHING proving his point. His
content is all about himself and personal insults against
his "opponents." That's rather sick.

>> If you find that "antagonizing", Brian, I am sorry, but hey, it
>> was YOUR false assertion and running off at the mouth that brought
>> things to this stage.
>
>Indeed you follow your lies with antagonism. You even precede your
>lies with antagonism.

Quite true. But...the whole purpose of Robeson's messaging
in here is the constant, sociopathic insulting of others who
have written negative opinions of Robeson.

>> Don't like it? STOP RUNNING OFF AT THE MOUTH WITH EASILY
>> DISPROVEN ASSERTIONS, BRIAN! ! ! ! ! ! !
>
>Bricks and slashed tires?

So far, Robeson hasn't "easily disproven" anything. Such
"disproving" is merely his personal-insult commentary on
yourself (and others). Perhaps a new word needs to be
coined: "Diss Proof" a la Robeson. His "proof" is merely
an absolute statement that his opponent "LIES." He needs
nothing else, yet he needs MUCH more such as ACTUAL proof.

Robeson is an example of the modern U.S. Amateur Extra.

I have used computers for over 20 years and I still can't touch
type. I wanted to take a typing class in high school bout "Boys"
weren't allowed to take the class back in the '60s at my high school. I
have to look at the keyboard while i type with two fingers. Carpal
tunnel and nerve damage in my wrists doesn't help the situation either.

I was interested in Amateur Radio back in the late '60s but quickly
lost interest in HF. I wanted to work 144, 432 and up, where code
wasn't used so I went into broadcast and CATV engineering, followed by
working for a company that manufactured microwave telemetry equipment.
I discovered I had more fun making equipment work than using it. Now
I'm 100% disabled and I plan to spend some time restoring the old
Amateur Radio receivers in my small collection.

My current project is a National NC183R. I may use it to listen to
some international broadcasts, but I'll probably sell it after I'm done
working on it. I lose interest in most equipment after I have it
working properly.

>
>The old, "two wrongs makes a right" defense.

I have to disagree. Robeson is so caught up in his personal
hatred of me that he cannot possibly discuss anything
rationally...or even act rationally. He is the constant
antagonist of ANYONE who disagrees with him.

Case in point is others' opinions. Robeson labels those
as "LIES," perhaps even "deceit" even though those are
just personal opinions. Apparently, in Stevieworld,
only Stevie Robeson has the "truth." Ergo, in the logic
of Stevieworld, ALL contrary (to Robeson's) opinions
are "LIES" as well as "errors" and "deceit."

That's quite sick. Irrational. Opinions are just
opinions.

However, Robeson seems to take everything against his
opinions as a "personal attack." He then respond but
that response IS a personal attack on his perceived
attacker. He hasn't yet learned that such is NOT the
way discussions go in our society.

On the other hand, if Robeson has been so brainwashed
by the remaining amateur radio membership organization
that he believes ONLY what they say, then any negative
against him is held AS a personal attack. That is NOT
the fault of anyone voicing a negative opinion against
Robeson's, it is Robeson's fault.

>> > You won't do what you know to be right because someone else isn't
doing

>>
>> I AM, repeat AM doing "what's right".
>
>Repeating something doesn't make it any more true or false. But in
>this case, it makes lies #19 and #20.

Quite true, but Robeson hasn't learned to communicate
with rational people yet. He simply drives home a
blunt point that HE IS RIGHT with no proof or other
reference that it IS right.

That's either a monstrous ego at work there or it can
be a curious mixture of the reasons I mentioned just
before. Either way, it is not right...to rational
people.

>> You and Leonard are lairs, Brian.

That's a falsehood, a LIE. Robeson's only justification
of that is that HE IS RIGHT. It is his antagonist style
which is so off-putting to so many...no justification,
just the personal insult and LIE combination.

>> You don't tell the truth. YOU
>> make glaring errors, and then when I make a simple one, all of a
sudden
>> you think your slates are wiped clean.

Robeson's simple LIE-insult in the first quoted sentence
is an absolute statement. It is without any presented
proof...therefore it is Robeson's OPINION. However, any
of Robeson's OPINIONS are - in his communications here -
perfectly "right." HE IS RIGHT in Stevieworld. Problem
is, everyone else is NOT in Stevieworld (wherever that is).

>Lessee? 30 hours before Len makes an appearance in one of your
>demented threads, you're chiding him for disapproving of what you
said.
>Then you have a conversation with a claimed colleague of Len's years
>and years before you ever heard of Len. Both cases were smear
>campaigns against Len, and you say you make simple errors???
>
>> Sorry...Doesn't work that way.
>
>That's right Steve, it doesn't work that way. What you said was an
>outright lie.

Robeson's HATRED and ANGER seem to be overriding any
rationality here. Robeson cannot prove the existance
of this "fitrep" determiner. He has compounded that
by numerous statements, none of which have any proof
of truth. [see my previous message on this...]

Actually, several years ago, Robeson tried the same
ploy and embellished that until nearly in the form it
was recently. That was unproveable then and his
claim is unproveable now.

None of this discussion has ANYTHING to do with amateur
radio policy. It is just the usual Stevie psychotic
activity in here, part of his general misuse of the
newsgroup as his own personal "battleground."

Robeson doesn't seem capable of acknowledging that he
ever does anything wrong. That seems to increase his
anger quotient and his personal insults grow to
incomprehensible blatherings of Hatred and Anger.

Robeson is an EXAMPLE of a modern U.S. Amateur Extra.

Other Amateur Extras seem unable to take any strong
action to stop his pollution of all threads in this
newsgroup. All threads eventually turn into Robeson's
insults of all his "opponents" in any discussion.
A few have made negative comments to his style, notably
Hans Brakob. Responses to those by Robeson were less
than civil and uncomplimentary.

The local ham club is looking for people to take classes with "Now
Your Talking" rather than try to find people with any electronics
background. I offered to help maintain their club equipment but they
brushed me off because I don't have a ham ticket. I still have a half
way decent RF bench, but nothing compared to the $1,000,000 plus benches
of test equipment I had at Microdyne.

I never had any formal electronics training, yet I ws a broadcast
engineer, and a engineering tech for some products at Microdyne. I
learned it because I wanted to. I went to work part time in a TV shop at
13 after school and on Saturdays. When I was drafted I was tested to
prove I didn't know electronics but it backfired. I not only passed the
MOS test for Broadcast Engineer at Ft Knox, I was told I had received
the highest score on record for the test. These are some of the reasons
for my sig file. :-)

Opinions are just opinions when they start off "My opinion on the subject is..." Or "I think it would be better if..." THOSE are opinions.

Lies and deceit are things like "The ARRL BoD is dishonest" or "ARES won't be able to respond becasue their members are too old and oover obligated

> Quite true, but Robeson hasn't learned to communicate
> with rational people yet. He simply drives home a
> blunt point that HE IS RIGHT with no proof or other

(A) Neither Leonard H Anderson or Brian P Burke are rational. They both make statements in public forum contrary to the presence of data that contradicts their assertions.

(B) Nice try on the "no proof" assertions, Lennie....And only MORE proof that I am correct in calling you a liar.

Your marionette is presently avoiding answering questions about his assertions of the viability of ARES in the face of NUMEROUS news releases to the contrary.

Huge snip of ususal obnxious verbosity to.....

> Other Amateur Extras seem unable to take any strong

While I have no doubt that not everyone approves of my "up in your face" methology of dealing with the two of you, I DO notice that NONE of them, other than to acknowledge your "First Amendment Right" to do so, "support" YOUR presence here, Lennie.

It dosen't take one of those "inquiring minds" to know why....

You are both liiars.

You don't do what you'll say you'll do.

They're tired of the same "Back in 1953...." war satories.

You'e deceitful.

It really is THAT simple.

You mean like problems caused by the licensing of people under the age of 14 years?

You told FCC that no one under that age should be allowed to get a ham license but you offer no proof of *any* problems caused by the lack of such a rule.

You don't do what you demand of others, so why should anyone meet your demands?

It's really just your word against his, Len.

He says somebody remembers you from a certain place and time. You say no such person exists. Neither one of you offers any solid "proof".
>
> PROVE Robeson is "telling the truth" on that "person."

"telling the truth on that person"? Perhaps you mean "telling the truth about that person".

It's not my claim so it's not my job to prove it.
>
> PROVE that "person's" existance to the REST OF THE
> NEWSGROUP.

Why? I'm not the one making the claim that such a person exists or does not exist.

> >>

>
> Sorry, Jimmie, that's just plain BULLSNIT. :-)

No, it's not.

> The only thing that "happened" is that Robeson tried
> to imply that he was an experienced combat veteran.

Where? Being "involved in a hostile action" doesn't mean someone
actually fought in combat.

And maybe he *is* an experienced combat veteran.

> You have tried to make that an ABSOLUTE TRUTH.

Nope.

All I've said is that:

"if K4YZ really did participate in seven hostile actions,
then it happened regardless of whether details are given or
not."

See the first word of that statement? *IF*.

> Can't be done.
>
> That's neither "objective" nor "reality."

It's both.
>
> What seems to be operative here is that you are a BUDDIE
> or Robeson and will support him in whatever he says in
> here.

No, that's not true at all.

> [do I have to elaborate on what "buddie" means?]
>
I know it already.

> You have presented NO PROOF to anyone on this subject.

Sure I have. You just don't operate logically.
>
> If Robeson had merely stated the WHERE and WHEN of those
> "seven hostile actions," he MIGHT be believable.

Not to you. You'd make fun of him, like you always do.

> He has
> not done that yet. Ergo, after months of claiming such
> he can only be considered a simple braggart. HE has NO
> PROOF at all. Just a simple brag.

Apply that same standard to your buddy N0IMD...

> Robeson has had ample time to embellish his BRAG or to
> PRESENT PROOF to others. He has NOT done so.

Why should he tell you anything?
>
> Put this matter to rest.

Are you telling me to shut up?

> You have NOTHING on that subject.

Just logic.

"if K4YZ really did participate in seven hostile actions,
then it happened regardless of whether details are given or
not."

You've claimed that if someone doesn't give details then it didn't
happen. That's simply not objective reality.

> You are wasting everyone's time manufacturing an "issue"
> that doesn't exist.

If it doesn't exist, why are you so worked up about it?

Besides, you've "wasted everyone's time" on far more trivial things.
Like age limits for a ham license, with *no* proof that young amateurs
cause *any* problems in amateur radio. Or mistaken information about
USN encryption methods.

But I don't tell you to shut up.

Personally, I don't really care how good or bad your "fitrep" was X
years ago. Even if it was terrible - so what? Good or bad, it doesn't
make your behavior here or your flawed arguments any more acceptable.

A N D Y O U A R E S T I L L R E F U S I N G to read what
was said in the first place, Brian.

There's a lot of things I can help with, Brian, but arrogant isn't
one of them.

> > Sorry...Doesn't work that way.
>
> That's right Steve, it doesn't work that way. What you said was an

> outright lie.

Nope. Never was.

The O R I G I N A L comments addressed Lennie's history of doing
EXACTLY what I said then....

> > I already count two acknowledgements of errors I have made
this
> > week.
>
> Errors? Simple mistakes? Nobody thinks that, not even you.

Sure I do.

And Brain P Burke STILL has not acknowledged his errors about
ARES. Very clearly documented. Very clearly DISproven with MULTIPLE
news releases.

> > I haven't seen a single one from you acknowledging your ARES
> > errors alone...
>
> There's a profound reason that you haven't seen such an
acknowledgement

I never said I was a "combat veteran". I don't describe myself as
a combat veteran. I was, however, involved in seven different actions
while I was in the Marine Corps where I was directly involved in the
receipt of or exchange of hostile gunfire.

And no matter how many times Lennie tries to make fun of them, it
doesn't change any facts.

Lennie can just stew in his frustration of not being able to point
and click his way to superior intellect!

BUT, Bert, you are among those who do recognize that--for some--other than the public service role of amateur radio, the only reward they gain is just a real simple, real down-home QSO via phone. That's the pleasure of amateur radio; the many various ways in which people enjoy it.

For some, Mike, the "code" (i.e., even just the connotation in the word
"code") is all they got.

Ok.... It took "me" 2 weeks, I know others who learned it quickly, but I can't provide a time frame. Yes, code "can" be harder for others to pick up. I don't doubt that for a minute. Point is, you have to put one foot in front of the other and stick with it, to get down the path to learn it. Many don't want to start, and whine about it without ever putting forth effort. Hell, I know people who bitched about having to look at the "basic" Q/A manual! One remark was "Do I "have" to learn all this?" Another - "Do I "have" to read all these questions?" But yet they want a license. Pure laziness. Licenses should be "earned" not given away. People are least likely to respect something "given" to them. The bands are already showing signs of deterioration from people who just don't care.

I broke into computers with a Radio Shack computer. Model III - I think it was. Anyway, I typed using hunt and peck. Given the keyboard lay out, if I had stuck with it, I may have learned to type a lot sooner. I was getting used to it. But, life changed and I had to sell it. Then later on, I got a Commodore 64 and it was a pain in the ass - to me, with all those dumb commands and keyboard functions. Though I used it quite a bit, I despised it. Then I got a desktop 386. I was still using hunt and peck, but now I felt I was in the "real" world of computers. I found the keyboard rather easy to manipulate and understand. It took about a year - maybe a little less - of hunt and peck typing. I am in positions where I do a lot of typing of letters and such. One day I was typing a letter and it suddenly dawned on me, I hadn't looked at the keyboard the whole time I was typing. I was flabbergasted. At some point, it all kicked in. When I was in high school - 9th grade I believe, I took typing, I had no choice - it was given to all. I bombed it. I couldn't type to save my ass - of course, back then, I could care less - I was into girls and other attractions. Now I type pretty well. Not as good as say some secretaries I know, but pretty damned well for how it came to be. USE is 1/2 the battle. If you want it bad enough, give it a little effort, it will come to you.

Yup, I do. And sorry, but I can read the book, or read the pool, and
get the same thing. The answers are just more verbose in the books.

> The purpose of the examination is to determine if the prospective licensee

> UNDERSTAND a damned thing, but only have normally developed memorization
> skills.

The concept of "memorizing" the Q and A of say the Extra pool is
amusing. Especially when there is a little scrambling going on for the
answers.

Personally, I took the on-line tests, and those questions that I missed
were looked up. Mostly without reference to the question pool, except
for the ones for band edges. The band edges are rote memorization
anyhow. Then I went back and retook the tests until I aced them just
about every time. That was a lot easier than rote memorization of 800
(IIRC) some questions.

> I have no problem with Q&A study aids containing sample questions which

Well, whatchya gonna do? The tests themselves are only the beginning, be they the "super easy" tests administered today, or the "incredibly hard" tests administered under the steely glare of an F.C.C. field agent at the time when hams were real men and women.

I've looked at some of the older questions. The only thing about them that is difficult is that they tend to pertain to operating with equipment and different condition than today.

'Way to go Bert! That's a tough one, there aren't a whole lot of HZs on the air. "Back when" the only HZ on the air for years was HZ1HZ. He was only on 40M CW and usually only in the major DX contests so he was a real "catch". Problem with him was that he had about the worst bug swing most of us have ever heard, absolutely indecipherable. Thank God he wasn't a ragchewer. But that was OK because that swing was his immediate "identifier" and ya knew who it had to be even if ya could hardly copy him in the piles. I have no idea what their rules are today but back then only members of the royal family were allowed to get on the ham bands.

Serious HF dxers aren't serious unless they work both phone and CW, ya have to do both or else yer shooting yerself in the foot.

> the sound of a dah. People with hearing aids often had a difficult time.

You hit that part right on the head. My XYL has a deep notch in her hearing response curve, from about 400 Hz to about 2 KHz, due to playing viola in a symphony orchestra for 15 years, sitting right in front of the brass section[1]. She's having the very devil of a time with Morse, mostly because she has problems distinguishing between dit and dah. She has learned not to trust her ears, and now she's trying to learn to read with them. The deep notch right where most people tune to read CW and where the various tapes, CDs, and tutor programs all put the tone, also makes it very difficult for her.

When she passes Element 1, I have to go learn American Sign Language and pass a proficiency test.

[1] I'll bet most people don't think much about hearing damage in people playing in symphony orchestras. It's fairly common.

No, the only thing harder was that those were just samples, and you had to
actually understand the underlying material because the question on the
examination would be different.

From your description of "take the online test until I can pass it, then
rush down to the VE session", I expect that you'd be another Len Anderson
under those conditions, on the outside looking in.

I have yet, a couple samples of the "FCC" study guides from days gone by. They told you what areas "may" be covered on their exams and a "typical" question. For the most part, for each class, they were one side - of a 8.5 x 11 sheet. Not looking at them, I think one or two may have been 2 sides. They did NOT divulge "actual" test content. You "had" to know electronics and any rules and regulations when you went there or else you wasted a trip, pure and simple. One class builds on the other, but back then, the tests got a hell of a lot harder as you climbed the ladder. They were in some cases, as tough as the Commercial exams. You couldn't get away with just memorizing a bunch of answers in a Q/A guide. You were only fooling yourself if you thought you could get away with that.

> form of "justification" about "amateur radio policy."

So why tell us about it so many times? It was interesting
the first couple of dozen times, but not any more.

In fact, why tell us about it at all, since there's no
connection to amateur radio policy?

> What I originally presented was factual information
> based on personal experience in regards to USE OF
> MORSE CODE by a large Army communications station.

But why? That has nothing to do with amateur radio policy.
You said yourself that amateur radio isn't the US military.

> Army station ADA (it still exists, by the way) USE OF
> MORSE CODE MODE was nil, none, nada from 1953 onwards.

Even *if* that is true - so what?

> World War II ended in 1945.

And Morse Code was used by the US military in WW2, wasn't it?

> Further, I stated that (based on Pacific Stars & Strips
> published story of 1955) ADA relayed 220 thousand
> messages a month in 1955. ADA (also known by the
> TTY message identifier of "RUAP") was only the third
> largest Army station in ACAN (Army Command and
> Administrative Network). Such traffic operation took
> place around the clock, every day ("24/7").

But why?

> Further, I stated (correctly, from Army documents)
> that the ONLY morse code operator training in the
> 1950s was for Field Radio Operator.

Operator training and use aren't the same thing.

> Field Radio is
> exemplified by operations of Regimental-level
> AN/GRC-26 self-contained transmitter-receiver huts
> on the bed of a 2 1/2 ton truck. "Angry-26s"
> were in use at much lower traffic levels, by unit

So you really are just going on the words of others.

> The brunt of military messaging is done by the
> (relatively, speaking in 1950s terms) high-speed
> TTY that can carry message traffic 24/7.

Morse can carry message traffic "24/7", Len. You can't.

> All of
> that constituted the NORMAL means of logistical
> communications...all of that necessary for troop
> movements, shipping of supplies, operational
> orders, etc., etc., etc.

Sure. And they used HF radio because other means
weren't available or were inadequate.

> The total personnel
> and installations in the Far East Command then
> was akin to a small state, therefore the amount
> of communications was quite large.

And the number of personnel assigned to the communications
was quite large, too, wasn't it? Not just you but more than
700 people at ADA alone, wasn't it?

> At NO TIME
> was any bank of morse code operators seen OR
> KNOWN serving either the FEC Hq or Army Central
> Command ("central" insofar as Japan).

"seen or known" by whom?

> Did I
> "know" all that? Yes. It was part of my duty
> there to not only be at a part of the
> communications station but to make trips to
> nearby units. Do I have absolute proof of all
> of it by referencible documents? No. Only some.

So you don't really know from personal experience. Besides,
as you have said, the non-existence of something cannot be
completely proved.

> Am I "lying" in stating any of the above? No.
> There is NO reason for me to "lie" about anything
> there.

Sure there's a reason. Several, actually. But I've never
accused anyone here of lying. Not even you. I've pointed
out mistakes, but that's a different thing entirely. A
lie is intentional, a mistake isn't.

> There is no reason for N2JTV to say
> anything about it, yet Gene was there at the same
> time I was, the same station but on a different

Do you call him "Genie" or some other insulting nickname,
Len? Or just "Gene" or "N2JTV"?

> The gist of all that is that: MORSE CODE WAS NOT
> IN USE FOR MAJOR COMMUNICATIONS TRAFFIC. Not in
> The Far East Command at the time. That Command
> included USAF and USN.

Even if that's true - so what? The Far East Command wasn't
amateur radio.

And it seems that you are hyper focused on "MAJOR COMMUNICATIONS
TRAFFIC" as if nothing else matters.

> I've seen documents that stated the communications
> plans from 1948 onwards would handle ALL normal
> message traffic by TTY for the future. I do not
> have such a document to "prove" it but can state
> that, from 1953 onwards, it WAS TRUE by example,

> by various Army documents published since 1956,
> by various Signal Corps photographs (none of
> which show any morse code operators at work) in
> the Far East Command.

Even if that's all true - and you could be mistaken about
it, but let's not go there right now - what possible connection
does that have to amateur radio policy in 2005?

> Was there ANY morse code used in the U.S. military?
> Of course.

FINALLY!!

Len admits the US military actually used Morse Code!

Next thing we'll see is the sun coming up in the west ;-)

> All in Battalion or smaller units for
> field radio in the Army...on board ship in what
> Hans Brakob describes as "small boys" such as
> DDs (destroyers) or lesser-tonnage vessels.

How about submarines?

Did you know that approximately half of all Japanese ships sunk
in WW2 were sunk by US submarines - a force that was only a very
small part of the US Navy at the time? Subs also sent back vital
information from Japanese-controlled areas (such as weather and
enemy task force movements). Also rescued downed airmen and aviators,
placed and retrieved covert operatives.

You can look all this up. I don't think US Navy submarines had teletype
aboard in WW2.

> Morse
> code skill was required by some airborne radio
> units (ASW and the like) and for aircraft on long,
> over-water flights...also for the (then) Distress

> everyone.

How about that!

> I do not have any specific cites of
> morse code use by SAC units of the 50s or 60s, but
> TAC does not include it. Long over-water flights
> my USAF military transports required morsemen on
> board.

You mean "radio operators skilled in the use of Morse Code"

> What you have to understand is that the
> cruiser or heavier class ships had carried RTTY
> since first starting with that in 1940.

All of them? Why do I "have to" understand that?

> That was
> necessary to insure the secure "rotor machine"
> encryption terminals (on-line or off-line capable)
> for Command orders and responses.

But other USN ships were able to communicate securely
without RTTY.

> Regardless of
> nit-picking on the names of such systems or their
> absolute, exact nomenclature,

You mean you were mistaken in your earlier posts, as
corrected by K0HB.

> their existance was
> acknowledged in at least two civilian books first
> published in the 1960s (David Kahn's "Codebreakers"
> was on the NYT non-fiction bestseller list for
> several months, a seminal text on history of
> cryptography).

Hams aren't allowed to encrypt their transmissions. Against
the rules. "Encrypt" meaning "to conceal the meaning".

> Morse code use in small-unit radio decreased and
> decreased from the 1950s onward. All branches,
> even the USCG.

Nobody disputes that. Yet even in the 1990s it was in use,
and there were maritime rescues dependent on it. SOLAS and
all that.

> TTY rates jumped from 60 WPM to
> 100 WPM,

Hardly a "jump", Len. More like a slide.

> then morphed into "data" in various
> forms at rates up to 2400 WPM over HF radio links.
> By 1978 the USAF (one of the remaining strong users
> of HF) was shutting down HF as a spectrum component
> in favor of the new satellite relay and
> troposcatter, VHF and UHF (they'd had the 225-400
> MHz "military aviation band" since shortly after
> WW2).

How does this have anything to do with amateur radio policy? All
amateur radio privileges above 30 MHz are available without a
code test.

> By then the sole use of morse code was
> limited to emergency communications as a secondary.

Even if true...so what?

> It MAY have been used for ALERT messaging of
> submarines but another (with actual experience of
> such communications) will have to give details.

Why, Len? You give all sorts of details on things you have
no experience with...

> By the 1980s, the ALERT messaging to boomers and
> sharks was done by some form of encrypted DATA.
> As to the SAC messaging on "oil burner routes" or
> otherwise on loitering flights, I can't comment
> on those formats or content other than to say
> morse code was NOT used for those.

Even if that's true.....
>
> So, there has been a lessening NEED for any
> "trained morsemen" in the U.S. military over the
> past HALF CENTURY.

Did the military call them "trained morsemen", Len? Or
something else, like "Radioman First Class"? (Rm1C)?

> It has VANISHED for use in
> actual communications in the military...since
> the International Distress and Safesty system
> was implemented a few years ago worldwide, the
> USCG has stopped monitoring 500 KHz.

Because they don't have to, anymore.

Did you know that a new Morse shore station was just licensed to
operate on 600 meters (500 kHz) and HF maritime frequencies? Call
is KSM.

> The military
> has had MILLIONS of U.S. citizens in service in
> all that time, still has a million-plus serving.
> Morse code use in the military is limited solely
> to INTELLIGENCE INTERCEPTS (one-way, "silent
> listening").

Even if that's true....

> GONE is the NEED for "trained morsemen" of any
> kind by the United States government.

Who ever said there was such a need in modern times, Len?
Not me.

> There is
> NO NEED of any sort of "trained pool" of such
> morsemen for the national use.

Who ever said there was?

> That lessening
> began about 57 years ago although it was already
> happening during WW2 when HF commercial SSB was
> carrying TTY messaging to Europe and Asia.

Here's a clue, Len:

The FCC, in Part 97, mentions the need for a pool of trained
skilled radio operators or some similar verbiage. You can
look up the exact words if you're so inclined. The key point
is that one of the Basis and Purpose of the Amateur Radio
Service is to have such a pool of radio operators. Doesn't say
anything about "morsemen". And it never has - the Basis and

Purpose were first put there in 1951, and the phrase has always
referred to "skilled radio operators" with no mention of Morse
Code.
>
> What is left is a lot of daydreaming by amateurs
> based on myths begun in WW2 of glorious use of
> morse "in battle zones" or as the valiant radio
> operators of B-17s and B-24s (actually more
> gunners than radio operators) and "fighting men"
> in ship radio rooms, etc.

What "myths", Len? Were you there?

Have you ever been in a B-17, B-24 or B-29?

> Generations of day-
> dreaming amateurs passed them on to succeeding
> generations until the mythos became almost
> palpable.

So you're saying Morse Code wasn't used in WW2 for
anything important, huh?

> The only radio service in the USA
> that requires morsemanship skills is Amateur
> Radio Service and that ONLY for privileges below
> 30 MHz.

And that's perfectly reasonable because hams *do* use
Morse Code - particularly below 30 MHz.

Seems to me your whole argument comes down to the idea
that since the US military doesn't use Morse Code much
if at all anymore, hams shouldn't use it either, nor
have a test for it.

All that verbiage of yours, summed up in one sentence.
>
> When it comes to "handling traffic" on HF, *NO*
> amateur radio group or net can come even close
> to the amount handled by the third-largest radio
> communications station of the Army did a half
> century ago.

Sure we can. 700 amateurs, each with PSK-31 or some other
modern data mode, 10 messages per day each. Do it for a month
and there's 220,000 messages.

But is size all that impresses you, Len? Seems like it.

> Not even if you use mulltipliers
> to make up for the (usually specious) claim that
> amateurs "use only their own purchased equipment."

What "specious claim", Len? It's a fact - almost all
hams have to buy/build and maintain their own equipment.
Not like the military, where Uncle pays for everything.

Sure, a few hams have access to club or other stations
funded by others. But they're the exception that proves
the rule.

> Further, amateurs do NOT do it 24/7 for months
> on end, "CW" or not.

Neither do you, Len. Nor did you, at ADA or anywhere
else. 700 plus personnel, remember?

> You are getting very tiresome on this petulant
> complaint about one other radio activity on
> HF or bitching about someone who was there.

The main petulance and bitching are yours, Len,
repeating the same story over and over and over, as
if it is somehow relevant. It isn't.

> Put an end to it.

Are you telling me to shut up, Len? Seems like it.

You rail on about the First Amendment but then tell others
to shut up. Double standard of the worst kind. I've never
told you or anyone else here to shut up...

> All your petulant whining
> about the glory and efficacy of morse code is
> of NO value in the whole wide world of radio
> communications today.

What "petulant whining", Len? Show us an example.

And the fact is, Morse Code is of great "value in
the whole wide world of radio communications today"
- because that includes Amateur Radio.

Or do you exclude Amateur Radio?

Aren't we hams big enough to count?

> All you have left is the
> mythology of "greatness in morsemanship" to
> rationalize keeping the morse code test for a
> HOBBY use of radio by amateur radio hobbyists.

No mythology, Len. Fact.

Not used by whom? I frequently use CW on the VHF, UHF, and microwave bands -
perhaps moreso than SSB and certainly at least as much.

I'll have to side with Len on this one. It was a JUMP, not a slide or a
slither.

When the USN fleet broadcasts shifted to JASON cover (100WPM) from black
uncovered (60WPM), estimates are that the TTY casualty rate approached 75%.

Machines which had been happily chugging along for years on 60WPM gears
literally self-destructed when 100WPM gears were installed.

No, it wasn't necessary. The most popular "rotor machine" crypto system in us in ALL Navy ships was the off-line KL7 "ADONIS" system. It was incapable of on-line connection, and did not require TTY to transmit messages. Morse worked just fine, and 98% of all the "5-letter-coded-group" messages were generated on KL7 off-line machines.

OK Dieter, what should be the Amateur policy regarding an amateur radio operator in this country declaring a national emergency for another country??? ak

Case in point:

Mr. E. Pitman,
Government Telecommunications Officer,
Department of Telecommunications,
Hamilton.

Dear Ted,

I am faxing a transcript of the broadcast put out by K1MAN last week. When you have read this I would like to have a meeting with you, maybe we could have lunch and discuss it then, to fill you in on what actually happened.

Your support with this would be appreciated. I have been to the American Consulate and will be writing a formal letter of complaint this week, requesting a public apology from K1MAN. He is advocating that I should lose my license for NOT passing third party traffic when the "world needed to know" and he had declared an emergency. He was doing this under the authority of the "FCC" according to him. I reminded him that we were not a State of the United States of America and that we were governed by the Department of Telecommunications and also the British arrangements for third party traffic. He could declare whatever he wanted to but until we had clearance, we would not pass it

No emergency had been declared and as far as we were concerned it was an unofficial net standing by in case we were needed should an emergency be declared. He did not like being informed that we were handling the situation ourselves very efficiently, without his help.

Please telephone me when it is convenient and I will explain more, or as I said, maybe we could have lunch.

Yours sincerely,
VP9HK

Well Stevey, growing up in the 70's was a lot different then today. We didn't have tv with 100 channels or even the internet. Bottomline if you don't want to take the responsibility and watch what your childern are listening too or watching on TV then you shouldn't of had childeren, plain and simple.
One thing I hate most in the world are a bunch of right wing assholes from two religious groups telling me what I can and can't watch on TV. As for title of this thread THAT'S OK STEVE I CONTINUE TO RUN MY INFORMATION BULLETIN IN THE AMATEUR SERVICE. :)

>> >> in a window display...
>> >
>> >Is it wrong to mention an interesting architectural feature?
>>
>> Morse code is NOW an "interesting architectural feature?"

>The windows are an interesting architectural feature.

Way back in Usenet history(early 90's), there were posts signed by an author named "Serdar Argic" who repetitively posted about the Armenian murders of Turks in 1918:

http://www.jaedworks.com/shoebox/zumabot.html

(Reputable historians agree that the killing was the other way around.)

Some interesting similarities to Len:

- Serdar responded to each and every mention of "Turkey" or "Armenia," no matter the context, with long harangues about his interpretation of history.

- Len responds to each and every mention of "Morse Code," no matter the context, with long harangues about his interpretation of history.

- Any attempt to engage Serdar in debate resulted in him insulting others with invectives like "Gum Brain," "Wieneramus," "your Criminal Armenian Grandparents" (even others who were, say, ethnic Japanese), and "A mouthpiece for the fascist x-Soviet Armenian Government."

- Any attempt to engage Len in debate results in him insulting others with invectives like "Gunnery Nurse," "Katapult King," "Macho Morsemen," and "A believer in the Church of St. Hiram."

- While somewhat amusing at first, with posters able to easily rebut Serdar, even writing parodies mocking the overwrought style of the posts, the amusement turned to annoyance when the sheer volume of his

posts overwhelmed any on-topic discussion.

- While somewhat amusing at first, with posters able to easily rebut Len, even writing parodies mocking the overwrought style of the posts, the amusement turned to annoyance when the sheer volume of his posts overwhelmed any on-topic discussion.

- Serdar failed his Turing Test for human intelligence when it became clear that he could not distinguish between Turkey, the country, and Turkey, the meat. For example, his postings went up dramatically in the first two weeks preceding American Thanksgiving, strongly suggesting that the posts were written and posted by some kind of AI or "bot."

- Len's sentience, and ability to pass the Turing Test, is left as an exercise for the reader. As a first test, Len is invited to guess my positions on Morse Code.

Thanks Brian. I'm havin' gobs of fun and have broken out the K2/100 running approx. 70 Watts. I'm about a third of the way through toward DXCC and need an Asian contact for WAC.

I will heed your advice re. using both phone and CW. I do hop on 10 using phone while commuting to and from work, but in the shack, well... ;-)

To be honest, I suppose I just find the CW itself fun. I'm also a big WW II buff and was quite honored to work W5E over the weekend, who was operating from a Boeing B-17 bomber. The op was using the vintage onboard gear. It's humbling to think of the transmissions that have traveled through that gear. Tnx agn es hpe c u ota. Take care es...

> those "canned" welcome messages. ???

I prefer to read widely, but post judiciously, and only when I have something original to say.

I always respond to replies to my welcome message. In fact, the text of the message itself invites such replies:

'The author welcomes any and all constructive feedback. Please direct all such feedback to pschleck@novia.net and retain the original subject (e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.'

Just this month, I received and replied to messages from three correspondents about the welcome message. Most repliers express confusion over getting the message, as they didn't realize that they followed up to an article cross-posted to many newsgroups.

I invite anyone who didn't get a reply to try again, and post any bounce messages received. Failing that, if the reply isn't too personal, please post it here or on *.misc, and I will try to follow up with a considered reply.

The last time someone complained about bounces (someone named Andreas "Tekman"), it was due to a SPAM blacklist filtering out their message at the ISP level because they were posting from a site identified as a significant source of SPAM. His degree of good faith and sincerity in the matter (his followup posts included several schoolyard taunts and a death threat) was also strongly in question.

Len, if it was you that tried to reply, and didn't get an answer, does that mean that you now wish to have an E-mail conversion on newsgroup subjects? Your last message to me, on January 27th, 2004, said in no uncertain terms that you did not.

And please, Todd, tell me about YOUR children...What PRACTICAL EXPERIENCE in child rearing do YOU have, or are you just using this as an excuse to have "100 channels or even the internet" completely "adult oriented" for for your personal perversions...?!?!

> One thing I hate most in the world are a bunch of right wing
> ###holes from two religious groups telling me what I can and can't
> watch on TV.

Hot flash, hot rod...They are not telling you what you can or can't watch...they only want to be able to have family oriented television at a time that is, well, family oriented.

Just because YOU want to be able to watch "Hot Barely Legal Asian Teens" at 2 in the afternoon is NOT a defensible reason to have it on five network channels.

You'll ALSO note that the FCC's "obscenity" challenges have to do with COMMUNITY standards. Maybe where YOU live it's OK to use the "F" word in unmoderated public forums, but here they prefer to have a bit more responsible and mature conduct.

>As for title of this thread THAT'S OK STEVE I CONTINUE TO

"Caveat," I was in the military, the United States Army,
voluntary enlistment beginning 13 March 1953. Went from
Basic to Signal School at Fort Monmouth, NJ. Amount of
Signal School time spent on morse code? ZERO! NO class,
NO "cramming."

At that time the ONLY military occupation specialty
in the Army requiring morsemanship was Field Radio.

Field Radio then required passing 20 WPM, was taught
at Camp Gordon (later Fort Gordon, now the home of the
Signal Corps). Drop-out rate was roughly a quarter of
all starting...that I know about. Those that didn't
make it, but had some apitude for electronics, got to
go to Inside Plant Telephone, Outside Plant Telephone,
Carrier, Teleprinter Operator, Field Wireman...or the
Infantry. :-)

My Signal School classes taught Microwave Radio Relay
(at a time when there was little of such operational).
Radar was also taught at Fort Monmouth, had the same
basic electronics as Microwave. I got assigned to a
Fixed Station Transmitter site in Japan. Got all of
about a day's worth of on-site "training" to operate
one of three dozen HF transmitters having a minimum of
1 KW output. NO MORSEMANSHIP NEEDED THERE. NO MORSE
USED at the third-largest station in the Army Command
and Administrative Network.

>>> Maybe you never will use it again.

for
>that effort.

Riiiight, Coach Lector. :-)

After my release from active duty in 1956, I thought it good to get a Commercial Radiotelephone License. Lots of job opportunities with that then. Couldn't find a Q&A book in town but I got a copy of the entire FCC regulations from a good guy at a local broadcast station, studied that and got my First 'Phone on the first sitting in Chicago, 90 miles away (didn't walk, rode the train, kept my shoes on even if there was no snow). Moved to L.A. at the end of '56, started at Art Center School of Design to become an illustrator. Worked during the day at Hughes Aircraft, found out that illustrators didn't make much money, liked electronics (already spent three years in Army communications) and switched to Electronics Engineering. Took me 15 years to complete that due to job requirements making me miss whole semesters. Got engineering responsibility, title, and pay before any "certificate" (suitable for framing) awarded (sheep did not sacrifice their skins for graduates, regardless of what is said).

In between semesters, I thought it a neat thing to learn this morse code stuff, get a fancy callsign to "sign after my name" (youth can be misleading on what is important). Got to roughly 8 WPM clean copy using practice tapes (magnetic, reel-to-reel, cassettes had not yet been invented in those 60s days). Stopped after that plateau, wondered "whatinhell am I doing spending all this time on morse?" I'd already spent three full years on Army communications at a major station (220 thousand messages a month in 1955), had become a supervisor, did finally work on microwave radio relay operations in the service, was now an employee of Ramo-Wooldridge Corp. in electronic warfare group, and the

Class D CBs had already started. I'd gotten the First 'Phone, worked on HF, was now working on more of the EM spectrum than any ham of today can use, already had a good home workshop and was coming along on professional design. I didn't "NEED MORSE" to GET ON THE AIR. I had already done that, perfectly legal, without fault.

I had tossed the idea of getting a "title" (the callsign) since there was MUCH MORE electronics coming along. The first of the ICs had already hit the market and some of us were tinkering with the first personal computers, rolling our own without benefit of MITs or Apple or SwTP kits (hadn't come out yet). PLENTY of fun and games in electronics AND radio to be interested in.

>>> I DO use code now and then, but not daily like many others do. Everyone has
>>> their own thing. Some are into Packet, RTTY, AMTOR, etc, I'm not...To each
>>> his own. But we all had to learn "something" about those modes to pass an
>>> exam.

Oooooo! "PASS THE (code) EXAM!"

Geez, poor babies, like an amateur exam is "Nobel Laureate" material? Like "rocket science?" Yeah... a "life accomplishment!" :-)

I used to "pass a test" every week...on payday. If I didn't KNOW what was needed on the job, to do the things my bosses had given me responsibility for, I wouldn't "pass that exam." No paycheck. Bye.

I never failed such an exam. I never failed any exam in college courses, either. I just kept on working in engineering design...and having to constantly keep on learning. The state of the electronics arts have NOT ceased to advance...not one iota of stopping.

>Funny thing is, we're all arguing pros and cons and in the end, it won't
>matter. WE do not have control.

NO NO NO!!! WRONG IN HERE!!!

The NO-CODE TEST ADVOCATE extras "HAVE CONTROL!" At least three have "forbidden" any non-amateur to EVER say anything about getting INTO amateur radio! Such folk are, as these gods of radio put it, "NOT INVOLVED!"

Damn the First Amendment (say those three). THEY "rule" on What Shall Be in U.S. amateur radio!

Their clubhouse door is CLOSED to "outsiders." [so are
their minds, BTASE...)

>So, if we're going to debate the issues we
>have no control over, may as well keep it clean.

What is "clean?" Anything done the way the ARRL says
is "clean?" Anything done to show "committment" and
"dedication" to amateurism is "clean?" Does "clean"
mean that ALL must obey the olde-fahrt amateur extras
who cuss at all the (evil) no-coders?

Does "clean" mean the usual Double Standard in this
newsgroup? All the PCTA extras can cuss at others
but everyone else has to be OH so polite, civil,
obediant, and respectful to their MIGHTY personal
accomplishments?

>Hardly any of us know the
>other and it isn't worth making enemies over.

Quite true, but that is NOT practiced in here. Look
at the labels of "PUTZ," "LIAR," "COWARD" that are
tossed out freely by these MIGHTY PCTA extras!

>Certainly not worth name calling....

It MUST be "worth it" to these stalwart, noble, good
and true MORSEMEN. They seem to thrive on it.

>Whether I'm right or wrong, I do value opposing view points.
>Everyone has a right to his/her own opinion.

Commendable and should be the operative ethic in here.

Unfortunately, it is NOT SO.

>Pro or con, it is a matter of time. May be a year, may be 5, but it
will
>come to pass.

Absolutely. But...that will be the END of the ARS
(Archaic Radiotelegraphy Society).

Stop blabbering like a petulant child. Get with the program
in computer-modem communications. YOU DON'T DO WHAT YOU
YOU JUST COMMANDED.

You are NOT a "commander" of a damn thing in here. You can't
control yourself or your angry, petulant, emotional outbursts.

> Lies and deceit are things like "The ARRL BoD is dishonest" or
>"ARES won't be able to respond becasue their members are too old and

WHAT "data?" Robeson has presented NO "data."

> (B) Nice try on the "no proof" assertions, Lennie....And only
>MORE proof that I am correct in calling you a liar.

Robeson has NO "proof." All Robeson has is a seemingly
unending list of personal insults against all those who
disagree with him.

> Your marionette is presently avoiding answering questions about
>his assertions of the viability of ARES in the face of NUMEROUS news
>releases to the contrary.

NO ONE is any "marionette."

Your (usual) petulant outburst in another demonstrated
fit of anger shows you have little "proof" of anything
but your own anger and hatred of anyone saying the least
negative thing about your own opinions.

> Huge snip of ususal obnxious verbosity to.....
>

your
>face" methology of dealing with the two of you, I DO notice that NONE
>of them, other than to acknowledge your "First Amendment Right" to do
>so, "support" YOUR presence here, Lennie.

Tsk. Robeson should have all kinds of "doubt." :-)

Robeson not only acts like the sociopath but has a
monstrous EGO thinking that his "in your face" insult-
fest is "approved" by those that count. :-)

> It dosen't take one of those "inquiring minds" to know why....
>
> You are both liiars.

What is a "liiar?" List the "LIES" supposedly said in here.

Robeson has yet to "do what he says he will do." :-)

Namely PROVE the existance of this imaginary "fitrep"
person he says evaluated me at NADC 34 years ago. :-)

Robeson has yet to acknowledge that the Department of
Defense DOES DIRECT MARS...even when given the link to the

latest document issued by the DoD.

Robeson has yet to state the WHEN and WHERE of his mighty
"hostile action" experiences.

> They're tired of the same "Back in 1953...." war satories.

Well, regardless of the anger-induced typos ("satories"),
I did work big-time HF communications for three straight
years beginning in 1953. Robeson has NOT done anything
close to that. Robeson has NEVER worked in electronics
engineering as either civilian or military member, yet
presumes to be "knowledgeable" about engineering after a
very short-term job as a purchasing agent!

> You'e deceitful.

Present the "proof." Describe the WHY where ALL MUST
do exactly what they (allegedly) "promised" years ago.

Robeson does little else but hurl personal insults at
those who do not agree with him. That gets him the
attention he seems to be desperately seeking. Robeson
manages to turn EVERY thread in this newsgroup into his
own "FIGHT" with all those who disagree with him.

> It really is THAT simple.

Robeson IS "that simple."

Robeson is an EXAMPLE of a modern U.S. Amateur Extra.

>
>Right.....well come on, belly up to the bar or get off the pot.

Todd, he is still "on the pot" trying to call every
other kettle "black." :-)

That's his whole activity in this newsgroup. "Hostile
action" stuff in FIGHTING with anyone he cares to.

Note his habit of making typos when angered, such as
"tob e done..." :-)

>>They're going.
>
>Right, Steve I think you full of it....
>
>Todd N9OGL.

Robeson is "full" of anger, resentment, and possibly
frustration over many things besides amateur radio.
He operates continually in a petulant, emotional
insult mode to anyone who disagrees with him in any
way. <shrug>

Don't try to discuss anything with him. Once the
first disagreement occurs (however slight), you
will find yourself on his "enemies" list and so
commented upon by him in here...regardless of what
you are talking about in any message. That's
almost a guarantee! :-)

LenAnderson@ieee.org

Little Stevey said:
> How? Why? Is "decency" any more or less important today than 30
>years ago? 100 years ago?

Well Stevey, time changes and attitudes change.....I know for you and your little bible banging butt buddies at the AFA and PTC don't like that idea but it's the truth, We don't live in the 1950's anymore.

>Hot flash, hot rod...They are not telling you what you can or
>can't watch...they only want to be able to have family oriented
>television at a time that is, well, family oriented.
>Just because YOU want to be able to watch "Hot Barely Legal Asian
>Teens" at 2 in the afternoon is NOT a defensible reason to have it on
>five network channels.

First off I wouldn't watch some show called "Hot Barely Legal Asian Teens" What I was saying is some of the shit that these groups like the AFA (American Family Association) and PTC (Parent Television Council) are complaining about is really stupid stuff, and thanks to the FCC they've rejected a lot of their shit. Unforutnely, their trying to push congress to pass laws to allow the FCC to regulated content on cable and satellite. You see little stevey, I pay for that programming on satellite and if I want to watch something a little more adult in nature, that's my right, I'm paying for it. I don't need some fucking nazi bible banger tell me that I have to watch only "family oriented" programming.

>You'll ALSO note that the FCC's "obscenity" challenges have to do
>with COMMUNITY standards. Maybe where YOU live it's OK to use the "F"

>word in unmoderated public forums, but here they prefer to have a bit
>more responsible and mature conduct.

A public forum??? do you mean here???? well the Internet doesn't really follow the community standards that broadcasting does. Thanks to the Supreme Court those nazi at the AFA and PTC can't supress adult speech on the internet.

>As for title of this thread THAT'S OK STEVE I CONTINUE TO
> RUN MY INFORMATION BULLETIN IN THE AMATEUR SERVICE.

>Not for long.

Yeah right, I believe it when I see it, I'm starting to believe these guys on the context that your full of it.

Actually, not really Mike.

Welcome to RRAP, wherein our resident
"used-to-be-an-engineer-and-know-everything-better-than-you"
representitive, Len "Lennie" Anderson endears himself and makes friends
by calling them Nazis, thugs, elitists, etc, then crying foul when
"called" on it.

> Trust me on that if you haven't seen others' received
> flak.

Trusting Lennie Anderson on ANYthing is like letting Jack
Kevorkian make your health care decisions for you.

Do a Google on "Lenover21@aol.com", "Lenof21@aol.com",
NOCWTEST@aol.com (before winter 2001, I believe...)

Lennie's "reputation" for honesty, trustworthiness and
dependability are less than adequate.

> Still a professional electron pusher (and long-time
> electronics hobbyist) but one doesn't do it during
> regular office hours.

You don't do it during OFF hours either, judging by your complete
lack of evidence on ANY "hobbyist" project other than listening to the
ATIS at LAX on your scanner.

Hope you'll get a ticket at one level or another, Mike...there's
a lot of fun to be had...If some club was rude to you, don't think it's
the whole tamale.

Poor choice of words on my part, Hans.

A better choice would be "step up" or "incremental increase".
I think of a "jump" as an order-of-magnitude increase, like
60 wpm to 600 wpm, etc.
>
> When the USN fleet broadcasts shifted to JASON cover (100WPM) from

Nor should we...But you didn't answer my questions about decency.

I don't have any "bible banging butt buddies" anywhere, Todd.

And what IS it with you and butt fetishes?

You really do have some seriously perverted issues, Todd.

> >Hot flash, hot rod...They are not telling you what you can or

Stupid to YOU, but you're ignorant, profane, functionally
illiterate and just basically a fool. So who cares what you think?

> Unforutnely, their trying to push
> congress to pass laws to allow the FCC to regulated content on cable
> and satellite.

And at some level they should. There needs to be some sort of
control over the rampant promulgation of smut.

Your "bio" says you've been born and rasied in Taylorville, Todd.

Well, I've had a chance to travel...A LOT...I've worked in health care in little podunk communities and major cities. I've seen what our out-of-conrol "let it all hang out" 21st century attitudes have done to us. If you want a great appreciation of why a lot of people want to rein in some of that liberal behaviour, read "Rise And Fall of the Roman Empire" and see if you can't see some parallels

> You see little stevey, I pay for that programming on

Then get the adult channels.

Just becasue you pay for basic programming does NOT mean that you should have carte blanche access to all the kiddie porn and beastiality you think you "deserve".

> >You'll ALSO note that the FCC's "obscenity" challenges have to do

If you were acting like an adult, that might apply.

Your conduct here is "MEMEMEMEMEMEMEMEME", just like a three year old.

Nothing happens in "a day", Todd. If your expecting to see someone knocking on your door today, tomorrow, or even a month from now, you'll be disappointed.

But it will happen.

Steve, K4YZ

4591. Todd Accepted Into Lennie's "Camp"...It Had To Happen ! ! ! !

Guess that puts Todd, the functionally illiterate, profane, law breaking fetishist strongly in Lennie's "camp" where lying, deceivng and sending pictures of inappropriate content via e-mail is not only accepted, but practiced and condoned!

It's Official!

This is so precious! A wedding made in heaven!

Steve, K4YZ

Not specious at all, Len. You hold me responsible for what someone
else does. Doesn't work like that, Len.

> You HAVE supported him in the recent past and not long
> ago disavowed any attempt to control his emotional
> outbursts.

What you're saying is that if I agree with him on something,
I'm somehow responsible for everything he does.

I figured you for a Mac user, Len. ;-)

> What "bothers" me is that a NON-SERVUNG

"SERVUNG"?

What does that mean?

> (EVER) person
> tried to make out like he was the "expert" on the
> United States military use of radio.

I don't claim to be an expert on anything, Len. I think
the fact that I pointed out some of your mistakes really
burns your bacon.

> You are NOT QUALIFIED for such a judgement. <shrug>

Sure I am.

> >What has that to do with your claim that:
> >
> >"If you ain't got the guts to tell the details, you AIN'T done it.

> >
> >That's what you wrote, Len. Does it only apply to Steve and not to
> >Brian.
>
> Simple. Brian has NOT insulted me personally, not even
> many times over. Robeson HAS and continues to do it.

Ah, I see.

If someone agrees with you and demonstrates the proper kudos,
you accept what they say as absolute fact, without any details or
supporting evidence.

But if someone disagrees with you, and maybe "returns your fire"
in the form of name calling and other jackass behavior, you
demand "proof" and deny the reality of their experience. In fact,
you claim that:

"If you ain't got the guts to tell the details, you AIN'T done it.
Simple as that."

Of course you've also demonstrated that no matter what proof is
presented, you won't accept it, and will attack the messenger.

So there's no reason to give you details or proof.

> >> I'm just showing what a damn LIAR he is.
> >
> >What lie?
> >
> >The claim he has made is that he found someone who knew you from
when
> >you were allegedly at NADC. And that someone says you didn't do such
a
> >great job there.
>
> That's the LIE you are referring to.

That he found someone, or what the person said?
>
> Why do you say "allegedly" there?

Because I don't know for sure. You've made mistakes before.

Why should I accept your words as fact when you don't accept mine?

> If you don't believe I
> was there (I was), then Robeson's claim is irrelevant.

No, it isn't.

Either you were there, or you weren't. That's objective reality.
Whether I believe it or not doesn't affect whether you were
there or not.

You claim without proof that no such person exists. So it's your
word against his.

> Why do you feel you are INVOLVED with Robeson?

What involvement? I'm simply pointing out some facts.

> You've already disavowed any capability of controlling
> his emotional tantrums in here.

So? *You* can't control his emotional tantrums "in here", either,
despite all your alleged knowledge of human nature and psychology, etc.

In fact, Len, you can't even control your own emotional tantrums "in
here" ;-)

> >Now maybe it's true and maybe it isn't. But it's basically your word
> >against that of some unknown person.
>
> IMAGINARY person.

The only way that could be proved true is if:

1) You were never at NADC, so nobody could know you from there.

2) Everyone who knew you there is now dead or otherwise unable to
communicate with Steve.

3) You have complete information that no one you knew there has
communicated with Steve.
>
> I can't "disprove" something that doesn't exist.

So it's your word against his. Nothing more or less.

> If you wish a reference to the fact that I WAS at NADC
> or that I worked with NADC engineers in the 1970s, you
> can verify that with KD6JG.

Why? Was he there with you? How do I know his information is reliable?

More important - how would it prove that Steve has not communicated
with someone who knew you there?
>
> Jimmie boy, you are getting VERY tiring with all this
> "intellectual word gaming" in here.

Now there you go, Len, trying to make me angry by calling me names.

The fact is you know you've painted yourself into a logical corner,
and you're trying to bluff and bluster your way out.

Can't you take "strong opposition"?

> All you are doing
> is WASTING TIME of others.

How? I'm simply pointing out some of your mistakes and holes in your
logic. Do you consider what you write to be a waste of time?

> I have plenty of time but
> grow tired of your constant petulance.

What "petulance", Len? I'm not calling you names.

> You have NO return on any investment.

That's not what my monthly statements say! ;-)

> All you seem to do is follow
> your buddie's word and SUPPORT him. You have NO proof
> that this imaginary "reference" of Robeson exists,
> can NOT present it to anyone else.

I'm not trying to prove it one way or the other. That's for
you and Steve to do. I'm just pointing out that your claims
are as unproven as his.

It's just your word against his. Nothing more.

> Why bother with
> all your foolish word games in here?

Typing practice. Spelling practice. Logic practice.

Plus it's mildly amusing.

> Are you that hard
> up for something to do?

Not me. Obviously *you* are, though...

> Bye. Off.
>
Sounds like a veiled command for me to shut up.

At least you won't call me a "feldwebel".

That was it, Lennie.

> Those are OPINIONS. No "law" requires prefacing "every"
> OPINION with your orders of the day. Kiss off.

OH! Now THAT was a COMMAND, Lennie! And one that even further
endears you to the ones you would seek to dominate and rule.

Too bad were on to you, eh,...?!?!

> > (A) Neither Leonard H Anderson or Brian P Burke are rational.
> >They both make statements in public forum contrary to the presence

of
> >data that contradicts their assertions.
>
> WHAT "data?" Robeson has presented NO "data."

Sure I have!

Brian insisted ARES's usefulness and ability to respond to calls
was "overblown".

In the last week alone I have provided no fewer than four
references that absolutely disprove his assertion, and all of those
from news releases within DAYS of his comments.

> > (B) Nice try on the "no proof" assertions, Lennie....And only
> >MORE proof that I am correct in calling you a liar.

There's no "unending list of personal insults", Lennie.

All I have to do is recite what YOU have said and what YOU have
said you'd do then point out that you've not done it to make my point.

> > Your marionette is presently avoiding answering questions about
> >his assertions of the viability of ARES in the face of NUMEROUS news
> >releases to the contrary.
>
> NO ONE is any "marionette."

Brain P Burke is. He's yours, as a matter of fact.

But he may get jealous...You've started tossing affectionate
sounding conversation in Todd's direction...We may be ringside for a
cat fight soon!

> Your (usual) petulant outburst in another demonstrated
> fit of anger shows you have little "proof" of anything
> but your own anger and hatred of anyone saying the least
> negative thing about your own opinions.

No outburst. That's your imagination running amok, Lennie.

> > While I have no doubt that not everyone approves of my "up in your

NONE
> >of them, other than to acknowledge your "First Amendment Right" to
do
> >so, "support" YOUR presence here, Lennie.
>
> Tsk. Robeson should have all kinds of "doubt."

But why?

> Robeson not only acts like the sociopath but has a
> monstrous EGO thinking that his "in your face" insult-
> fest is "approved" by those that count.

Lennie, you ARE the complete idiot I suggest you are.

In the very paragraph YOU quoted, I stated very clearly that I
"have no doubt" about who does or doesn't approve of my methodology of
dealing with you.

Why would you then make so assinine an assertion as to suggest
that I have some ego to suggest I believe it's "approved"...?!?!

Another snip of ususal pejorative laden rhetoric (that he claims
is only used AGAINST him...)....

> Robeson IS "that simple."

Not as "simple" as the alleged ex-radio engineer who makes
assinine assertions based upon quotes that clearly undermine it.

> Robeson is an EXAMPLE of a modern U.S. Amateur Extra.
>
> LenAnderson@ieee.org

And the IEEE should sue to get you to stop using an IEEE address in
public. You're a humiliation to one and all.

Ponder that question a minute! It's pretty hard to test a 60WPM machine at
100WPM until you convert it to 100WPM. Duh!!!

In some cases (CVA's, CL's, CA's, and flag-configured platforms) that was
possible with spare machines, but most hulls did not have that luxury. You just
swapped out the gearset and crossed your fingers. If it broke, you could always
send a CASREPT and shift to the FOX broadcast.

No, the FCC has rejected some of the AFA and PTC claims. this huge amount of "smut" that is out isn't really out there....if you want to see some really smutty television go to europe or the asian countries watch their tv channels.

> Your "bio" says you've been born and rasied in Taylorville,
Todd.
yes and your point is??? i've travelled all over the united states and europe.

Now if you could just manage some adult speech instead of vulgaritities.
Spewing fourth with strings of four letter profanities isn't adult in
case you haven't noticed toddyboy.

>
> No hams are involved in MARS?

Sure they are, Jim. Lennie knows that.

And Lennie ALSO knows that his "sole use of military personnel" is
an absolute lie.

> > See the links to the
> > actual words of the DoD DIRECTIVE posted in here...see
> > the links to several of the "Grecian Firebolt" radio
> > exercises posted in here.
>
> Were you a part of that exercise, Len?

Of course not.

But Lennie COULD have been...Aafterall, HE said it's possible for
non-Amateurs to become "licensed" in MARS who are not otherwise part of
a relevent DoD program...

Still waiting for him to tell us of how he's now on MARS without a
Morse Code test....

> > >That's my position. If Steve says different, argue with *him*.

Guess Lenie thinks that his sarcastic use of "wonderful
representitive" doesn't work for him too.

But it works just fine...

> > You HAVE supported him in the recent past and not long
> > ago disavowed any attempt to control his emotional
> > outbursts.

As opposed to Lennie who's not even responsible for what Lennie
does!

He's made TYPOS! Lennie's REALLY mad now!

> > You are NOT QUALIFIED for such a judgement. <shrug>
>
> Sure I am.

Lesseee......I LOVE it when Lennie claims that one MUST have
certain credentials in order to comment on military use of radio (which
Lennie has not participated in in almost 50 years himself...), yet when
any of us suggest that if he were a licensed Amateur with some
PRACTICAL EXPERIENCE in Amateur Radio policy and practice, all he can
tell us about is the licensure status of FCC commissioners and his Army
days in 53-56 while getting profane and demanding!

>
> So there's no reason to give you details or proof.

Still wondering where Lennie's pictures of his home "radio hobby"
projects are...Of course he insults and

He insists he has some (projects), but never discusses them or
presents them. Has tons of time to insult others over theirs, though.

> > If you don't believe I
> > was there (I was), then Robeson's claim is irrelevant.
>

That's what has Lennie confused. Facts are NOT his forte...

> > You've already disavowed any capability of controlling
> > his emotional tantrums in here.

> So? *You* can't control his emotional tantrums "in here", either,
> despite all your alleged knowledge of human nature and psychology,
etc.
>
> In fact, Len, you can't even control your own emotional tantrums "in
> here" ;-)

Extremely good point...especially with him making several posts
this day alone with out-and-out demands, multiple typos (his own "rule"
that typos are indicative of anger or "madness"), and frequent use of
profanity and antagonistic comments such as "kiss off".

> > >Now maybe it's true and maybe it isn't. But it's basically your
word
> > >against that of some unknown person.
> >
> > IMAGINARY person.
>
> The only way that could be proved true is if:
>
> 1) You were never at NADC, so nobody could know you from there.

Nope...Lennie was there.

> 2) Everyone who knew you there is now dead or otherwise unable to
> communicate with Steve.

Last I spoke with my contact there was 4 years ago. He may have
passed on since then, but he's in great shape...I really doubt it.

> 3) You have complete information that no one you knew there has
> communicated with Steve.

Ain't happened...Hence Lennie's frequent and lengthy tirades in
here in order to mask his retreat...Problem is all he's doing is
stompping that much harder!

> > I can't "disprove" something that doesn't exist.
>
> So it's your word against his. Nothing more or less.

A-yup. And it seems pretty evident from all teh rhetoric that I
hit a pretty sensitive chord.

He shudda kept his mouth shut instead of trying to show off!

> > If you wish a reference to the fact that I WAS at NADC
> > or that I worked with NADC engineers in the 1970s, you
> > can verify that with KD6JG.
>

> Why? Was he there with you? How do I know his information is
reliable?

And such corroboration would only further substantiate my
findings.

> More important - how would it prove that Steve has not communicated
> with someone who knew you there?

=)

> > Jimmie boy, you are getting VERY tiring with all this
> > "intellectual word gaming" in here.

>
> The fact is you know you've painted yourself into a logical corner,
> and you're trying to bluff and bluster your way out.
>
> Can't you take "strong opposition"?

Of course he can't, Jim.

That's why he's so frustrated. He came in here thinking (falsely)
that all those "amateurs" would just fall at his professional feet.

When we not only DIDN'T kneel before him but actually demonstrated
that, Yes, we CAN walk, chew gum AND talk on a radio at the same time,
he got down right indignant...!

> > All you are doing
> > is WASTING TIME of others.
>
> How? I'm simply pointing out some of your mistakes and holes in your

> > grow tired of your constant petulance.
>
> What "petulance", Len? I'm not calling you names.

I reiterate my suggestion of Lennie's perception as being better
than "us"...He sees all of us as errant children, and he thinks himself
the father about to administer corporal punishment.

> > You have NO return on any investment.
>
> That's not what my monthly statements say!

Seems to me all of us with an FCC Form 660 have an investment!

> > All you seem to do is follow
> > your buddie's word and SUPPORT him. You have NO proof

> are as unproven as his.
>
> It's just your word against his. Nothing more.

Uh oh...that was rationality, Jim...You'll confuse the old man.

> > Why bother with
> > all your foolish word games in here?
>
> Typing practice. Spelling practice. Logic practice.
>
> Plus it's mildly amusing.

I kinda see it like watching a puppy chase his tail...Only I can't
figure out if Lennie is the puppy or the tail.

> > Are you that hard
> > up for something to do?
>
> Not me. Obviously *you* are, though...

Sounds to me like Lennie just wants everyone to shut up, get in
line behind him, and don't do anything HE doesn't do!

> > Bye. Off.
> >
> Sounds like a veiled command for me to shut up.
>
> At least you won't call me a "feldwebel".

I am sure Lennie wouldn't have known what it was if not for
"Stalag 17".

The "f" word, suggestions that people put razor blades in their
rectums, and other sexually descriptives words are obscene.

> > I don't have any "bible banging butt buddies" anywhere, Todd.

> really, you sound like one to me....I figured you were a life member
of

I seriously doubt that you have a "girlfriend" in any regularly
accepted use of the term, Todd. You may have female acquaintences, but
I have a hard time accepting that any concious, aware adult female
would allow your mouth to touch her ANYwhere.

Self-deceit is easily accomplished when you have problems such as you have. Again, I recommend professional help.

> And Brain P Burke STILL has not acknowledged his errors about
> ARES. Very clearly documented. Very clearly DISproven with MULTIPLE
> news releases.

The only thing clearly documented is your inability to accept that the available resources were inadequate to cover the designed capability of the volunteer group. You manipulated the exercise to have the outcome that you desired. Unfortunately for you, I saw through the gaping holes instantly.

Yup. I must confess that I kind of drew you and some folks into this a bit, because I have some significant hearing defects. Several 60+ db notches,esp at the mid and higher frequencies and two separate tones of tinnitis, a different frequency for each ear. I haven't had a quiet moment for 30 years or more. When conversing with people, I read lips. I understand vey much the situation of the fellow whose wife has notches in her hearing.(conjecture alert) I would also say I suspect that the constant noise in my ears has turned of parts of my brain that process sound. And that is probably why I had such a hard time (conjecture alert off) All I can say for teh folks with hearing problems is that study, practice, and most importantly, relaxation during copying is the key.

Does 6 months of constant hard effort indicate the desire to "stick with it"?

> Many don't

Most of what you say , I agree with. If a person doesn't want to study,
they shouldn't have a license

> The bands are already showing signs of
> deterioration from people who just don't care.

I've heard of some pretty wild times long before things were "dumbed down"!

> 100WPM until you convert it to 100WPM. Duh!!!

You misunderstand - probably because I wasn't clear. Here's what I meant to say, but mangled:

"Didn't 'Those In Charge Back On Land'(1), who decided to change to 100 wpm, run some off-air, lab tests on the various types of teleprinters in use by the fleet before the changeover, to see how the machines would hold up?"

I guess not. They must have figured that if the teleprinter manufacturer said the machines would work at 100 wpm, and made 100 wpm gears, there would be no problem.

I wasn't implying that you were wrong, only that Robeson views you as wrong, and thusly, he can be as wrong as he needs to be with complete immunity. In they typical liberal fashion, any means to achieve the desired end is "good." Like lying about what ARES needs.

Robeson is so caught up in his personal
> hatred of me that he cannot possibly discuss anything
> rationally...or even act rationally. He is the constant
> antagonist of ANYONE who disagrees with him.

Indeed. The moron even harangued me for not giving Coslo grief over his aborted near-space balloon project. I was characterized as an antagonist for not exhibiting antagonistic behavio[u]r. Hi. Hi, hi! What an idiot.

> Case in point is others' opinions. Robeson labels those
> as "LIES," perhaps even "deceit" even though those are
> just personal opinions.

Like the many other assertions that Robeson makes, they are simply wrong.

Apparently, in Stevieworld,
> only Stevie Robeson has the "truth." Ergo, in the logic
> of Stevieworld, ALL contrary (to Robeson's) opinions
> are "LIES" as well as "errors" and "deceit."

And so his sickness manifests itself.

> That's quite sick. Irrational. Opinions are just
> opinions.

Robeson is quite sick, irrational.

> However, Robeson seems to take everything against his
> opinions as a "personal attack." He then respond but
> that response IS a personal attack on his perceived
> attacker. He hasn't yet learned that such is NOT the
> way discussions go in our society.

He's still having problems figuring out what an antagonist is. Meanwhile, he's got a fan club from the rra.MISC egging him on.

> On the other hand, if Robeson has been so brainwashed
> by the remaining amateur radio membership organization
> that he believes ONLY what they say, then any negative

Robeson is shamed that he could not write a valid schedule with fewer
than the required number of volunteers. He is angry that my opinion
turned out to be correct, as proved by his very own works.

No, but If I had to send CW I would have to use a computer keyboard
because my hands are stiff and I have almost no feeling left, other than
a constant dull pain. The ability to do delicate work at any reasonable
speed is gone. I have severe tinitus and get migraines easily so
listening to the heterodynes and static quickly trigger headaches so I
can't even think about long hours of listening to HF signals like I did
as a kid.

I have been around hams and radio clubs since the '60s. Some are the salt of the earth, and others are a pain in the ass just like any other large group of people. One club was strictly for the rich blowhards who did nothing but argue about who spent the most o their radios, had the biggest lightning farm in their back 40 but they never seemed to do anything but argue with each other. A few other small groups were interested in homebrewing a complete station, and had a good grounding in electronics. You could have conversations about equipment, design and operating the equipment and they knew what they were talking about. I helped start the ham radio club at my high school in the late '60s. The school system provided us with a small corner for the radios and a teacher for a couple hours a week so we could be in the school after hours. I got people to donate dead radios and TVs. I repaired them, sold them and raised close to $1000 to buy parts and equipment. As soon as the station was on the air the three licensed hams in the club spent all their time either on the air tying up all the equipment or arguing that it wasn't their fault no one else could use it because they didn't have a license, rather than do like they promised and help others learn the code and get their ticket. Not long after that I was drafted and spent a couple years in the Army. After that I did two way radio repair, broadcast and electronics manufacturing. These days the only mode i would enjoy would be VHF or higher, and I'd probably spend more time building radios than using them. BTW, the board of directors of the local club has a couple retired EEs who look down on everyone else who doesn't have a degree, or hasn't been on the air for teen years or more. I know a number of local hams who dropped out of the club and gave up on ham radio altogether because of club politics. The only thing they seem to do right is have their small hamfest at their club headquarters and not charge people for a ticket to enter to buy or browse. I went to the last one to try to find some old friends and came home with a full truckload of parts and damaged old equipment to repair or use for parts. I ran into a half dozen people I had lost contact with and had a little fun, till my legs gave out.

When I lived in Ohio I sold parts and reconditioned equipment at the Dayton and Cincinnati hamfests. I made a lot of friends and had a lot of repeat customers but I find very few hams in Florida who even know which end of a soldering iron to pick up. I had on guy yelling at me at

the last hamfest I sold at because I had computer cable and connectors, but they weren't assembled. He was yelling, The day I can't buy what I need already assembled, is the day i sell my station. I politely suggested he sell it right away and do other hams a big favor by getting off the air.

> to change to 100 wpm, run some off-air, lab tests on the
> various types of teleprinters in use by the fleet before the
> changeover, to see how the machines would hold up?"

The entire fleet was outfitted with AN/UGC-20 and AN/UGC-25 plus a scattering of AN/UGC-6 teleprinters. These are just different configurations of what civilians would call a "Model 28". The were designed to run at 45.5, 55, and 75 baud (60, 75, and 100 WPM) depending on the gearset installed. Properly maintained and adjusted, they were reliable workhorses at any designed speed.

But for years they'd been plodding along at 45.5-baud in the fleet and never been exercised at the higher speed rates. Ships didn't carry gearsets for speeds above 45.5, and even if they did, changing out the gears was not a trivial task, and besides, there were no higher speed signals available to test at those higher speed.

But maintenance was uneven, as was the skill level of the repairman. Many ships carried no trained repairman, and the machines only got professional attention during shipyard or tender availability periods (stand-downs for upkeep).

These machines have a host of springs/clutches/latches/pivots/adjustments which each of course have design tolerances. Now at 45.5-baud a machine can tolerate some level of "out of tolerance" parts and adjustments and still operate quite satisfactorily. But jump (there's that word again) to 75 baud and all that tolerance creep would result in an inoperative machine, either printing garbage or actually physically failing as out of tolerance parts literally "ran into each other", clutches froze, bearing seized, etc.

> I know what FOX is and I assume CASREPT is a request for a repeat.

CASREPT is "Casualty Report" --- a dreaded notice up the operational chain of command that your ship has some diminished capability to perform. Skippers don't like to send CASREPTs! Good sailors do some heroic things to protect their Skippers from such, including cumshawing a helicopter ride in the middle of the night to carry a sick AN/UGC-20 to the repair shop on a nearby Heavy. Almost as much as a good stewburner (cook) a Captain would do almost anything to get (and keep) a good teletype repairman.

Wise procedure from one who is not quite a moderator here.

However, those replies SEEM to begin as a result of
automatic comparison against a list of those who had
previously been sent such messages. That is based on
my use of the IEEE address instead of the AOL one (AOL
has dropped access to newsgroups) when using Google.

>I always respond to replies to my welcome message. In fact, the text
of
>the message itself invites such replies:
>
>'The author welcomes any and all constructive feedback. Please direct

>all such feedback to pschl...@novia.net and retain the original

>(e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.'

I have NO problems with that. Please do not assume I do.

Automatically-generated messages are very common on the
Internet.

>The last time someone complained about bounces (someone named Andreas
>"Tekman"), it was due to a SPAM blacklist filtering out their message
at
>the ISP level because they were posting from a site identified as a
>significant source of SPAM.

I am NOT that person, have NO complaints about that in
this thread or any other.

>Len, if it was you that tried to reply, and didn't get an answer, does

>that mean that you now wish to have an E-mail conversion on newsgroup
>subjects? Your last message to me, on January 27th, 2004, said in no
>uncertain terms that you did not.

I am NOT interested in discussing any "policy matter" on amateur radio with anyone who is biased, coarse, cannot accept any viewpoint different from their own, or who becomes petulant and abusive when "not accepted," nor anyone who attempts to command anything when NOT in any position of authority to force such commands.

If this PUBLIC venue is insufficient to "discuss" matters about Rec.radio.amateur.policy, then it is not productive to consider that private correspondence is also "useful." I've received quite enough of those in the past. I've received some angry, petulant responses while engaged in Instant Messaging with my wife who was visiting up north while our niece was undergoing a risky corrective operation. I had neglected to set my AOL blocking controls fully and now have to allow only certain screen names through. I have received a couple of telephone messages from irate individuals. That was during a trip, were duly recorded along with their desitination number, all forwarded to telephone company security people and the LAPD Stalking unit (LAPD does not consider ANY form of stalking as minor or trivial). Neither do I live in any form of "fear" of anything...it is tiring to see so many wanting to "fight" via messages as if they could "accomplish" anything that way.

27 Jan 04 was nearly 15 months ago. That is VERY late to assume any sort of "remedial action from authority" communications. However, anyone is still "free" to send me any sort of e-mail. I have the perfect freedom to ignore such or to respond in any way I choose. I have not sent any messages to you since 27 Jan 04.

If you have ANY complaints about my personal e-mails then you can either exercise your newsgroup authority by stating so plainly in private e-mail. That should be clear enough...

Tsk, tsk, tsk, "Melanoma," I've been INSIDE the world of
electronics and radio for the last half century. Slightly
MORE than a half century. As a professional, that is.

Gave up trying to add an amateur radio license to the
old (1956 granted) First 'Phone license collection about
four decades ago (give or take). I thought it might be
nice to take it up again now in retirement, like for fun,
but U.S. amateur radio seems to have evolved into
SERIOUS BUSINESS! Everyone all uptight and demanding
absolute and instant obediance from all the Dill
Instructors swaggering about, trying to whack the
hobbyists into SHAPE for the SERVICE!!! :-)

I don't see where many are into ham radio for "fun" in
here. All are acting like RADDIO KOPS, complete with
shiny badges of RANK, etc. :-)

Good luck on your chemotherapy...

> dah. People with hearing aids often had a difficult time.

You can get special tests and use special accomodations (such as code with longer dahs than normal making for more of a distinction in dits and dahs) if their hearing is truly a problem. My ex had a 70% hearing loss in each ear AND constant ringing in the ears. However, he managed his 5wpm without special accomodations other than using headphones and a very loud volume. Other people might need a different pitch or need the dits and dahs separated by pitch either for their initial learning exercise or even for the test.

People with hearing aids will often have problems with many sounds not just code. The training and test material must be set to a pitch that they can hear.

The number one reason people have problem with code is unrealistic expectations on how quickly they can learn it. They see the "wunderkinds" who can do it in a few days and think they are failures if they can't duplicate it. In reality the average person needs TWO MONTHS OF DAILY PRACTICE FOR 30 MINUTES PER DAY. Until they have done that, they can't say whether they have a problem learning it or not. And of course they must use good training methods. After that period of time, even if they don't yet have it down, they will be seeing the light at the end of the tunnel.

The second biggest reason people have a problem with code is simply not committing to learning it.

I agree with you Mike. I hate it when I hear someone say "it only took me a
few days" as that raises unrealistic expectations on the part of the
students. It becomes very hard to convince them that they will probably
need more time than that and to keep them motivated to keep working on it.
The average person needs 30 hours of study (1/2 per EVERY day for 60 days)
to get there. Some will take longer such as yourself but at least once they
have put in the 30 hours, they will be able to tell that they are making
progress even if it takes longer for them.

In two experiments on a few circuits over RUAP (the
TTY network identifier of messages carried through
ADA) of 1955, the various teleprinters were modified
with "new gears" to operate at 75 WPM. After three
months the downtime on those modified machines
quadrupled. Another experiment was tried in 1956
(after I had been sent back to the states) but that
modified-existing-machine-type was also a negative-
result test. Note: Those circuits were running
24/7 and with backup possible on older 60 WPM stcck
machines.

The newer 100 WPM teleprinters began to come into
operational Army use in the 1960s. See the Model
33s from Teletype Corporation which served both
industry and the military quite well for the next
two decades.

The Army had tried both a punch-card and magnetic
card system for message relay in the late 1960s but
with mixed success. While higher rates were possible
without the strain on P-tape punchers-readers now
replaced by cards, those would evolve into the

all-electronic message relay systems. USAF did the same.

Sorry, can't think of any fancy names applied to any of the land-based systems. :-) Guess it isn't as romantic as what the Navy had with names like ADONIS or JASON (if you like horror that one might be considered "romantic" - :-]).

Len, I was drafted in 1972. I was working in a TV shop and repairing ham radios on the side. They told me I would either drive a truck or be a cook. I raised hell. I was told by the draft board that if I didn't have a background in electronics they would not only not draft me, but they wouldn't even let me enlist because of my health. So a couple months later I'm yelling at an E8 and a Captain that I was not going to drive a truck, and I was not going to cook. I told them about the conversation with my draft board. The sergeant laughed and told me "I'm going to do you a favor and prove you don't know the first dam thing about electronics" He scheduled a 6 AM for me to take the 26T20 MOS test which was called" Television equipment repairman" It was the Army's equivalent of the FCC first class ticket. They pulled every trick in the book to make sure I failed, including ripping the last two pages from the test so only 88 of the 110 questions were there. I had 2 hours & 15 minutes to take the test. I turned it in 17 minutes later. The sergeant laughed and said, I see you've given up. I grinned and said, No, I'm done. He started grading it and his eyes kept getting larger. He got to the end ant went over it two more times then stuck out his hand and said, "Son, I apologize. You got 82 of the 88 questions right. That's the best score I've seen on this test, even when I had the full copy." I was awarded 26T20 as a civilian acquired skill that was a three year school at Ft. Monmoth. I worked in CATV, CARS, installed a nice PA system for the General's conference room at Ft Rucker, and did a little RADAR before I was sent to Alaska to the AFRTS radio & TV station to work as one of the engineers. I made E4 in 18 months and received a letter of commendation from the commanding general of the three Army bases in Alaska.

Just before I got out of the Army the FCC stopped allowing veterans to convert the 26T20 rating to a First phone without taking the test again. I was bored with broadcast anyway so I did commercial sound and industrial electronics. Later I did early personal computer and monitor repair.

Several engineers at Microdyne wanted to know why I didn't have an EE degree because I knew more about some of our older products than they did. They also knew they couldn't bullshit me when I limped into engineering with a handful of papers. I was there for results. I could walk into the engineering department and the place would go quiet as they looked for any excuse to grab something and leave through the other hallway. It didn't take them long to find out that I not only found a problem, I had found a least one valid solution. My supervisor laughed and told me, "You just won't take no for an answer, will you?" I shrugged and said, No, and I won't take "Yes" if I don't believe them.

After all the early problems with engineering my supervisor was asked to release me to them to be an EET on their newest DSP based telemetry system. They knew I would iron out a lot of problems before the radio hit the production floor. I redesigned several test fixtures and re-wrote most of the test procedures into a form the guys on the floor could follow. Then I went through all the BS of our becoming ISO 9001 certified. I told my bosses that they better keep the UL inspector away from my bench during their quarterly audits because I didn't mind calling an idiot an idiot to their face.

We had basic models that were customized to the customer's needs. I also did a lot of preliminary testing of new components, boards, and modules before they were released to production so I had a lot of data books and marked drawings on my bench. ISO 9001, as they set it up did not let the techs keep any notes or write anything on any drawing for future reference. I was no longer allowed to maintain test software I wrote for an automated test fixture and I didn't want a pencil pushing outsider in my way while I was working. I had a 350 MHz four channel scope on my bench, but if a test procedure specified a 20 Mhz scope the idiots insisted that you couldn't use the 20 Mhz filter in a better scope. Even worse, they sent someone new for every audit so we had to go through the same mess each time. One would insist a process was wrong. We would change it to suit him or her. The next one wanted it changed back.

BTW I worked on almost every board or module for a special broadband telemetry receiver we built for the International Space Station. These days I work on old ham receivers and test equipment when I feel well enough to spend a couple hours at the bench.

There's NO such member at the IEEE. IEEE is a worldwide
professional association. I first joined them in 1973
and am a Life Member. You can check that in the annual
Membership Directory.

>> retired (from regular hours) electronic engineer person
>
> Retired from what he alledges to have been an engineering
>career...

Feel free to query the Personnel departments of:
Rocketdyne Division of Boeing Aircraft (when it was
a Division of Rockwell International), Teledyne
Electronics (Newbury Park, CA), Hughes Aircraft
Corporation (now owned by Ford? see ElSegundo radar
and Canoga Park missle divisions), RCA Corporation
EASD (now owned by General Electric), Electro-
Optical Systems (Pasadena, a division of Xerox
Corporation).

That goes back 40 years. I didn't list Micro-
Radionics since they got purchased by Systron-
Donner which was later purchased by another
corporation with the original MRI group moved
from its Van Nuys, CA, building. Same with
Birtcher Corporation bailing out of a competitive
electronics market and into building management.

I left the RCA/GE Retirement Plan in favor of a
lump sum dispersal a couple years ago, worked out
well for me financially; still getting rebates
from our joint tax returns.

Mentioning the part-time job as Associate Editor
(as well as frequent contributor to Ham Radio
Magazine seems to be a sore point with you. Too
bad, but you can still get ALL the articles they
published over their 22-year life from CQ or ARRL
for $150 the set of three CDs (shipping extra if
ordered by mail). Since you don't do any computer
hobby activities, you wouldn't be interested in
my articles in BYTE, Micro, or CALL-A.P.P.L.E

publications; ELECTRONICS magazine, a bi-weekly published by McGraw-Hill changed into four separate marketing type periodicals. The old Hewlett-Packard (calculator) Software Library is long gone so you can't check there...although at least one program submittal was in the Top 10 requested programs for months.

> Now full time newsgroup insulting.

Tsk, tsk. You mean like calling others "PUTZ" or "LIAR" or "DECEITFUL?" I don't think I've done that. Seems to me that little STEVIE does that on a regular basis!

Sunnuvagun! (as Hans likes to say...)

Poor Stevie, you HAD to comment on "alledged." Tsk.

>- Len responds to each and every mention of "Morse Code," no matter
the
> context, with long harangues about his interpretation of history.

Explain my "interpretation." As one who was IN
communications for a long time, IN the electronics
industry for a long time, HAVE extensive backup
literature on communications methods, I'm not
"interpreting" anything.

>- Any attempt to engage Serdar in debate resulted in him insulting
> others with invectives like "Gum Brain," "Wieneramus," "your

>- Any attempt to engage Len in debate results in him insulting others
> with invectives like "Gunnery Nurse," "Katapult King," "Macho
> Morsemen," and "A believer in the Church of St. Hiram."

AFTER I had been personally insulted a number of ways,
i.e., called a "PUTZ," "LIAR," "deceitful," AND had
members of my family (alive or dead), especially my
wife, insulted in public...I decided to "return fire"
in the same way. Civility in opposition to anything
I wrote was not "discussion" but a series of personal
insults and harrassment actions, both on and off the
newsgroup.

>- While somewhat amusing at first, with posters able to easily rebut

"Overwrought?" :-) Merely responses in kind.

"Sheer volume of posts?" Have you examined the Google
statistics for individual messagers or actually
EXAMINED the CONTENT of the newsgroup postings?

Apparently NOT. Or, the "authority" is rather biased.

In the past, I've given what was thought to be some
examples of communications modes and methods that I
was a party to, knew about, or could double-check
through disinterested third parties. What I got in
response was the usual personal insults for NOT
adhering to the "authority" on amateur radio as
stated by the ARRL...or NOT adhering to the pet
desires of individuals whose personal views were
taken as "applying to ALL in amateur radio." [those
did not, but that was irrelevant to such posters]

>- Serdar failed his Turing Test for human intelligence when it became

my
> positions on Morse Code.

WHAT "Turing Tests" apply in here? Are you implying
(which is transparently obvious on reading) that I am
some kind of "Artificial Intelligence?" Is everyone
required to "pass a test" to perform as a robot and
mechanically utter all the quaint "standards" of
yesteryear? Are all robots in here "supposed" to
obey - without question - what the ARRL commands?

Alan Turing was considered a genius at cryptography
and methods of attack (solutions to cryptographic
problems). Alan Turing was also a homosexual and,
when exposed, took his own life. That was long ago.

Suddenly, for some odd reason, I am implied as
"failing" a "Turing Test" by NOT ACCEPTING old,
antiquated standards in an amateur radio hobby
activity!?! So be it. I am NOT a robot. I am
NOT artificial (all natural ingredients).

If there is any "failing" of a "Turing Test," then
I would judge the "authority of the newsgroup" to
be deficient in handling a public dispute by a
technique of mockery and attempts at humiliation.
As one who has been IN computer-modem communication
for 20 years - not counting sporadic viewing of the
old ARPANET and original USENET before that - and
as a former co-sysop of one BBS and a moderator on
two other BBSs...I find this "technique" of handling
certain individuals to be faulty in the extreme.

You should give careful thought, using whatever intelligence is there, artificial or not, to closing access from public to private. Select ONLY those who conform to Group Think, who say nice-nice to all the self-defined gurus, and respect the ENTIRETY of U.S. amateur radio customs and traditions, wishing to keep OLD standards forever. CLOSE this place off. Do NOT let any "riff-raff" in. Demand "dedication" and "committment" to old standards, ideas, and (especially) the mythology. Demand "involvement" FIRST...by licensing, something by which "to show papers." Do NOT, under any circumstances, allow the First Amendment Rights of Americans to operate in here. Think of that as the "Orwell Test." It doesn't have the mythological mystique of "Turing Test" but it is nonetheless as artificial.

I refuse to meet any "Orwell Test." Have a nice day, Mr. Asimov...

Most of the computer programs let you select a pitch you like. Of course
you would have to arrange with the VE team well in advance of the test to
have one set up at that pitch for her testing.

Or just make sure that you can turn the volume WAY up just like my ex had to
(70% hearing loss in each ear and constant ringing of the ears).

The test pools are large enough that it's much easier to learn the material
than memorize all the questions and answers. The Extra class pool is
something like 800 questions even though only 50 appear on the test. I'd
much rather learn the equation and how to use it than try to memorize say 10
different question/answer combinations for the material covered by that
equation.

That's all well and good Mike and no doubt you're a quite competent RF tech, not even a discussion. But I think you're missing some critical points here. Rumors to the contrary ham radio is overwhelmingly a communications hobby, it is NOT an electronics hobby as such. Sure there are any number of high-end electronics gurus who also have ham tickets and exercise their skills on the bands, in the clubs and even in this funny-farm of a USENET group. But they're not the heart & soul of ham radio today for certain and I'm not particularly convinced they ever were. In general the average ham learns as much about electronics as he/she needs to satisfy their enjoyment of the hobby. Which on average ain't much in this day of cheap whizzy plug 'n play equipment. Beast on reality as you might but that's the way it is.

In this sense and given the obvious lack of interest in the arcane details of electronics amongst the average members of the average neighborhood ham radio club you should not have known that your offer to participate was a no-counter. They don't "maintain" their radios, they don't need your expertise, they simply ship their broken radios off to the repair shops to get fixed. In short "Now You're Talking" fits their agenda and your's simply does not. In another sense ham radio clubs are private entities conventionally for hams and prospective hams only. As an analogy what you did was show up at a bow-hunters club with a .45-70 powder-burner and expect any interest in an offer to "help".

Land based/sea based all have the same names. They were assigned by NSA (who ultimately controls all US Government crypto systems), and were based on names from Greek mythology, ie., ADONIS, BACCUS, JASON, NESTOR, ORESTES, PONTUS, etc. By convention they are always written in "all caps".

Sunuvagun!

And what follows is suppose to be that? Try instead:

http://libertyincident.com/USNcourt.htm

for the complete record; or here:

http://www.ussliberty.org/nci.txt

for just the sworn testimony transcript.

> The Jews

You mean Israelis of course. Must be a "slip on the tongue"

> NEVER queried the U.S for the identity of the Liberty, but the Jews
did
> recon the Liberty for almost a day prior to the attack, during which
time
> the
> Liberty was flying an oversized American flag, a holiday ensign.

What BS, even Ennes doesn't make that claim about the size of the flag!

"Like any Navy ship, we flew our standard five-foot by eight-foot
American flag."

And of course there's more:

<start>
☐LIBERTY flew a size 9 (approx 5 feet by 8 feet) U.S. ensign from her
foremast throughout the morning of 8 June and until it was shot down by
the Israeli air attack. At least 5 minutes prior to the torpedo attack
a size 7 ensign (approx 7 feet by 13 feet) was hoisted at the main
yardarm.
<end>

That comes from direct, sworn testimony by Liberty crewmembers.

Do bone up on the FACTS ...

Remaining nonsense snipped ...

> BWHAHAHAHA..Thanks for admitting you are Roger's BITCH! Oh, and
> does your fat hog of a wife still give blacks blowjobs?

YAWN and YAWN again Woger. Your threats are as empty as your ugly head. In all the years we've read your posts, one thing stands out. You are the world's biggest PUSSY. Your nickname is "Curtains" for good reason. You've been afraid all your life. The only one you ever successfully beat down was your own elderly step-mom, and that got you locked in the nut hatch, didn't it Curtains?

You are an Uber-impotent fuckwit of the lowest caliber. You're the .22 of fuckwits. Two-Test - known all over the east coast and the midwest as the laughingstock of ham radio. The township ordered you to remove your pathetic wire antennas; the Chief of Police nearly pissed himself laughing when you had some kind of fear-induced fit when he came to arrest you; Riley busted you for qrming; you've gotten TOSED from more networks than you have dollars in your purse; and you're under constant surveillance in your neighborhood.

The neighbors are positive you're a pedophile. Personally, I doubt you're a pedophile because children would run screaming from you, the four-eyed half-wit living in the sagging run-down shack you call home. You wouldn't have a chance to molest a child unless he was blind and couldn't run away upon seeing your deformed and girlish silhouette.

Even by West Vagina standards your hovel reeks of cheap assed beer, home-grown weed, and musty tarpaper. You're nothing but a sad joke on usenet and a sadder joke in person. You embarass West Vagina. That's how stupid you are Woger.

Take your SSI check, and go buy a gun and put a bullet in your empty skull. You're a useless and pathetic excuse for something your crack-addicted Mama shat out and should have flushed twice. You're damn lucky Marie adopted you. If I was your Pappy I would have stepped on your tail, broken it off and beaten you to death with it at the moment of birth, being afraid you would have grown up trying to fuck the neighborhood dogs.

Now piss off Curtains, you're nothing and you're nobody and as usual we're all laughing at YOU, the Pathetic Clown of ShitPail, West Vagina.

Ah, that only means that they were victims, not that they have any
special knowledge as claimed by the following myth.

>Israeli high-command
> ordered the attack, full well knowing they were attacking an
> American ship in International waters. Liberty intercept operators
> recorded Israel high command orders to attack the *American*
> ship.

Wow! That's quite a piece of myth-saying; especially when, as a FACT,
there is:

<start>
Looking back on the Liberty incident, one perhaps should fault the
cryptologic organization for not assuring the presence on board of
qualified
Hebrew linguists for on-station examination of Israeli voice
communications uncovered in the intercept from the nonmorse search and
development mission and for not even having a token mission on Israeli
voice communications. It turned out that Hebrew language tapes produced
by USN-855 from the search and
development mission on the morning of 8 June did not contain
information on the forthcoming Israeli attack, but NSA did not learn
this until it had received these tapes and had processed them several
days after the event. For all NSA and USN-855 knew at the time,
information on Israeli intentions towards the ship might well have been
on those tapes.
<end>

Available to any SERIOUSLY INTERESTED individual at:

http://www.nsa.gov/liberty/index.cfm

all part of the NSA report on the incident.

>U.S. submarines in the area filmed the entire deliberate attack.

Wow!! "They" did? Just which U.S. subs would that be? They have names
you know, and of course then there's the film ...

IOW, what a bucnh of ...

The weight of the evidence is that the Israeli attacking force
originally believed their target was Egyptian.

The information thus far available does not reflect that the Israeli
high command made a premeditated attack on a ship known to be American.

>antagonist for not exhibiting antagonistic behavio[u]r. Hi. Hi, hi!
>What an idiot.

It matters not what the subject is, ANYONE disagreeing
with him (even in the slightest) becomes his "enemy"
and is dealt with in barbaric terms. See his treatment
of Dieter Stussy, Todd, even Hans who outranked him in
experience as well as rank in the Navy.

The interesting part is that he does the "mirror"
thing on people who respond to him more than once.
He turns around and accuses the accuser of doing
things he does. Such as (lately) being an
"antagonist." It's obvious that HE is the antagonist
but he will not, possibly can not accept that.

To me he has tried to be "on my case" even in
comments to others, having nothing to do with
Robeson. He seems to desperately seek attention
by trying to turn every thread into his own
battleground.

Great! But Fort Monmouth changed considerably from
when I was there in '52 to when you were there 20
years later. :-)

A prime example was that there was NO CATV or any
TV courses available nor the curricula for same.
I'm not even sure where the AFRS (later AFRTS) guys
went to get electronics training for their broadcast
stations. AFRS was quite separate from regular Army
communications.

Also, in an odd quirk at the time, ALL rank promotions
were frozen while IN any school. Once one got out
(no "graduation ceremonies"), they started counting
time-in-grade. :-)

> Just before I got out of the Army the FCC stopped allowing veterans

Outstanding that you are still active! My old office
cubicle buddy from RCA days (only a month younger than
myself) suffers from Parkinson's disease (kept down
from deleterious effects, thank God), yet he had
enough soup left that he fixed me up with an HP 608 and
HP 606 generator when I got married (again). He's
on 20 meters every Saturday after fixing up his old
tube clunker transceiver.

I'm still bopping around with only minor problems, none
worth mentioning. But, I come from a family of long
livers (oh...about three feet or so, some would say).
:-)

> ever were.

Most of the hams I knew as a kid were home brewers. They were not
designers but they could build a piece of equipment form a magazine
article or the handbook. I lived about an hour from Mendelson's in
dayton Ohio, and I ran into a lot of hams there, digging through the
unmarked bins of parts to build their latest project or repair one of
their projects.

> In general the average ham learns as much about electronics
> as he/she needs to satisfy their enjoyment of the hobby. Which on
> average ain't much in this day of cheap whizzy plug 'n play equipment.
> Beast on reality as you might but that's the way it is.

The whole idea of a rig that isn't intended to be serviced is what
kills my interest in the hobby. Too many custom parts made of
"Unobtaium" and refusing to release schematics and manuals really don't
inspire any confidence in imported whiz bang rigs. Not that I prefer
tube only rigs, but they were built to do their job for years. Maybe
the rest of the ham's life if he took decent care of his equipment. A
lot of newer rigs end up as parts units because some cheap component is
NLA. Do you think many of these all plastic LCD display radios will
still work when they are 20 years old?

I was told that a couple retired EEs in the local club did all their
repairs and I didn't know enough to be of any help. Then they told me
to "stuff" my offer of free electronic components to help them with
repairs.

> In this sense and given the obvious lack of interest in the arcane

> bow-hunters club with a .45-70 powder-burner and expect any interest in
> an offer to "help".
>
> w3rv

Sorry, but that analogy just doesn't work. Several members told me they wanted to do minor repairs on their equipment but they didn't have access to the tools or equipment anymore. I offered them free use of my shop and to give them most of the components from my old repair business if I had what they needed and was laughed at. As far as weapons, I have used a bow but I prefer an M-72. ;-)

A lot of hams in Ohio were glad that I was willing to help out including an old ham in his late 70s that brought me a home brew receiver that a SK friend of his had built 20 years before. He had lost the hand drawn schematics and had a tear rolling down his cheek as he asked if there was any way I could possibly help him. He told me that he had been to every two way shop and ham equipment dealer to try to find someone to work on it and that one of them told him I was the only one in the county crazy enough to even attempt a repair. I tore it down and found a couple burnt resistors and shorted caps. I did a little math, dug around and found the parts. He was crying when the receiver came to life and kept thanking me. I charged him $10 and he hurried home to get back on the air. Helping someone like that is better than spending hours on the air to me. Different strokes?

I was born in '52. :-)

I was never at Ft Monmoth. I was tested at Ft Knox, Ky. I caught a lot of hell for it from other soldiers at my different duty stations because they didn't believe anyone could test out of a three year school. The station manager in Alaska told me "No civilian knows a damn thing about electronics". In fact, someone on another newsgroup was mailing me and calling me a liar because he insists that no one ever tested out of a tech school. I am requesting my full military records package from the archives to shut him up.

> A prime example was that there was NO CATV or any
> TV courses available nor the curricula for same.
> I'm not even sure where the AFRS (later AFRTS) guys
> went to get electronics training for their broadcast
> stations. AFRS was quite separate from regular Army
> communications.

The radio station at Ft Greely, Ak was built in 1948 as the first permanent "Armed Forces Radio Network" station. It was the first site built with commercial broadcast equipment instead of modified military gear used at some sites during WW II. The radio transmitter was a gates BC250 In the early '70s AFRTS claimed to be the only all tube network in the world.

I wish I had a photo copy of the FCC license for the two stations.

The radio station: frequency 980 KHz.
Power: 250 watts, or as deemed necessary.
Expiration date: Until no longer needed.

The TV station: Frequency Channel 8.
Power: 500 watts, or as deemed necessary.
Expiration date: Until no longer needed.

> Sigh. I didn't know the Army had gotten so generous
> with conversions of skills to civilian licenses. :-)

Actually, it was the FCC who no longer accepted the military records in lieu of testing.

There were a few other skills that were convertible. I know guys that worked high pressure steam who said they just walked into the state's licensing office with their military records, paid the fee and left with their state license. There were a couple EEs who worked at the Ft Greely power plant. That was where I first got my hands on the IEEE magazine. Of course, air traffic controllers were in demand in civilian airports. Ft Tucker trained helicopter pilots and Air traffic controllers at Carin Air field, a few miles from the Daleville gate. The airfield was Air Force, but the students were Army and Air Force, as well as some foreign militaries. My main job was to maintain two 12 channel CATV systems and 350 monitors used to distribute educational TV and weather data to student pilots.

My retired dad lives next door. Other than some problems with his hip he's in better shape than I am. I'm 100% disabled due to a laundry list of "Little" problems. I still try to keep busy with some projects. I am trying to set up a program to collect old and dead computers, refurbish them and give them to disabled vets in my area. This part of Florida is full of retired and disabled vets trying to survive on a small pension or Social Security.

Ok, Mister Wizard, answer me this question, where in the FCC rules or a FCC decision does it state that an information bulletin can not be opinionated??? please quote it from rule or statement from the FCC.

You say I'm in violation of federal law so please enlighten me which laws am I in violation of?

> wife, insulted in public...I decided to "return fire"
> in the same way.

The problem is that Len responds that same way to everyone
who disagrees with him - even if the disagreeing person
has done none of the things described above. He interprets
any disagreement or unflattering observation as an "insult".

The mere act of disagreeing with Len's position on Morse
Code testing, or pointing out errors in his facts or
arguments, will result in him insulting you.

> Civility in opposition to anything
> I wrote was not "discussion" but a series of personal
> insults and harrassment actions, both on and off the
> newsgroup.

But even if a person does none of those things, Len will
behave as if the person has. Len seems to think that all
who disagree with him are equally responsible for what any
who disagree have done.

And what follows is suppose to be that? Try instead:

http://libertyincident.com/USNcourt.htm

for the complete record; or here:

http://www.ussliberty.org/nci.txt

for just the sworn testimony transcript.

> The Jews

You mean Israelis of course. Must be a "slip on the tongue"

> NEVER queried the U.S for the identity of the Liberty, but the Jews did
> recon the Liberty for almost a day prior to the attack, during which time
> the
> Liberty was flying an oversized American flag, a holiday ensign.

What BS, even Ennes doesn't make that claim about the size of the flag!

"Like any Navy ship, we flew our standard five-foot by eight-foot American flag."

And of course there's more:

<start>
?LIBERTY flew a size 9 (approx 5 feet by 8 feet) U.S. ensign from her foremast throughout the morning of 8 June and until it was shot down by the Israeli air attack. At least 5 minutes prior to the torpedo attack

a size 7 ensign (approx 7 feet by 13 feet) was hoisted at the main
yardarm.
<end>

That comes from direct, sworn testimony by Liberty crewmembers.

Do bone up on the FACTS ...

Remaining nonsense snipped ...

No, Todd...that's why the obscenity test requires the test of
"COMMUNITY STANDARDS". I can assure you, with no fear of conradiction,
that people who talk and act LIKE YOU are NOT part of the standard.

You're the part that lowers the curve.

> listening too then you should have ####ing kids. Stop relying on the
> government to do the parents job.

I don't rely on anything. The point is that you're barking at the
moon about parents supervising kids watching TV, and the point, made
clear by your admission of no kids yet, is that you DON'T HAVE A CLUE
about what it's like to raise kids yet.

You and Lennie Anderson have a lot in common. HE has suggested
rules to the FCC about kids and HE doesn't have any experience in child
rearing either. And in both cases, your rhetoric matches your
expeience level.

Once you have tainted "information" with individual opinion, it is
no longer information, but editorial.

FCC rules and regulations allow for the transmission of bulletins
of general interest to the Amateur service.

Your "bulletins", made up of YOUR "opinion", do not meet the test
of "general interest.

Read it yourself, Toiddie. You've requoted it over and over
enough.

Whoa, boy you're moving fast, good show! How much sleep are you getting
these days?

> and need
> an Asian contact for WAC.

Condx from here on the east coast to the north Pacific rim have been
somewhere between lousy and hideous for weeks. A JA or a UA0 will pop
into your sights eventually.

> I will heed your advice re. using both phone and CW.

If the name of your game is building your mixed-mode total, which is
usually the Holy Grail, you really don't have any choice. It's simple
statistics and the immutable math of the decibles. CW gets you an
automatic 10 dB advantage over ssb but if the rarie only runs ssb well
then the ten dB obviously don't mean squat, etc.

I haven't done any "card counting" for years but I suspect that if I
did I'd find that 25-30% of my total are phone contacts. Despite the
fact that I'm a terrible weak-signal phone op and spend 95% of my time
lurking in the lower 25s.

> I do hop on 10 using
> phone while commuting to and from work, but in the shack, well... ;-)

Heh. Keeping an eye on 10 from the vehicle is not a bad idea actually.
If ten opens up you know the lower bands are probably cooking.

You never have. It's not up to ME to prove...YOU already did
that.

Can't name the facility or the town it's in...report what shift I
work or who I work with, etc etc etc.

You're STILL an Anonymous Coward, and a lying one at that.

I can only imagine what it must be like with a significant hearing deficit. I can not and will not put anyone down who has such a problem. As to how they can learn code, there are many ways, but I guess it comes down to whatever works best for that person. Not everyone's condition is the same. I've tested folks with some difficulties, I followed the guidelines as given by the VEC/FCC. There are ways to test folks with such problems, but getting them to be able to learn the code - is the first hurdle.

Yeah, I know the bands started going to hell before that. Used to be I bragged about Ham to people who wanted their kids to get into radio but didn't want the CB garbage. I said Ham is clean. Today, you couldn't pay me to advertise ham as being clean. It is NOT. That is sad..... It really is. The exams test for proficiency in code, theory, rules and regulations. They're not psychological tests to weed out all the riff raff. IF such tests existed for Ham and all the other fields, maybe we'd have a better world. There are people in every field, be it a hobby or profession - who ruin it or at the very least - make it look bad for the rest.

NOT EVERYONE - can learn code in a few days or whatever. There are some
things I can't learn in a month where others picked it up right away.
Different strokes for different folks. Each person has to take whatever time
as needed to learn whatever it is they're needing/desiring to learn. Some
fields don't allow a lot of time to learn, while others - such as ham - do.
There is nothing saying that ANYONE has to learn code overnight or they're a
failure. Just because I was fortunate enough to get enough in - in that 2
weeks - to pass the exam, doesn't make me a "CW" king. I use code "rarely".

But, I had a chance once to teach some youngsters the code. One picked it up pretty quick, the others - were a bit slower. If anyone wants/needs to learn the code to get a license, they will - in whatever time it takes - IF they start on it and don't give up.
The last part is the key..... To get started and stick with it. As to time, when they get all the characters down, then they'll have learned the code. Be it 2 weeks or 2 years.

Toady, prove it or you are a liar!
If you know all about how to set up your page, you will have the IP's of any poster logged!
So here's your chance to prove you are a liar you little gay boy. Post the logging.
You make so many post about boyfriends and gay sex, child porn, rusty sex objects, did your daddy and uncle molest you as a little boy toy toad? Do they still do it today gay toady? Please get help with all these sick fantasies soon!
When you make these accusations, please be ready to back them up you gay racist perv.! I've seen your waste of bandwidth site but I never posted on it in my name nor anybody else's name, so your turn gay boy, PROVE IT OR YOU'RE A LIAR! :)

Maybe someone would care to explain to me and to the rest of the world, how Gordon West's mini camps held on a "weekend" - were designed to work to get people ready to pass an exam by the end of the weekend. At least that is the understanding "I" got from reading the ads. I can't recall if some of those weekends were just for NO Code Tech OR if perhaps they also may have been for "code" as well. IF SO, and someone never had code, then how the hell did they do it in 3 days? Two weeks is a reasonable amount of time - as it took me. Three days? I don't know..... Is it possible? Even if it were just for the theory, most I know, can't learn all that in 3 days. You'd have live, eat, sleep, breathe and take the books to the can with you. IF anyone took one of those weekends, speak up. IF maybe "I" misunderstood the ad wordage, someone - anyone - feel free to correct me.

By taking things too literally, you have missed the point (and also
further proving you have no sense of irony, humor, or self-deprecation,
all important examples of human emotional intelligence that, by the way,
could be detected by, oh, I don't know, a Turing Test maybe?).

I, of course, do not think that you are 100% Serdar Argic. I'm happy to
clarify that for you. Rather, you act very much like Serdar Argic in
many ways, and I thought the newsgroup readers would be amused by my
pointing that out. I figured that you would not be amused. I didn't
figure that you wouldn't understand why WE were amused.

> "interpreting" anything.

Here's just a few examples that I could find in the few minutes that I
searched in Google (try the query "wrong Len
group:rec.radio.amateur.policy" at http://groups.google.com):

- The MARS program does not rely on radio amateurs (it does)

- Dave Heil, K8MN, does not appear on any official list of staff at a
U.S. Embassy (he does)

- Steve Robeson, K4YZ, did not serve in Marine Corps, or if he did, he
did not serve honorably (he did serve, and serve honorably).

- Any claim of an amateur balloon going to 100,000 feet is suspect, as a
latex weather balloon will burst at 50,000 feet (Kaymont makes one
rated at 100,000 feet that is affordable to amateurs).

- All amateur radio licensees are perfectly legal to continue operating
in their grace period (only if they renewed before expiration).

- Collins Radio did very little innovation in SSB (What about the
Permeability Tuned Oscillator, PTO, or their 1930's patent for a
phasing transmitter, or just the fact that they were able to put it
all together into a rugged, compact, and reliable package that was
just what the USAF needed, and was available at just the right time,
not theoretically, or only in a patent application, or only on a
blueprint, or in a better implementation that wouldn't be available
until years in the future, and we only realize now after decades of
20/20 hindsight?).

I characterize these as interpretations either because they are wrong (can be rebutted by facts), or are expressions of opinions (usually sweeping, black-and-white assumptions that can be counter-argued into many shades of gray).

>>- Any attempt to engage Serdar in debate resulted in him insulting

What I have seen is something like Israel/Palestine, or Serbia/Bosnia, where the conflict has been ratcheted up incrementally until it becomes personal on both sides. You have certainly done your share of escalation, spoiling for fights, and picking new fights. You remind me of the type of person that the police regularly drag out of barroom brawls, or that school principals separate on the elementary school playground, and usually with both sides screaming, "But HE started it!!!!" At that point, it doesn't matter who started it, because you have what are called "unclean hands," and thus garner no sympathy from me, or others.

Your spoiling for a fight caused you to lash out at Jim, N2EY, in a situation where you were not directly attacked, your basic arguments about Morse Code were not explicitly contradicted, and you chose to reply (post #2, in response to his post #1 in the thread) in a manner that was completely off-topic and ad-hominem. I might have even given you a pass (by not replying) if you had argued something like, "Well, I don't think that Morse Code deserves such architectural worship in a World War II exhibit by implying that it has the same status as, say, Egyptian Hieroglyphics in an exhibit about Egyptology." Instead, you ripped into Jim with an accusation that he didn't have military service (an off-topic, ad-hominem attack that could only be replied with, "Yes/No/Maybe/So What?"), then tried to drag him into some silly argument over whether Morse Code could be an "interesting architectural feature." That's when I dropped in on the thread.

Jim and I have disagreed on many things, but I don't like to see a fellow ham attacked in that way. As you can see, the ham community will close ranks and will defend each other vigorously if that happens.

That's not a threat, merely a pragmatic observation that you are not winning friends or influencing people here. Whatever merit you may have originally had is now completely wasted, and falls on deaf ears.

> "Overwrought?" :-) Merely responses in kind.

> "Sheer volume of posts?" Have you examined the Google
> statistics for individual messagers or actually
> EXAMINED the CONTENT of the newsgroup postings?

What a silly question. Of course, I have examined the record, that's why I have come to the conclusions that I have. According to Google Groups (search for "author:LenOver21@aol.com" at http://groups.google.ca, as the Beta version at groups.google.com still has a number of serious bugs), you have posted as "LenOver21@aol.com" about 6,230 times since December of 2000. That's an average of 3-4 posts *per day* for almost 5 years. Surely you must be repeating yourself. Not even John Updike or James Michener could generate that much output and still be original. I used the principal address you used over the years. If I threw in your recent switch to "LenAnderson@ieee.org" (probably due to AOL shutting down news service), and any other address you used earlier (you previously said you have been posting to the newsgroups for about 7 years), I'm sure the statistics would be even higher.

Furthermore, most recent threads show you replying, and counter-replying, and counter-counter-replying, and ..., doing more than your share of contributing to run-on arguments. In this most recent thread, you have made about 21 out of the 141 posts to date, and will probably make many more. Do you really need the last word that badly? ("But HE started it!" is not a defense.)

> Apparently NOT. Or, the "authority" is rather biased.

The following response of yours exhibiting your obvious persecution complex is a perfect example of your overwrought replies:

> In the past, I've given what was thought to be some
> examples of communications modes and methods that I
> was a party to, knew about, or could double-check
> through disinterested third parties. What I got in

> when exposed, took his own life. That was long ago.

Are you homosexual, Len? Don't get me wrong, I'm not judging you if so
("Not that there's anything wrong with that," as Seinfeld would say).
However, you did bring it up, and past persecution would explain the
persecution complex you display today. I, and others, might even feel
some degree of sympathy for you if you were. I figured you brought the
subject up either because you were homosexual, or wished to characterize
all hams as homophobic, or are even presuming to raise your persecution
to the degree that Turing suffered.

Speaking of tests, you didn't answer my challenge that you guess my positions on Morse Code. Either you don't know, or you realize that arguing with me isn't about Morse Code, it's about your desire to fight just for the sake of fighting, whether people could conceivably agree with you or not. I also recall that there was one specific circumstance that I agreed with you on another topic, and disagreed with every other poster, in a recent thread. Can you name the topic?

What an obviously self-evident thing to say. I would also post
judiciously about military matters, not being a General, about legal
matters, not being a member of the bar, and about technical matters, not
being a P.E. or PhD.

> However, those replies SEEM to begin as a result of
> automatic comparison against a list of those who had

> my use of the IEEE address instead of the AOL one (AOL
> has dropped access to newsgroups) when using Google.

Yes, you described how the setup works fairly accurately. The Perl
script that is used can only distinguish users by E-mail address. If
you post from a different E-mail address, that it hasn't seen before,
you will get the welcome message. It's an admitted technical
limitation, but one that is probably not easily overcome, and doesn't
seem to bother most people too much.

>>I always respond to replies to my welcome message. In fact, the text

> I have NO problems with that. Please do not assume I do.

I didn't. I followed up to rebut your fairly plain statement above that 'He doesn't answer any e-mails...at least to the web address on those "canned" welcome messages.' Please don't assume that because I haven't posted recently, that I am not reading, or not in positive control of the welcome message service, or that I wouldn't respond to any E-mail replies.

> Automatically-generated messages are very common on the

I did wonder, however, on what basis you were making the statement about me not replying. Was it based on personal experience, as I asked below:

>>Len, if it was you that tried to reply, and didn't get an answer, does

or was it based on hearsay that you read on the newsgroups? The only hearsay I can recall is that of Andreas "Tekman," and I explained in my previously reply that his assertions are contradicted by evidence, and his behavior on the matter calls his reliability into question.

Since I have successfully rebutted your assertion (or hypothesis, or assumption, or whatever) that I do not respond to E-mail, would you now be willing to do the honorable thing, and retract your original statement? I really don't care very much either way, but I, and others, would recognize such a retraction as honorable.

>>that mean that you now wish to have an E-mail conversion on newsgroup
>>subjects? Your last message to me, on January 27th, 2004, said in no

I don't see how that describes me. Even you have described my E-mail communications to you as suggestions or advice.

> If this PUBLIC venue is insufficient to "discuss"

That wasn't me. Just give your consent, and I can make public (on a web page, no need to annoy the newsgroup), our entire E-mail conversation and allow others to judge its content.

> 27 Jan 04 was nearly 15 months ago. That is VERY late

Nor have I to you, except for the automated welcome message. Did you wish to reply to my welcome message, did you have any questions about how it works and why you got the message, or did you want to resume having an E-mail conversation about other newsgroup subjects?

> If you have ANY complaints about my personal e-mails
> then you can either exercise your newsgroup authority
> by stating so plainly in private e-mail. That should
> be clear enough...

I have no rank, commission, or authority here, as you take pains to point out (except maybe as a peer-recognized "authority" on Usenet history, as well as on posting practices that have proven over time to foster effective communications, as opposed to non-productive arguments).

Of course not, governments never reveal such stuff, but every
Israeli in "the business" (where I worked) knows that that was the
case.

I don't dishonor the memory of the sailors killed aboard the USS
Liberty. They didn't have to die. I dishonor their superiors who
never took responsibility for not preventing what happened.

>(I've heard the place is now condos).

When the rats started to outnumber the people in that building,
something had to be done....

A shame - 641 Washington Street was a beautiful example of 1920s
Federal office buildings. A family friend who was my inspiration in
joining the Federal workforce worked there most of her career as a
secretary and then a claims examiner for the pre-OSHA Labor
Department - may she rest in peace.

I was in the FCC facilities there only six times - twice for amateur
exams, three times for commercial exams, and once to the office
(which was at the opposite end of the building from the exam rooms)
to pick up travel orders to my first duty post in San Francisco.

I still can't comprehend those old buildings as upscale condos....

What the fuck do you care, Lardass? You never served in the
military, you chickenshit.
As usual, you blather your utterly useless opinion on something
you know absolutely nothing about.

A former subordinate of mine at the FCC, Don Browne, was an EE and ROTC-trained AFRTS officer in the late 1960s and after his three years on active duty with the Signal Corps went Reserve and came to work for me. He spent several years at the field office and several more at headquarters. His reserve billet was abolished in an AFRTS reorganization (even though he was a MAJ) but when a vacancy on the civilian engineering staff of the AFRTS came up he transferred to that. He retired as the chief of engineering for AFRTS several years ago and still hangs around the broadcast business.

AFRTS >>> IS NOT <<< Amateur Radio

Hi Lardass Davies!

Afraid of you, Lardass? Hardly. You ran your fat mouth in the newsgroups and didn't show at Dalton hamfest. "Two-test?" Hell, Lardass you can't even get past the training wheel ham license. You are too stupid and lazy to learn the higher class radio theory or simple 5 wpm Morse code.
I don't live in a "township", dumbass, and they certainly didn't order me to remove my "antennas" since I have a DX-CC and the total length is 82 feet in an inverted vee configuration. I know you don't know what that is, since you are stuck in a filthy HUD apartment complex and have to use the shitty "Tiny Tenna". Never had any cardiac arrest, tubby, since unlike you I'm not morbidly obese. And Stenger never "arrested" me, you fucking imbecile. I haven't gotten TOSed from networks, dumbass, since networks and ISP's are quite different. If you'd have gotten a real degree instead of a good as toilet paper certificate, you'd know that. Riley didn't bust me for QRMing, since only one warning letter and a retest letter that indicates no such reason for retesting. I passed my retest and even upgraded. And you've been a no code training wheel ham for over 10 years???? HAHAHAHA Nobody is watching me either, retard. I get along quite well with my neighbors and the kids in the neighborhood are not afraid of me. Unlike the kids in the HUD apartment complex you live in who would kick your fucking ass. Not a run-down shack, Lardass, that would be the 200 square foot apartment you live in in the ghetto. I wouldn't look for a chance to molest a child, since I'm not a pedophile like you. Sorry, unlike you, my house is clean and neat. Only obese fat hogs like you live in a pig sty. And you really shouldn't steal Dicksucking Davey's little blatherings, since he is more of an embarrassment to West Virgina than I could ever be. I don't get SSI, either, career pizza BOY, and I know I have more money than you will ever have. And who said I was adopted? Boy, you sure are stupid. And quit projecting your own lousy childhood coming from a broken home on others. If I ever wanted a piece of you, you'd just shit all over yourself like when Oris visited you or when you refused that Federal Express package a few years ago. You make me shut

up, Lardass, I dare you. It will be extremely satisfying to break your fucking fat jaw for you.
There are no Daleks, retard. They only exist on television and in the Dr. Who books. Only mentally ill retards like you think they are real. You probably think Star Trek is real and dress up in your "uniform" when you watch it.

Want to bet I wouldn't break your jaw, tubby? Show up, that's all you have to do. I'll even let you throw the first flabby, ineffective punch. Stengert isn't about to send anybody to prison, bitch boy. But you might just end up there on drug charges. You are sick of it, do something about it, you whining cunt. But we all know you won't, like when you wouldn't show at Dalton, or come outside when Oris visited you, or sign for a Federal Express package.
Lardass Davies, still a training wheel ham who is too fucking stupid to upgrade.
Like I said, Lardass spends all his time thinking about Roger Wiseman, staying up late at night whining about him, and is the fist thing he posts about at 5-6 AM.

Lardass, the career pizza delivery boy, the best job he could ever get because he was too fucking stupid and lazy to get an education or a real job instead of a high school boy's job. Lardass is and has always been a total fuck up in his life, his employment and in every facet of his miserable life. He comes from a broken home, has mental illness and major depression and unchecked manic depression. Lardass the pig faced loser, who is so fucking unwanted he can't even get a date or a pity fuck from a woman. Not that he wants one. He has to be a fucking FAGGOT. He can't even get past the training wheel ham license, and everybody in ham radio knows it. He wants the requirements to be lowered because he is too lazy and stupid to pass the current tests. He will always live in a HUD apartment complex, get food stamps, and always be what he has been his entire life, NOTHING.

The reason some people don't know for sure if they are going to Heaven when they die is because they just don't know.

The good news is that you can know for sure that you are going to Heaven which is described in the Holy Bible as a beautiful place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is to be saved so that we can live forever with Him in Heaven.

"For if you confess with your mouth Jesus is Lord and believe in your heart that God raised Him from the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth in the person of Jesus Christ to shed His blood and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to a virgin Jewish woman named Mary and lived a sinless life for thirty-three years.

At the age of thirty-three Jesus was scourged and had a crown of thorns pressed onto His head then Jesus was crucified.

Three days after Jesus died on a cross and was placed in a grave Jesus rose from the dead as Jesus said would happen before Jesus died.

If someone tells you that they are going to die and in three days come back to life

again and it happens then this person must be the real deal.

Jesus Christ is the only person that ever lived a perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds) with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have redemption through His blood, the forgiveness of sins..." (Ephesians 1:7)

If you would like God to forgive you of your past, present and future sins just ask Jesus Christ to be your Lord and Saviour.

It doesn't matter how old you are or how many bad things that you have done in your life including lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven with You when I die. I agree with You that I am a sinner. I believe that You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins and that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thanks Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God to save you. Now you are a real Christian and you can know for sure that you will live in Heaven forever when this life comes to an end.

As a child of God we are to avoid sin(wrongdoing), but if you do sin the Holy Bible says, "My dear children, I write this to you so that you will not sin. But if anybody does sin, we have one who speaks to the Father in our defense Jesus

Christ, the Righteous One."

Those of you that have not yet decided to
place your trust in the Lord Jesus Christ
may never get another chance to do so
because you do not know when you will die.

Jesus said "I am the way, the truth and
the life: no one can come to the
Father(God)(in Heaven), but by me."
(John 14:6)

This means that if you die without
trusting in Jesus Christ as your Lord and
Saviour you will be forever separated from
the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of
eternal torment, suffering, pain and agony
for all those who have rejected Jesus Christ.

The good news is that you can avoid Hell by
allowing Jesus Christ to save you today.
Only then will you have true peace in your
life knowing that no matter what happens you
are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ
Ronald L. Grossi

*Show this to your family and friends so
they can know that they have a choice
where they will spend eternity. Thanks!

That's quite some claim to be making. In all the years, not one peep
from those "in 'the business'" (as you call it) who would have been
part of (you guessed it) the GOI ...

> I don't dishonor the memory of the sailors killed aboard the USS
> Liberty. They didn't have to die.

Correct, they sure as hell didn't!

> I dishonor their superiors who
> never took responsibility for not preventing what happened.

Ah, there was no way any component of the US gov't was going to prevent the IDF from screwing up!

The popular term is "sh*t happens!", and during a war is can happen a lot ...

A lot of people got caught in RIFS. I worked with an E5 who was
riffed from Captain to E3 a few years before. he decided to stay in the
service so he took the reduction.

I spent more time in the TV end, but I had to take care of the radio
station as well.
>
> AFRTS >>> IS NOT <<< Amateur Radio

I know its not but those old stations were maintained like a lot of
homebrew ham stations. Jury rigged repairs to get back on the air,
running a very marginal signal because you weren't allowed to shut the
transmitter down till scheduled maintenance, which was once every six
months. Repairs done with used parts salvaged from old radios and TVs.
You could see the handiwork and creativity used by former staff and I
always wondered how many were hams. The station manager at Ft Greely
was, but he was a real lid. He truly believed in tuning for minimum
smoke rather than learn how a transmitter worked, but he was the only
one like that I met in the service. Instead of using the station
monitor, he would call his wife to ask how the picture was as he screwed
with the transmitter.

BTW, I was offered a civil service job while at Ft Rucker and turned
it down. I would have finished my active duty there while I filled the
slot, then the slot would become a civilian job again.

My comments with respect to the NPRM were, "What I fear most about changing the Morse Code exam requirements is a lack of enforcement, and what I fear most about maintaining the status quo is a lack of enforcement."

> Yeah, I probably could have learned it in under a week, if I pushed
myself.

That wasn't my point. My point is that everyone is different, and the
length of time it takes to learn 5WPM varies greatly. The time it
takes to learn 20WPM could be lifetimes. Not everyone is even capable
of 13WPM.

> Most anyone will tell you - it isn't good to do such. Besides, at
that time,

I've been told that is absolutely no excuse. Nothing in your personal
or professional life can be more important than learning the code.

Most recommendations are
> 15 minutes to a half hour a day. That hardly makes it possible in a
week. I

They've finally left the group. They were paid to learn the code, and
they kept getting paid even if they failed. Of course, insteading of
doing intercept comms, they were peeling potatoes.

I don't dislike the code. It was difficult for me to make the few
QSO's that I did make as a novice. I'd like to pick it up again
someday.

I don't think that's 100% correct. You and me don't write the FCC
regulations, but the FCC looked to the ARRL to put forth modern exam
requirements. The ARRL movers and shakers wrung their hands and bit
"thier" knuckles and said that there was no concensus. So the FCC
plowed ahead with modernization, and the ARRL came up with reductions
in the Morse requirements lickety split. Amazing, all that.

So in the end, if more folks has been exposed to viewpoints other than the ARRL's, there just might have been a concensus.

Just my opinions, of course, but by tomorrow I'll probably be labeled a liar, a homosexual, and maybe even a horse thief.

Navy RM "A" School, the basic school which trained Navy Radiomen, was 13-weeks long. Morse practice was 3 hours per day, 4 days per week, but students could come in after-hours for additional practice. Graduation requirement was to be able to copy 5-letter coded groups at 18WPM for 10 minutes, with 3 uncorrected errors allowed.

He's a bigger liar than Dick Whiten and Carol Madera combined Danny. His insurance license was 'administratively cancelled' which is quite a coincidence, since that is exactly what will happen to his ham ticket in October!

Not only did he lose the privilege of advertising in QST - which court records indicate was because QST staff said he overcharged and spent customers deposits before giving them a written estimate - but get this Dan - he's also been accused of fucking up customer's radios, more than once!

According to a source who contacted the IRS, his IARN charity didn't even make enough $$ to file taxes last year. You may well ask, what organization???

Combine that info with the FACT that he was fired from his job as station engineer for 95.3 FM in Augusta, and the FACT that he sued a little girls camp (and lost) over a petty grievance, and we begin to see the REAL picture of who the Belgrade Blowhard truly is...

I don't have any statistics, but it was fairly small, probably on the order of 8-10%. Most washouts were for academic reasons. Very few failed because of the code.

> What happened to the wash-outs?

They were transferred to the fleet, where most of them were immediately snapped up by the Chief Radioman as undesignated strikers. Since we were chronically short of operators, any training at all was an asset, and a "second chance" is a great motivator. Usually these turned out to be above average sailors.

73, de Hans, K0HB
Master Chief Radioman, US Navy

It really isn't so bad. In fact, it is sometimes hilarious, when I
badly misinterpret what someone says. My family usually tells people of
my "predicament" before I meet them, when they have the chance, so they
don't think I'm whacked when I give them some off the wall response! 8^)

Though there are some sleepless nights when the ears are really roaring....

So I just wear a headset to Op, and turn the sound up......

Whining doesn't help anything. And I am proud of having learned Morse
code. Yes, that part was more difficult for me than some others.

Big deal - I'm not going to demand that everything be changed to suit
me. I fully support Morse code testing.

I don't know if you do PSK31 or not. But if you want to QSO with
gentlemen and gentlewomen, it is the place to go. I've yet to hear a
curse or even complaining gossip on that mode. The worst I ever heard
was one ham (deservedly) upbraiding another for a horribly overdriven
and powerful signal that was wreaking havoc with the rest of the
segment. But even that was tame by comparison with the rest of the
bands. 20 is great for DX, and 80 is the place to go to ragchew.

And on psk31, I have no hearing problems at all, haha!

Exactly.

And as for my testing preparation method, it is effective. THe
questions I got correct, I had no need to go any further with. But the
ones I got wrong were corrected by a trip to the books, or internet
research. By the time I took the real test, I knew the material very
well indeed.

4737. FCC Licenses new CW coastal station

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-20 04:48:20 UTC
From: "Mel A. Nomah" <Hightower@cosmos.net>
Message-ID: <oal9e.11056$IP1.8867@newsread1.news.pas.earthlink.net>
Source record: 106252

The FCC has granted a license for a new, common carrier, class 1A CW coast station, callsign KSM. This is the first time in many years that the FCC has granted a new license for this service. The hours of operation for the station have not yet been determined, but the call is KSM and frequencies of operation will be 426, 500, 6474 and 12993 kHz with an authorized output of 5kW on all frequencies.

Wrong attributes, Todd. I said that...

Why did you initiate yet another lie?

> AND YOU STEVE ARE A LITTLE LYING ####HEAD THAT NOBODY LIKES

Todd, if you think for a moment that that was supposed to hurt my
feelings or make me rethink how I handle you, you're wrong.

Not to mention lying AGAIN since there have been posts to the
contrary just this week.

Why do you insist on posting things that are not truthful, Todd?

Oh...You mean the SMAE Dan Rather that's humuiated himself lately
by "going live" with "stories" that were unsubstantiated and patently
false on the face of it?

> > FCC rules and regulations allow for the transmission of
bulletins

No citation needed. Just spend a semester in a Freshman
journalism class.

Todd can broadcast his "shows" if he cares to, but just like
K1MAN, he gonna have to eventually face the federal music, Brian..
Don't take my word for it...A former FCC communications lawyer said so
himself in this forum.

There ya go.

First of all, Todd, you write and post like an idiot on RRAP where you have TIME to stop, go back, and correct your typing and grammatical errors.

You obviously don't do it...So WHY would I try to communicate with you on ICQ where it's all short time if not real time keyboard communications...?!?!

And I guess you haven't heard, but ECHOLINK is not YOURS to decide who says what on....And if you thnk I'd connect to your repeater, you're sadly mistaken.

You've already expressed your willingness to violate, in no un certain terms, any federal law you care to....I ahve no doubt you talk on the air like you do on here...And I don't need it.

Lennie's rantings were about me, Paul.

Many, MANY years ago, I "saw" Lennie on his "Lenover21" screen
name and tried to IM him...This was back when I still held the idea
that, newsgroup "spats" notwithstanding, men could still talk like men.

Nope. Not Lennie. I tried to say hello...then hello again after
no response and a few moments time. More than enough time to say "I'm
chatting with spouse who is with sick family member...Can't talk now",
or something similar.

He never responded. I "signed off" with "Guess you're too busy to
talk to me...Will see you in the newsgroup".

What we've been bombarded with eversince is this "He Beat Me Up In IM's!" rantings which were NEVER anything of the like...

But it did give him a chance to claim, just like he has on so many OTHER occassions, that things happened "one way" when nothing of the like did...

Good luck trying to rationalize with him. Like you said...He's fighting for fighting's sake.

It's just fine, Anonymous Lying Coward.

You STILL can't name the facility, the town it's in, report what
shift I work or whom I work with.

> >You're STILL an Anonymous Coward, and a lying one at that.
>
> You're still a LIAR, Nursie. And a unmitigated blowhard.

Nope.

Prove me wrong. Fill in the blanks, Anonymous Lying Coward.

STEVE WORKS AT:_____

STEVE STARTS AT: _____ AND HIS SHIFT ENDS AT:_____

His Shift Supervisor is:_____
(I'll give you the point if you can just look in the window and
describe him/her...)

HE WORKS ON: (DAYS OF WK):_____

So, Anonymnous Lying Coward...Yo gonna ante up or just make more "you're a liar and blowhard" statements?

I say your nads are in the vise.

It doesn't have any.

Further, its sole existence seems to be geared towards harrassment of
others via computer newsgroups.

That should tell you a few things...

Operating a "pirate" radio and TV station, Todd...
Or did you forget already?

my license has been renewed since that time, and like I said the FCC knew about so did the Subcommittee on Telecommunication and I'm still here, it seems that the FCC blew it off and /or don't want to bring it up because like said there's a lot more there then what you think, and the FCC doesn't want to touch it. Your best bet is to foget about it and get on with you life.

You're working on nothing, Toiddie.

The sum total of your "actions" will be limited to lashing out on
your blog, making up even more an more ludicrous stories as you go.

You'll do nothing because you ARE nothing, Todd.

There's not a lawyer with any self respect who would humiliate
himself by trying to take your "case" into court, Todd. The only "case"
you have can be resolved with Penicillin.

And anything else you might try to do on your own will no doubt
get you incarcerated, institutionalized or hospitalized.

You're a joke, Toiddie, and we're all having a good laugh!

Steve, K4YZ

>

I agree. As I've said, I learned the code well enough in 2 weeks to pass the exam but it didn't / doesn't make me a "CW" king. Time isn't really the factor here. My main point was (and I do know others who learned code quickly), you "have to start". I've heard people spout out - I can't learn those dashes and dots. Problem is, they never even tried. Maybe as kids - they may have had a set of cheap walkie talkies with the code on them or perhaps seen some code characters listed or heard them somewhere on tv or so. Did they "really" try to learn it? Nine chances out of ten - I'm willing to bet - NO. You have to "try". If you can't do it alone, seek out the help of one who has or any of the courses available and give it a chance. I will admit, some of the courses I have heard - sucked. They tended to turn me away from the desire to listen. One reason, one of the course tapes had an "echo" to it. Try listening to that for a while. If you were ever in a sub and heard sonar for 8 hours a day or more, you'd have felt right at home. So, yes - some things "can" drive you away from wanting to learn it. If one method doesn't do it, find one that will. If you're interested enough, you'll do what it takes to get through it.

Time used to be a factor at one time as a license had to be upgraded in a certain time, so it sort of placed those who were lagging - in a bit of a turmoil. I guess that was the FCC's way of saying - you can do it if you put your mind to it. They kind of pushed you along or out of the way.

Not by me, I don't have a problem with opposing view points. You could be right, I could be wrong. It is good to debate.
Name calling doesn't get it done. That is what kills me, many do that because they can't do a good debate. So what if we keep opposing each new point made, who cares? Just makes more to chat about.

As to the ARRL, at one point - "I" thought and perhaps I read it somewhere - the FCC was getting fed up with the ARRL always trying to influence them. I'm not sure what is going on there anymore. The ARRL pissed me off a long time ago and ever since then, it didn't matter to me whether they sank or swam. The local representative was one of the most cocky - arrogant people to walk the face of the earth. He was "supposed" to be at the Hamfest to meet people and to discuss things. He blew off most of those who approached him. Instead - always turning to his friend to talk to him. Well excuse US for the interruption..... With representation like that, who needs them? That wasn't the only issue. Their arrogance got the best of me and some others I know - a few times. I don't follow them anymore - like a dog on a leash. Funny, my brother just got an invitation the other day - to join. First one he got in a long time. I said - must need some money! The ARRL doesn't speak for me. Actually, I don't think they speak for themselves anymore. In the end, unless we continue to get government protection, big business will win. Money talks and bull shit walks.

>

VEs can accommodate you if special testing is needed - BUT - if "special equipment" is needed, it is up to the examinee to provide it - the VEs are not liable for that. All Handicapped applicants "should" call ahead to make special arrangements so that any extra VE team members if needed - can be there to assist, or whatever other needs - can be met. For example, if I have a blind applicant, which I had - I can't read his test to him in the sitting of others taking the exams. That would be distracting. We instead - gave this person - his exam - after the others were done. "We" did not have any "Braille" equipment. I'm not even sure if such equipment exists which would have read the text to him - if fed in. IF so, it would have been up to him to supply it. Another case required an hour or so of prior preparation of materials and equipment. We've had other cases where special needs had to be met, but again - it was by prior arrangement. There is no other way to do it. For them to just show up - we simply wouldn't have been able to accommodate them. I don't know of any VEs who would shy away from testing the handicapped, but you have to work with them too. They don't know your problems until you tell them. Then - they can work with you to get you through the exam process. Even if you failed, they will most likely - now knowing of you and your condition - offer to help you learn it for the next time. Maybe even help set up a station.

IF you have a tone problem as I've seen the example given, it could take some time and equipment to get "a" tone for you to be entirely comfortable with. IF for some reason - the computer can't do it, then perhaps a taped exam fed through a mixer to acquire the proper tone. OR maybe even a test - sent by a code practice oscillator set to a pitch - suitable. The code test may have to be broken down to allow the person to absorb the sound if they can't "hear" it properly. In this case, a CPO would work with a buzzer - to "feel" the characters - as an example. Perhaps - light flashing - if the

tones are not able to be heard at all. Any number of issues could be prevalent and though there are ways to deal with them, it would be hard pressed to try and do it with a "walk in" handicapped applicant. Walk in - in case your not aware - means unannounced - in regard to Ham exams.

Then here's yet another chance for you to prove yourself, Brain,
and provide SOME sample of a post I have EVER made that asserts that
ANYthing having to to with Amateur Radio must be approched as the "MOST
IMPORTANT THING" in ANYone's life.

You said it exists. Let's see it.

Steve, K4YZ

No as a matter of fact, I am not into PSK31. I've not really been on the Ham bands for a while. Just recently I did start scanning them though. First time in about a year. I'm waiting to do some more phone and yes - maybe even a CW contact!!!!!

> Ohh, you know how newsgroups are.....

>>I<< know how they are, Mike!

They're populated by people who don't have the intestinal
fortitude to sign their names to their posts and they make up
allegations to try and hide behind.

Ask Brain where the Techs went. He insists that they were "chased
away", yet refuses to say who chased them away or where they went.
I've asked him repeatedly after he unequivocally stated they had.

Ask Brain where the "unlicensed devices" are. He insists that
"unlicensed devices" play a "major roll" in emergency communications.
He WON'T provide any evidence of it, but he insists it's true.

Brain has also recently asserted that ARES is "overblown", and
that it won't respond to "real disasters" due to the age of it's
membership. I've posted several news releases, all of them from within
the last 2 weeks, and Brain won't explain how it is ARES is "overblown"

when there's evidence to the contrary.

Those are just the recents ones...The Somalia horse is pretty dead...He could never make that horse trot no matter how colorful a jockey he put on it.

His "I've worked DXCC several times over" stories are cute, too...

Now his most current diversion is adding up non-existant "lies". It just makes him look more feeble, but hey, it keeps him warm.

Keeps me warm too....from laughing so hard!

You have a good point Mike. I have seldom had any problems with written
exams, but passing a Morse test was hell. Those of us who have had trouble
learning Morse have taken a lot of abuse in this group. You hit the nail on
the head when you said you wouldn't do the same if someone had trouble with
the theory.

You're being a Jonah again, Jim. the announcement guesstimates all done
within a year, i.e. by spring '06. Sounds about right to me. Granted that
the comments about what the FCC might do (and the title of the post) were
all the poster's own, and not Hamwave's.

My own crystal ball guess is that the FCC will just delete the code test and rearrange some subbands around this time next year. That's still much longer than I originally thought.

Been there, did that. I built my first SW receiver from junk parts I
picked up along Radio Row in Philly. Radio Merit Badge booklet in hand
circa 1950. Things have changed a bit since then though . . . (?!)

Maybe it's happened but personally I've never heard of an instance of
anyone with a broken mainstream radio not being able to fix it or get
it fixed because the manuals and/or the schematics couldn't be located.
Parts are another story but that's SOP. Try to buy all the parts for a
1980 Ford from a dealer.

> really don't
> inspire any confidence in imported whiz bang rigs.

All commodity widgets have design lifetimes particularly when they are
based in the fast-moving field of electronics Japanese and otherwise.
But there are tens of thousands of 20-year-old pieces of complex ham
gear still regularly on the air. I can't imagine why you would expect
any more than that for the service life of chunks of entertainment
electronics.

> Not that I prefer
> tube only rigs, but they were built to do their job for years. Maybe

> still work when they are 20 years old?

I have no idea but a buddy of mine has an IC-781 xcvr which cost him
over $6k 18 years ago and it's color LCD display still works as well as
it did out-of-the-box. Boeing is replacing the conventional instruments
in it's airliner panels with color LCD panels which better last 20
years and more or Boeing is gonna get spanked plenty.

> I was told that a couple retired EEs in the local club did all
their

Makes no sense at all, I'd leap on an offer like that if I needed acess
to an RF bench because I'm really ill-equipped in this area. Must be
something in their water.

> As far as weapons, I have
> used a bow but I prefer an M-72. ;-)

Yeah, RIGHT . . ! Whoosh: Thud. So re-up, Rumsfeld is offering bonuses.

Nice job. Could not agree more.

In a contorted way it appears that thee and me are basically the same basic breed of radio alley cat. Bear with me here. It's a tale. I got into ham radio over a half century because I wanted to move up from SWLing and just reading National Geographic as a kid to get on the air and communicate with others in foreign places. I'm still at it and in my mind the magic of DXing the HF airwaves hasn't diminished a bit.

Here's part of the convergence: For the most part I simply can't stand most neighborhood radio clubs for all the reasons you've cited recently here and there in this NG. The poltics, the general clulessness, the rambling disorganization, the lack of interest in my particular hot buttons, etc. So I don't bother with 'em.

> Different strokes?

You bet. I found my "cure" for the local radio clubs many years ago. I'm a member of a wide-area regional ham club which is tightly focused of HF DXing and DX contesting, a bunch who have the same narrow interests I have. Works for me, maybe the format would work for you.

There's some huge number of electronics hobbyists across the country including hams who get their jollies from tube electronics. Since you're in what amounts to "geezer alley" in central Florida I expect that there is a higher concentration of "tube huggers"there than one would find elsewhere in the country. If I had your interests and lived where you do I'd seriously consider poking around the area for others of your ilk to clump with and form some sort of club centered on tube

radio, etc.

Maybe one of these days I'll get off my butt and see if I can find the
Philly Custom House where the FCC lived around here in it's glory days.

> I still can't comprehend those old buildings as upscale condos....

Philly is *loaded* with 'em Phil. You'd have to see it to believe it.
The really pricey versions are those which are converted multi-story
waterfront warehouses on piers poking out into the river. When I was a
kid you took yer life into your hands when you went into those
waterfront areas. No more. Another big source of conversion properties
in the city is the huge old 6-10 story light manufacturing buildings
staffed by sweat-shop immigrant labor in the early 1900s. Out here in
the 'burbs the hot ticket conversions are the surviving ancient
(1700s-1800s) textile mills along the creeks most of which have been
chopped up into big bucks office space.

156 hours worth of in-class code parctice and a pretty stiff exam.
Sounds familaiar. I didn't clock it but the 156 hours total is probably
in the realm I needed to get from zero to 20WPM. Which in my case was
stretched out over years between the 5/13/20 WPM exams.

I've heard some weird tales about how the Signal Corps used Draconian
methods to quickly pound Morse into the heads of their WW2 radio ops.
Stories about eight-hours-per-day seven days per weeks drills for 2-4
weeks or some such, nasty punishments for those who "didn't get it",
etc. Have you ever heard any of these tales?

There's no indication at all that "the FCC doesn't want to touch it", Todd. It may well be that no one at the FCC is aware of your background and activities.

> Your best bet is to foget about it
> and get on with you life.

There's no obligation on anyone's part to "foget" about it. Some might feel an obligation to bring a blatant scofflaw's activities to the attention of the proper authorities. Folks with ethics and principles might feel that is the right thing to do. They might feel that anyone with a disregard for broadcast regulations would likely have the same disregard for amateur radio regulations.

It was a constant battle to find parts to manufacture several models
at Microdyne. Manufacturers would drop parts, whole product lines or
merge with another company and disappear. We had to stop building
several models because to cost to completely redesign the radio was more
than the expected sales. As a stopgap a few boards were converted to a
SMD and through hole mix, but that only bough a couple years.

I don't run out and buy the latest and greatest toy of the week.
Most of the electronics i have are ten years old, or older. This
computer is over five years old but it still allows me to to do what I
have time for.

> I have no idea but a buddy of mine has an IC-781 xcvr which cost him

They would just replace it and the driver with newer designs. On the
other hand Avionics has to meet strict standards so it is in a state of
constant change. No airline will ground a plane because they need
$20,000 worth of new electronics. I saw a news release a while back that
some of the early 747s were being retrofitted with the latest control
systems. On the other hand, there is a limited number of years the
airframe can be used and there is a thriving business in used parts.

They told me they only used parts they could trust and never used any
old stock. What do they think they get on small orders from small
distributors? The parts have been on the shelf, somewhere. Sure you
can get oxidation on leads if improperly stored, but its not like they
are in damp cardboard boxes in my back yard. I think the real issue was
that they retired from Lockheed-Martin, and I had worked for Microdyne.
There was a rivalry, even though Lockheed-Martin was one of our
customers.

Most of the old timers around here have the attitude that they stopped fixing anything the day they retired. There is a HUGE retirement community near here that has spread into three counties. It is full of retirees who think any manual labor is beneath them. They all hire lawn services, they aren't allowed to change their car's oil on their deed restricted property and no antennas so the hams there all use handhelds. They are the most self centered people I have ever met. They also have the highest rate of STDs in senior citizens in the country. Not many electronics people around here. Its the "I built a computer" crowd who wouldn't know which end of a soldering iron to pick up till they smell burning flesh.

I was on the advisory board for the Lake County Vo-Tech Electronics program. It was the highest rated in the state but the school board shut it down. I haven't found anything here in Marion County. One high school had a similar program, but shut it down as well. its no wonder the few technology businesses are down sizing locally and shipping the jobs to other parts of the country.

I gave up on them and decide I don't want to join them. I offered to
help plan the next hamfest and maintain a E-mail list for them. They
asked if I had the money to pay the year's dues first, then told me,
"Real hams will know about it, anyway"

Yes, it was a good day at the bench. Much better than some whining
CBer who bitched at paying $7.50 to put a plug on their third microphone
that month.

> Sounds to me as if you *have* found your place in the hobby. Seems like
> a good one to me.
>
> - Mike KB3EIA -

Yes, I've always enjoyed the equipment more than using it, and I have
lost interest in getting a station on the air so I'll keep collecting
and repairing old gear as long as I'm able to do it. I have a couple
kids who are supposed to help me clean out my shop this summer so i can
see how much equipment I can salvage. I still have the benches wrapped
in plastic from last year's hurricanes. I pray they miss us this year.
Three in my area were just too much.

I have a couple websites, but no good pictures of the three shop
buildings to put up, yet. Maybe I can do it this fall.

I've recently read somewhere (if only I could remember where) of a totally
deaf ham
who operates cw. He was a no-coder until he became deaf. He uses a homebrew
gizmo plugged into the headphone socket that flashes a light. Was allowed to
use it for the test without any problems.
His only problem is that from around 15wpm the light does not come on and go
out fast enough. IIRC his device uses standard tungsten filament bulb. What
would be the best alternative, i.e. "switches" faster, LED or neon bulb?
The article had a schematic of the sound-to-light converter - I remember it
could be adjusted to allow for signal strength, noise and variations in
output characteristics of different radios.

I suppose someone reasonably competent in electronic design, not me :(,
could "re-invent" such a thing without raising a sweat.

statements?

So lying Nursie, are you going to admit you are a liar and an
unmitigated blowhard?

> I say your nads are in the vise.

At least I have a set, Nursie.

//////////////////

Yeah, Rogie. You "have a set", alright.
Spit em' out.
Lloyd wants them back.

Toady lives at home with his mommy and daddy, now just how pathetic is
that? Thirty Seven going on fifteen and still lives with his mommy. I
wonder if they have seen his blog yet? You paint a very sad picture Toady.

AB8MQ, Wogie Wussyman has a spare bedroom in his mommy's hovel. Maybe Toadie
can move in with Wogie. After all, they are already two peas in the same pod
and both are social outcasts.
They ought to get along quite well.

Toad. Give Roger a call at 1-304-845-0109. He doesn't work so he's home
almost all the time.

I hear West Virginia is very nice this time of year.....

An LED would seem the ideal solution.

I also have a significant hearing disability. My hearing chart shows my
hearing drops off at about 1.5 kHz and is down 40 dB at 10 kHz. CW
solution is to use RIT shifted so I hear about a 500 Hz tone.

>5kW on all frequencies.

Note that the licensee is the Maritime Radio Historical Society,
which has been restoring the original Morse stations on several
WW-II-era vessels used as floating museums in the San Francisco Bay
and other West Coast areas and has made restoration of the coast
station (site and equipment owned by the Golden Gate National
Seashore) a prime goal in the last five years or so.

The site of KSM (and its equipment) is the old RCA marine coast
station KPH, transmitters in Bolinas, CA and receivers/control point
in Point Reyes, CA. The same station is used for the annual "KPH"
fire-up on July 12, the anniversary of the last commercial Morse
traffic in the US, and for frequent operation of the power-lowered
transmitters on the ham bands as K6KPH. Everyone concerned is a
volunteer.

I've done some work with them but I'm too far from San Francisco to
be one of the "regulars".

>Ah, there was no way any component of the US gov't was going to prevent
>the IDF from screwing up!

If as eye-witnesses have reported the ship was overflown by Israeli aircraft the day before, did the brass aboard the Liberty get on the horn to Naples and report it? And did the brass in Naples report it to Norfolk? And did Norfolk report it to the Pentagon? And did the brass in the Pentagon get on the horn to the Kirya (Israel's "Pentagon") with whom they were in almost constant contact because the US was resupplying Israel with ammo (this I know for a fact because one of my buddies was aboard some of the resupply flights) and ask "why are you overflying OUR ship", thereby verifying that it was a US vessel? Or did they just sit and wait to see what would happen?

You are right - s**t happens, and when is the USN going to accept the responsibility for their part in the mis-handling of the situation? Not doing so dishonored the memory of the innocent sailors who were "caught in the middle", so to speak.

Peace be on the souls of the departed.

> > ante up or just make more "you're a liar and blowhard"
> statements?
>
> So lying Nursie, are you going to admit you are a liar and an
> unmitigated blowhard?
>
> > I say your nads are in the vise.
>
> At least I have a set, Nursie.
>
> ////////////////////
>
> Yeah, Rogie. You "have a set", alright.

Yeah, and you don't. That's why you hide behind "Phil Harmonic" through
Altopia.
Oh, the irony, Davies.

> Spit em' out.

Projecting your homosexuality, FAGGOT? Oh, and keep guessing.

> Lloyd wants them back.

Lardass Lloyd never had a set (like you, "Phil") to begin with.
Now whine for me, Bitch boy!

"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd's got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does "dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is "disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make good sentence
"jellous" - Most of LARDASS Lloyd's cellulite body is "jealous" of skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those nutsacks for pizza topping, Pappa John's terminated him saying he didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an

education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of
tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good
sentence!
"straming" - Lardass usually has to wash his sheets from the "stream"
of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of
stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd
talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's"
them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd
revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head
collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be said
about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack
thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad
LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy
by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain

neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has "despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say "sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses" on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to, to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never are though.
"I wear if with" - Davies wears his stupidity well

"You need to get al ife and a job." Mongolloyd retardo Davies needs to get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman."
- I just "knew" Llardass Lloyd couldn't pose as "Christy
Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd has never given anything any "thought." (from another "I'm leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's
"doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something, anything.
"situtation" - Most people get in "situations, " but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time" now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.

"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and

pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites
by now
"red head" - Little Red is shoving his big ole black dickhead in
Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten
in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed
skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't
he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets
"harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite
the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino
nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide
"whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his
brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider
remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a
cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is
sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his
stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't
have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard
Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very
literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never
contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck
ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".

"Activatiuons" - Lardass Mongolloyd always has his stupidity
"activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a
pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never
get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good
spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates
the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the
eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not
"bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one
get "refused" by any military? Especially when he was honorably
discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a
90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking
imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is
still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off"
himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless
self." - Mongolloyd has no listeners or anything useful to say. He's so
"useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is
useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people
flush "used up toilet paper, " Mongolloyd eats used up toilet paper,
"don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart
as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his
stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.

"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....

"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.

"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!

"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent

sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.
"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!

Mongolloyd make good spells!

A picnic in da park it wasn't. Big HUT on the bed of
a deuce and a half, towing a PE-95 motor generator on a
trailer. Enough poles and wire under the single operator
bench (a low cabinet with "cushions" on it) to make a
small wire rhombic antenna. Smelly Model 19 TTY
clattering away on the bench-desk and the venerable
BC-610 400 Watt transmitter near the door. A couple
fans to "cool" everything so it was miserable in the
heat of summer and uncomformtable in winter. "5-packs"
of canned/dry rations instead of hot dogs and soda.
Nobody "kept score" in any competition...other than the
competition of not being destroyed (literally) by any
enemy. Field Radio circa 1950s, USA.

>> Field Radio then required passing 20 WPM, was taught
>> at Camp Gordon (later Fort Gordon, now the home of the

>> morse code on HF nowadays...EXCEPT inside the ham bands.

With the RF Gain on maximum and AGC disabled, BFO on,
one will eventually start "hearing morse code" on "the
bands." :-)

The discordant thrumming-whistling of old commercial muliti-
channel SSB is less now than it was a quarter century ago.
All kinds of OTHER weird sounds ARE there, but those are
various forms of data that very few hams use (or can use)
and ON HF but NOT in the ham bands. Once in a rare while
one might catch an ALE burst from one of the 2500 gubmint
radios of SHARES.

>That guy could probably copy psk31. He's a machine.

Nah. He's just an ordinary programmer, a regular
young guy, a Mormon. He just happens to have
gunfighter reflexes in his brain...and about $2.5
million extra now. :-)

Jeopardy is now coming up on the FINALS in a sort of mental championship on ABC-TV. Fun programming to watch...and try to match wits with the various contestants and their amazing memories. My wife and I are regular viewers after supper...with a bit of friendly competition between us and the contestants.

Meanwhile, the cardinals are gathering in Newington to elect a new poop to lead the morsemen into the righteous path of the true hamreligion...via the "history" of radio as only they have sterilized it.

I have a homebrew electronic keyer that uses TTL devices. Years ago I added a simple led fed by a chip to drive that LED. I run some fast CW and the little LED keeps up just fine.

Wow. I'm in the presence of Nobility. I am humbled.

FWIW, AFRTS headquarters used to be just about a mile from my
house on a little jog of La Tuna Canyon Road, just before it
gets changed to Penrose. In some "economy move" of about 7
(or was it 6?) years ago, it was emptied out in Sun Valley,
CA, and all staff moved east about 40 miles to a
decommissioned USAF base somewhat close to Ontario, CA. The
old AFRTS buildings haven't been leased to anyone yet after
all this time (one can still read the name in smudges on the
exterior wall where the raised lettering was).

> AFRTS >>> IS NOT <<< Amateur Radio

It's >>SHOW BIZ<< !!!

AFRTS >>>> IS NOT <<<< COMMUNICATIONS per se. <shrug>

Did AFRS or AFRTS ever do morse code? :-)

You might as well say "I'm just like 'Kasar Pane' or
'Balik Kavurmasi.'"

Why not? [it's Turkish] You can really do a snow job
on somebody with names like that.

> I'm happy to clarify that for you.

Stop sounding like a used car salesman or other pitchman.

> Rather, you act very much like Serdar Argic in
>many ways, and I thought the newsgroup readers would be amused by my
>pointing that out.

Riiiiight. You KNEW "Serdar Argic" and say "I'm NO Serdar
Argic..." :-)

Not to worry. I once met the REAL Arpad Somlyody.
[hope I spelled the name right after all these years]

> I figured that you would not be amused.

Whatever gave you THAT idea? :-)

> I didn't figure that you wouldn't understand why WE were amused.

Oy beggin' yer lardship's pardon...oy dint behave in
da presence of ya nobles wot got all yer WE-WEs itchy.

>Here's just a few examples that I could find in the few minutes that I
>searched in Google (try the query "wrong Len
>group:rec.radio.amateur.policy" at http://groups.google.com):

Tsk. Judge Schleck is carrying on like his real name
is Roy Bean and he be in the olde West and wanting to
hang anyone high...

So...have you queried (in just scant minutes) ANYONE ELSE'S
"mistakes" and evil, wicked, mean, and nasty comments
about ANYONE ELSE? Tsk. Haven't seen you in here for
months and suddenly you strap on them "six-shooters" and
go gunning for ONE individual...who "coincidentally" is
a pro not an amateur and who is against the morse test.

Uh-huh...you are "here" to nobly RIGHT WRONGS and do
some "avenging." [serving all you WE-WEs, no doubt]

"WE are not amused," you write. Have another piece of
cake, Marie...

- snip of alleged "offenses" committed before the
high court of the kangaroos -

>I characterize these as interpretations either because they are wrong
>(can be rebutted by facts), or are expressions of opinions (usually
>sweeping, black-and-white assumptions that can be counter-argued into
>many shades of gray).

Tsk, tsk, tsk, Judge Bean...er, Judge Judy...er, Judge Schleck.

Feel free to do a few "searches" on OTHERS who were here
BEFORE me as well as during. It will take you "only
minutes." :-)

>What I have seen is something like Israel/Palestine, or Serbia/Bosnia,
>where the conflict has been ratcheted up incrementally until it
becomes
>personal on both sides.

So...has your ratchet clicked up anything about me in regards
to those foreign places? Or did your ratchet get clogged with...
(I won't mention it).

> You have certainly done your share of
>escalation, spoiling for fights, and picking new fights.

Absolutely! But, one error...I haven't "picked new fights."
The old ones haven't ended yet as the walking wounded from
years ago in here are still suffering anquished pain and
demand retribution.

Tsk, tsk. Somebody calls me names and does the personal
insult bit and they get REPLIES. Oh, oh, oh, OH! One
CANNOT talk back to High Nobles of Amateurism!!!! No, no
nono NO! That just "isn't done!" :-)

> You remind me
>of the type of person that the police regularly drag out of barroom
>brawls, or that school principals separate on the elementary school
>playground, and usually with both sides screaming, "But HE started
>it!!!!"

Poor baby. YOU remind me of some haughty intellectual who
got his academic robes twisted when someone from the real
world (the one outside the campus) pointed out some really
real things.

> At that point, it doesn't matter who started it, because you
>have what are called "unclean hands," and thus garner no sympathy from
>me, or others.

Whoooooeeee. The caste system has been cast in concrete,
I see! [is there a "caste-ing couch" in here too?]

Tsk, tsk, tsk. I've been doing computer-modem communication
for almost 20 years and learned LONG ago NOT to "look for
love, respect, or admiration" via this medium. Don't start
with that bullshit "looking for sympathy" thing...doesn't
work with grown-ups, boy.

Case in point on hypocrisy: Look at what you wrote IN
CONTEXT. Seems like that is an exact depiction of what
you accuse me of doing! :-)

>Your spoiling for a fight caused you to lash out at Jim, N2EY, in a
>situation where you were not directly attacked, your basic arguments
>about Morse Code were not explicitly contradicted, and you chose to
>reply (post #2, in response to his post #1 in the thread) in a manner
>that was completely off-topic and ad-hominem.

In other words, my manner got YOU all pissed off. :-)

So...Miccolis (who never served) GETS A PASS because he
"is allowed" to previously act in the manner you described?
[do a search etc., will take you only minutes or something]

Not a problem. Your reaction was expected.

Say nasty to traditional methods, sass the WE-WEs and
one will be hung from the nearest J-pole. :-)

Meanwhile, all the NON-serving "historians" can strut
around as "experts" in a parody of a Monty Python
lumberjack. :-)

> I might have even given
>you a pass (by not replying) if you had argued something like, "Well,
I
>don't think that Morse Code deserves such architectural worship in a
>World War II exhibit by implying that it has the same status as, say,
>Egyptian Hieroglyphics in an exhibit about Egyptology." Instead, you
>ripped into Jim with an accusation that he didn't have military
service
>(an off-topic, ad-hominem attack that could only be replied with,
>"Yes/No/Maybe/So What?"), then tried to drag him into some silly
>argument over whether Morse Code could be an "interesting
architectural
>feature." That's when I dropped in on the thread.

In fewer words, you got pissed off!

Everone gotta be nice-nice to da extras and morsemen.
They RULE ham radio. Uh-huh. Got the picture. Got
whole billboards, posters, and regular ads to that
effect. Yawn. Been that way for years. Try to say
something new.

>Jim and I have disagreed on many things, but I don't like to see a
>fellow ham attacked in that way.

"Brothers in arms." :-)

> As you can see, the ham community will
>close ranks and will defend each other vigorously if that happens.

"As one." "An Army of ONE." "All united."

Tsk. Usual stuff. Each individual thinks ALL hams think
just like them. Not quite. :-)

>That's not a threat, merely a pragmatic observation that you are not
>winning friends or influencing people here.

AWWWWWW...."really?" :-) :-) :-)

I've never come in here to "win friends." Got them already,
NOT on-line or by "working contacts" on a raddio.

You are falling into a common personal trap in doing this
computer-modem comms thing...that of thinking you are "one
to one" with however you are messaging to in public. NOT
so. You can't see all the (silent) readers who never post.

I'm NEVER going to "convince" Morseman Miccolis of anything
and have never hoped to. He is of the type that just can't
be swayed from his set-in-concrete and armor-plated godlike
stubbornness about the efficacy of morsemanship. Neither
can I convince any of the other CLOSED minds who have been
thoroughly brainwashed into some weird groupthink. They
toss out their arrogant stuff by the bushels full on a

regular basis (sounding like Newington-south all the time)
and us little "we" are supposed to sit quietly by and say
"yes, sir, no, sir, can we have more, sir?"

Not likely, Judge Schleck. Bang your gavel all you want,
but there are MANY out here and there who DO NOT agree
with old ways, old traditions, forever keeping some
antiquated artificial standards operative until the end
of time. There's lots of us independent thinkers out
here and there and a few of us don't really give a shnit
about saying what's on our minds. [I know that's tough
to live with but it IS a fact of life and it's growing]

So, "close your ranks." Do close-order drill in formation
if you want (the morse beat will be the music you need to
keep in step?). Fly flags, have the post band play loud.
Vigilantes can even try to burn an ARRL diamond on my
front lawn. :-) Your "ranks" in that particular
"community" is having more and more deserters. Formations
are out of step more often than not. Hobby activities'
members don't all particularly care to be in some para-
military "service." Get used to it.

> Whatever merit you may have
>originally had is now completely wasted, and falls on deaf ears.

Tsk, tsk, tsk. [add overtones of "snide" to your being
pissed off]

>What a silly question. Of course, I have examined the record, that's
>why I have come to the conclusions that I have.

[aren't you rather underestimating the degree to which
you were pissed off? :-)]

>yourself. Not even John Updike or James Michener could generate that
>much output and still be original.

Thank you for putting me in with some literary best-sellers!

I wouldn't mind it if you put me in with J. D. Robb... :-)

> I used the principal address you
>used over the years. If I threw in your recent switch to
>"LenAnderson@ieee.org" (probably due to AOL shutting down news
service),
>and any other address you used earlier (you previously said you have
>been posting to the newsgroups for about 7 years), I'm sure the
>statistics would be even higher.

"Billions and billions served!" :-)

A saga worthy of a Sagan.

Consider it an astronomical number since I've been doing this computer-modem thingy for nearly 20 years and have a little experience at being a BBS co-sysop and a moderator on two other BBSs. Tsk, tsk, tsk. If you think some of these public egos are "large," you ought to see them in private! :-)

>Furthermore, most recent threads show you replying, and
>counter-replying, and counter-counter-replying, and ..., doing more than
>your share of contributing to run-on arguments. In this most recent
>thread, you have made about 21 out of the 141 posts to date, and will
>probably make many more. Do you really need the last word that badly?

No, now that you explain that others "DO deserve the last word!" :-)

Tsk. Am I to "keep to some (ordained) schedule" in here? Sunday afternoon I was speaking at Getty Center. Only posted a couple that day. Monday the Getty is closed and I didn't have any other things needed to do...posted several things. Tuesday it's "back to the usual" and I wasn't here. <shrug>

You really need to POST A ROSTER of who is PERMITTED and who is NOT PERMITTED to post! :-)

"Close ranks" ALL the way. As I've suggested before, just make access restricted to those who can "show papers" AND demonstrate a Group Mindset "worthy" of being in the newsgroup. NO major dissention allowed. Lock out any "undesireables." No problems. All make nice-nice and chant traditional mantra.

>The following response of yours exhibiting your obvious persecution
>complex is a perfect example of your overwrought replies:

Wow! "OVERWROUGHT!!!" Tsk, tsk, tsk. :-)

>The following response of yours about the "Turing Test" joke is a perfect
>example of your overwrought replies:

Tsk. Some of us "artificial intelligences" get SO "overwrought."

Remember what ol' Sam Morse tapped out, "What hath God overwrought?" :-)

>Are you homosexual, Len?

Call me a "lesbian." I prefer women. :-)

> Don't get me wrong, I'm not judging you if so
>("Not that there's anything wrong with that," as Seinfeld would say).

Perish the thought, JUDGE Schleck would NEVER "accuse"
anyone!!!" No, no, no, no NO...

>Speaking of tests, you didn't answer my challenge that you guess my
>positions on Morse Code.

I really don't give a flying fig about your "position." :-)

I've never HAD to use any morse code in my whole career
IN radio (a mere 52 years now)...which includes, but is
not limited to REAL HF communications. Anyone who says
I "MUST" take some federal test in order to be ON HF as
an amateur tends to get the Flying Fickle Finger of Fate
awarded in return. :-)

> Either you don't know, or you realize that
>arguing with me isn't about Morse Code, it's about your desire to
fight
>just for the sake of fighting, whether people could conceivably agree
>with you or not.

Tsk. It's also about my getting you all pissed off. :-)

That happens a lot all over the Internet.

Have a nice day...

This was also posted to usenet newsgroups:

http://www.network54.com/Forum/message?forumid=324004&messageid=
1103856160

This was e-mailed to me this morning by Oris Grim an old friend.

I happened to be traveling through Huntsville, Alabama early
this morning, I deceided to stop in Athens and see just how
tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with
several people in the Deja Newsgroup (now Google) and I issued a
challenge to him. I told him I would be attending the Dalton,
Ga. Hamfest if he wanted to continue the conversation. He said
he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on
the newsgroups. He always talks tough behind his keyboard. And,
I understand he is now doing the same sort of thing on the NIM
Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his
apartment in a nasty looking section of town. I'm a pretty good
sized man, but I put my gun in my back waistband after exiting
the car. I located his apartment and knocked on the door. The
doorbell was missing and bare wires were sticking out of the
wall. I heard someone say I'm coming and shortly the door opened
with a safety chain lock still engaged. He asked what I wanted
and I introduced myself and asked if we could have a
conversation. He turned white as a sheet and attempted to slam
the door, but I already had a foot wedged in the opening. He
started shaking uncontrollably and was shouting leave me alone,
leave me alone! I told him he didn't seem so tough now face to
face and then noticed a putrid odor of urine and he was pissing
his pants and crying like a baby. Please leave me alone Oris he
said, I was just having fun and meant no harm, please leave,
please. I could see the filthy floor of this apartment and the
dirty floors and the stench of a grown man pissing on himself

were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

Posted on Dec 23, 2004, 9:42 PM

Poor Lardass Davies, he fucked up again!

Class instructors should also pass this info to their students if they are any good at being instructors. Of course there are people who choose to "go it alone" in becoming hams, but the study guides do mention that accomodations are possible.

As usual, someone made the mistake of thinking they could engage Lennie in meaningful, adult "debate".

Lennie couldn't stand a toe-to-toe "debate", so he starts in on the cute "endearments" and making analogies that are no where near the mark.

And Lennie wonders why I call him a "putz" and no one renders to him the honors he feels he is due.

Thanks, Lennie. I never have to wait long for YOU to provide me with even MORE proof of all my assertions about you.

But don't worry...You've impressed Todd!

>

Check out the book "The Art and Skill of Radiotelegraphy." Basically anyone without a handicap can master 20wpm with the proper training tools if they are truly motivated to do so. Keep in mind that we all talk faster than that. We even talk faster than that when we spell out words phonetically!

>> Most anyone will tell you - it isn't good to do such. Besides, at
> that time,
>> I was chasing rug rats - so study time was premium.
>
> I've been told that is absolutely no excuse. Nothing in your personal
> or professional life can be more important than learning the code.
>

No one has ever said that. We each must choose our activities based on our personal priorities. But do not whine and cry to change the requirements simply because it's not high enough on your priority list to put some time into it. Besides if you haven't time to study code 15 minutes per day, you don't have time to study the theory either.

> Most recommendations are
>> 15 minutes to a half hour a day. That hardly makes it possible in a
> week. I
>> used the words " "AT LEAST" 2 WEEKS". Some are faster learners than
> others,
>> that is a given. BUT my point was, you have to get started to learn
>> ANYTHING.

The book "Morse Code: The Essential Language" states that the AVERAGE person is going to need 30 hours of study and practice to get to 5wpm. Natural there are the "wunderkind" like my daughter who got it in a couple of weeks and there are others who need many months.

As you said, a person must get started to learn anything.

[snip]

Do you spend a lot of time home alone on Friday nights wondering why no one does anything? (5 points)

Do you look forward to posting in news groups as a chance to be part of the "gang?" (3 points)

Do you find that social outings often end with you being subjected to a savage beating or "wedgie?" (2 points)

Were you a member of the band in high school? (6 points)

Were you a mathlete? (4 points for RMS voltage)

Was your last date an invitation to the roller rink? (3 points)

Have you failed to be invited to parties held at your house? (7 points)

Have you begun to believe that "the freak is here" is a term of endearment? (4 points)

Does the stripper really like you? (4 points)

Does your "network" include Lloyd? (3 points)

Does a big Thursday night involve you and the cast of The Lavender Lads? (6 points)

(And will you bet five dollars that Roger plagiarizes this and claims it as his own?)

Oh, then quit whining about "Anonymous cowards," hypocrite
Nursie.
If it doesn't matter for him, then it doesn't matter for me or
anybody else who uses anonimity. Or are you admitting you employ
a double standard, one to people that agree with you and another
standard to those that don't.
And Lardass couldn't be right in a million years, (frankly
neither could a proven liar like you)and your numerous typos
prove you don't know what the fuck you are talking about, either.

> You didn't answer the questions, confirming my conclusion
that
> "cypherpunks" is nothing BUT a punk.

Aww, poor Nursie. The big bad "anonymous" didn't address the
known newsgroup liar's abckpedals.
Get over it, Nursie. And quit employing double standards, it
only makes you look more foolish than you normally do.

> C-YA, Anonymous LYING Coward!

Sooner rather than later, Obese Nursie.

It might not be possible to go any faster with a flashing light anyway as
"persistence of vision" kicks in somewhere around there and it would look
like a single long light anyway. That's how movies work.

Now that you mention it, I have taken amazing amounts of guff because I am "stupid enough" to use my own name and callsign. I've only been doing that since, oh..... the early '90's.

And yet, there is no doubt that the more anonymous the poster, the more outrageous and profane the posts. Odd how the "smart" people seem to need to hide themselves. Big deal! Its sooo easy to be a big man when you hide who you are.

Hey, are you going to be at Dayton this year?

I think the operative word is "tale" (civilian "legend"). I don't go back that
far, but seems to me a draftee kid who drew Signal Corps billet would recognize
a cushy job when he saw it and such "motiviation" wouldn't be needed.

Wow, talk about prejudicing the audience! This assumes that those of us
who support Morse testing simply do it because we had to. With my
problems with it, that would make me the meanest SOB in the valley.

Perhaps, just perhaps, some of us believe that it is a good idea simply because it is a good idea, a mode that cant be performed by picking up a mic and talking, or typing on a keyboard, and needs to be learned?

> "Actually, what is being discussed is freedom of choice of modes

Extended to all modes? Get rid of those darn satellite mode questions on the tests! I personally have no use for that! For a strict appliance operator who is going to buy everything they use and have someone else install it? No one should have to do anything they don't want to do! Ditch all those unneeded questions.

If you don't have room for good food then you don't have room for junk.
However I did not have to tell my children this because I never served
dessert unless there was company and sometimes not even then. I eat too
much junk during the day at work so try to avoid compounding the problem at
home.

I only object to those who wish to change the rules without having the experience to judge for themselves whether they should be changed. You and I do not agree on the code test but I respect your opinion as you have experience in the field (but do not agree with it). When and if the majority of experienced hams say it should go, then I have no problem with that. So far that doesn't happen to be the majority opinion among the experienced hams.

> "Actually, what is being discussed is freedom of choice of modes

Actually people who are not required to learn something at a basic level too often bypass the activity altogether because they perceive it to be harder than it is. Therein lies the loss. We will be left with only 25+wpm CW people on the bands in that mode and everyone else will be too intimidated to get on. Only the extremely motivated will even bother to try. We will lose the "casual" CW operator who ragchews at the 13wpm level or so.

I'd like to see people learn a much wider range of "basics" in life not just ham radio than they do now. For example, personally I believe that everyone should have a year of art class and a year of a musical instrument, among other things, to be well rounded. Yet we insist on eliminating more and more basics in all areas. How is a person to have any idea what they want to do with their life when they have not had an opportunity to gain some basic skill in a wide range of areas? Similarly how is a person to have any real idea as to whether they might like code and wish to pursue it if they do not have a minimal, basic skill level?

"Here" is all knowing.

Part 97 doesn't define Morse Code, but specifies that it is to be tested at 5WPM. Part 97 is silent on Farnsworth Code. Part 97 doesn't say that the VE's must accomodate variations in testing.

Why does a person have to ask RRAP when they should be able to read it in the governing regulations???

> tests! I personally have no use for that!

Good point, and I agree. If we are going to have incredibly difficult satellite
questions on the Extra written exam, like the following verbatim example.....

Q: Which of the following types of communications may space stations transmit?

A. Automatic retransmission of signals from Earth stations and other space
stations
B. One-way communications
C. Telemetry consisting of specially coded messages
D. All of these choices are correct

.....then there ought to be similarly incredibly difficult CW questions on the
Extra written exam, like:

Q: Which of the following alphanumeric characters corresponds to the Morse sound
"di-dah"

A. A
B. B
C. C
D. All of these choices are correct

After all, fair is fair, and the CW mode ought to have test questions just like
all other modes. Thanks for pointing that out.

Good thing you didn't deny the homosexual and pedophilia inuendo. That
would have made Lies #27 and #28.

I don't buy that line of reasoning at all.

I was never "required" to learn to set up a "Lindy Rig", but saw other fishermen doing it and it looked like fun, so decided it must not be too difficult, so I learned how.

I was never "required" to learn to swim, but saw other kids doing it and it looked like fun, so decided it must not be too difficult, so I learned how.

I was never "required" to learn how to kiss a girl, but saw Clark Gable doing it, and it looked like great fun, so I decided it must not be too difficult, so I learned how.

I was never "required" to learn Morse Code, but heard it on the Zenith and was curious about those beeps and boops, so I learned how (a decade before I decided to be a ham).

I was never "required" to learn RTTY, but saw other hams doing it, and it looked interesting, so I decided it must not be too difficula, so I learned how.

You probably get the drift.

I'll bet you like those schools where the students determine the
curriculum!

Especially important is that those who do not know the material MUST determine what the material is that they must learn. That is always the smartest way to do things. The students must educate the teachers.

Not at all Mike. You've persuaded me that there ought to be test questions for
Morse just like there are test questions for each other mode. We seem to be in

complete agreement on the matter.

Brian, I just sampled a bottle, and it is awesome IMHO. It is a big beer, has an excellent head and is pretty well balanced between malt and hops. Good carbonation. It is a little darker than I expected. The alcohol content is a bit more than I expected, so it isn't a session beer, but more like an after dinner beer. Another month and it might be worth entering in a competition...... Yumm

The Miccolis argument goes farther. He's advocated dropping all
requirements testing. Why don't you go over the deep end, too?

> > Sunuvagun!
>
> Huzzanga!
>
> - Mike KB3EIA -

You can add all the CW quesstions, within reason, that you want. Let
CW stand with the other modes in the written test. And drop the code
test.

Ahh, appearing to agree with me to discount my point!

I could ace the entire test if asked is dih-dah meant "A". But that
isn't the point.

You did of course leave out my point that you can argue yourself out of
any testing via your argument......

such as....

> Extended to all modes? Get rid of those darn satellite mode questions on the tests!
>I personally have no use for that! For a strict appliance operator who is going
>to buy everything they use and have someone else install it? No one should have
>to do anything they don't want to do! Ditch all those unneeded questions.

0 question test.

Try reading Part 97.509 Section (h). It covers "administering the exam". I
think you'll find it DOES cover the fact that VEs must accommodate
handicapped applicants.

But you left out all the things you chose not to do because it "didn't look
interesting" or because "it looked too hard."

Have you tried everything that you have seen others do? And on what basis
did you choose to try some things and not others? Simply because in your,
as yet inexperienced eyes in that arena, it looked interesting? Have you

never tried something because some one else with experience said you should give it a try? Have you never had the experience of finding something to be fun and interesting upon being required to do or coaxed to do something that you thought you wouldn't like?

The real question is not so much the Morse code test per se but what is the set of basics that all hams should be familiar with whether or not they personally use that knowledge? Those things should be required whether or not they are interesting or difficult.

By the way I happen to think that all should be required to learn to swim whether or not they think they may use it. I happen to consider it a basic skill in life that all should know.

Ah, it is section (k) now........

(k) The administering VEs must accommodate an examinee whose physical disabilities require a special examination procedure. The administering VEs may require a physician's certification indicating the nature of the disability before determining which, if any, special procedures must be used.

Nahhhhh...some REALLY believe in their conditioning,
that morse code testing must ALWAYS be required as
"necessary" to operate transmitters below 30 MHz!

U.S. hams have always had code testing to get a
license...and they MUST always have such a test.
It's engraved on their synapses or something...

Of course! Especially that part about "didn't look interesting".

> Have you tried everything that you have seen others do?

Nope. For instance, I never jumped out of a perfectly good airplane, and I've never tried to jump a motorcycle over 13 burning school buses, and I've never entered a pie eating contest, and I've never done a whole lot of other hobby things that didn't appeal to me. Lifes to short to dance with hobbies I don't like.

The use of Morse in amataur radio is entirely optional. All licensees, even those not tested, are free to chose to use it (or not). While I'd be perfectly happy to see written test questions about Morse, just as there are written test questions about other modes, there is no longer any legitimite argument for a skill demonstration, other than your "try it, you'll like it" argument.

> The real question is not so much the Morse code test per se but what is the
> set of basics that all hams should be familiar with whether or not they
> personally use that knowledge? Those things should be required whether or not
> they are interesting or difficult.

I agree entirely! Yes, I really do.

But "be familiar" and "demonstrate a skill" are not the same thing.

I am required (as I should be), for example, to "be familiar" with a wide variety of subject matter to obtain an Extra class license, but only in the case of Morse am I required to "demonstrate a skill". What's wrong with that picture? Why shouldn't we be required to "demonstrate the skill of safely measuring high voltage" or "demonstrate the skill of planning a good ground system" or "demonstrate the skill of tracking down the source of a TVI problem". All of those basic skills seem much more part of the "basic skill set" that all hams should possess, more so than requiring a demonstration of skill in only ONE of a growing list of communications methods and modes.

No you can't.

I fully support a Morse familiarity test. Cross my heart and hope to die!

I just don't support a "skill demonstration", unless you want to require a "skill demonstration" of every knowledge area on the test, and deny licenses to everyone who cannot demonstrate all required skills.

What's a "full call"? A 2x3? That's what no code techs
get in districts where all the 1x3's have run out.

So, is a 1x2 or 2x1 not a "full call"?

I kept my old 2x3 when I upgraded to extra.

Oh YESSS do these hams KNOW things... :-)

>Part 97 doesn't define Morse Code, but specifies that it is to be
>tested at 5WPM. Part 97 is silent on Farnsworth Code. Part 97
doesn't
>say that the VE's must accomodate variations in testing.

Mama Dee would simply say "It's GOOD for you..." and
withold dessert. :-)

>Why does a person have to ask RRAP when they should be able to read it
>in the governing regulations???

I'm curious about the same thing. I've gotten all
these "interpretations" on it...which are simply
RATIONALIZATIONS anywhere else.

Part 97 is one of the shortest Parts in Title 47 C.F.R.

But, above all, MORSE must SHINE as the A-number-1
thing to DO!

Strange. 52 years ago the Army didn't require me
to know any morsemanship to operate and maintain
high-power HF transmitters (a mere 3 dozen). No
license, either. A year ago, nobody required me
to possess any license to operate a privately-
owned HF SSB transceiver on a boat. NO morse
needed to operate legally below 30 MHz then.

But, the ARS (Archaic RadioTELEGRAPHY Society)
stoutly maintains that *ALL* MUST test for morse
in order to have the "qualifications" to operate

below 30 MHz! FEDERAL Test! It's the LAW!!!

It's always been done that way...CANNOT be
changed. [been told that]

Actually Roger/Not Roger, Todd's post more closely resemble your own.
The vocabulary is similarly limited. You both have emotional problems
and difficulty relating to society. Both of you issue threats of
violence which both of you are too timid to attempt to carry out. The
biggest difference between you is that Todd doesn't look like a Stephen
King troll doll.

It doesn't seem that way to me, Hans. I think "whine and cry" is a
fairly accurate description. I have no sympathy for one who can't climb
the 5 wpm morse mountain in order enter the world of HF amateur radio.
None.

No.

Barry's in Australia.

He means he's got a full-privileges license without
passing a code test.

> That's what no code techs
> get in districts where all the 1x3's have run out.

Actually FCC has the policy of going through the sequence once and then
on to the next. When they reached N3ZZZ, they went on to 2x3 calls even
though there were unassigned N3xxx calls available from hams who'd
dropped out or changed their calls.
>
> So, is a 1x2 or 2x1 not a "full call"?
>
> I kept my old 2x3 when I upgraded to extra.

I had a 2x3 for seven years as an Extra.

Toady.

Interesting.

Did a search on AOL White Pages just using Toiddie's last name
(his REAL last name) and QSL address. Dear Old Dad's name is there
along with the home phone number.

Maybe we ought to start running off some of Toiddie's rantings,
profanities and threats to and about federal officials, and other such
behaviour and mail them to Dear Old Dad???

Better yet, drop a call to the family while Toiddie is in class?
Mom and Dad ought to know what's going on before U. S. Marshals knock
on the door along with an FCC rep. They've got to be getting on up in
years and don't need that kind of stress.

Of course Toiddie wouldn't care what happened to Mom and Dad as a
result of HIS misbehaviour...As long as Toiddie get's what Toiddie
wants!

> ...and for RTTY.

Well, that depends on the type of RTTY operation and equipment. While
we hams usually use "SSB" detection of RTTY signals, and then an audio
TU, there are other ways.

There was a QST article in the late 1950s or so, showing an adapter
that used 'real' FM demodulation of the IF signal. Built around a
BC-453 Command set. Had a 'scope built-in, IIRC. Complete receiving
setup in a rack mountable unit, just feed the IF signal (190-550 kHz)
from almost any superhet to it.

I'm sure there were manufactured equivalents.

Wrong, Lardass. Here's the original post (and I'm not on AOL):

Lines: 52
X-Admin: n...@aol.com
From: w...@aol.com (George Ashley)
Newsgroups: alt.radio.scanner.flame_fest
Date: 24 Dec 2004 13:40:09 GMT
Organization: AOL http://www.aol.com
Subject: Merry Christmas Lloyd Davies
Message-ID: <20041224084009.10404.00001525@mb-m25.aol.com>

This was e-mailed to me this morning by Oris Grim an old friend.

I happened to be traveling through Huntsville, Alabama early
this morning, I
decided to stop in Athens and see just how tough Lloyd Davies
was going to act
when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with
several people in
the Deja Newsgroup (now Google) and I issued a challenge to him.
I told him I
would be attending the Dalton, Ga. Hamfest if he wanted to
continue the
conversation. He said he would be there and he was going to kick
my ass.

Well, Lloyd was a no-show and continued the verbal assault on
the newsgroups.
He always talks tough behind his keyboard. And, I understand he

is now doing
the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a
nasty looking section of town. I'm a pretty good sized man, but I put my gun in
my back waistband after exiting the car. I located his apartment and knocked on
the door. The doorbell was missing and bare wires were sticking out of the
wall. I heard someone say I'm coming and shortly the door opened with a safety
chain lock still engaged. He asked what I wanted and I introduced myself and
asked if we could have a conversation. He turned white as a sheet and attempted
to slam the door, but I already had a foot wedged in the opening. He started
shaking uncontrollably and was shouting leave me alone, leave me alone! I told
him he didn't seem so tough now face to face and then noticed a putrid odor of
urine and he was pissing his pants and crying like a baby. Please leave me
alone Oris he said, I was just having fun and meant no harm, please leave,
please. I could see the filthy floor of this apartment and the dirty floors and
the stench of a grown man pissing on himself were almost enough to make me want
to vomit, and I don't have a queasy stomach. Upon telling him that this time he
would escape a ass kicking and not to ever get a smart mouth with me again and
a verbal yes from him, I departed. That apartment complex looked like a
crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars
everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could
afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it
for everyone to see just what kind of chickenshit asshole this Davies really
is.

Methinks the Op wanted us to think that the FCC was bringing back CW in the
maritime service! Well spotted, Phil.

4903. Would You Believe N9OGL Is A Member Of.....

According to his eHam profile, Toddie is an...

ARMY MARS MEMBER!

QUOTE

I am a member of the following ham radio clubs...
Army M.A.R.S. Christian County Amateur Radio Club (CCARC)

UNQUOTE

Good thing "Don't Ask, Don't Tell" doesn't apply to MARS, eh,
Toddie...?!?!

Steve, K4YZ

4904. And It Seems N9OGL Changed His Mind About Broadcasting On HF

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-21 15:23:30 UTC
From: K4YZ <k4yz@aol.com>
Message-ID: <1114097010.791115.86230@f14g2000cwb.googlegroups.com>
Source record: 106370

QUOTE

Amateur Broadcasting -- Why Not? Reply
by N9OGL on December 5, 2004 Mail this to a friend!
Broadcasting in the amateur bands would not in reality a good idea.
Simply because there are too many people on the ham bands.

UNQUOTE

I guess that Todd forgot what he posted in December of 2004, eh?
Been on 20 ands 10 meters both.

QUOTE

I wouldn't however be objective on allowing half hour or hour
programming on those band that are dead or not in uses. For the purpose
of short range programming dealing with issues in the field of
electronics or radio.

UNQUOTE

That's why Todd is now broadcasting his show on 145.58 instead of
on his "repeater"...

Now...Half an hour per day per Amateur...

Doesn't take too long to see what happens after that Genie gets
out of that bottle!

QUOTE

Many Amateur Radio operators I've read talk about what content should
or shouldn't be allowed on the amateur radio bands because of the FCC
rules and regulations.

UNQUOTE

Yep...

QUOTE

But many amateur radio operators forget about Section 326 of the
Communication Act of 1934. Which states that the FCC may NOT control
any content of any station except for Obscene and indecent material.By
putting them on the bands that are not in uses would not only stop
interference but would prove that the amateurs are using those
frequencies

UNQUOTE

And Toddie forget's the STANDARDS that obscene and indecent speech must meet...One of them is that community standards must be met...And in the United States, most Amateurs DON'T want to hear graphic depictions of sex acts, the use of certain language, or "suggestions" of where to put razor-blade studded sex toys.

And the "inteference" would multiply exponentially...from all the carriers, QRM, cat calls, etc that would inevitibly follow...ESPECIALLY with creeps like N9OGL doing the "programming"....

Thank-God (or your diety of choice) that creeps like this only show up once in a very blue moon...

Wrong, Lardass. Here's the original post (and I'm not on AOL):

Lines: 52
X-Admin: n...@aol.com
From: w...@aol.com (George Ashley)
Newsgroups: alt.radio.scanner.flame_fest
Date: 24 Dec 2004 13:40:09 GMT
Organization: AOL http://www.aol.com
Subject: Merry Christmas Lloyd Davies
Message-ID: <20041224084009.10404.00001525@mb-m25.aol.com>

This was e-mailed to me this morning by Oris Grim an old friend.

I happened to be traveling through Huntsville, Alabama early
this morning, I
decided to stop in Athens and see just how tough Lloyd Davies
was going to act
when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with
several people in
the Deja Newsgroup (now Google) and I issued a challenge to him.
I told him I
would be attending the Dalton, Ga. Hamfest if he wanted to
continue the
conversation. He said he would be there and he was going to kick
my ass.

Well, Lloyd was a no-show and continued the verbal assault on
the newsgroups.
He always talks tough behind his keyboard. And, I understand he

is now doing
the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a
nasty looking section of town. I'm a pretty good sized man, but I put my gun in
my back waistband after exiting the car. I located his apartment and knocked on
the door. The doorbell was missing and bare wires were sticking out of the
wall. I heard someone say I'm coming and shortly the door opened with a safety
chain lock still engaged. He asked what I wanted and I introduced myself and
asked if we could have a conversation. He turned white as a sheet and attempted
to slam the door, but I already had a foot wedged in the opening. He started
shaking uncontrollably and was shouting leave me alone, leave me alone! I told
him he didn't seem so tough now face to face and then noticed a putrid odor of
urine and he was pissing his pants and crying like a baby. Please leave me
alone Oris he said, I was just having fun and meant no harm, please leave,
please. I could see the filthy floor of this apartment and the dirty floors and
the stench of a grown man pissing on himself were almost enough to make me want
to vomit, and I don't have a queasy stomach. Upon telling him that this time he
would escape a ass kicking and not to ever get a smart mouth with me again and
a verbal yes from him, I departed. That apartment complex looked like a
crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars
everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could
afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it
for everyone to see just what kind of chickenshit asshole this Davies really
is.

While hams have used pure AFSK with FM at VHF, a BFO or product detector
in the SSB mode is the traditional of RTTY reception. It was also the
method used by USG agencies at HF.

> There was a QST article in the late 1950s or so, showing an adapter

> (like the R-70?)

Naw, Len's relic has a good product detector. He could almost use the method he described except he would have no need to switch the AGC to the "off" position--just switch it to the "fast" position.

> > he'd likely hear little or no beat note
> > at all using the method he advocates.
> >

That's interesting. I tend to be more libertarian (small "l"), leaving such decisions up to the individual rather than a societal (government?) "all should be required" mandate. While it's easy to make the argument that swimming is a useful skill beyond it's recreational value (just as you might make a slightly weaker argument that Morse is a useful beyond it's recreational value), society really has no vested interest strong enough to dictate "all should be required" to develop the skill of swimming. If they did, then the next layer of busy-bodies would busy themselves deciding which swimming strokes ought to be required, which section of the beach we'd be allowed to use (depending on our tested swimming speed), and requiring that all non-swimmers live only in arid locations like Arizona and New Mexico.

> everyone who cannot demonstrate all required skills.

No other part of the testing is a skill. You can buy a Yeacomwood rig, have other people set up your antenna and setup. You can talk into a microphone, (assuming that people know to mash the PTT or adaptive device that performs the same function) and it will "work". I can buy or download and install the software that I use for PSK31. It's a major stretch to consider that a skill. More like knowledge.

But CW is a different matter. You aren't going to read a book and sit down at the key and start sending or receiving Morse. *Thst's* a skill.

Even with computer generated Morse and Receiving programs such as CWGet (all which do s so-so job of the mode) it is a valuable skill which can work with minimal equipment.

My point EXACTLY, Mike.

While there are many skills associated with our hobby, only one of those skills is singled out for a required demonstration.

Interestingly, if that skill is so vital as to need a skill demonstration, it would seem that no-one who had not been tested would be allowed to use it on the air. Yet a basic Technician licensee is perfectly free to use Morse on the air without having passed a Morse test. So much for the need for a demonstration before a license grant!

> Was there anything incorrect or inaccurate in Dee's statement?

> Dave K8MN

No, and of course neither did I say there was.

It's a perfectly accurate statement, just like the following similar
statements:

Besides if you haven't time to study code 15 minutes
per day, you don't have time to take a shower either.

Besides if you haven't time to study code 15 minutes
per day, you don't have time to bathe the dog either.

Besides if you haven't time to study code 15 minutes
per day, you don't have time to mow the lawn either.

Besides if you haven't time to study code 15 minutes
per day, you don't have time to snuggle with your
spouse either.

Besides if you haven't time to study code 15 minutes
per day, you don't have time to eat dessert either.

Besides if you haven't time to study code 15 minutes
per day, you don't have time to play baseball with
the neighborhood kids either.

Just think of all the things you'd have time to do, if you'd just have
learned Morse code and gotten it out of the way! It's a wonder
everyone doesn't know Morse code, so they'd have time to to the things
they really WANTED to do!

One of my wife's avocations is specialty dessert and cake catering
(she's taught that for years and at times has even made money doing
it commercially).

Her specialty is diabetic-safe products (I'm a diabetic) - low fat
and no refined (or unrefined) sugar. She duplicates about 95% of
what one can find on a fancy "sweet table" (marshmellow requires the
crystalline structure of "real" sugar) and I most certainly do not
suffer from a lack of "goodies" all year round.

Dessert is one of the basic food groups..... <ggg>

Every war is "popular" to a certain extent among those who aren't required to attend.

It becomes markedly less popular among those whose attendance is involuntary.

Hello Alun,

I'm not sure what you mean by "being a Jonah".

Does it have anything to do with the bible story of Jonah and the whale - aka "You Can't Keep A Good Man Down"?

> the announcement guesstimates all done
> within a year, i.e. by spring '06.

So they meant *next* summer (2006), not *this* summer (2005).

> Sounds about right to me. Granted that
> the comments about what the FCC might do (and the title of the post) were
> all the poster's own, and not Hamwave's.

Exactly.

My time estimates are based on what FCC has done in the past on a number of issues. FCC doesn't seem to be in any big hurry to change the rules - heck, it's been over 5 years since the last restructure, over 21 months since WRC 2003 ended, and yet there's no NPRM on the street yet.

> My own crystal ball guess is that the FCC will just delete the code test
> and rearrange some subbands around this time next year. That's still much
> longer than I originally thought.

My guess is there will be some more-substantive changes, and that the code test deletion isn't a done deal - yet.

I base the above on the fact that FCC could have simply dumped Element 1 back in summer 2003, without an NPRM, comments, or any of the rest. They received at least two proposals to do just that. All it would take is for FCC to say, in effect: "This subject was discussed thoroughly back in 1998-1999, and we kept Element 1 only because of the treaty. Now the treaty's gone, so we're dropping Element 1." Or some such verbiage - the basic idea is still the same. There's a procedure for such changes.

Yet there have been no changes yet, just proposals *to* FCC, and comments.

Last time FCC did a restructure, the comment period was what - six-seven months or more? Then it took about 11 months for the Report

and Order, and another four months or so before the rules changed.
That's over 20 months from NPRM to new rules in effect. 21 months from
summer 2005 is spring 2007.

Maybe FCC will say something at Dayton. Maybe not.

Well I've yet to find a "low fat" or "low/no sugar" food that tastes like
the real thing. It always tastes a little different. So my choice is
simply to bypass the desserts as much as I can discipline myself to do so
(sometimes I fail miserably).

A really good use for a Q5er, too. Selectivity was about right for the
850 shift that was common in those days. Plus it was a complete unit in
one package.

> > > I'd have thought the old boy would have known all that

Simple:

One of the arguments for keeping some sort of code test is that
hams do, indeed, use Morse Code. And on HF, they use it *a lot*.
Now whether that constitutes enough reason to keep the test is
purely a matter of opinion - but it *is* a reason.

As we have often seen, Len constantly minimizes and ignores the
role Morse Code plays and has played in radio communication. So
it's natural that he'd want to minimize reception of the mode..

Just a guess. But I don't see him thanking me for pointing out
his error, or even acknowledging it.

You're hearing my voice? I'm only typing. I'm not affiliated with any National Socialist group anywhere on the planet. I can, however, understand how you might believe that anyone opposed to your vile postings would be considered to be a National Socialist. After all, there are any number of groups who would take offense at your output.

> Oh, and no matter how
> many times you blather that lie, I'm still not Roger Wiseman, un
> or not. And you and your toadie Nursie Steve are the biggest
> liars on the group.

It must be difficult for you, unable to come out as yourself, having to hide behind anonymous remailers because you fear the outcome if you reveal yourself. You're reduced to verbal sniping while hiding under a rock. You can only lose so many ISP's and you certainly don't want to give the authorities any easy evidence against you. If I were in your shoes, I'd deny being Wiseman too.

> > Nope, just yours.
>
> Nope. Not mine. Maybe Wiseman's. Thanks for aditting you did
> whine.

I'm sure that you consider anyone reporting vile comments about another, his wife, his children and his parents to be whining. You'll probably not understand why anyone would talk to the police after you'd issued posts about him in which you spew filth involving homosexual activities, pedophilia or incest.

> Why don't you whine to Toad's police chief?

Todd isn't local to me, hasn't posted anything about my wife, children or parents.

> Or you think
> you'd get told to f--k off and quit wasting valuable police
> resources, like before?

That certainly didn't happen the number of times I visited Glen Dale Police in your case, Roger/not Roger. They were familiar with you and asked that I forward e-mail and newsgroup posts. I've done so on a number of occasions. They certainly didn't view my visits as a waste of time or resources. They're concerned. You should be too.

> Or are you too f--king stupid to either ignore it or use a
> killfile?

I shouldn't have to put up with it at all. As far as a killfile is concerned, it'd work if you used one or two e-mail addresses but the material would still be there. If you'd use some self-control on your written form of Tourette's Syndrome, there'd be no need to killfile you.

> > Actually Actually Roger/Not Roger, Todd's post more closely resemble
> > your own. The vocabulary is similarly limited. You both have > > emotional problems and difficulty relating to society. Both of you
> > issue threats of violence which both of you are too timid to attempt
> > to carry out. The biggest difference between you is that Todd doesn't > > look like a Stephen King troll doll.

> <whines and backpedals from the Nazi with a fat gut
> and a bad comb-over>

Why, UnWiseman, are you fixated on my hair? Your powers of observation aren't very good and you're short. I have a full head of salt and pepper gray hair. Would you care for an 8 x 10 color glossy? Perhaps if you ever attend another Marshall County ARES meeting or a Field Day, I can arrange for a step stool.

> Actually, you are uninformative.

I can be quite informative, Roger/UnRoger. You need to turn your receiver on.

Poor Nazi.

You're 0 for 2. I'm neither poor nor a Nazi.

> Soothe your oh-so-damaged-ego by tapping out some Morse Code.

Well, there's a peculiar idea. Does that work for you?

Perhaps we should adopt the practice of "shunning" to deal with such people. If they are treated as if they were invisible, they'll get tired of the game since they get no response and no one will talk to them between times either.

You thought you were responding to me, Roger? I don't have any need to hide behind anonymous remailers.

You asked sometime ago what I'd done for amateur radio. I provided a number of items which are easily verified. How about you answering that same question? We know about your notorious interactions with the FCC. Why not provide us even a one-liner with the things you've done for and not to amateur radio? QRMing stations on 20m and getting involved in an SSB version of the stuff you post here don't count.

Would you care to astound us with your contributions to your community, county, state or nation? Maybe you could come up with commendations from some of your many friends. Perhaps you're involved with your church or a civic organization. Let us know.

>simply to bypass the desserts as much as I can discipline myself to do so
>(sometimes I fail miserably).

As the old Ross Bagdasarian/Rosemary Cloony song of the late '40s
went: "C'mon a' my house, my house, I'm gonna' give you candy...."

That's why she's a specialist......the "store-bought" stuff can't
make it, and the sweetener used in most of those products (Sorbitol
or Manitol) is colloquialy known as "Laxitol".

Since the commercial sweetener Sucralose went "retail" under the
name of "Splenda" it's a lot easier to get the right taste.

4953. Good morning or good evening depending upon your location. I want to ask you the most important question of your life. Your joy or sorrow for all eternity depends upon your answer. The question is: Are you saved? It is not a question of how good you are, nor if you are a church member, but are you saved? Are you sure you will go to Heaven when you die? GOOGLE·NEWSGROUP·POST·146

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-21 23:48:34 UTC
From: RonGrossi382769@yahoo.com

Source record: 106467
Cross-posted to:
autodesk.autocad.customization,rec.radio.amateur.policy,alt.infertility.parenting,uk.rec.cars.misc,alt.support.mult-sclerosis

The reason some people don't know for sure if they are going to Heaven when they die is because they just don't know.

The good news is that you can know for sure that you are going to Heaven which is described in the Holy Bible as a beautiful place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is to be saved so that we can live forever with Him in Heaven.

"For if you confess with your mouth Jesus is Lord and believe in your heart that God raised Him from the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth in the person of Jesus Christ to shed His blood and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to a virgin Jewish woman named Mary and lived a sinless life for thirty-three years.

At the age of thirty-three Jesus was scourged and had a crown of thorns pressed onto His head then Jesus was crucified.

Three days after Jesus died on a cross and was placed in a grave Jesus rose from the dead as Jesus said would happen before Jesus died.

If someone tells you that they are going to die and in three days come back to life

again and it happens then this person must be the real deal.

Jesus Christ is the only person that ever lived a perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds) with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have redemption through His blood, the forgiveness of sins..." (Ephesians 1:7)

If you would like God to forgive you of your past, present and future sins just ask Jesus Christ to be your Lord and Saviour.

It doesn't matter how old you are or how many bad things that you have done in your life including lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven with You when I die. I agree with You that I am a sinner. I believe that You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins and that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thanks Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God to save you. Now you are a real Christian and you can know for sure that you will live in Heaven forever when this life comes to an end.

As a child of God we are to avoid sin(wrongdoing), but if you do sin the Holy Bible says, "My dear children, I write this to you so that you will not sin. But if anybody does sin, we have one who speaks to the Father in our defense Jesus

Christ, the Righteous One."

Those of you that have not yet decided to
place your trust in the Lord Jesus Christ
may never get another chance to do so
because you do not know when you will die.

Jesus said, "I am the way, the truth and
the life: no one can come to the
Father(God)(in Heaven), but by me."
(John 14:6)

This means that if you die without
trusting in Jesus Christ as your Lord and
Saviour you will be forever separated from
the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of
eternal torment, suffering, pain and agony
for all those who have rejected Jesus Christ.

The good news is that you can avoid Hell by
allowing Jesus Christ to save you today.
Only then will you have true peace in your
life knowing that no matter what happens you
are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ
Ronald L. Grossi

*Show this to your family and friends so
they can know that they have a choice
where they will spend eternity. Thanks!

> Dessert is one of the basic food groups..... <ggg>

In my family, desserts were not really all that big a thing. Some
sweets around the holidays, but otherwise we were (are) big meat eaters.
Kinda like leftover hunter gatherers... 8^)

> large.

You thought you were responding to me, Roger? I don't have any need to
hide behind anonymous remailers.

You asked sometime ago what I'd done for amateur radio. I provided a
number of items which are easily verified. How about you answering that
same question? We know about your notorious interactions with the FCC.
Why not provide us even a one-liner with the things you've done for and
not to amateur radio? QRMing stations on 20m and getting involved in an
SSB version of the stuff you post here don't count.

Would you care to astound us with your contributions to your community,
county, state or nation? Maybe you could come up with commendations
from some of your many friends. Perhaps you're involved with your
church or a civic organization. Let us know.

Dave K8MN

....

Weeeellll......Roger is the reason the local grade school hired a full time
policeman. I guess you could say that Roger helped create another job????

"aditting" Darn those typos!

"abckpedals" His greasy hair got in his eyes again

"shreeched" Wasn't he the guy in a sit com? Screech?

"stuid" Pot calling the kettle black?

"heared" That's West Virginia for heard.

"assuslted" Rog just makes em' up as he goes along.

"experieince" Oh, DUH!

"abouve" Is this a French word?

"Cosast" Some place by a body of water?

"mebership", Just a typo, right?

"retqards" Regards or Retards? Who can tell?

"coordinbator" Huh?

"Realy" Really?

"Nitoiced" Keyboard error or stupidity?

Becasue

Licence

Convienince

Myabe

"occurance" Say what?

"srtuggling"

"definatrely"

"delapidated" What a dufus.

"picutre"

"permenatly" Ebonics again?

"Arest" You need a rest, Wogie.

"Sentenceing" No comment.

"Narcotices" What?

"Undre" Is this a city in Germany?

"Surgeoun" And this would be?

"Commuications" Who is laughing at who?

"Ovre" Ovre and out!

"Wondreful" It's a "wondreful" day in the neighborhood?

"Derivitave" Still no spell-checker, eh?

"You lose, shit for brians." Woger showing who real loser is.

"Deisowned" Deis what?

"Deeppest" Roger strikes again.

"Dodgeing". Is he talking about a car?

"Staedy" Steady?

"Linme" Transmission line?

"Getr" Nobody knows.

"Experieince" Wogie is good, ain't he?

"Appropiate" What kind of opiate?

"Laywer" Lay what?

"Visitpors" You never have any, ergo you don't know how to spell it.

"It's "complaintant," you sniveling weasel." (Roger Wiseman on spelling complainant.)

"Irreevant" Good going, Wogie.

"Forwared" Forward HO!

"Glady" Glad Bags?

"Neighborhod" It's a wonderful day in Wogie's neighborhood.

"Mena" Mean? What you mean, Wogie?

"Notr" Not?

"Sassifyed" ALA Rolling Stones.No Sassifaction..

"Fantasises" That is "fantasizes", Wussman.

"Illarate" West BY GOD Virginny!

"Reveresed" Must be one of those off-brand keyboards.

"Soem".as in Some? What a loser.

"VIRIN".What Wogie was before he met the Lavender Lads.

"Minisule".he mussa meant miniscule. Like his IQ.

"Champoin".Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

"Acident" Roger's mom got preggers by accident.

"Alreaedy" Alright, already!

"Amouints" Roger amounts to nothing.

"Aposterphe" This guy is a hoot, ain't he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

"Coiward" As in peeking from behind his mommy's curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.

"Ghet" Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce" He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can't spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender Lads.

"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

" Stgop" Roger's version of Stop.

"Fahter's" He meant Father's Day.

"fserting"..would that be festering?

"poists". Roger meant "posts".

"snadwich" As in peanut butter and jelly?

"regualr" Glen Dale rendition of "regular".

"aftrer" After? Aftrer what?

"soory". Sorry Roger fucks up again.

"didnb't" He didn't?

"whoile". He ate the whoile thing?

"Woamn" He's hooked on West Virginia phonics, all right.

"prrof" And he kin prove it, too.

"beforfe" Was that before he lurned to spell?

"yoiuy" Roger's version of "y'all".

"illerate" Only illiterate Roger can spell like this.

"haeart" Aw, how heartless of me to laugh!

"valule" Roger has no values. No wonder he can't spell it.

"proch" Doesn't everyone have one on their house?

"inmstitution" Where Roger's mom put him in June 1999.

"timne" It's Howdy Doody time?

"whgo" What? Who dat?

"gnetically" Only Roger knows what this one means.

"crfy" Like, cry, Roger, cry.

"stutrtering" Some stutter, Wiseman stutrters.

"Whjere" Where is Curtain Boy?

"Webiste" That's Website to the rest of us.

"Youire" Your? You're? Who knows.

"fiored" As in fired?

"Parety" Roger gave a party once. Nobody came.

"Bouynce" Bounce?

"Varification" Verifiable mental case.

"Probelms" Poor Rogie.has many problems of the mental sort.

"Partricipate" Oh, DUH!!!!

"Cryed" Gee, Wogie..cry me a river.you dolt!

"Stoick" What a dork. His old 386 has no spell check program.

"Partiall" More WV Phonics, I see.

"Obsucred" Either obscured or Rogie has "sucre" on his mind.

"Infinate" Stupid. Think finite, Rogie.

"Sustinance" As in Sustenance?

"Juvinile". This is the way Roger likes his boys.

"Piut" Put it where, Rogie?

"Toyus". "Toyus R Us?

"Diminuative". Roger's height.

"Definitely" Definitely

"Percriptions" Say what?

"Credibiliy" More Glen Dale intellect.

"Thsoe" Yet another Glen Dale gaffe.

I just finished up my dinner of Sausage and Green beans. Lots of green
beans. No dessert, and didn't miss it either. Might have bit of sugar
free gelatin later for a snack.

4970. EU: Europe just lost a Primary Amateur Radio Band

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-22 00:06:17 UTC
From: G1LVN <gareth.paley@gmail.com>
Message-ID: <1114124760.358841.117090@g14g2000cwa.googlegroups.com>
Source record: 106485
Cross-posted to: rec.radio.amateur.policy,uk.radio.amateur

Today Europe lost an Amateur Radio Band to "licence-excempt"
time-limited use by automotive short range radar equipment.
see:
http://www.ofcom.org.uk/consult/condocs/24ghz/
(have your say before 23rd May !!!!!!!!!)

It's the first nail in the coffin for the UK Amateur Radio. The Funeral
is now set for 26th May 2005 when a consultaion on the future of UK
amateur radio licensing is published which will contain the question on
fully deregulating amateur radio in the United Kingdom of Great Britain
and Northern Ireland (UK):

http://www.ofcom.org.uk/radiocomms/ifi/licensing/classes/amateur/forthcoming

or (http://tinyurl.com/8pvxw)

"..For the avoidance of doubt, whilst the formal public consultation
will put forward a number of other options for the future, those
options are explicitly not recommended by Ofcom. Specifically, Ofcom
will not recommend any options to make the amateur radio service WT Act
licence-exempt; however, for transparency and completeness, this will
be put forward as an option in the public consultation in order to
gather the community's views ....."

Looks like 100 years plus of amateur radio history in the UK could soon
go the same way as the 24GHz band i.e. licence excempt - no exams, no
callsigns, just CB!

Splenda isn't too bad at all. In fact, I've used the artificial
sweeteners for so long that I dislike the taste of "real" sugar. Leaves
a unpleasnt after taste.

I understand the feeling. When I was growing up, we had "meat, potatoes,
and gravy" as our main staple. For a change, we had "potatoes, gravy, and
meat!"

LOL!!! I liked the one when uncle Jed bought himself a new
"fishin boat" He came down to the docks dressed as an admiral
and went on board a Destroyer.....

I wonder how VE Dee would accomodate the disabled in the Tower Climbing
pass/fail skill exam?

Not that Tower climbing will likely ever become an issue with the exam, but
if it were, then I'd suggest there would be questions relating to the proper
safety techniques of doing such a job, wherein "actual" "physical"
demonstration is not needed nor required. Given that - a wheel chair bound
person "could" pass those parts of an exam. I can't fathom tower climbing
becoming a major issue. There is a question or so relating to wearing a
"hard hat" when working "near" a tower in case someone drops a tool or other
item. So, there ya go. Perhaps you can consider that as a step in the
"tower" safety process. It would be only "questions" relating to such
things, what's the big deal about pass/fail? You either answer the question
correctly as you would be expected to with any other - or you don't!

We have to count the number of correct answers given and see it they add up
to a passing grade, if not - too bad! It won't matter if they're handicapped

or not. We can accommodate them as to taking the exam, we don't accommodate them as to giving them the "answers".

Licence exempt - with 150W DC in (400w pep) - never in a million years..
I would think every single organisation with an interest in the radio
spectrum
would object.

Woody..

The one translates into the other via the last part of the first item
you quoted, which, again, is "...however, for transparency and
completeness, this will be put forward as an option in the public
consultation in order to gather the community's views."

Although there can be little doubt about the nature of the special
pleading by NuRSGB in its meeting with OFCOM, the latter have well and
truly shafted the former by going ahead anyway. That the final wording
might say "specifically not recommended", the proposal is nevertheless
on the table for "the community" to comment on. That is, if someone
wants a deregulated Amateur Radio system in this country, they can
write in and ask for it. If OFCOM get enough of these, then they may
feel that that is enough authority on which to go ahead.

Stand by for yet more special pleading from NuRSGB, as they see the
concept of The Governing Body of Amateur Radio slipping from their
grasp. HTH

Why do you want to utter yet ANOTHER mistruth, Brian, when you
have so many others out here that you still have yet to answer to?

As noted previously, Brian, I've been a member of each MARS at one
time or another for different reasons, and have been in charge of an
island-wide system on Okinawa for six months.

My undersanding of the program, it's history, purpose and goals
far exceeds anything you or Lennie the Lame can cut-and-past from
internet URL's.

Well, I wasn't trying to do that!

But the way FCC has worked in the past, I wouldn't count on
fast changes. That's the reality of how the process works.

> The thin end of the wedge my boy, thats what it is.

That it is, Sir, that it is...However it's a rusty wedge, becasue
that's been the history of the Amateur Service (at least here in the
Colonies) since the inception of Radio.

Everytime it's been in the best COMMERCIAL interests to do so,
Amateurs were moverd higher and higher up the spectrum until those very
same commercial interests decided they were ready to populate those
same higher bands.

And truth be said, just how much use are we (Amateurs) making of
those bands? There's probably not even 100 guys here in the States
that make use of those bands, and even if the number is 10 times that,
it still doesn't warrant holding them back for development.

Oh, I certainly believe we need to hold some slices open for
Amateur and experimentals, but the bottom line is that it's unrealistic
to expect that that amount of "radio real estate" would be held for our
exclusive use.

Absolutely assinine.

I knew dozens of USMC officers marreid to "foreign nationals" who
not only kept their clearances, but went on to higher accomplishments.

> Along with your wrench
> turner "job" in the Cashew capital of Africa. Since the State

You'll be saying we have to give back the internet 44.x.x.x IP address range next, OM. We could probably get $billions for a Class A allocation like that. Yet we don't do we?

I'm not sure if that was meant for me (no attributes), but no Sir,
we certainly don't have to surrender an internet address....We can
create new addresses as the circumstances and technology allow.

The electromagnetic spectrum is a very finite resource, however,
and we'll be hard pressed to defend some of our allocations with as
little use as they are getting.

I can't speak for you fellows on that side of the Atlantic,
however I know that any use of the bands above 2.3Ghz on this side is
very rare. I think we will be lucky to maintain even sharing
arangements in the future, let alone keep exclusive allocations.

Well history has revealed that radio amateurs were pushed further up the frequency scale simply because they (the authorities) thought it was of no use commercially. Look at Short Wave, it was the radio amateurs who discovered that one could work the world on short waves. Radio amateurs who discovered (or was it invented) SSB. Now of course there are fewer things for us radio amateurs to give the world (for free of course) so our existance is tolerated. However it looks like that tolerance (at least in the UK) is about to be curtailed.

But the skill demonstration should bear relationship to the privilege granted as a RESULT of that demonstration. In other words, USE of Morse should be restricted only to those who have successfully demonstrated their skill. Or to use your example, the USE of Morse should be the carrot offered as a result of passing a Morse test.

But by FCC regulation, a code-free Technician is allowed to use Morse on the air WITHOUT a successful Morse demonstration, and the "demonstrate BEFORE privilege" model is disconnected; ergo the demonstration is not vital to the successful use of the mode and serves no rational regulatory purpose.

>Steve, what's it to you? You have no understanding of MARS.

The planet, the candy bar, or MILITARY Affiliate Radio
System? :-)

"Sorry, Hans, MARS >>IS<< amateur radio."

Poor Stevie still thinks that hams started it and
run it, too.

The United States ARMY started what would become
MARS before WW2. That was in an effort to "get
civilian radio amateurs interested in MILITARY
radio operations. The acronym was formed after WW2
when USAF joined the Army in the system. The last
branch to join MARS was the USN (and USMC by
extension).

MARS has performed well in the 60s to 70s as a
morale booster for the military personnel away from
home, courtesy of many civilian MARS operators (who
have amateur calls) placing telephone calls for them.

However, MARS is definitely still a MILITARY op and
the Department of Defense DIRECTS MARS. Stevie has
been shown the link to the DoD page but he won't
concede to going there and reading it. [he may think

it is a "trick" by others to lead him to a different website] The DoD may be reached by direct, independent search available on all ISPs.

Each military branch maintains their own MARS Hq. For example, the Army MARS headquarters is at Fort Huachuca, AZ. MARS is a regular participant in "Grecian Firebolt" radio networking exercises carried out by GOVERNMENT and MILITARY organizations having intrinsic radio networking ability. Exercises like those can and HAVE been done successfully WITHOUT any civilian volunteer participation. MARS is NOT part of the regular military communications scheme, only a sort of standby which exists primarily for inter-service morale boosting.

Stevie keeps enobling himself by implications of relationship of his amateur status to that of MARS. This is akin to his implications of "participation" in the famous "seven hostile actions." :-)

etc., :-)

Oh my how the LITERALISTS hop in with FALSE "corrections" in
order to attempt making nasty to "opponents."

Notice the little smiley I originally wrote? You two didn't?
Tsk, tsk, tsk, tsk... :-)

With maximum gain, almost ANYTHING will be "heard" on a
radio with NO signals present. If someone WANTS to hear
morse, then, listening to noise, they eventually will. :-)

Note: Check one of Cecil Moore's early postings about
how he (in humor) said he "could hear morse from his
car tires when traveling on rough highways." :-)

Now let's turn back to the good old ARC-5 Command
receivers...which DID have BFOs and thus morse code
beeping capability in the audio output. Look again at
their circuitry. See any "A.F.gain" control in there?
What, couldn't find it? You couldn't, the thousands of
them were NEVER made with any "A.F. gain" or "volume"
control! Amazing!

Only ONE "volume" control, better known as an "R.F.gain"
that changed input amplifier bias. That even included
the original "Q-Fiver," the LF band version of the ARC-5

receiver.

>> >
>> > Well, that depends on the type of RTTY operation and equipment.
While

>>
>> While hams have used pure AFSK with FM at VHF, a BFO or product
detector
>> in the SSB mode is the traditional of RTTY reception. It was also
the
>> method used by USG agencies at HF.

Oh, dear, here comes the Department of State, equating
amateur radio with "U.S. Government agencies!" :-)

Tsk, tsk, then whatever you TWO know suddenly becomes
what "ALL hams" do!! Marvelous.

Commercial and Government users of TTY reception
NORMALLY use "converters" outboard of the receivers.
Those are specifically tailored to detect the FSK
(Frequency-Shift Keying) that is COMMON in RTTY
communications. Those converters (in the generic
sense, NOT as "what hams know" as "converters" to
down-frequency-convert VHF or UHF to HF) usually
have (in older days) some mild analog signal
processing to both clean up the demodulated TTY
Mark and Space for less distortion and to limit
interfering signal amplitude in between Mark and
Space as well as above and below them.

>One of the arguments for keeping some sort of code test is that
>hams do, indeed, use Morse Code. And on HF, they use it *a lot*.

Hams use morse code to sell real estate? :-)

>Now whether that constitutes enough reason to keep the test is
>purely a matter of opinion - but it *is* a reason.

A vapid "reason" considering that the government
does NOT *REQUIRE* any class ham to specifically
USE morse code over and above other OPTIONAL modes.

As Hans Brakob pointed out in another thread, ANY
U.S. class radio amateur CAN use morse code...but
they are NOT REQUIRED to do so.

>As we have often seen, Len constantly minimizes and ignores the
>role Morse Code plays and has played in radio communication.

Oh, oh! Jimmie done said a WRONG THING there!

I've repeatedly pointed out that On-Off Keying, as
by morse code, was THE ONLY METHOD OF USING EARLY
RADIO AS A COMMUNICATIONS MEDIUM!

As the ONLY way to communicate by early radio, I'd
say - and HAVE SAID - that the ONLY way is IT. As
such, it would intrinsically BE the "great part" of
early radio! :-)

Tsk, tsk, tsk, I don't see (and hardly anyone else
"can see") Jimmie maximizing the early SPARK
transmissions as having been a "role" as great as
morse code...:-)

> So it's natural that he'd want to minimize reception of the mode..

Poor baby...can't understand simple HUMOR, can you?
You MUST be the LITERALIST, taking EVERYTHING EXACTLY
as its written!! No possibility of exaggeration as an
essential part of humor. To you two, all things ham
are SERIOUS BUSINESS (even if amateur means not to gain
monetarily from the activity). :-)

>Just a guess. But I don't see him thanking me for pointing out
>his error, or even acknowledging it.

Tsk, tsk, I "acknowledge" only that you wrote what you
THOUGHT was a "correction." It was NOT a "correction."
The "correction" (as it was portrayed with an example
of the original "Q-Fiver" out of an LF Command Set
receiver) was WRONG. There is NO "A.F.gain" on any of
those receivers. With NO such control it is impossible
to "set gain" of it. :-)

What "thanks" does Jimmie Noserve "deserve" in here?

Come back when you've learned to get along with non-
morsemen, general.

Hmmm. Now you answer to "Woger." First you are and then you aren't
Woger.

Well, NotWoger, have you ever taken a look at

http://www.arrl.org/FandES/field/regulations/io/#cept

for further info about international operations? If you're going to
the Italian Riviera again this Summer, perhaps you need to study that
page. As an aside, I recommend staying in or near La Spezia, instead
of one of the Rivera towns. But then, an international man of mystery
like yourself probably knows all about La Spezia, don't you?

Roger will have to propvide it, retarded Nazi, he's probably
done more than you really have.
Fromthe official letter that was once posted at Hap's Rain
Report website, no reason was given for Roger's retest letter of
what, 5 years ago, now? And still nothing else heard from the
FCC on his so-called "actions" on 20 meters, if he is such a bad
"qrmer" as you claim, he'd be in the FCC enforcement letters all
the time or worse. Guess all you whining is just another lie by
the biggest liar on the newsgroup.

Source record: 106552

Amateurs on the Usenet rec.radio.amater.policy are now using the Asshole Radio Relay League (ARRL) FCC Amateur Auxiliary to suppress my right to free speech over the air waves. The Asshole Radio Relay League FCC Amateur Auxiliary apparently has me on a list so their little monitoring stations can monitor my transmission to see if I'm running an informational bulletin so they can send the Gestapo to my house and suppress my right to free speech on the radio, just like the little NAZIS they really are. The reason for the list is because some little cry babies on the newgroup believe that information bulletins can be opinionated and by running a opinionated information bulletin it constitutes "broadcasting"

97.3(A)(25)
Information bulletin. A message directed only to amateur operators consisting solely of subject matter of direct interest to the amateur service.

NO WHERE in that definition does it state an information has to be a NEWSCAST. But, there are asshole amateur's out there that are using their ASSHOLE radio Relay League to suppress FREE SPEECH. It just like the ARRL to SUPPRESS FREE SPEECH!!!

And here's yet ANOTHER lie that Leonard H. Anderson ahs to account
for...

I never said they (Amateurs) started it. You are welcome to try
and locate the post wherein you insist I did.

I didn't say they "ran" it. You are welcome to try and locate the
post wherein you insist I did.

I DID say that without the Amateur Radio service, MARS would not
exist. This still remains true to this day.

> Stevie keeps enobling himself by implications of
> relationship of his amateur status to that of MARS.
> This is akin to his implications of "participation"
> in the famous "seven hostile actions."

I'm not "enobling" myself for having shown that I was a previous MARS member, Lennie. Those are facts. It validates My knowledge and experience in MARS that substantiates my assertion that without Amateur Radio, MARS would cease to exist.

You are welcome to list YOUR MARS callsigns, Lennie, and tell us all about YOUR experiences in the programs....

You have the callsigns and dates I was a member. You may verify my experiences at your leisure.

Tower climbing is not a basic skill so there is no need to test for it. One
can put up a wide variety of antennas without a tower. On the other hand,
I've often thought that a person (unless handicapped) should demonstrate
putting a simple PL-256 on coax.

If anybody wanted to read your dog turd blog, then they would go there.
Why keep posting it here?
As far as free speech goes, accusing people of stuff they haven't done,
such as downloading kiddy porn or posting more crap on your turd site,
well pecker breath, you are stepping way over the line.
I see you took off your list of people that were k1man supporters,
well toady, too late, Rand already saw it and has a copy!
You make post then you fake others nicks and calls and post more
garbage, talk about censorship, you are the queen of that.
So why not just keep your crap on your blog and waste other peoples time
posting the garbage here.

Hey shit head! it not my fault your shitty call sign and his is close so you can go fuck you yourself or perhaps you should fuck asshole buddy Steve. Calling people names, like you and your little sluts on here has done to me, I would call "over the line" too so get over you fucking fat bastard! I never fake a nick you lying sack of shit so why don 't you take a razor blade dildo and shove it up your and your fucking slut steve ass. you fucking poor excuse of a fucking amateur operator. oh and eat shit and die you fucking fat bastard!!!!

and by the way your little slut steve has posted shit off my blog (the complete article) which is copyrighted) again fuck yourselves up your asses with a razor blad dildo you fucking fat bastards

No mistruth, Steve.

You are the one who claimed, "Sorry Hans, MARS >>>IS<<< Amateur Radio!"
Hi, hi!

> As noted previously, Brian, I've been a member of each MARS at
one
> time or another for different reasons,

Wow, I didn't realize that there were different reasons for being a
member. I guess the different services have markedly different
purposes and goals.

and have been in charge of an
> island-wide system on Okinawa for six months.

That would have been funny to see. Can you give us some details of
your "In-Charge" time so that we can verify it? We'll Start with a
copy of your USN MARS license, and a letter from the installation
Commander assigning you such duties. Then we'll need corroborating
information from your customers and subordinates. This will be fun!

> My undersanding of the program, it's history, purpose and goals
> far exceeds anything you or Lennie the Lame can cut-and-past from
> internet URL's.
>
> Steve, K4YZ

We'll let you prove that with the above requested information.

And none of this "Seven Hostile Actions" stuff.

Best of Luck!

involved in an
> SSB version of the stuff you post here don't count.

Roger will have to propvide it, retarded Nazi, he's probably
done more than you really have.
Fromthe official letter that was once posted at Hap's Rain
Report website, no reason was given for Roger's retest letter of
what, 5 years ago, now? And still nothing else heard from the
FCC on his so-called "actions" on 20 meters, if he is such a bad
"qrmer" as you claim, he'd be in the FCC enforcement letters all
the time or worse. Guess all you whining is just another lie by
the biggest liar on the newsgroup.

Perhaps you'd like to ask somebody who give a fuck about what
you request. I don't have to qualify myself to you or anybody
else, Nazi. Nobody has to give information because you ask for
it, Nazi.

5082. Good morning or good evening depending upon your location. I want to ask you the most important question of your life. Your joy or sorrow for all eternity depends upon your answer. The question is: Are you saved? It is not a question of how good you are, nor if you are a church member, but are you saved? Are you sure you will go to Heaven when you die? GOOGLE·NEWSGROUP·POST·147

Newsgroup: rec.radio.amateur.policy

Cross-posted to:
autodesk.autocad.customization,rec.radio.amateur.policy,alt.infertility.parenting,uk.rec.cars.misc,alt.support.mult-sclerosis

The reason some people don't know for sure if they are going to Heaven when they die is because they just don't know.

The good news is that you can know for sure that you are going to Heaven which is described in the Holy Bible as a beautiful place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is to be saved so that we can live forever with Him in Heaven.

"For if you confess with your mouth Jesus is Lord and believe in your heart that God raised Him from the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth in the person of Jesus Christ to shed His blood and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to a virgin Jewish woman named Mary and lived a sinless life for thirty-three years.

At the age of thirty-three Jesus was scourged and had a crown of thorns pressed onto His head then Jesus was crucified.

Three days after Jesus died on a cross and was placed in a grave Jesus rose from the dead as Jesus said would happen before Jesus died.

If someone tells you that they are going to die and in three days come back to life

again and it happens then this person must be the real deal.

Jesus Christ is the only person that ever lived a perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds) with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have redemption through His blood, the forgiveness of sins..." (Ephesians 1:7)

If you would like God to forgive you of your past, present and future sins just ask Jesus Christ to be your Lord and Saviour.

It doesn't matter how old you are or how many bad things that you have done in your life including lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven with You when I die. I agree with You that I am a sinner. I believe that You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins and that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thanks Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God to save you. Now you are a real Christian and you can know for sure that you will live in Heaven forever when this life comes to an end.

As a child of God we are to avoid sin(wrongdoing), but if you do sin the Holy Bible says, "My dear children, I write this to you so that you will not sin. But if anybody does sin, we have one who speaks to the Father in our defense Jesus

Christ, the Righteous One."

Those of you that have not yet decided to
place your trust in the Lord Jesus Christ
may never get another chance to do so
because you do not know when you will die.

Jesus said, "I am the way, the truth and
the life: no one can come to the
Father(God)(in Heaven), but by me."
(John 14:6)

This means that if you die without
trusting in Jesus Christ as your Lord and
Saviour you will be forever separated from
the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of
eternal torment, suffering, pain and agony
for all those who have rejected Jesus Christ.

The good news is that you can avoid Hell by
allowing Jesus Christ to save you today.
Only then will you have true peace in your
life knowing that no matter what happens you
are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ
Ronald L. Grossi

*Show this to your family and friends so
they can know that they have a choice
where they will spend eternity. Thanks!

I'm going to advocate it during the next NPRM.

but
> if it were, then I'd suggest there would be questions relating to the
proper
> safety techniques of doing such a job,

No questions. They need to climb a 60 foot tower, haul up the coax and an HF-tribander, fasten it, point it north, and make the connections.

wherein "actual" "physical"
> demonstration is not needed nor required.

But it is. Otherwise, how would we know they could do it?

Given that - a wheel chair bound
> person "could" pass those parts of an exam. I can't fathom tower climbing
> becoming a major issue.

Yet Morse Code has become a major issue. Just because not everyone is going to have a tower is no excuse for not being able to demonstrate the ability.

The Somolian judges gave this a 9.8 on the Olympic Troll-O-Meter,
but they were over-ruled by the umpires in instant replay, who
award it a 2.6

The Somolian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious.
It was poorly written, poorly executed, and was so incredibly
lame as to lack the true drawing power of a really masterful
troll. Maybe as high as a 3.3 for the intense stupidity of the
premise, but a 9.8? Never! The Somolian judges tear their
hair out, throw their balalaikas down in dismay, and perform
the traditional Somolian Dismay Chant! They demand a recount!

Recount denied.

There's an old adage out there which applies here, "Use it or lose it".
There's no point to complaining about losing allocations if we don't
use them. Which is the case with 24Ghz and we did it to ourselves.

&#65533;97.1 Basis and purpose.

The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:

. . . . . (b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.

Which is a more valuable "Use" of spectrum.... 5,000 appliances operators on wall-to-wall Lumbago Nets on 75-meters, or 5 guys designing world-class antennas and low-noise preamps in order to work the EME path on 24-Ghz?

> done more than you really have.

Do an internet search on Roger Wiseman, AB8MQ or KC8JBO. That'll reveal
that Roger is known only for 1) being in hot water with the FCC and 2)
posting filthy rants in newsgroups. He's quite the asset to amateur
radio.

> Fromthe official letter that was once posted at Hap's Rain
> Report website, no reason was given for Roger's retest letter of

> the time or worse.

Roger now keeps a very, very, very low profile on the air--for good
reason.

> Guess all you whining is just another lie by
> the biggest liar on the newsgroup.

"You whining"? Your claim of lies rings quite hollow from one who must
hide behind anonymous remailers. Now if you had the courage of your
convictions, you'd use your name and stand behind your statements.
You can't do that.

> > Would you care to astound us with your contributions to your

> it, Nazi.

You're absolutely right. Nobody has to do so. You being a stand up
guy, I thought surely you'd want to let us know what you'd done with
your life. That you choose not to do so just makes your claims look like
sad, plaintive cries in the night. Off to the rest of the cockroaches
with you.

: right to free speech over the air waves.

Tedd,

You need to understand some definitions before you spue such nonsense,
especially the difference between "Free Speech" and "Lawful Speech".

QRM'ers - Those who by their own consensus reality, set
themselves apart from and superior and use
this illusory superiority to restrict or censor any others
attempts at communication through. Rarely identify
themselves.

Censorship - The attempt, successful or not, by an arbitrary set of
human beings to remove the ability of any other arbitrary
but disjoint set of human beings to perceive the intended
Message of a human being.

Community - Any arbitrary group of human beings who gather together
for one or more purposes. Synonym for Mob.

Control - Regulation of activity and content. That which should only
be applied to oneself. The need to control others is a
dishonorable symptom of the failed need to control oneself.

Ethics - Rules of conduct which appease and satisfy one's own true self.
Sometimes directly opposed to Morals.

Freedom - The ability of a person to execute any arbitrary action that
the person desires.

Free Speech - That speech which does not conflict with Ethics.

Lawful Speech - That speech which does not conflict with Morals.

Mob - Any arbitrary group of human beings who gather together for
one or more purposes. Synonym for Community.

Morals - Rules of conduct which appease and satisfy a Community.
Sometimes directly opposed to Ethics.

Obligation - Required action due to previous agreement or
condition. This is what most people call "responsibility".

Responsibility - A voluntary state of awareness, which results in
actions for the highest and best good of one's self.
Also, your ability to respond. Responsibility can
never be coerced or enforced, but must always be a
free choice.

Extra credit if they can do it without melting the
dielectric insulation of the coax. More points if they
can get the solder to actually flow onto the connector body
where the shield solder holes are located (helps if you
use a small file to remove the plating first).
And more points if they remember to put the shell on the
cable in the correct direction before doing any soldering ;-)

You didn't "fet" my original question, Todd...Who listens to your shows anyway? Five folks, Todd. Can't name any?

And W1AW gives me information I can use. They are also the agency the FCC goes to when there are "communications emergencies" to be broadcast.

N9OGL is NOT the "agency" they go to in order to get that information out.

You do not possess the resources to do what W1AW does. You're a make believe broadcaster with a chip on his shoulder.

Or they could demonstrate extra skills and just use crimp on PL259's like I do. These are much easier and more reliable. They are more expensive but their construction is superior.

My original comment was directed at Dee offering points for something called a "PL256".

I used to tin the braid then use a small tubing cutter to trim the shield to the right length. I used a drill to remove the plating from the holes and file all the chrome off between the holes. I tinned the center conductor and put a drop of liquid RMA flux on the center conductor and the braid before I put the coax into the plug, then soldered all four holes and the center pin. I didn't melt the dielectric, and you couldn't pull the coax out of the plug. I also used my Sprague TO-6 to put a couple hundred volts across the cable to make sure there were no loose strands waiting to short out. I had Hams and CBers tell me my cables were too expensive but they kept coming back to buy more to replace other bad cables, and they started sending other people to me, as well.

I had someone bring me a cable he bought somewhere else. He said it was "Kind of lossy" No wonder. It was a dead short at one end. He didn't want two new plugs so i walked out the door to my truck and raised the hood. I touched the center pin of one plug and the sleeve of the other plug across the battery. Smoke and flames came out of one plug. A true "Quick & Dirty" test that never fails to find the shorted plug.

Brian has a dream. Yes, he does!

Once Brian can garner some backers he has a plan to open a fireworks stand right there on the outskirts of Taylorville.
Todd is well qualified, too. After all, he graduated from VisionWay Christian School and came away with all sorts of business acumen.
Besides. With a fireworks stand he won't have to worry about his grammar and once he makes a few dollars his daddy can tell Toddie-Boy to get out of Taylorville.

(Todd won't go, though. Apron strings are very hard to cut)

And the chickenshit, psychopathic momma's boy from West Vagina spews yet
more filth.

Wogie, you are not worth the toilet paper it takes to clean Lloyd's
butthole.

Low-life scum such as yourself lead very lonely lives. You know what I mean.

You have nary a single friend in the whole world ("hole" as you spell it)
and your pathetic existence is punctuated by occasional malicious forays
into the newsgroups where the only attention you get is shameful.
You obviously lack the attention you wished you would have had as a child,
but being a 49 year old psychopath is not going to bring back the childhood
you missed.

Castigating others will not bring back your Father. He left you a long time
ago, and probably for good reason. Denigrating the families of others will
not bring back your wife and kids. They left you a long time ago, too. And
for good reason.

You, Curtains Boy, are a pathetic excuse for a 49 year old "man." Life is
very obviously lonely for you.

For whatever good it may do Wogie, we the undersigned will keep you in our
prayers.

Tsk, tsk, tsk. The UNITED STATES ARMY said that THEY
started MARS. I just repeated it. No lie at all. :-)

Don't get too angry with those typos like "ahs."

Or is that some kind of TN accent?

>and locate the post wherein you insist I did.

You ARE going to say that at the end of your "reply."

> I didn't say they "ran" it. You are welcome to try and locate
the
>post wherein you insist I did.

Tsk, tsk, tsk...YOU said "MARS >>IS<< amateur radio."
Put that way, the only interpretation can be that
MARS is "all" about amateurs. It isn't.

> I DID say that without the Amateur Radio service, MARS would not
>exist. This still remains true to this day.

Untrue. MARS did NOT "begin" with amateurs but rather
the U.S. military. The ARMY to be exact.

MARS exists because the DoD says that MARS exists.
Each major branch of the U.S. military maintains
their own MARS headquarters. MARS continues to
function with or without any civilian volunteers.
That is referencible by documents outside of the
ARRL. [the ARRL does not run MARS]

> I'm not "enobling" myself for having shown that I was a previous
>MARS member, Lennie. Those are facts. It validates My knowledge and
>experience in MARS that substantiates my assertion that without
Amateur
>Radio, MARS would cease to exist.

MARS was formed by a few members of the U.S. Army
prior to World War II. The purpose of this small
Army function was to get civilian radio amateurs
interested in military communications and "possibly"
contribute to the state of the art of military
communications. That was a rather grandiose view of
the few in that first MARS organization (under another
name then). In the main, the remainder of the military
(wisely) considered themselves and their mission to be
of importance, especially in the growing hostilities
around the world in the 1930s.

There is enough referencible material on the history
of military radio to show that there was LITTLE
influence on military communications by the few
amateurs who had volunteered to be a part of this
Army experiment. The major part of the experiment
was focussed on Public Relations, NOT on the civilian
volunteers actually being any part of military radio
(the military had enough paid civilian employees for
that purpose).

After World War Two, and just after the split-off of
the Army Air Corps to form the United States Air
Force, the new USAF combined with the USA and changed
its name to the present MARS or MILITARY Affiliate
Radio System. Eventually the USN joined in that.

The role of MARS focussed now on the morale issues of the widespread military spread beyond our shores. The "phone patches" became a regular part of civilian volunteer efforts as well as the "radiograms" forwarded when voice telephone contact could not be made. That was an excellent service to our military at the time.

By the 1980s the needs for any "phone patches" were dwindling rapidly. One reason was improved means of communications for military personnel off-shore. By the mid-1990s the DSN had spread to U.S. bases off-shore and was growing at an amazing rate. The DSN or Digital Switched Network has been described as "the government's own Internet" and functions the same. A major difference is that the DSN can connect directly to the Internet and it is possible for individual service members in many locations to communicate directly with their family and friends back home. Computers have become a part of military operations.

The mission of MARS had shifted to become a sort of liason between the military and other government agencies. That served its original post-WW2 role as a sort of back-up system, an actual affiliate. An affiliate is NOT part of the day-to-day military communications system but can "work with it." That MARS can function on its own, without civilian volunteers, has been proven in the previous Operation Grecian Firebolt annual military-government exercises.

> You are welcome to list YOUR MARS callsigns, Lennie, and tell us
>all about YOUR experiences in the programs....

"Experience" is NOT a requirement. There is much history of MARS available to anyone who will bother to look beyond the PR of the ARRL. The Fort Huachuca, AZ, military website is a good place to investigate for information. Huachuca is mainly the Army's Military Intelligence School as well as a hub of military communications. Huachuca also trains UAV teams for unmanned aerial reconnaisance (what UAVs are designed and operated for) and other M.I. skills, including the center for the last morse code cognition (receiving only) schooling for the entire U.S. government. MARS (Army) Hq is a small part of the sum total of Fort Huachuca activities.

As to actually "working with MARS," station ADA had one 1 KW FSK RTTY transmitter on tertiary priority for the MARS facility at Far East Command Headquarters in Tokyo in the early 1950s. First priority was to the FEC Commander's aircraft should he be aloft. Secondary

was to back-up of either Anchorage or Seattle radio
circuits, depending on traffic needs. I don't recall
any time that the MARS facility at Pershing Heights
was actually granted use of that one transmitter between
1953 and 1954; they had asked often enough but Control
had the final say. By late 1955 the MARS facility was
moved to Hardy Barracks and they got their own tri-
bander and (perhaps) a better transmitter; Pershing
Heights was given back to the Japanese (it was their
old War Ministry) and the ADA transmitter site increased
to 43 transmitters from 36 and relocated to Camp
Tomlinson (a converted airfield) NE of Tokyo. MARS
messaging had to use regular TTY routings, again in
low priority, even being behind the Red Cross messages
carried over RUAP (the TTY node name used then).

> You have the callsigns and dates I was a member. You may verify
>my experiences at your leisure.

Irrelevant. MARS existed before Stevie existed. The
DoD DIRECTS MARS. The major service branches all have
their MARS Hqs and all supply information on their
activities. The Army Communicator (from Fort Gordon,
GA) and SIGNAL (from AFCEA, the military-civilian
Armed Forces Communications-Electronics Association)
both have published information in those periodicals.
[archives are available for viewing at their
respective websites] MARS is a *small* part of
military communications, not in the mainstream. The
AFRTS is much bigger and DOES have an extraordinary
number of civilian volunteers (primarily from the
entertainment industry). MARS works with SHARES, the
SHAred RESources of the government insofar as government
radio stations exist (2500 give or take, not part of
AFRTS and not part of regular military communications
nor part of regular civilian-government DSN, AUTOVON,
AUTODIN. et al networking).

As to "Mars," the planet, I've been privileged to view
real-time (in solar system time terms) data and video
arrive from the first successful Mars lander at JPL.
A super-tense time (years before the little rovers)
since that was a definite FIRST then.

Nice warmy fuzzy regulatory platitude conjured up back when amateur radio was a major player in what was back then considered the DC to daylight RF spectrum. Which is obviously no longer the case. Back when ham radio actually made some noteworthy contributions to the state of the RF comms arts. When was the last time that happened? 1920?

> Which is a more valuable "Use" of spectrum.... 5,000 appliances
operators on
> wall-to-wall Lumbago Nets on 75-meters,

No counter, apples and oranges, has nothing to with "use or lose". The HF ham bands are not under any particular allocation threats today because (in the U.S) the Verizons, Nextels and (globally) the "public interest" no longer have big (if any) stakes in the HF spectrum so no sweat for the GeezerNet allocations. Let 'em roll, nobody cares including the regulators.

But as has been clearly demonstrated any number of times since WW2 the ham bands above 50 Mhz have been increasingly threatened species as the stakes have moved up the spectrum and have grown exponentially to the point where ham radio is now barely a bit player on frequencies above 470 Mhz. The dumbest strategy we could lean on to our preserve our

allocations is to depend on our long since worn out old 97.1b nonsense and it's equivalents in the US/UK/EU/ITU etc.

The only real defense we have today for retaining our high bands is occupancy, the potential for emergency ops and a lot licensed voters screaming at the regulatory agencies about screwing with our hobby. Screaming oddly enough seems to work to at least some extent as witnessed by the impact ham radio had on the recent brawl over BPL/PLC here in the States.

> or 5 guys designing world-class antennas
> and low-noise preamps in order to work the EME path on 24-Ghz?

EME has been around since 1947 and nobody has shown a bit of interest in commercializing it 24 Ghz and otherwise. As you well know nobody "needs" to use a half million mile bounce path to work down preamp noise figures on any frequency.

That's a hell of a lot of messing about and time consuming too. A crimp on PL259 for RG58 series or RG213 series cables would take about 2 minutes to install, no soldering, no chance of heat damage, no shorts and they can be fitted in the field.

Brad.

Bed Time Story

By Roger Wiseman

Last night, Friday, I had a dream. It was not your every day dream so far as those go.

I was relaxing in my single wide bed while looking at the newsgroups for someone to harass. Darned if I didn't come across Lloyd Davies once again! (or at least someone who looked like him)

Of course I have been stalking Lloyd for years, and I was quite pleased to see him on the Newsgroups.

I popped up from my lonely mattress and immediately began pounding upon my Wal-Mart keyboard. Imagine my excitement! Here I was, Loser Roger, wasting a perfectly good evening when along came Lloyd! Imagine my excitement! I couldn't get off my crusty mattress quick enough!

I quickly logged on to the nearest anonymous email service and began furiously pounding away on my keyboard. I had so much to say and so little time..too many newsgroups and so little time.

I began by regurgitating the standard Roger Wiseman filth.you know the role. I cuss a lot but say little.

Then I spent a few minutes searching the Web for personal information to post about others.

When that failed I had little recourse but to fall by the standard retorts, such as calling Lloyd a "Lardass" and calling other posters "Nazis".

I can't help myself. Sometimes the voices in my head take control and I can' t stop it.

Yes, I sometimes poop on the floor but the voices tell me to do so. I only do what the voices tell me.

I used to take Thorazine. I really did. I pay about four dollars per pill. I found out that I can make a few bucks ...I sell the pills to the area kids and make enough to pay my utilities with a little left over.

Of course without my meds I am a Social Misfit.a psycho.a Cork Soaker..

And to top it off? I am not Roger.

This is Toiddie's doing, no doubt.

It only lends more credence to the assertions I've made as to his
maturity (lack of, actually...)and responsibility (again, lack of...).

It's things like this that give very good arguments to the
suggestion that there must be limits on "free speech".

> Are these a few of your fantasies toad?

You missed the "vacuum cleaner" pic, Jim. This boy is even more
perverted than I would ahve given him credit for.

> ###es with a razor blad dildo you ####ing fat bastards

Sorry, Todd...Your blog is not "copyrighted"...And even if it
were, you've been given complete and unequivical credit for anything
that was cited.

Good luck.

Steve, K4YZ

> with NMC MARS calls and not AFMARS calls, and vice-versa.

That is such a thin, thin difference, but when you have nothing else, you'll say and do anything so as not to be wrong.

So what was the reason you were a MARS member the first time? The second time? Was there a third time?

> > and have been in charge of an

So you say.

> > And none of this "Seven Hostile Actions" stuff.
>
> That happened too. It's just not pertinent to this forum.

But Steve, you're the one constantly saying that if you can't post documentation, it didn't happen. Were you lying then or are you lying

now?

Hmmm? Which number lie would that be?

> > Best of Luck!
>
> No...best of luck to YOU...explaining how you didn't see those
> callsigns, dates, locations I already gave...

I try to avoid your record number of meaningful exchanges with your new playmates from rra.misc. Did you include the letter of appointment from your Commander?

> You're such a putz, Brain.....

Name calling, again? So much for meaningful Extra Class discourse. You do your fellow Extra Class amateurs and the ARS proud. ARRL member, too?

> Do an internet search on Roger Wiseman, AB8MQ or KC8JBO. That'll reveal
> that Roger is known only for 1) being in hot water with the FCC and 2)
> posting filthy rants in newsgroups. He's quite the asset to amateur
> radio.

I can't be bothered. Since your "opinion" of him carries about as much weight with me as it does with evberybody else but your toadies. His "hot water with the FCC" consists of a warning letter from 1999, which may or may not indicate anything, a cautionary letter to him and another ham not to carry online arguments on the air again from 1999, and a retest letter which Roger passed from 2000, all from 5 years ago. Can't find anything recent, though, can you? Why is that? If he is such a "qrmer" as you assert, why hasn't he gotten any more letters? Your reasoning is flawed, like you.
And his "filthy" posts are not half as bad as your posts, or others. You sure do like haveing the old Nazi spirit alive, don't you?

> Roger now keeps a very, very, very low profile on the air--for
good
> reason.

Not so. You just can't find him on the air. But with work and other things, he probably has better things to do that stay on the radio 24/7. Isn't have a balance what is in your amateur code? You probably spend more time on the radio than with your family. I can't blame them for encouraging that.

> "You whining"?

Typo, Nazi. "Your whining." Is that better for your narrow mind?

> Your claim of lies rings quite hollow from one who must
> hide behind anonymous remailers. Now if you had the courage
of your
> convictions, you'd use your name and stand behind your
statements.
> You can't do that.

The only thing ringing hollow is your own pompousity echoing in your hollow skull. I stand by my convictions, and others who use anonimity who agree with you, you have no problem with them using "anonimity." Are you like Nursie, using a double standard?

> You're absolutely right.

I'm glad you can see that, finally.

Yes, you have.

And you have lied when you have stated that I said Amateur Radio operators started MARS. I am still waiting for you to produce the post wherein you think I said otherwise.

> Don't get too angry with those typos like "ahs."
>
> Or is that some kind of TN accent?
>

Still waiting, Lennie...Of course "we" know it won't be coming
since it never happened...

> > I didn't say they "ran" it. You are welcome to try and locate
> the
> >post wherein you insist I did.
>
> Tsk, tsk, tsk...YOU said "MARS >>IS<< amateur radio."
> Put that way, the only interpretation can be that
> MARS is "all" about amateurs. It isn't.

No, that's not "the only interpretation". That's YOUR
interpretation...it was wrong today, it was wrong yesterday, and it
will be wrong tomorrow.

> > I DID say that without the Amateur Radio service, MARS would
not
> >exist. This still remains true to this day.
>
> Untrue. MARS did NOT "begin" with amateurs but rather
> the U.S. military. The ARMY to be exact.

It doesn't matter HOW it STARTED...It's what it is today.

> MARS exists because the DoD says that MARS exists.
> Each major branch of the U.S. military maintains
> their own MARS headquarters. MARS continues to
> function with or without any civilian volunteers.
> That is referencible by documents outside of the
> ARRL. [the ARRL does not run MARS]

DoD's enabling documents allows MARS to exist as long as it
doesn't put any significant drain on funds or manpower.

At present, more than 90% of all MARS membership is civilian
Amateur licensees.

> > I'm not "enobling" myself for having shown that I was a previous

> Amateur
> >Radio, MARS would cease to exist.
>

> MARS was formed by a few members of the U.S. Army
> prior to World War II...

Snip...

Yet another history lesson for you to duck behind does not change
current events, Lennie.

No Amateur Radio = No MARS.

> > You are welcome to list YOUR MARS callsigns, Lennie, and tell
us
> >all about YOUR experiences in the programs....
>
> "Experience" is NOT a requirement.

Sure it is, Lennie...

You must have "EXPERIENCED" getting an Amateur license before you
can be an enrolled member.

Your cut-and-paste history lessons keep you busy, Lennie, but AS
USUAL, you don't have all the FACTS.

> > You have the callsigns and dates I was a member. You may
verify
> >my experiences at your leisure.
>
> Irrelevant.

I always love it how YOU can say that actual, relevent experience
is IR-relevent, yet when anyone a day younger than you speaks up on any
historical item of radio, you nay-say it as false since we could not
have known...!

> MARS existed before Stevie existed.

MARS existed before Lennie existed, too.

The difference is that Stevie has several YEARS of experience in
MARS. Lennie does not.

More, "I'll dodge behind this" stuff snipped.

> As to "Mars," the planet...(SNIP)

Yes, I did.

And you're the one who keeps quoting it out of context as if it
were something like "...they chased all the Techs away" or something.

Hardly a "thin difference", Brain.

> So what was the reason you were a MARS member the first time? The

Obviously not. You not only missed or ignored the posts I was addressing earlier, you've done nothing to go back and fill yourself in.

> > Callsigns, dates and locations were given in another thread just

Sure...You just ignore posts unless you think you can let a zinger of your own fly...

Of course, what you've done for THREE POSTS now is demonstrate that you're inept AND lazy.

> > Feel free to research my duty assignments during those times.
>
> Kindly repost them here.

Find them yourself, Brain. It's only been two days.

> > The "above requested information" was posted in RRAP this week.

It has nothing to do with any memberships or licensures, Brain.

It has to do with you being a demonstrated putz.

Now...about all those Techs that have been allegedly chased
away..by who and where...???

Solderless connectors for RF applications? A quick fix for sure but not a lasting one! The only crimped connector I've ever seen work is the cable TV connectors and the center conductor us used directly.

Hey Mike, Don't rule all Hams. I will agree that most look down their noses and anyone with a lesser class of ticket and none at all is even worse but there are some that are helpful and knowledgeable in their field. I would guess that most hams don't know sqat anymore. Store bought radios and cables and antennas really are the problem here. Everyone operates and yaks about the weather and their latest hemmroid attack but no one know how to fix a broken radio. Heck, I even saw a post from a Canadian Ham that wanted some one to align his Heath stuff, How easy can you get and yet he can't do it or won't even learn how to do it.

My mentor in the 60's in Ham radio is now long dead but when that man taught you something it stuck and we built some of the most God awful

transmitters and regen receivers but they worked and the knowledge stuck.
His motto was "Why buy it when you can build it" and he built everything he used on the air too. People looked down on him too as he held a Conditional class back then.

That's not what I said, Todd.

I said the ARRL is the Agency that the FCC goes to when it needs
to get communication's emergency messages out.

That is absolutely true.

I did NOT state who could be that provider.

> > You do not possess the resources to do what W1AW does. You're a
> >make believe broadcaster with a chip on his shoulder.
>
> you don't need a lot of money to run an information bulletin, but

Of course you're not. You'll continue to offer your once-a-week
disc jockey wannabe "show" with information that is of no use to anyone
since it's probably already a week old.

W1AW, on the otherhand, provides THEIR bulletins several times a
day, on multiple bands and in multiple modes. You'll hear W1AW unless
the ionosphere is torn away or there is an EMP.

> Since you don't want to

Crimp on RF connectors have been used for decades, BNC, TNC and N
connectors, good to 1.5GHz, UHF connectors to 500MHz. Used in most avionic
and military applications. (many of the connectors have a mil p/n) The crimp
forms a cold weld which is better than solder and more reliable considering
that the crimp tools are calibrated.

http://www.radiall.com/vdocportal/portal/template/application/app/radiallWebSite?pageId=03
0-00000q-002&categoryId=382831

Download the BNC catalog, go to Page 12 for a sample of BNC crimp on
connectors. The UHF's are similar.

Brad.

Oh, is that a new kind of connector? I like using PL-259's on
coax myself! :)

Yup, some days I can't type. The crimp on would also be an option since I
did (purposely) phrase it as install it. In either case, the pass/fail
criteria would be continuity with no shorts.

As with anything else, there are both advantages and disadvantages. The
crimp on ones seem to be more prone to having a shorter life. Why, I don't
know.

Unfortunately too many of the installations are sub par. When I have
purchased antennas that came with crimp on connectors, such as many mobile
antennas, I've had to replace the connector in under a year.

The answer for that is to nail yourself some higher income. Barring
that, here's a url where you can locate a roommate:

http://www.roommatenation.com/cities/IL_Taylorville_Illinois.asp

By the way, it lists the median rental cost in Taylorville as $418, not
"extremely high" by any means.

It certainly looks like MARS has always been centered around amateurs even from its inception if you read the brief history on the MARS website.

In addition, if a person bothers to look at all the initials, the second word is AFFILIATE. So when anyone homes in on the first word, they are missing the effect of the subsequent modifiers and thus the meaning of the phrase.

Hint: I doubted you'd do so. You already know what would be found.

> Since your "opinion" of him carries about
> as much weight with me as it does with evberybody else but your
> toadies.

It has nothing to do with my opinion. It has to do with what a Google search reveals.

> His "hot water with the FCC" consists of a warning
> letter from 1999, which may or may not indicate anything...

May or may not reveal anything? Why do you believe you were sent a warning letter?

> ...a cautionary letter to him and another ham not to carry online
> arguments on the air again from 1999...

Why do you think that one was sent?

> and a retest letter which
> Roger passed from 2000, all from 5 years ago.

Why do you think the retest was mandated?

> Can't find
> anything recent, though, can you? Why is that? If he is such a
> "qrmer" as you assert, why hasn't he gotten any more letters?

I'd guess he'd have to be a bigger fool than is commonly supposed to tempt fate, don't you, Roger/UnRoger?

> Your reasoning is flawed, like you.

My reasoning in suggesting doing the Google search? Why not offer up a few of the positive things your good friend Roger has done with his life?

> And his "filthy" posts are not half as bad as your posts, or
> others.

Sorry, that is totally incorrect.

> You sure do like haveing the old Nazi spirit alive,
> don't you?

I have no affiliation with the National Socialists nor AARP.

> > Roger now keeps a very, very, very low profile on the air--for

> > reason.
>
> Not so.

So.

> You just can't find him on the air.

One can't find what isn't there.

> But with work and
> other things, he probably has better things to do that stay on
> the radio 24/7.

I'm sure "he" is long on other things and short on work.

> Isn't have a balance what is in your amateur
> code?

"Have a balance"? No, I don't find that in "my" amateur code.
I have many interests, UnWiseman. Amateur radio is but one of them.

> You probably spend more time on the radio than with your
> family.

Then again, you'd have no way of knowing.

> I can't blame them for encouraging that.

Then again, you know nothing of them.

> > "You whining"?
>
> Typo, Nazi. "Your whining." Is that better for your narrow mind?

Just remember it the next time you go on about one of my errors.

> > Your claim of lies rings quite hollow from one who must

> statements.
> > You can't do that.
>
> The only thing ringing hollow is your own pompousity echoing in
> your hollow skull.

> I stand by my convictions, and others who use
> anonimity who agree with you, you have no problem with them
> using "anonimity." Are you like Nursie, using a double standard?

If you stood by your convictions, you'd have no need to hide behind
anonymous remailers. You previously used your call as part of your
email address and you got tossed from several ISP's as a result of your

warm and friendly manner.

Your statement (above) is one of the most convoluted pieces of work I've ever encountered. As to "anonimity", I'd let you slide but one doesn't often make a typo twice. The word is "anonymity".

> > You're absolutely right. Nobody has to do so. You being a stand

It isn't supposed to be but unfortunately devolves into that all too often.

Its intended purpose is to debate issues such as Morse code testing, proposed regulation changes, etc. Or even topics was to what is or is not an information bulletin.

However, there are some childish people who must immediately resort to lies and/or vulgarity if challenged rather than being able to debate. When people are in the flame war mode, there are quite a few who choose to stay out of the conversations until people settle down again.

> Dee D. Flint, N8UZE

Dee, I have worked in broadcast and manufacturing. 95% of the failed
RF connectors I've seen were crimped. I've never had a soldered PL259
come off after I started using the described method. The assemblers at
Microdyne were required to put completed crimped cables into a fixture
that applied the manufacturer's specified tension on each crimped
connector. Most of the SMA we used were still soldered, either on flex
or semi-rigid cable. In 30 years I have only seen a few cracked solder
joints on semirigid, and that was on N" connectors in Collins 4 GHz
Satellite TV receivers. Over half of the units I repaired for United
Video Cablevision had bad solder work on the RF input connectors.

I was at a hamfest a few years ago and bought a box full of PL259
connectors that were cut off bad cables. I used needle nose to pull the

insulation out and held the shell over a propane torch a few seconds and dropped it on the bench to remove the loose stands and old solder. After they had cooled I did the center pins that way. No damage to any of them and all were nicely tinned for re-use.

I flee ARES meetings in fear.

I cringe behind curtains when someone drives down my street.

I spew filth from behind anon remailers.

I am unwelcome at ham radio gatherings in my community.

I inherited my 800 sq ft tin roof hovel from my adoptive mother.

I survive on SSI but have this "job" which allows me to be on
Usenet 24/7.

Riley has cited me numerous times for malicious qrm on 20 meters.

I think Stagger Lee is seven, no eight different people.

I was cited by city code inspectors for blocking the public
sidewalk with antenna wires.

"Lloyd" is an imaginary person whom I call Tubby.

I have no friends.

A retired State Dept. ambassador in my community is the
cause of all my problems.

I didn't make the cables one at a time. I would make dozens and it
went very fast because I did it like a small assembly line. Not only
that but people paid about $3 per connector I installed than anyone else
in the area wanted. I could make about a dozen cables in an hour, back
when I was in the RF business. I didn't make, or use RG58 cables. Only
RG-8 or 213. I have to find the right connectors for the teflon coax I
have in the shop. I think its two spools of RG-179 and a spool of
RG-400

Who says you can't get a shorted cable with crimp connectors? I've
seen plenty of shorted cables with crimped connectors.

Has to be one or the other, Steve.

> It's here already...this week...Show some initiative and find
> it...

Documentation, Steve, documentation. Simply saying you did something
is not documentation. Scan in your license(s) and your appointment
letter.

> > Hmmm? Which number lie would that be?
>
> Number none.

No, no. You're up to about #27 or so.

> > > > Best of Luck!

Actually, you're right. It has everything to do with your personality
defect.

Now post your documentation.

No, Secret Lardass. I didn't, Roger did. And he still passed it.
You have yet to advance beyond the training wheel beginner's ham
license.

> The FCC doesn't make you retest just for the fun
> of it.

They can make you retest at any time, if you were first tested
under the VE system.
Why wasn't a reason given in the FCC letter. It was posted at
the Rain Report at one time, say 5 years ago when it happened?
And all you can think about is what happened 5 years ago, and
you call Roger obsessed?

What is "think think,?" above, you never did answer.

> What is this AKA stuff? You don't have a clue who you are

"Just because YOU don't know how anonymous remailers work, doesn't mean everybody else does, imbecile." Roger Wiseman

"pompousity" Oops! Darn that keyboard, anyway!

"suergery" That is Devry for ya.

"aditting" Darn those typos!

"abckpedals" His greasy hair got in his eyes again

"shreeched" Wasn't he the guy in a sit com? Screech?

"stuid" Pot calling the kettle black?

"heared" That's West Virginia for heard.

"assuslted" Rog just makes em' up as he goes along.

"experieince" Oh, DUH!

"abouve" Is this a French word?

"Cosast" Some place by a body of water?

"mebership", Just a typo, right?

"retqards" Regards or Retards? Who can tell?

"coordinbator" Huh?

"Realy" Really?

"Nitoiced" Keyboard error or stupidity?

"Becasue" Well...

"Licence" Roger had to test twice for his license.

"Convienince"

"Myabe" Or then again, maybe not.

"occurance" Say what?

"srtuggling"

"definatrely"

"delapidated" What a dufus.

"picutre"

"permenatly" Ebonics again?

"Arest" You need a rest, Wogie.

"Sentenceing" No comment.

"Narcotices" What?

"Undre" Is this a city in Germany?

"Surgeoun" And this would be?

"Commuications" Who is laughing at who?

"Ovre" Ovre and out!

"Wondreful" It's a "wondreful" day in the neighborhood?

"Derivitave" Still no spell-checker, eh?

"You lose, shit for brians." Woger showing who real loser is.

"Deisowned" Deis what?

"Deeppest" Roger strikes again.

"Dodgeing". Is he talking about a car?

"Staedy" Steady?

"Linme" Transmission line?

"Getr" Nobody knows.

"Experieince" Wogie is good, ain't he?

"Appropiate" What kind of opiate?

"Laywer" Lay what?

"Visitpors" You never have any, ergo you don't know how to spell it.

"It's "complaintant," you sniveling weasel." (Roger Wiseman on spelling complainant.)

"Irreevant" Good going, Wogie.

"Forwared" Forward HO!

"Glady" Glad Bags?

"Neighborhod" It's a wonderful day in Wogie's neighborhood.

"Mena" Mean? What you mean, Wogie?

"Notr" Not?

"Sassifyed" ALA Rolling Stones.No Sassifaction..

"Fantasises" That is "fantasizes", Wussman.

"Illarate" West BY GOD Virginny!

"Reveresed" Must be one of those off-brand keyboards.

"Soem".as in Some? What a loser.

"VIRIN".What Wogie was before he met the Lavender Lads.

"Minisule".he mussa meant miniscule. Like his IQ.

"Champoin".Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

"Acident" Roger's mom got preggers by accident.

"Alreaedy" Alright, already!

"Amouints" Roger amounts to nothing.

"Aposterphe" This guy is a hoot, ain't he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

"Coiward" As in peeking from behind his mommy's curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.

"Ghet" Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce" He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)

"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can't spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

" Stgop" Roger's version of Stop.

"Fahter's" He meant Father's Day.

"fserting"..would that be festering?

"poists". Roger meant "posts".

"snadwich" As in peanut butter and jelly?

"regualr" Glen Dale rendition of "regular".

"aftrer" After? Aftrer what?

"soory". Sorry Roger fucks up again.

"didnb't" He didn't?

"whoile". He ate the whoile thing?

"Woamn" He's hooked on West Virginia phonics, all right.

"prrof" And he kin prove it, too.

"beforfe" Was that before he lurned to spell?

"yoiuy" Roger's version of "y'all".

"illerate" Only illiterate Roger can spell like this.

"haeart" Aw, how heartless of me to laugh!

"valule" Roger has no values. No wonder he can't spell it.

"proch" Doesn't everyone have one on their house?

"inmstitution" Where Roger's mom put him in June 1999.

"timne" It's Howdy Doody time?

"whgo" What? Who dat?

"gnetically" Only Roger knows what this one means.

"crfy" Like, cry, Roger, cry.

"stutrtering" Some stutter, Wiseman stutrters.

"Whjere" Where is Curtain Boy?

"Webiste" That's Website to the rest of us.

"Youire" Your? You're? Who knows.

"fiored" As in fired?

"Parety" Roger gave a party once. Nobody came.

"Bouynce" Bounce?

"Varification" Verifiable mental case.

"Probelms" Poor Rogie.has many problems of the mental sort.

"Partricipate" Oh, DUH!!!!

"Cryed" Gee, Wogie..cry me a river.you dolt!

"Stoick" What a dork. His old 386 has no spell check program.

"Partiall" More WV Phonics, I see.

"Obsucred" Either obscured or Rogie has "sucre" on his mind.

"Infinate" Stupid. Think finite, Rogie.

"Sustinance" As in Sustenance?

"Juvinile". This is the way Roger likes his boys.

"Piut" Put it where, Rogie?

"Toyus". "Toyus R Us?

"Diminuative". Roger's height.

"Definitely" Definitely

"Percriptions" Say what?

"Credibiliy" More Glen Dale intellect.

"Thsoe" Yet another Glen Dale gaffe.

Unless you are in this person's supervisory chain-of-command,
you cannot gain access to his performance record. Meaning,
you are full of crap. Source please?

Marriage to a foreign national does not necessarily terminate
one's security clearance. Please cite the regulation you are
basing this statement on? Source please?

How? By making fun of persons who insist on lying in
public...such as yourself, Brian?

> > They're populated by people who don't have the intestinal
> > fortitude to sign their names to their posts and they make up
> > allegations to try and hide behind.
>
> And people who sign their names to every made up, false allegation.

Such as?

> > Ask Brain where the Techs went. He insists that they were
> "chased
> > away", yet refuses to say who chased them away or where they went.
> > I've asked him repeatedly after he unequivocally stated they had.
>
> Steve, it's old news. You're welcome to research it in the archives
> unless you're just too lazy and/or inept.

Oh no, Brain! This was YOUR assertion! YOU stated all the Techs
have allegedly been "chased" somewhere..

Let's see you pony-up that proof, Lying One.

> > Ask Brain where the "unlicensed devices" are. He insists that
> > "unlicensed devices" play a "major roll" in emergency
communications.
> > He WON'T provide any evidence of it, but he insists it's true.
>
> It's true.

If it was, where's your proof?

It was your assertion.

I say Brian P. Burke is was jsut caught up in the moment, tried to
bluff his way through, but got caught on a techniccality...The truth...

> > Brain has also recently asserted that ARES is "overblown", and
> > that it won't respond to "real disasters" due to the age of it's

> > when there's evidence to the contrary.
>
> You failed as shift writer. You failed miserably, and you proved my
> point.

You keep saying that but it's still not true.

Again, you are lying, Brian P Burke. Why do you insist on doing
that in the face of evidence to the contrary...?!?!

> > Those are just the recents ones...The Somalia horse is pretty
> > dead...He could never make that horse trot no matter how colorful a
> > jockey he put on it.
>
> I'd like to see the documentation that you were the IMD on Okinawa.

You've got the dates, callsigns and places, Brian.

It's more than enough to substantiate MY claims...Now...About
those techs and ARES claims...???

> > His "I've worked DXCC several times over" stories are cute,
> too...
>
> Please retell those stories, Steve.

They weren't my stories, Brian. They were yours.

> > Now his most current diversion is adding up non-existant
"lies".
> > It just makes him look more feeble, but hey, it keeps him warm.
>
> They are well documented, and you just issued lie #27.

Nope. Still at zero, Brain.

But you keep trying.

> > Keeps me warm too....from laughing so hard!
>
> Oh, yeh, the "bwhahaha" laugh that you claimed to not make.

I never made that claim, Brian.

I >>DID<< claim that I >>DON'T<< use your "Hi" in written
communication as alleged "laughter".

You are welcome to re-post the item wherein you think I said I
never use that "Bwwwhahahahahahaha...."

And if we stack up the lies, Brian P., we'll have quite an archive
to leave for your heirs...Faaaaaaaaaaaaaaaar in excess of the "27" you
alledge that I have authored.

> Anything to keep from being wrong.

Nope. Each branch of MARS has both it's distinctive and it's
similar programs. Otherwise there'd only be "MARS"...Not AFMARS, Army
MARS, and NMC MARS.

> > > So what was the reason you were a MARS member the first time?
The

"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over English grammar

idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to
debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a
scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd's got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks
in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in
ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his
favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does
"dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is
"disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make
good sentence
"jellous" - Most of LARDASS Lloyd's cellulite body is "jealous" of
skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those
nutsacks for pizza topping, Pappa John's terminated him saying he
didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his
fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus
spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an
education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of

tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good sentence!
"straming" - Lardass usually has to wash his sheets from the "stream" of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's" them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his stupidity, however.
"You could have posted it, for we know!" - LARDASS make good sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and

write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest
L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy
apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has
"despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say
"sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses"
on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity
and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't
care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to,
to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe
illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get
rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that
I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not
here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby
tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the
impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS
Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never
are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to
get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never
had to pretend to be stupid, either!

"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman." - I just "knew" Llardass Lloyd couldn't pose as "Christy Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd has never given anything any "thought." (from another "I'm leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's "doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something, anything.
"situtation" - Most people get in "situations, " but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time" now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.

"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites by now

"red head" - Little Red is shoving his big ole black dickhead in
Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten
in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed
skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't
he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets
"harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite
the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino
nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide
"whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his
brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider
remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a
cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is
sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his
stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't
have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard
Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very
literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never
contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck
ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity
"activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a
pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!

"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the

internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....

"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.

"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!

"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.

"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being more stupid, "are we now," Lardass?

Mongolloyd make good spells!

Nazi Davey's Dictionary:

"Nbot" - Nazi Davey's "not" all there!

They are looking into no code techs like you who get on the General
portions of the bands, too, Davies.

You know, by golly, you're right. Most of them seem to have names from
various anonymous remailers and are dated very recently. I think you're
on to something. You're a regular self-fulfilling prophecy.

>

It is hardly hypocritical to do the very same thing which you do to me
and others. It is actually quite just.

>> It boils down to the fact that you don't have the courage of your

No, Secret Lardass. I didn't, Roger did. And he still passed it.
You have yet to advance beyond the training wheel beginner's ham
license.

> The FCC doesn't make you retest just for the fun
> of it.

They can make you retest at any time, if you were first tested
under the VE system.
Why wasn't a reason given in the FCC letter. It was posted at
the Rain Report at one time, say 5 years ago when it happened?
And all you can think about is what happened 5 years ago, and
you call Roger obsessed?

What is "think think,?" above, you never did answer.

> What is this AKA stuff? You don't have a clue who you are
> replying to.

You don't have a clue, period, Lardass. You really shouldn't use
the same lines you use elsewhere.

> Typical of poor dumb wogie, the laughing stock of ham radio
> and the Internet.

Hi secret Lardass! How's it feel to know you can't make it past
the training wheel no code technician?

You know, for a guy who isn't Roger Wiseman, you certainly know a great deal about him. As to "it never did": there's a ham living just out the road from you who says differently. Two others confirmed it.

Playing cockroach won't work this time, Roger. A wire antenna is rather noticeable. One which runs out near the street is even more noticeable. I hear a couple of your antenna supports are bowed like a fishing rod with a Marlin on the end of the line. Can that be true?

Dave K8MN

Hate to dissappoint you, but I was licensed long before the VE system. I took my test at the FCC field office in front of an examiner for my Advanced ticket. Bet wogie can't say that. Well he could as he lies a lot.

> Why wasn't a reason given in the FCC letter. It was posted at

Poor widdle two-test wogie, had to take the exam all over at the request of the FCC. The FCC doesn't make someone retest just for the fun of it, there is a reason behind it, and it nearly always means the person being retested has violated the rules and got caught, like widdle wogie did.

Roger is flailing about, grasping for something--anything to hang on me.
He'll be disappointed.

> Marriage to a foreign national does not necessarily terminate
> one's security clearance. Please cite the regulation you are
> basing this statement on? Source please?

It happens all the time. A background check is done. The marriage is
"blessed" by the Bureau of Diplomatic Security.

At my last post alone, the Deputy Chief of Mission was married to a
Chilean, the General Services Officer was married to a Finn, the
Administrative Officer was married to a Chinese.

In Helsinki (first tour) the Ambassador, Consular Officer, one of my
coworkers and one Political Officer were married to Finns, the Deputy
Chief of Mission to a Chilean.

In Botswana the Deputy Chief of Mission was married to a Swede, the
Administrative Officer to a Portuguese, the Budge and Finance Officer to
a South African, my coworker to a Brit, the Consular Officer to a Thai.

In short, Roger hasn't the foggiest idea what he's talking about.

Oh, so you admit you lied. You just admitted the meeting ended.
Before, you said he left before the meeting ended.

> During that period, you bolted, never to be seen again.

I did? When I've never been to one of your "meetings?"
Besides, you just got caught lying again. And how long would it
take to look over a van? Guess you don't get out much.

> He must have given one of your other personalities some bum
info,
> Wiseman/UnWiseman.

Now, Dave the ASSHeil, there you go thinking I'm Roger again.

> I have a full head of hair. If you were taller,
> you'd know. Why this fascination with my hair, Roger?

Now, Lurch the Nazi, you seem to see Roger everywhere. You have
a bad comb-over from what was described to me. And all grey
hair. Too bad you dye your eyebrows, but you probably are vain
like that.

> Are you entering the big Stephen King look-alike contest this
summer?

No, since I don't look like Steven King. You seem to have some
sort of animosity towards him. Is it because he is a successful
writer, and the only "writing" you have done besides your
newsgroup lies is the at the disinformation center in Texas?

> Nbot?

What's "Nbot"????

> Offer up some proof.

You first, liar.

> You made a claim. Offer up some proof.

Whine a little louder, must be the Nazi way.

> Hint: I doubted you'd do so. You already know what would be
found.

Hint: I couldn't be bothered. You must hang on his every word,
since you seem to want to rummage through his past posts.

Hint#2: You use the "Hint:" thing when you post as "Stagger Lee."

I'd guess you are talking out of your lying ass again, Davey
Assheil.

> My reasoning in

Your reasoning is flawed.

> Sorry, that is totally incorrect.

Your posts are on Google for all to see.

> I have no affiliation with the National Socialists nor AARP.

Not "offically", but you sure do embrace the supression of
freedom of speech, Nazi.

> So.

Not so. I imagine Roger gets on the air. You just would try to
qrm him, wouldn't you?

You don't have a brain do you?

> One can't find what isn't there.

Exactly. You don't have a brain.

> I'm sure "he" is long on other things

Like intelligence, unlike you.

> and short on work.

Oh, do tell, canned from the State Dept. because you married a
foreign national, AssHeil boy!

> "Have a balance"? No, I don't find that in "my" amateur code.

I guess yours is closer to Mein Kampf.

I am referencing Paul Segal's "The Amateur's Code" written in
1928.

The Radio Amateur is...
{edit}
Balanced....radio is an avocation, never interfering with duties
owed to a family, job, school,orcommunity.

Like I said, yours is more like Mein Kampf.

> I have many interests, UnWiseman.

There you go thinking I'm Roger Wiseman again, Davey ASSHeil.

> Amateur radio is but one of them.

Not everybody is into your sick perversions.

> > You probably spend more time on the radio than with your
> > family.
>
> Then again, you'd have no way of knowing.

Then again, one can reference your posting times and air times.

> > I can't blame them for encouraging that.
>
> Then again, you know nothing of them.

Then again, you know nothing, period.

> Just remember it the next time you go on about one of my
errors.

Tsk, tsk, Nazi. You don't like your many errors poinmted out to
you, do you?

> If you stood by your (whaa whaa whaa whaa)

Would you like some cheese with all that whine? I never used "my
call" as part of my email address, Nazi. And I've never gotten
tossed from my ISP, either.

> Your statement (above) is one of the most convoluted pieces of
work I've
> ever encountered.

You should be on this end of your posts, then.

> As to "anonimity", I'd let you slide but one doesn't
> often make a typo twice. The word is "anonymity".

Sort of like your screw up of "That's incorrect yet again"...or
any number of errors.
Like "Nbot" above.

> > > You're absolutely right.
> > I'm glad you can see that, finally.
>
> I've seen that all along.

Glad you admit I'm right.

The Illiterate idiot is paranoid and looking for backup from the government that he hates!

From his letter to Representative John Shimkus
House Subcommittee on Telecommunication

"But there are amateur radio operators who going after me because they think information bulletins should be not be opinionated. They, (the FCC Amateur Auxiliary) are also going after me for what we had discussed at our meeting here in Taylorville over the FCC licensing system. These amateur radio operators are digging up information, which is old, and none of their business. I consider that matter closed and should be left that way. I am hopeful that you can help in resolving this problem."

People are going after you toady. Lock the doors, keep an eye in the rear view mirror, and if you can't dance, just tumble!

Not to worry. It's an obvious forgery. Todd didn't write it.

Note that the grammar and spelling are near 6th or 7th grade level (not
Todd's 3rd grade level), the tone is civil, and the entire paragraph is
completely devoid of toilet-mouth language.

Good F'n luck too the FCC. I'm gonna challange them at Backlash(r) to a no DQ match and the winner takes all, in other words if I win at Backlash(r) the FCC loses ALL CONTROL and ALL FREEBANDERS CAN USE ANY FREQUENCY WE WANT TO from 0 khz to 50 Ghz. If they win (The fcc) then us freebanders will cocede defeat. What about it FCC you up to the No DQ challange at Backlash(r). BTW Vinnie Mac already appoved becuase then if We freedbanders win then he can broadcast the way he wants to without restrictions from stupid useless censors and the goody-two shoes idiots.By the way, ECW ECW ECW ECW ECW ECW ECW ECW ECW

:
: Can someone fill me in on the players here?
:

CW (Love your screen name),

Here are quick thumbnails of a few of the most-regular players:

First, the ying and yang of rrap, both vainglorious and pompous, but of opposite polarity --- Steve (K4YZ) and Len (not licensed). A perfectly matched push-pull circuit with 180-degree out of phase connections resulting in zero-useful-output.

The mindless gadfly, Brian (N0IMD). Like one of those annoying bugs who slips in on a hot summer night and disturbs your sleep. After awhile he becomes part of the background noise and you don't even notice him until suddenly he lands on your nose just as you were dozing off.

Then the self important but also completely innefective trio of Jim (N2EY), Dee (N8UZE), and Hansl (K0HB). These three are all well meaning dufus's who need to rent a clue about the real world.

Resident potty face, Tod (N9OGL). 37-years old, going on 8. Learned a bunch of naughty words during recess, and seems afraid of the bogey man, so he makes a lot of loud incoherent noise to scare away the ghost under the bed.

Everyone else you can pretty much ignore. Now that I think of it, you can ignore the ones listed above too.

M.A.N.

Source record: 106768

Case Opinion #3,456

Sigmund Freud (another confused Jew) would have said that Roger is an obsessive compulsive and a repressed homosexual. Roger obsesses constantly, not only about that which he lacks, e.g., a male member (penis envy) but also about a place to stick it (Lloyd's rectum)(what Roger continually refers to as "Lardass").

Roger suffers from a case of unrequited homosexual love. His love object is quite obviously Lloyd. Roger is so obsessed with his love object that he sees Lloyd everywhere and is positively fixated on the fantasy of engaging in sexual congress with Lloyd Davies. Anyone who answers a post from a variety of Roger's nyms and anonymous remailer's is immediately labled "Lloyd."

Since Roger is homosexually repressed, he cannot come out and ask Lloyd for a date directly. The only way his primitive defenses can cope with his desire for Lloyd is to project onto Lloyd those fears of which he (Roger) himself is terrified.

Roger keeps in constant, daily, nearly hourly contact with Lloyd by fantasizing, and then posting his fantasies about Lloyd. Those familiar with this sad case of homosexual repression will recognize the hallmarks of this compulsion immediately.

In addition to the obsessive homosexual nature of this handicap, Roger has obviously been sexually abused on multiple occasions, most likely by a male member of his own family. His recurrent references to homosexual anal sex are replete with fantasies of male dominance and submission. His constant references to anal sex and the posting of pictures and links to hermaphrodites and she-males bear witness to Roger's gender identity confusion.

Roger also greatly values social and economic status, which he sorely lacks. His targets are frequently those who have more education, more wealth, and more popularity than he enjoys, or most likely, will ever enjoy.

Anyone can readily grasp the significance of Roger's poverty. His economic status is lower than low, and in fact he is economically deprived in one of the US's most impoverished States. Perhaps that is why he appears to be a vile racist ("nigger-dick sucking kike") as well as an ati-semite. People who share Roger's lack of social status usually focus equally on the members of both the lowest and highest rungs of economic status. His fear of being branded as a Jew stems from his surname, which is widely known to have its roots in European Jewry,

despite Roger's reliance on a fake website that preys on ignorant rubes in search of a valid coat of arms.

Roger's hatred of women is well documented, by his ex-wife and deceased caregiver whom he beat with some regularity. This is characteristic of homosexual rage, impotence, and general incompetence with the opposite sex.

The best way to handle a personality of this type is to beat him down, to illustrate his utter inferiority, lack of masculinity, and his generally defective lack of wit, charm, intelligence, and personality.

This subject could be analyzed further, but is not of sufficient interest except in a limited way to those interested in OCD as it relates to homosexual repression. Thank you for this most interesting consult and good luck with the court ordered castration.

Sincerely,

Geno Paris, M.D.

> take to look over a van?

It took the rest of us some time. Your tour was shorter. You fled.

> Guess you don't get out much.

Are you asking me for a date?

>> I have a full head of hair. If you were taller,
>>you'd know. Why this fascination with my hair, Roger?

> Now, Lurch the Nazi, you seem to see Roger everywhere. You have
> a bad comb-over from what was described to me. And all grey
> hair. Too bad you dye your eyebrows, but you probably are vain
> like that.

It'd be strange for Roger Wiseman to have a fixation on my hair and
eyebrows. It would be far more peculiar for you, a person you claim not
to be Roger Wiseman to have such a fixation--especially when you worry
that I don't go out enough.

>>Are you entering the big Stephen King look-alike contest this
>
> summer?

> No, since I don't look like Steven King.

Don't be modest. You're a shoo-in for first prize.

>>Nbot?
>
>

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission’s
Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the
authority to re-administer any examination element previously
administered by Volunteer Examiners (VE’s). The Commission
may either administer the examination itself, or under the
supervision of a Volunteer Examiner Coordinator (VEC) or VE
designated by the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an American Radio Relay League Volunteer Examiner Coordinator. This examination must be completed on or before September 11, 2000. The required code speed that you must demonstrate is 5 words per minute.

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission’s
Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the
authority to re-administer any examination element previously
administered by Volunteer Examiners (VE’s). The Commission
may either administer the examination itself, or under the
supervision of a Volunteer Examiner Coordinator (VEC) or VE
designated by the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an American Radio Relay League Volunteer Examiner Coordinator. This examination must be completed on or before September 11, 2000. The required code speed that you must demonstrate is 5 words per minute.

There you go showing your jealousy of Steven King again.

> Don't you recognize it?

Lying again. You wrote it.

> That was my response to:

No, you just keep lying. That's what you are good at.

> Me first at what, UnWiseman?

You first as an asshole, Davey ASSheil.

> Oh, I see.

That is highly doubtful, since you perpetually have your cranium
in contact with your prostate.

> I'm beginning to see a pattern.

Again, doubtful.
Your "mind" is about as wide open as an eye of a needle.

> Hmmmm?

Are you offering to give me a hummer?

> Hmmmm?

Guess you are.

> They most certainly are. None of them has material consisting
of vile,

None of
> them depicts filthy acts of homosexuality, incest or
pedophilia.
> Yours, on the other hand...

Are not any worse than your filthy posts.

> Your rights end where they infringe upon mine.

You keep that in mind, Nazi.

> You see--there's your problem. You assume that everyone
thinks and acts
> like you do. You're socially defective.

You're socailly inept. But that trait permeates your entier
life..ineptness. You would qrm Roger if you ran across him on

the air.

> That's just lovely coming from the local filth monger.

Oh, such self righeousness, coming fromsomebody who posts filth
like you do.

> You're one of
> the most unbalanced people I've run into in years, UnWiseman.

Since I'm not "UnWiseman" your opinion is valueless, like you
life. And exactly where did you get your Psychology degree...oh,
that's right you don't have one.

> You're a problem to amateur radio

I am? Since I'm not Roger Wiseman, how is that possible?

> and a problem to your community.

Hardly.

> You haven't a family.

Wrong as usual.

But, neither do you, at least your perverted daddy isn't
diddling the altar boys anymore.

> Sure, sure, Roger--and you've never had troubles with the FCC
and never
> had troubles with local law enforcement. You're a regular
model citizen.

No matter how many times you lie, I'm still not Roger.

And Roger's last "troubles" with the FCC was 5 years ago. Onthe
rest, all you offer is hearsay evidence.
And from a proven liar like you, well, nobody can believe a liar
like you.

> *Just like* (blah blah blah)

You wrote it, Shit for brains.
Deal with it.

So is your body odor.

> One which runs out near the street is even more noticeable.

So is your pointy head.

> I hear a couple of your antenna supports are bowed like a
fishing rod
> with a Marlin on the end of the line. Can that be true?

Hardly, since I don't have one. Roger has metal antenna
supports. Looks like you are talking out of your ass, as usual.

'''

Hey, Not Roger. Referring to yourself in the third person is a lame ruse.
It is quite obvious to all that your 'third person" routine is but a
childish attempt to mislead those whom you hope are of a similar intellect
as yours. Unfortunately, Not Roger/Roger, your weak attempts are fruitless
and those of us who are you intellectual superiors spend several minutes of
each day laughing at you.

Not with you, Roger At you.

Dave was accurate when he described you as being a psychopath and social
misfit. You really do need help from an outside source.

Gosh, Toddie. It is past your bed time. Doesn't your Mommie cut the phone
line off at midnight?

You really should get some sleep. I hope my posts are not keeping you awake.

Oh, by the way. What, Toddie, is "you coding" ? And while I am asking, what
is "ther" supposed to mean?

Yes, Todd, "it would be wise not to pretend to be someone" but again, I have
no idea of what you tried to say.

At the risk of sounding 'snooty', Todd, may I suggest that you first learn
to use a spell checker?
May I secondly suggest, Todd, that you remove your bean head from the rectal
area it is apparently esconced in? While there is nothing condemnable about
having one's head implanted in a rectal cavity, it does inhibit one's
ability to see and hear..., at least for you.
There is at least one redeeming aspect of having your head firmly planted in
your rectum. You keep your ears warm and frostbite is out of the question.

Go right ahead steve the FCC has known about my past activities since 1999. I have been on the air illegal since 1999...So I really doubt they will do anything. As for telling them where to go, hey you fucking communist this is america I have the right to tell them what I think of them....go back to china you fucking commie. threats??? oh steve, you aren't lying again are you??? Because i've never threatened them except for the threat of law suits. My ISP only concern was about that picture and that was it.....Steve I've come to the conclusion you a crybaby litttle liar who thinks he better then anyone else. But hey steve if that's how you get your nuts off go for it, I dare you, you little shack of shit.

They got N8WWM already.

If you see the fugly felon doug at Dayton ask him these questions.

(he will be attempting to sell some trash there if I didn't
scare him away again)

1. How is the court ordered shrink working out for you?

2. How's the court ordered job hunt going?

3. How's the court ordered wage withholding going?

4. Have you made the rain report for jamming repeaters again, Doug?

5. Have you threatened to kick anyone elses ass, only to have them show
up at your section 8 slum and prove what a fucking coward you are, maggot?

Here's what the felon looks like:

http://img258.echo.cx/img258/8190/fuglydogiecloseupgif7bt.jpg

and

So, Unroger emails Roger, and Notroger emails the other two?
Fascinating! With three personalities emailing each other, do
they have separate email accounts? Separate computers?
Which one, two, or all three are responsible for the bowed over
antenna support poles?

So why did you write the wrong person? You first need to start with whoever in the FCC interprets the rules not a House subcommittee. Secondly, you need to include a sample of one of your "information bulletins" so that this person can evaluate whether it is acceptable. Writing a member of the House subcommittee will simply get you a polite letter that one or another gives you a brush off since it is NOT their job to interpret the rules.

Paranoid again toady? How many people are you going to accuse of making
this one post?
Remember, if you can't dance then tumble.

The House Subcommittee on Telecommunication oversees the FCC, if you read the whole letter I inform him that there is I believe a form of abuse going on , He will then in turn ask the FCC to resolve the problem. as for blowing it off it's very doubtful, I keep bugging him about it until something is done about it.

No it's just more lies toady, you claim that the FCC is going after you,
you write letters and ask for help. Look again at what you wrote.

"But there are amateur radio operators who going after me because they
think information bulletins should be not be opinionated. They, (the FCC
Amateur Auxiliary) are also going after me for what we had discussed "

This part makes no sense.

"bulletins should be not be opinionated"

I hope you didn't write this letter in crayon!
The only thing you have done, if they take you serious, is open a bigger
can of worms. If they look into this matter as you asked them to do,
they will see you as a paranoid nut case and then the ATF, DEA, FBI,
FCC, and many other three letter agencies will be watching you!

"bulletins should be not be opinionated"
SHOW ME THE RULE! the rules and FCC has stated that a bulletin has to be directed to the amateur radio service consisting solely amateur radio material. no where in the rules does it say that a information bulletin cannot be opinionated.

He will NOT do anything about it except perhaps to tell YOU to contact the FCC. The subcommittee job is to review proposed laws before being submitted to the floor. It is NOT to interpret law. You need to start in the right place and that is the FCC.

They have a little more power then you think, I was in a meeting with
him discusing the FCC licensing system and the first thing he said
before we even got start was "if there is a problem with the FCC we
need to know, and we will fix the problem." and that was before the
meeting. the subcommittee doesn't like the idea of the FCC "abusing" it
power and they said unless people tell them about these abuses they
can't help fix the problem. I remeber back in the 90's the subcommittee
was going to try to disband the FCC and run the whole thing themselves.

Well, you are strange. Too bad Roger described what you look
like. And the above is all true.

> >>Are you entering the big Stephen King look-alike contest this
> >
> > summer?

>
> > No, since I don't look like Steven King.
>
> Don't be modest. You're a shoo-in for first prize.

There you go showing your jealousy of Steven King again.

> Don't you recognize it?

Lying again. You wrote it.

> That was my response to:

No, you just keep lying. That's what you are good at.

> Me first at what, UnWiseman?

You first as an asshole, Davey ASSheil.

> Oh, I see.

That is highly doubtful, since you perpetually have your cranium
in contact with your prostate.

> I'm beginning to see a pattern.

Again, doubtful.
Your "mind" is about as wide open as an eye of a needle.

> Hmmmm?

Are you offering to give me a hummer?

> Hmmmm?

Guess you are.

> They most certainly are. None of them has material consisting
of vile,

None of
> them depicts filthy acts of homosexuality, incest or
pedophilia.
> Yours, on the other hand...

Are not any worse than your filthy posts.

> Your rights end where they infringe upon mine.

You keep that in mind, Nazi.

> You see--there's your problem. You assume that everyone
thinks and acts
> like you do. You're socially defective.

You're socailly inept. But that trait permeates your entier
life..ineptness. You would qrm Roger if you ran across him on

the air.

> That's just lovely coming from the local filth monger.

Oh, such self righeousness, coming fromsomebody who posts filth
like you do.

> You're one of
> the most unbalanced people I've run into in years, UnWiseman.

Since I'm not "UnWiseman" your opinion is valueless, like you
life. And exactly where did you get your Psychology degree...oh,
that's right you don't have one.

> You're a problem to amateur radio

I am? Since I'm not Roger Wiseman, how is that possible?

> and a problem to your community.

Hardly.

> You haven't a family.

Wrong as usual.

But, neither do you, at least your perverted daddy isn't
diddling the altar boys anymore.

> Sure, sure, Roger--and you've never had troubles with the FCC
and never
> had troubles with local law enforcement. You're a regular
model citizen.

No matter how many times you lie, I'm still not Roger.

And Roger's last "troubles" with the FCC was 5 years ago. Onthe
rest, all you offer is hearsay evidence.
And from a proven liar like you, well, nobody can believe a liar
like you.

> *Just like* (blah blah blah)

You wrote it, Shit for brains.
Deal with it.

There were multiple coordinated busts in several cities last
night. Freebanders could be in for some big trouble from
Uncle Candy Pants. Tons of equipment seized. Ham radio
operators assisted in all raids.

There you are in denial again.

>But Roger took a commercial license exam in
> front of an FCC examiner a long time ago, (mid 1970's or so).

So did I for a First Class Phone, so what does that have to do with the fact that two-test wogie had to retake the test to keep his ham license because the FCC caught him red-handed violating FCC regulations? How long has two-test wogie held a ham license? How many times did wogie have to test to keep his license? Why did the FCC make wogie retake the test to keep his license? The FCC doesn't make someone retest just for the fun of it, it always involves a violation of the rules. I have been licensed for over forty years and never have I been asked by the FCC to

retest to keep my license. Can two-test wogie say that? Didn't think so.
HAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHAHAHA!!!!! Two-test wogie, the
laughing stock of ham radio and the Internet.

So what?

> As Hans Brakob pointed out in another thread, ANY
> U.S. class radio amateur CAN use morse code...but
> they are NOT REQUIRED to do so.

So what?

Amateurs are not *required* to use any particular mode, frequency or band - but they *are* tested on what modes, bands and frequencies they are allowed to use.

> >As we have often seen, Len constantly minimizes and ignores the
> >role Morse Code plays and has played in radio communication.
>
> Oh, oh! Jimmie done said a WRONG THING there!

Not me.

> I've repeatedly pointed out that On-Off Keying, as
> by morse code, was THE ONLY METHOD OF USING EARLY
> RADIO AS A COMMUNICATIONS MEDIUM!

As a way of minimizing its use after the days of "EARLY RADIO"

And you do get upset when it is pointed out the Reginald Fessenden was using voice radio communications as early as 1900, and had established regular 2 way transatlantic *voice* communications by November of 1906.

> As the ONLY way to communicate by early radio, I'd
> say - and HAVE SAID - that the ONLY way is IT. As
> such, it would intrinsically BE the "great part" of

And I would say you're full of it ;-) ;-) ;-)
>
> Tsk, tsk, tsk, I don't see (and hardly anyone else
> "can see") Jimmie maximizing the early SPARK
> transmissions as having been a "role" as great as
> morse code...:-)

The spark era was actually very short in the history of
radio - by the mid-1920s it was almost gone.

> > So it's natural that he'd want to minimize reception of the mode..
>
> Poor baby...can't understand simple HUMOR, can you?

Sure I can, Len. But your attempts at humor aren't funny.
They're just dumb.

> You MUST be the LITERALIST, taking EVERYTHING EXACTLY
> as its written!!

Putting a smiley at the end does not make a dumb statement funny.

> No possibility of exaggeration as an
> essential part of humor.

Here's a hint, Len: The *audience* decides what's funny and what
isn't.

> To you two, all things ham
> are SERIOUS BUSINESS (even if amateur means not to gain
> monetarily from the activity). :-)

I don't take *you* seriously, Len.

I don't think anyone does ;-)

> >Just a guess. But I don't see him thanking me for pointing out
> >his error, or even acknowledging it.
>
> Tsk, tsk, I "acknowledge" only that you wrote what you
> THOUGHT was a "correction." It was NOT a "correction."

Sure it was, Len. You don't know squat about Morse Code or its
reception ;-)

> The "correction" (as it was portrayed with an example
> of the original "Q-Fiver" out of an LF Command Set
> receiver) was WRONG. There is NO "A.F.gain" on any of
> those receivers. With NO such control it is impossible
> to "set gain" of it. :-)

I never said the BC-453 or any other "Command Set" had an AF
gain control.

5435. Good morning or good evening depending upon your location. I want to ask you the most important question of your life. Your joy or sorrow for all eternity depends upon your answer. The question is: Are you saved? It is not a question of how good you are, nor if you are a church member, but are you saved? Are you sure you will go to Heaven when you die? GOOGLE·NEWSGROUP·POST·149

Newsgroup: rec.radio.amateur.policy

Source record: 106984
Cross-posted to:
autodesk.autocad.customization,rec.radio.amateur.policy,alt.infertility.parenting,uk.rec.cars.misc,alt.support.mult-sclerosis

This is the most important question of your life.

The question is: Are you saved?

It is not a question of how good you are,
nor if you are a church member, but are you saved?

Are you sure you will go to Heaven when you die?

The reason some people don't know for sure if they
are going to Heaven when they die is because they
just don't know.

The good news is that you can know for sure that
you are going to Heaven.

The Holy Bible describes Heaven as a beautiful
place with no death, sorrow, sickness or pain.

God tells us in the Holy Bible how simple it is
to be saved so that we can live forever with Him
in Heaven.

"For if you confess with your mouth Jesus is Lord
and believe in your heart that God raised Him from
the dead, you WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven to earth
in the person of Jesus Christ to shed His blood
and die on a cross to pay our sin debt in full.

Jesus Christ was born in Israel supernaturally to
a virgin Jewish woman named Mary and lived a sinless
life for thirty-three years.

At the age of thirty-three Jesus was scourged and
had a crown of thorns pressed onto His head then
Jesus was crucified.

Three days after Jesus died on a cross and was
placed in a grave Jesus rose from the dead as Jesus

said would happen before Jesus died.

If someone tells you that they are going to die and
then three days later come back to life and it
actually happens then this person must be the
real deal.

Jesus Christ is the only person that ever lived a
perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds)
with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have
redemption through His blood, the forgiveness of
sins..." (Ephesians 1:7)

If you would like God to forgive you of your past,
present and future sins just ask Jesus Christ to be
your Lord and Saviour.

It doesn't matter how old you are or how many bad
things that you have done in your life including
lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean
it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can
have a home in Heaven with You when I die. I agree
with You that I am a sinner. I believe that You love
me and want to save me. I believe that You bled and
died on the cross to pay the penalty for my sins and
that You rose from the dead. Please forgive my sins
and come into my heart and be my Lord and Saviour.
Thanks Lord Jesus Christ for forgiving me and saving
me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God
to save you.

Now you are a real Christian and you can know for
sure that you will live in Heaven forever when this
life comes to an end.

As a child of God we are to avoid sin(wrongdoing),
but if you do sin the Holy Bible says, "My dear
children, I write this to you so that you will not
sin. But if anybody does sin, we have one who speaks
to the Father in our defense Jesus Christ,
the Righteous One."

Those of you that have not yet decided to place your
trust in the Lord Jesus Christ may never get another

chance to do so because you do not know when you
will die.

Jesus said, "I am the way, the truth and the life:
no one can come to the Father(God)(in Heaven), but
by me." (John 14:6)

This means that if you die without trusting in Jesus
Christ as your Lord and Saviour you will be forever
separated from the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of eternal
torment, suffering, pain and agony for all those who
have rejected Jesus Christ.

The good news is that you can avoid Hell by allowing
Jesus Christ to save you today. Only then will you
have true peace in your life knowing that no matter
what happens you are on your way to Heaven.

Praise the Lord!
Servant of the Lord Jesus Christ
Ronald L. Grossi

*Show this to your family and friends so
they can know that they have a choice
where they will spend eternity. Thanks!

You know something todd, this man has served his country, he has raised
a family, has shown compassion to other humans, he even has a job. I
think Steve deserves some respect from a peon like you. You in turn,
live at home and bumm off your parents, you don't work, you have no
respect for the country you live in nor it's laws, you have no
compassion for anybody or anything, you lie about everything, there is
nothing lower then you todd, if Steve took you to his level it would
only be up.

Then you've just exposed YOURSELF as the idot that I've been
claiming you to be, Brain, since you've addressed my MARS service and

callsigns before.

Brain...Why do you do it...?!?! It's not like you're at gun point and have shoot before the other guy shoots you...You've got MORE than enough time to stop, see what the other person is talking about, and THEN post.

You claim >>I<< have a "mental defect", Brian, yet you claim I am a liar over data YOU already had in hand...And to top it off, I've been telling you for two days that RECENT information ir right in from of you...

Yet you go right on ahead and stick something that shouldn't be in a pencil sharpener right on in...

Silly you...That's why I sarcastically call you "Brain".

Wake up, Brian...You're NOT a "brain", and taking Lennie Anderson's lead has only made you look that more idiotic.

You claim that I am up to "29" lies this week, yet none have occured.

You "demand" documentation "right now", yet YOU have had quastions in from of you for YEARS without ANY "documentation" of YOUR claims.

You have CURRENT information at your fingertips, yet you ignore it and make rediculous, easily refuted allegations.

Sucks to be you, Brian...Sucks to be you.....

Who "manufactures lies", Steve?

Steve Robeson K4YZ wrote (in response to Len Anderson):

> You are once again challenged to produce even ONE quote that supports an
> assertion of yours...this one in particular, Your Supreme Lyiningness.
>
> "Q" signals are NOT used in MILITARY applications
>
> Something you LIED about, obviously.

Sorry, Steve, but "Q" signals (properly called Operating Signals) of course >>ARE<< used in MILITARY applications.

The governing document is ACP-131(E), an unclassified Allied Communications Publication (ACP) available on the web for your examination at http://www.dtic.mil/jcs/j6/cceb/acps/Acp131e.pdf

To save you the trouble of "checking me out", here is an excerpt from the table of contents:

CHAPTER 2 - OPERATING SIGNALS - DECODE

Q SIGNALS.....Page

QAA - QAZ.....2A1 - 2A3

QBA - QBZ. .....2A3 - 2A5

QCA - QCZ.....2A5 - 2A6

QDA - QDZ.....2A6 - 2A7

QEA - QEZ.....2A7 - 2A8

.....CLIP......

So who's lying in this case, Steve? You, or Len?

QBF?

This lecture brought to you free by K0HB, who hopes that you are not offended by anything you read, inferred, assumed, presumed or otherwise guessed I might have possibly meant as demeaning - unless of course you are a pompous "full-of-yourself" individual who WANTS to be insulted. In which case be my guest.

Can't even get the "Q" signals correct for Amatuer application.
Besides,
"Q" signals are NOT used in MILITARY applications, either...

UNQUOTE

Congratulations, Hans! You had to go back three years to find
something you could hang on to, but nice job!

And in YOUR reference:

Sorry, Steve, but "Q" signals (properly called Operating Signals) of
course >>ARE<< used in MILITARY applications.

The governing document is ACP-131(E), an unclassified Allied
Communications
Publication (ACP) available on the web for your examination at
http://www.dtic.mil/jcs/j6/cceb/acps/Acp131e.pdf .

Yep...In "MILITARY" communications...Not specifically United
States "MILITARY"...

The document you cited, for the enlightenment of others reading,
is a multi-nation Allied document...

So for that inappropraite choice of language, I stand corrected...

However:

That SAME document goes on to say: (paraphrased...you may certainly investigate my comments more closely...)

(1) The Q codes (for decode only) are used between military stations and civil aeronautical or maritime stations.

(2) The Z codes are for military use only. Q signals MAY be used but are not REQUIRED for use by Allied stations.

Said codes are typically used for Morse or teleprinter communications. Z-codes are more prevelent in AMERICAN military communicaitons...

But thanks for pointing out s three year old error, Hans.

I don't suppose you ahve anything more contemporary to address, do you...?!?!

If Cngmn Shimkus' staff is on it's toes, that sentence right there will sink Todd faster than you can say "File 13".

Todd's previous "meetings" with Cngmn Shimkus obviously didn't get him what he wanted the first time...Why would Todd think that he'll fare any better with his semi-illiterate "they're out to get me" rantings...???

Sheeesh.

High John.

Reckon it's just a coincidence that both "Nomen Nescio" <anon@hamanonspam.net>
and "Scratch Dog Twice" <ya@scrdotwices.org> 's posts come from Chris
Caputo's servers and contain this in the header? :D

Not so! I've attended several Microwave Update conventions in the USA
and always come away thinking how keen and act

Check the websites of the varous US microwave groups and you'll see
that these bands have lots of activity ... especially up to 10GHz and
increasingly to 47GHz and above.

Try www.ntms.org as a starter!

Sure you did, sure you did. You can't even pass the Extra exam.

Which means, "Yes, I am too stupid and lazy to try to get it."

> I haven't violate any FCC rules like two-test wogie so I don't
have to
> be retested.

You sure do violate many grammar rules, though, you illiterate
lazy bastard.

"I haven't violate" You mean "I haven't violated" You sure get
upset, Gopher face. Exspecially when reminded of the fact that
you can't pass the Extra. Which by the way, incorporates some of
the same questions as the old Advanced. Looks like your above
statement that the old Advanced pool was better than the current
Extra is based on your complete ignorance.

> Oh? Got some proof of that?

Hi, Gopher face! I knew it was you jamming Roger. Now get back
to cowering and making excuses why you can't get the Extra class

license.

> > They no longer issue them, except for renewal purposes.
>
> Thus they are not obsolete, you need to educate yourself a bit.

They still don't issue any of them as a new license. They are obsolete, like you, Gopher face.

> > That why they no longer issue them, except to ones that already
> > have them?? Dumb fuck.
>
> It is still a valid license until the FCC deems otherwise, moronic twit.

They still don't issue any new Advanced, now do they, excuse-maker.

Which means, "Yes, I am too stupid and lazy to try to get it."

Nice bit of Andersonian-like misdirection to try to cover your ignorance (lie?), but welcome to another lesson in US Military Communications, a subject in which you tried to lecture Len, and now me.

ALL similar publications used by our AMERICAN military communicators are also used by our military allies. That's why they're call "ACP-xxx". ("ACP" is the acronym for "Allied Communications Publication")

ACP-113 (Call Sign Book for Ships), ACP-117 (Routing Indicators), ACP-120 (Security), ACP-121 (General Communications Instructions) ACP-124 (CW Procedures), ACP-125 (Voice Procedures), and many other ACP's are the standard documents used by United States Military communicators. (The publications cited are all unclassified, and probably on the web at the JCS site which contains the ACP-131 which you examined.)

> Z-codes are more prevelent in AMERICAN military communicaitons.

Another "error" (lie?). Q-codes are at least as prevelant in AMERICAN military communications, if not more-so, than "Z" signals. Been there, done that, got the medals.

For someone who professes to have been seriously involved in one strictly-AMERICAN military communcations system, NAVMARCORPSMARS, governed by the publication "NTP-8" ("NTP" being the acronym for Naval Telecommunications Publication), your ignorance (lie?) is especially odd, since NTP-8 reproduces an extensive list of "Q" signals taken directly from ACP-131. I would think you'd have known that you never saw a copy of NTP-8.

Oh, never mind. I forgot that NAVMARCORPSMARS is >>NOT<< a military communications system. "Sorry Hans, MARS >>IS<< "Amateur Radio"

> But thanks for pointing out s three year old lie, Hans.

You're welcome, Steve.

This lecture brought to you free by K0HB, who hopes that you are not offended by anything you read, inferred, assumed, presumed or otherwise guessed I might have possibly meant as demeaning - unless of course you are a pompous "full-of-yourself" individual who WANTS to be insulted. In which case be my

What ever you want to believe in your fantasy world that makes you happy
retard boy. Wogie couldn't have passed the test for Extra except he went
to one of those license give-away VE sessions. He couldn't pass a 20wpm
code test in front of an FCC examiner. In over forty years of being
licensed I have *never* been asked by the FCC to retest to keep my
license. Can wogie boy say that? Didn't think so. Lets see the hands of
all the hams on the group who have been asked by the FCC to retest to
keep their license. Oh, just wogie? What a suprise!!!
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!!!!!
!
The FCC doesn't make someone retest just for the fun of it, the
retesting always involves some violation of the FCC rules. Poor two-test
wogie, had to retest on orders of the FCC to keep his license.
LOLOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

>
>
> You sure do violate many grammar rules, though, you illiterate
> lazy bastard.

But I didn't have to retake my amateur exam to keep my license like poor
retarded wogie did. HAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!! The FCC isn't
concerned about my grammar, but they sure are concerned about wogie's
illegal operating habits, that's why they made him retest to keep his
license. LOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

>
> "I haven't violate" You mean "I haven't violated" You sure get

That only seems to bother you wogie.

>Which by the way, incorporates some of
> the same questions as the old Advanced. Looks like your above
> statement that the old Advanced pool was better than the current
> Extra is based on your complete ignorance.

And the current Extra test contains questions from a question pool,
where the answers are available for any fool, like wogie, to just
memorize, no knowledge required to pass the test. The questions I
answered on my Advanced, which at the time was much harder than the
Extra, were not from any pool of questions with the answers available.
One had to have actual knowledge of the questions to correctly answer
them. Something wogie lacks. Ask wogie about negative SWR.
ROFLMAO!!!!!!!!!!!!!!!!!!!!!!!
>
>
>>Oh? Got some proof of that?

Like I said, got some proof you can show of that statement? Didn't think
so. I don't jam anyone on the ham bands like wogie did, that's why he
had to retest to keep his license. Poor two-test wogie.

>>
>>It is still a valid license until the FCC deems otherwise,
>
> moronic twit.
>
> They still don't issue any new Advanced, now do they, excuse-
> maker.

But it is still a valid license and the fact I obtained it in front of
an FCC examiner is proof I passed the required code test, and answered
questions that were not from a question pool in which the answers were
available for memorization, a test where one had to have actual
knowledge to answer the questions, which wogie can't do.
HAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!! Wogie had to get his extra at a
license give-away VE session with test questions from a pool of
questions where the answers are available simply to be memorized, no
knowledge required. Ask wogie about negative swr and RMS voltage.
LOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!!!!!!!!!!!!!!!!
>
Poor two-test wogie, had to retake his exam on orders of the FCC to
keep his license. Such action by the FCC is taken because of a violation
of the FCC rules.

I tire of this banter with the mental midget curtains boy of West VA,
it's like sparing with a chimpanzee.

So wogie and you, his altered ego, can believe about me whatever you want in your mental midget fantasy world, but I sit back and laugh my rear off every time you (wogie) post as it reminds me of how, because of wogie's illegal ham radio activities, the FCC caught wogie red-handed and made wogie retest to keep his license. Something I certainly have never had to do.
LOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOL!!!!!!!!!!!!!!!!!!!!!!!!!

By fool.

Wogie does indeed have a Master's degree. You see, he applied for a job down at the river at a fishing dock for the job of baiter, helping people who came to fish, bait their hooks. He started off as a baiter trainee, after six months moved up to associate baiter, then on to general baiter. Now after two years he has finally reached the lofty position of Master Baiter.

Steve, I sure hope you don't feel put upon by my holding you up to your
own words, your own rules, and your own standards.

Welp, you just scraped by with merely 29 lies in three weeks. I
figured you for a shoe-in at 30 lies or the rate of 10 new lies per
week. You disappoint as usual.

It must really suck to be Steve Robeson/K4YZ/K4CAP/K4MARS.

Hans, if only you had brought this up over the weekend Steve could have hit his goal of 10 lies per week! As it is, he's averaged only 9.666_ lies/wk, but I'm all for rounding up to help him make his goal.

>From the US Army MARS field manual that I am holding in my hands;

MARS (Army) TA2: QRK, QRQ, QRS, QRU, QRV, QRY, QRZ, QSA, QSG, QSV, QSZ, QTB, and lots of "Z" signals.

To the dismay of all the CW enthusiasts, Army MARS isn't using CW anymore. Nor is Air Force MARS.

So much for the knowledge of our resident MARS expert, Steve Robeson, K4YZ, K4CAP, K4MARS (hi!). You'd think he would have known better, but no.

"Sorry Hans, MARS >>>IS<<< Amateur Radio!" Hi, hi!

Brain!

Your lying goes way back and is well documented. Hans has showed that
your knowledge of military comms is miniscule all the while you claim
others are liars. I called you on your MARS IMD claims and you've yet
to show any documentation.

Your words, your rules, your "etiquette" makes you the liar.

> I guess I am going to just have to sit down with you and teach
you
> some basic math and etiquette, Brain

If you knew any.

> I don't know why you insist on lying yourself and then trying to make

Steve, make no mistake, you are a documented liar.

> But that's OK....Your kids will read these some day and they'll
> see what an unethical toad you really are, Brain.

I'm sure your children are proud of their daddy.

> Steve, K4YZ

Hans showed you to be a liar going back a long way. Today's lies are
just a continuation of the lying that you started a long, long time
ago...

From OH/PA dx bulletin # 707 ...

SPECIAL EVENT (Enigma Machine To Be Reactivated After 60 Yrs)......

In September 1939, the radio receivers of all radio amateurs were ordered to be confiscated, but many amateurs volunteered to become "Voluntary Interceptors" (V.I.'s) in their own homes. These V.I.'s intercepted encrypted Enigma messages transmitted in Morse Code which were passed to the code breakers at Bletchley Park. Accuracy was crucial in order to assist decoding of the message, but many of the intercepted signals were weak or fading and atmospheric conditions were often poor with QRM from loud local stations. Searching through the bands was very painstaking, but it was a task that was carried out with great skill and dedication, providing a most valuable service to the Allies. As a tribute to the work of the V.I.'s sixty years ago, the Scarborough Special Events Group (SSEG) will be on the air as GB2HQ from GCHQ Scarborough over the weekend of May 7-8th. A souvenir QSL card showing an Enigma cipher machine and an HRO receiver will be issued to commemorate the occasion. GCHQ have provided a working Enigma machine for use by the SSEG and Ofcom and have given permission for transmission of an enciphered Enigma message to be sent in Morse Code on the amateur radio bands for this event only. The group will be active on SSB, PSK and CW. The CW station will operate around 7015 or 3515 KHz and the Enigma message will be transmitted in Morse Code at 1100z on Saturday, May 7th, at a speed of 15 wpm. The message will consist of a few five letter groups which will be repeated at 1300 and 1900z. GCHQ invites all licenced amateurs and listeners to submit a copy of this Enigma message and will award a certificate for a 100% accurate intercept. A copy of this message should be sent via club call G0OOO (Scarborough Special Events Group, 9 Green Island, Irton, Scarborough YO12 4RN) and can be enclosed with a QSL card. The cost of the certificate is =C2=A33.00 sterling, 5 Euro's, 5 USD, or 6 IRCs. (UK cheques should be made out to "SSEG"). All profits will be donated to GCHQ Scarborough Charities Fund. Full details will be published on their Web site at:

http://www.sseg.co.uk

Depending on your location, conditions may not be favorable for reception on the day. However, in this respect, listeners will be experiencing the same problems faced by the V.I.'s some sixty years ago. FISTS members are invited to take part in a practical demonstration of history brought to life through amateur radio. For more information about the Enigma machine, please visit the following Web pages:

http://www.codesandciphers.org.uk/enigma/
http://www.enigmahistory.org/enigma.html

Nope.

You're still a liar, and I HAVE provided you with the information
you wanted.

Now you slide out of acknowledging that information with this
silly spin.

It REALLY sucks to be you, Brain...

But nice try...

One error out of seven years of this forum is "miniscule"...?!?!

That's stretching your luck, Lying One!

> (UNSNIP)....all the while you claim
> others are liars. I called you on your MARS IMD claims and you've
yet
> to show any documentation.

I gave you dates, places, callsigns, Brain. That's far more
information on ONE topic than YOU have ever presented on ALL the topics
YOU have been challenged on!

But nice try!

> Your words, your rules, your "etiquette" makes you the liar.

Nope. Information was requested...Information
provided...Actually, you ALREADY had the information in your hands...A
couple years ago, as a matter of fact, and it seemed to be quite
adequate for you then.

> > I guess I am going to just have to sit down with you and teach
> you
> > some basic math and etiquette, Brain
> >
> If you knew any.

We'll just have to sit down and I'll teach you, Brian. There's a
LOT for you to learn, though.

> > I don't know why you insist on lying yourself and then trying to
make

> > up stories about others lying.
>
> Steve, make no mistake, you are a documented liar.

There's no mistake, Brain...I'm not.

I have made mistakes...Owned up to them, acknowledged them. Hans' current item on the NON-US "military" use of Q signals for example. It was a long stretch, and he had to dig to find that one...

YOU, on the otherhand, have made COUNTLESS errors, and not only NOT acknowledged them, but tried to defend them as "valid". THAT goes from being an "error" to being a "LIE".

> > But that's OK....Your kids will read these some day and they'll
> > see what an unethical toad you really are, Brain.
>
> I'm sure your children are proud of their daddy.

Their daddy isn't lying repeatedly in a public forum.

> Hans showed you to be a liar going back a long way. Today's lies are
> just a continuation of the lying that you started a long, long time
> ago...

There's a difference. Hans found an error. Provided a reference. I acknowledged that and "stood corrected".

You, on the otherhand, still have not acknowledged your misdeeds going back a looooooooooooooooooong time before anything >>I<< wrote.

Try again, Brain. You've "proved" that you have the desire to continue your course of mistruths and deceit.

Brian P Burke IS a deceitful person. Deal with it.

Steve, K4YZ

think you'd
> have known that you never saw a copy of NTP-8.

I am very familiar with NTP-8.

I also know that in 6 months as ANCOIC on Oki and as a general
member for many other years, I didn't use Q-codes in MARS traffic
except where the text of a message was carried over from the Amateur
nets and the Amateur message had the Q-signal in it.

> Oh, never mind. I forgot that NAVMARCORPSMARS is >>NOT<< a military
> communications system.

Now you are believeing Lennie's rantings. I hope you didn't make
that silly assertion based upon something you "THINK" I said...

> "Sorry Hans, MARS >>IS<< "Amateur Radio"

And same out-of-context quoting as Brain...Guess the old mind is
slipping, eh?

> > But thanks for pointing out s three year old lie, Hans.

An "error" is something someone makes and then acknowledges and
corrects when shown that error.

I did that.

You and Lennie have been trying to defend out and out falsehoods
for years even after having been shown those errors over and over.

> > I don't suppose you have anything more contemporary to

You, Brain, have no business suggesting that YOU are giving anyone
a chance to "redeem" themselves.

> Steve serves up Lie #29 with undocumented claims of MARS service.

So...Let's count Brain's lies up.

Each time he's alleged I've lied when indeed I hadn't: 29

Assertion of legal operation from Somalia: 30

"Unlicensed devices play major roll in Emer Comm" 31

"ARES/RACES is overblown and won't respond" 32

"All the Techs have been chased away" 33

"You've threatened slash tires, wives, etc..." 34

"I've operated the equivilent of DXCC from KH, HL, etc" 35

Sorry, Brain...You're waaaaaaaaaaaaaaaay ahead, Old Boy!

> Wonder if he can get to #30 before the day's out? If so, he will
have
> averaged 10 new lies per week.

I'd have to get to "1" first...

Specifically, your actions can be considered violations of sections 2,
7, and 9 of the agreement.

As stated in the first paragraph of the agreement, if you choose not to
be bound by these terms please cease using the service immediately. If
you choose to continue to use the service and violate the terms - your
Internet service will be disconnected.

This document will also be copied to you through a certified letter via
the United States Postal Service.

Guess you didn't take them seriously enough, Todd...Too bad you
don't take hints easily, eh?

Robert Koester
Data Services Manager

Consolidated Communications

(2) Restrict or inhibit any other user from using and enjoying the Internet;

WELL WHAT ABOUT ME??? IT'S TO ME THAT CONSOLIDATED COMMUNICATIONS (WHICH IS THE LOCAL TELEPHONE COMPANY) WILL ALLOW THEM (THEY BOYS FROM REC.RADIO.AMATEUR.POLICY) TO BE ABUSIVE BUT WE SOMEONE TRIES TO FIGHT BACK, IT SEEMS TO ME THAT THEY (THE PHONE COMPANY) WILL BELIEVE THEM (THE BOYS FROM REC.RADIO.AMATEUR.POLICY) AND SAY TO HELL YOUR THEIR HIGH PAYING CUSTOMER.

Because even for those of us that don't like each other and contrantly go toe-to-toe, Todd, don't use the kind of abusive and disgusting language you insist on using.

And you need to read the note from Dee....People who make light of deceased children aren't at the head of anyone's parade, Todd.

And "fight back" against WHAT, Todd?

Suggestions that you do something about your childish grammar?

Suggestions that your "shows" are not wanted, not needed, or violate, in spirit if not absolute letter of federal law?

Suggestions that we don't want to read your foul, bullying crap, here OR on your "blog"...?!?!

Suggestions that you'd likely get better response from the FCC if you'd MEET LICENSURE CRITERIA for the license you're applying for...?!?!

(7) Post or transmit any unlawful, threatening, abusive, libelous, defamatory, obscene, pornographic, profane, or otherwise objectionable information of any kind (as determined in Provider's sole discretion), including without limitation any transmissions constituting or encouraging conduct that would constitute a criminal offense, give rise to civil liability, or otherwise violate any local, state, national or international law, including without limitation the U.S. export control laws and regulations;

WELL I'VE NEVER THREATEN THEM, AND WELL WHILE I MAY A BEEN ABUSIVE, THEY HAVE THE ####ING BALLS TO CALL THE KETTLE BLACK.

I HOPE you didn't send that kind of language to the guy who just told you that your filthy mouth is about to get your ISP service cann'd, Todd!

And Todd...did you read the part about "...give rise to civil liabilty.." and "...(as detrmined in Provider's sole discretion"...?!?!

They are TELLING YOU that you DO NOT have the right to act in a way which could get THEM pulled into court!

What ever fee you're paying them a month is NOT worth them going to court over because of YOUR foul mouth, pornographic depictions, and your "suggestions" of shoving razor balde-studded dildos into people's rectums.

It's not the "speech" of a responsible adult, Todd.

KC8GXW CONTINUES ABUSE ME ABOUT MY SEXUAL PREFERENCE AND THEIR CONTINUOUS CLAIMS THAT I'M VIOLATING FEDERAL LAW.

Your "sexual preference" became fair game after YOUR "vacuum cleaner" pic (which YOU posted) and YOUR >>frequent<< references to the male genitalia, Todd.

We've been trying to gently point this out to you, but you just insist on running head first into that brick wall over and over. I'm not going to offer an Excedrin to someone who won't stop doing what it is that causes the pain!

AS FOR OBSCENE AND POROGRAPHIC MATERIAL AND PROFANE WORDS ALSO FALL INTO THAT CATEGORY, UNLIKE THOSE MORONS ON THAT NEWSGROUP AND PERHAPS THE PHONE COMPANY WAS ASLEEP THAT DAY BUT THE US SUPREME COURT RULED OBSCENE MATERIAL WAS LEGAL ON THE INTERNET WHEN IT STRUCK DOWN THE CDA BACK IN 1996.

The Supreme Courst ALSO stated that such material must be guarded from access by children, Todd.

This forum is NOT gated from access by minors.

THE PHONE COMPANY HAS THE BALLS TO ALLOW IT IN , ALONG WITH CHILD PORNOGRAPHY, BUT WILL NOT ALLOW IT OUT. TALK ABOUT A BUNCH OF CRAP!!

They can't control what sites start at some other ISP and YOU go looking for...but they CAN stop YOU from putting them at risk for civil penalty by misuse of your account which is in THEIR name!

MAYBE I SHOULD INFORM THE SERVICE PROVIDERS OF THOSE PEOPLE ON REC.RADIO.AMATEUR. POLICY, ALONG WITH GOOGLE ABOUT THOSE PEOPLES ABUSES BEHAVIOR INCLUDING BUT NOT LIMITED TO POSTED COPYRIGHT MATERIAL ON THE NEWSGROUP WITHOUT MY PERMISSION, AND THEIR ABUSIVE BEHAVIOR

What are you going to report, Todd? Show AOL that I've been telling YOU over and over that YOUR illegal use of the Amateur Radio service is wrong...?!?!

Are you going to tell them that I have repeatedly "called you" on your use of profanity, threats and use of YOUR service to promote illegal activity...???

Abusive behaviour? How we've been telling you we don't want your foul mouth in this forum?

And "COPYRIGHTED"...?!?! Riiiiiiiiiiiiiiiiiiiiiight.....

Not one word of your "COPYRIGHTED" material has been misquoted or quoted without giving YOU full credit as the author...So good luck on THAT one, too!

(9) Gain or attempt to gain unauthorized access to or otherwise disrupt or deface web sites, networks, systems or accounts owned by Provider or any third parties, including without limitation, through the use of worms, trojan horses, denial of service attacks or other computer hacking techniques, disrupt the Service or network connectivity of Provider or any third parties, misuse Provider or third party facilities or create fraudulent accounts. communications over a network.

THIS PART HERE I DON'T KNOW WHAT THE #### I'M SUPPOSE TO BE VIOLATING HERE I'VE NEVER HACKED A SITE IN MY LIFE, NOR HAVE I EVER PRETEND TO BE SOMEONE....I THINK THOSE CRYBABIES ON REC.RADIO.AMATEUR.POLICY IS SMOKING CRACK.

You would.

You've had third persons pretending to be "me", for example...even acknowledged that they were bogus, yet you leave their foul and misleading "comments" on your blog for all to see as if it was really me.

As far as >>I<< am concerned, even if it WASN'T you (which I believe it was...) that has pretended to be me on your blog, you KNOW it's NOT me, you let it continue, and that makes you as culpable as the person who posted it.

Now, here it is Todd...

I've tried to tell you about your behaviour being unacceptable in a public forum...

Dee's told you about your behavioulr...

"Cmd Buzz Corey" has told you...

Brian Burke has told you....

KC8GXW has told you...

Others, both named and anonymous have told you....

Now, WHETHER YOU LIKE IT OR NOT...certain behaviour, even by adults, IS NOT TOLERATED OR APPRECIATED IN CERTAIN FORUMS...Just becasue a forum is made up of mostly adults does NOT mean they want to hear your "adult" language!

TAKE THE HINT, TODD!

Now...go open that certified letter!

Steve, K4YZ

"K4YZ" <k4yz@aol.com> wrote

> Up until I left Uncle Sam's Gun Club i saw precious little "Q"
> signals.

Unless you were trained and assigned duties as a Morse or TTY circuit operator, that doesn't surprise me. I expect you saw "precious little" Z-signals either. You see, "Q" and "Z" signals are OPERATING signals, exchanged between OPERATORS.

> I am very familiar with NTP-8.

Then I'm sure you've seen all the "Q" signals in Annex Charlie, and you also seem familiar with ACP-131. Nonetheless, when Len mentioned his "first QSY" you seek to discredit his statement with:

------>" "Q" signals are NOT used in MILITARY applications"

> I also know that in 6 months as ANCOIC on Oki and as a general
> member for many other years, I didn't use Q-codes in MARS traffic

Nothing surprising about that!

I've spent 21 years of Naval Communications and so far 34 years in NAVMARCORMARS (I was the first Area Coordinator on Guam, call sign N0GCM --- yes, way back when the calls were 1x3 --- and I hold NMOC certificate #1). I suppose that could be "added up" to 55 years in MILITARY communications, and in all that time I also never used Q-codes or Z-codes in message traffic.

There's a good reason for that! "Q" and "Z" signals are OPERATING signals and you don't normally use them in "traffic". To quote Annex Charlie again:

"C100. OPERATING SIGNALS ("Q" AND "Z")

a. Operating signals are concise codes designed primarily for use by communication personnel in exchanging information incident to the handling of messages or in establishing communications. Communication personnel also use them in service messages."

Sunuvagun!

Now to get back to Len's "50th Anniversary of his first QSY". It seems to me that was a particularly appropriate comment for him to make, when you responded with ""Q" signals are NOT used in MILITARY applications"

Len was assigned as a transmitter operator at a large MILITARY transmitter facility in Japan. Since I was Operations Chief at two such multi-megawatt facilities (NPN and NAM), I have a pretty good grasp of his duties at ADA. The transmitter facility would one part of a three-part communications station, the other two parts being a receiver facility and a tech-control/message center

facility both of which would be located several miles away from the transmitter facility to avoid self-QRM. All three facilities would be connected with a TTY-based orderwire system.

The tech-controllers are responsible to keep all the circuits up and functioning, coordinating between their local users and tech-control centers at the distant end of all their circuits (NPN, for example). This (obvious even to you) would require many frequency changes over the course of a day (and night) and those frequency change would be communicated over the orderwire out to the transmitter, receiver, and remote circuit-end sites by OPERATING SIGNALS. Unless you've discovered a hidden Z-signals unknown to me, those orders would go out like this ---

1) To the remote-end at NPN "QAP 10276". NPN would now listen for ADA on 10276.

2) To Len at the transmitter site: QSY NPN 10276". Len would shift frequency on the NPN transmitter to 10276.

In his full tour at the ADA transmitter site, "QSY" would be far and away the most often-copied OPERATING SIGNAL that Sgt. Anderson would see. Obviously it is going to still be familiar to him some 50-years later, and he may well remember his "first QSY".

What is your most often-copied OPERATING SIGNAL? I'm guessing it is "ZBM2" or "QBF?".

What does it matter, either way, Brain?

YOU continue to make idiotic assertions that are JUST that, and
then you don't offer any substantiation or verification of your claims.

Been doing it for years. This is no different.

Nice try, Though.

The safe combination at Ft. Knox is R27 L41 R1 L19.

People can post whatever tripe they want on RRAP, and you certainly have piled it higher and deeper than anyone else.

Now show the DOCUMENTATION! (and get rid of that rediculous photo on QRZ)

It matters because you are incapable of telling the truth, and you are incapable of living up to the standards that you set and demand everyone else meet. You are unworthy to keep our company on rrap. Sucks to be Robeson.

The net "is" real life.

And the word is "clique", not "click".

Any one can "TOS" anyone else, but the resulting action taken is
dependent upon what the alleged TOSee did.

In your case, Todd, you were profane, morbid and threatening.

You lose.

I have appointed myself. Just as you have appointed yourself judge,
jury and executioner in so many RRAP disputes, most of which you

started yourself.

Get used to it - there's a new Sheriff in town and he is watching you.

And I'm recalling the extension I gave for you to post documentation of your alledged MARS service. You didn't make my deadline.

Sucks to be Robeson.

"Sgt. Anderson" never saw those "operating signals" other than on paper, or overheard by the OPERATORS of ADA, Hans. "Sgt. Anderson" was a radio mechanic, not a station operator.

Nice try, though.

You're in way over your head, Steve. There are no "station operators"
or "circuit operators" at a transmitter facility. The "station/circuit
operator" is at a message center, a tech control center, or a wire-room
many miles away. At the transmitter facility there are "transmitter
operators" whose job it is to keep the transmitters up and running, and
perform "QSY"'s when directed. I know that flies in the face of your
beliefs, but reality doesn't much care what you believe.

Now then, when did YOU retire?

DISCLAIMER:
This lecture brought to you free by K0HB, who hopes that you are not

There must be. You've just lied again.

> I have made mistakes...Owned up to them, acknowledged them.
Hans'
> current item on the NON-US "military" use of Q signals for example.
It
> was a long stretch, and he had to dig to find that one...

Now wait a minute, Slippery Steve. If the manual is for "allied
forces" aren't we allied to them as well? Why would we have them
communicating with us using one set of protocols, and we to them with
another?

You've made more dodges recently than the Chrysler plant. Hi!

> YOU, on the otherhand, have made COUNTLESS errors, and not only
> NOT acknowledged them, but tried to defend them as "valid". THAT
goes
> from being an "error" to being a "LIE".

But we're discussing your errors, your accusations, your words, your
rules, your logic, and your lies!

It's pathetic that you can't live up to your own expectations of
others. You're not a straw boss anymore, just a strawman.

> > > But that's OK....Your kids will read these some day and

Your lying accusations don't matter?

Your standards for others, the very standard that YOU cannot live up
to, don't matter?

You sure don't give yourself much credit, do you?

Steven J. Robeson/K4YZ/K4CAP/K4MARS (hi!) is Unworthy.

Completely Unworthy!

Sucks to be Steven J. Robeson/K4YZ/K4CAP/K4MARS (hi!)!!!

Shot? This isn't marksmanship, Silly Gunny. Were you ever really a
Marine?

It was merely a DEMAND! Can you not live up to my repeating your own
demands? The demands that you place on others???

If you can't, then you fail your own test. Those are the rules that
you, Steven J. Robeson/K4YZ/K4CAP/K4MARS put into place.

Do be a good little Extra and live up to your own expectations.

Post REAL Documentation of your MARS activities!

> Information YOU have had and accepted YEARS ago is no longer
valid?

I accept nothing that your lying lips have told me.

Now post REAL Documentation.

Your words, your rules, your expectations of others!!!

At this point, It Sucks to be Steven J. Robeson/K4YZ/K4CAP/K4MARS
(hi!)!!!

You give absolutely not thought to offending Mormons and homosexuals,
as long as you can offend your fellow amateurs. Way to go, Robeson.

> Brain, I think I need to address YOUR frequent reference to
> homosexuality in almost everything YOU see to the Scouting council
your
> in.

Assess your own need to frequently refer to the male genitalia, and
frequent reference to two males as "bunkbuddies," "couples," and
"wives."

There is no other conclusion. You are fixated with homosexual
thoughts. I merely point it out because it has no place here. Drop
it.

> You don't need to be "supervising" children.
>
> Steve, K4YZ

You don't need to be in the medical profession where you have access to
narcotics. Your beyond vivid imagination, frequent untruthfulness,
unwarranted accusations, and often articulated desire to talk to other
peoples wives and children is just creepy.

Dialing....

Your words, your rules, your logic. You've demanded documentation from
others. If documentation isn't provided, then the event never happened
and that person is forever known as a liar. Your words, your rules,
your logic.

Now documentation is being demanded from you. MARS documentation.
Scan it. Post it.

Or you fail and will forever be known as a liar (you've got a good
headstart on that, though).

While I have no love for the potty-mouth antics on N9OGL, it's
control-freak tactics like THIS which force me to include the following
DISCLAIMER in many of my posts.

DISCLAIMER:
This lecture brought to you free by K0HB, who hopes that you are not
offended by anything you read, inferred, assumed, presumed or otherwise
guessed I might have possibly meant as demeaning - unless of course you
are a pompous "full-of-yourself" individual who WANTS to be insulted.
In which case be my guest.

ZBM2,

de Hans, K0HB

Well that almost looks like an admission, but there was no abuse. I just pointed out that he looked and acted gay, and this was only after had made-up accusations that I downloaded kiddy porn and bent over for other men! So I guess it was/is ok for toad but not for anybody else? Kind of like I want my rights and I don't care if I violate your rights doing so! Dish it out but don't take it? I'm glad I wasn't left out of the blame for it not being his fault, or am I fully to blame? I'll tell you one thing I'm not toady, I'm not a snitch!

What is an "ANCOIC?" I know that "NCOIC" is Non-Commissioned
Officer In Charge but have never seen that acronym with "A"
as a prefix. "Assistant?" "Auxilliary?" "Asshole?"

>I've spent 21 years of Naval Communications and so far 34 years in

Obviously it
>is going to still be familiar to him some 50-years later, and he may
well
>remember his "first QSY".

I don't remember that order-wire content, only the transmitter itself and getting a 1 KW tuned up, getting the keying, then watching a more senior (to a no-stripe PVT-2) guy set the spread (shift) and then watching Frequency Standards report on the Mark and Space frequencies, in or out of tolerance.

Later, with three-up and one down, I would be the first one on the order-wire and responsible for the whole operating team for that shift. Most of what each team did was QSYing. With a minimum of 30 transmitters ON at all times, all on HF, there would be at least 2 QSYs in any 24-hour period...or about 60 in all. That means an average of 20 QSYs on each shift.

Back in the ancient times a "frequency shift" was NOT the simple act of setting a frequency synthesizer. There were none. :-) Except for the pre-tuned SSB beasties (nice jobbers from WE, later bigger nice ones from Collins), each QSY needed at least two guys...one to change crystals in the FSK exciters, one to tune up the transmitter. A pair of guys at the receiver site, about 40 miles away, would be manning a General Radio frequency meter (not a direct read-out thing, but the two-rack thingy designed during early WW2) and would check out the Mark frequency first, then the "spread" or shift to Space (then it was standard to do 850 Hz). There would be an audio line from "Standards" that would send down the heterodyne (zero-beat on Mark) tone for Space (Fox Test was on the keying line, put there by Control) and the guy on the exciter would set the 850 cycle spread by zeroing that against a local 850 cycle tuning fork oscillator, both

being on a speaker. The Trick Chief would then notify Control
and Standards to go ahead and measure. If Standards thought
it out of tolerance, they would say so on the order-wire and
Transmitters would have to tweak it again. Standards would
report the circuit, frequency name (names used to avoid any
mistakes by typos on numbers), and measured tolerance. All
of it was written down on the order-wire which would begin
the process by "XMTRS QSY PUSAN BAKER TO SCHLITZ" (as an
example). "QSY" was the second 'word' and "XMTRS" was to
differentiate transmitters from Standards. [we used the
old ABLE-BAKER phonetics until fall of 1955 when the NATO
standard phonetic ALPHA-BRAVO started]

>What is your most often-copied OPERATING SIGNAL? I'm guessing it is
"ZBM2" or
>"QBF?".

Heh heh heh...with Stevie as "ANCOIC," I'd say it was simply
ZOE. :-)

No matter. What Stevie say is "truth" and all others who
disagree with him "LIE." :-)

>Disclaimer: This lecture brought to you free by K0HB, who hopes that
you are
>not offended by anything you read, inferred, assumed, presumed or
otherwise
>guessed I might have possibly meant as demeaning - unless of course
you are a

which case
>be my guest.

Several more things, since I wasn't here for the start
of this jolly "exchange."

The Director of J-6 at the JCS is Lt. Gen. Robert M. Shea,
USMC. I'm surprised Stevie didn't mention that while
popping-to and singing about the Halls of Montezuma...

Q signals QAA through QNZ inclusive are the responsiblity
of the ICAO (International Civil Aviation Organization)
but may be used by the militaries. Again, NOT noted by
the resident CAP Ace.

ACP124D, RadioTelegraph Procedures, is void, defunct,
obsolete and "included for reference purposes only."
I've been mentioning that for years, getting told it
was a "LIE" yet there it is, OBSOLETE, in public
access form, written by CCEB and approved by the JCS.
[the PCTAs don't want to admit that...:-)]

RadioTeleprinter procedures are indicated as "frozen"
and probably will be updated soon...or deleted,
possibly replaced by some name for "data" or whatever
the CCEB wants to call electronic text common today.

>dit dit

Da da, komrad. :-)

"QSY" was about the only Q code used on the operations
order-wires, used so often that we didn't have any big
reference paper for all the other Q codes or Z codes.
All the newbies were told what QSY meant and we all used
it like a word in speech.

By the time I got to my MOS on the microwave radio
relay terminals, there was so little traffic on that
order-wire TTY for them that all we did each shift
was to check in once...more to prove the order-wire
worked than anything else. :-) If one microwave
terminal went down for any reason, we would be busy
as heck in slamming in 23 patch cords to transfer
that many channels to the hot spare terminal jacks
on the local patch panel.* That happened only twice
in the last year I was in microwave. We would notify
Control by the voice order-wire first and then follow-
through on the TTY. No codes or abbreviations used
for that, just plain text. With some 60 to 80 radio
circuits affected by one terminal outage, every
minute it was out really added up. Everything ON
for 24/7 was something we strove for each day. In
retrospect, ADA/RUAP did pretty damn good on UP time.

* For the Control-Transmitters audio & keying lines
& a half-dozen ordinary telephone circuits, the
microwave terminals were the ONLY connection. That's
why there were two "hot spare" terminals running
alongside the regular two. The patch panel in the
microwave room was used because it was much easier
to patch around the normal-through connections there.
For Control to do it would take them away from their
operating task of both receiving and transmitting
control and the torn-tape TTY terminal room behind
them. We could do a full patch-over within 30
seconds. When that happened ALL of the radio
circuits got interrupted and TTY relay would have to
do repeats on half of the radio circuits, not
something they liked nor was the Duty Officer happy
at all that cumulative outage. TTY tape relay would
just have to pull off the tapes and reset them on the
tape transmitting distributors. For reliability, the
GE microwave terminals all had duplicate Rx and Tx
hot-spares with auto-switchover...with fault

indicators to let us know one had switched over (also very rare). Direct crystal control to 1.8 GHz for a 1950 design by GE using all vacuum tubes.

Todd's problem stems from his misuse of his ISP. His Google
postings ID his point-of-origin as "Consolodated.net".

I know enough to know enough to know that lying mouths left to
their own devices soon become the ONLY voices. That's not acceptable.
That path has been taken before in history with disasterous results.

>beliefs, but reality doesn't much care what you believe.

Quite true. Concise description.

The same was true at Camp Owada, the receiving site shared
by USA and USAF...said to be the largest receiving site
anywhere at the time. Nobody there was working the
airwaves listening for distant morsemen. :-)

In the 1950s, ADA Control (then referred to as "Chuo Kogyo"
the old warehouse-company it had been) directly managed a
whole heaping gob of circuits, most of them TTY. The only
direct handling of messages was by the torn-tape TTY relay
(over 200 machines) on one floor of the converted warehouse.
Message Centers from all over Central Command (Honshu, Japan)
including USN and USAF would receive from or transmit to
RUAP, the TTY node identifier which was "ADA." Some of
those message tapes were literally hanging around, waiting
(by priority) for being put on transmitting distributors to
go somewhere. Radiotelephone circuits were also there
through the Military's side of the Tokyo telephone office;
those were through the second voice channel of the 4-
channel SSB circuits to Okinawa, Honolulu, San Francisco,
Seattle, Manila. Some small stuff came in from the Red
Cross if it was intended for the Central area and some

of it was civilian wire-services relayed to places like the Pacific offices of Stars & Stripes newspaper or AFRS (AFRTS was not yet formed). Some of it was from State Department (heh heh) and a little bit was MARS (which had rather low priority on the ADA facilities). ADA even did some Facsimile...very little, once in a while sending some USAF weather maps if USAF's own FAX capability was down or overloaded. Lots of small facilities sent TTY through ADA since it was an AREA Hq Command facility.

>Now then, when did YOU retire?

The "ANCOIC" got a MEDICAL discharge. [I really don't want to think _how_ that "discharge" was done]

I'm going to retire tonight. I retired last night, the night before...even the Cavalier wagon will be retired before wife and I go to Beloit this year.

LenAnderson@ieee.org

No disclaimer. The 'ANCOIC' gets very angry at disclaimers...thinks they are all "insulting" him and are all "LIES!"

You very well may have. But I ahve no desire to even see Ft Knox
from a distance.

On the otherhand, YOU have asked for evidence of my MARS
participation. You were given all the particulars. In 2003 they were
enough for you. In 2005 you can't seem to connect the dots. Your
problem, Brain.

There is no "letter of appointment" for such assignments, Brain.
But you're certainly welcome to follow the information you were given
and see who the ranking and the next-ranking MARS NCO's were at the
times I gave you.

I haven't lied. A lie is an intentional effort to decieve. I have
made no intentional effort to deceive.

Where I have been proven wrong on issues, I have corrected the
error and acknowledged it.

On the other hand, we have you and Lennie and Y E A R S of
stories not only laid bare, but aggressively defended as "right" even
when PROVEN wrong. THAT is a lie.

And so far, you've not proven that intent.

> It's pathetic that you can't live up to your own expectations of
> others. You're not a straw boss anymore, just a strawman.

Nope. Sorry, Brain, but no matter how hard you try to shake this,
you've not proven a thing. No matter how loud yuo yell or how hard you
try to re-direct, you're still a looooooong way behind being truthful.

> > > > But that's OK....Your kids will read these some day and

I am. And I am not lying in a public forum.

> > > Hans showed you to be a liar going back a long way. Today's lies

> > I acknowledged that and "stood corrected".
> >
> You dodged!

Nope.

Dodging is trying to make excuses or redirect from the facts. I
admitted that I was wrong and his reference was right.

Just the opposite of when YOU said ARES was "overblown" and they'd
never respond in a true emergency. I provided media releases of
CURRENT events that disproved your assertion.

And just the opposite of when you insisted that "all the techs have
been chased away"... You've not yet answered "who" allegedly chased
them away and where they went.

> > You, on the otherhand, still have not acknowledged your
misdeeds

your
> logic, and your expectations of others being applied to you.

So far you've not answered a sngle question about ANY of your
assertions, claims or other fables, Brain.

On the otherhand I've given you exact information on
who/when/where.

I've MORE that filled in the blanks for you...You DID ask for
"callsigns" initially, and then when you GOT what you wanted, you tried
to change the game...Sorry.

> You fail the test! Your own test! The test you wrote!

I ahven't written any "test", brain, so here we have YOU in a fable
again...

> > Try again, Brain. You've "proved" that you have the desire to
> > continue your course of mistruths and deceit.

> Quite true. Concise description.

So...Lennie's been telling us all along that he was an "operator"
at ADA...Hans "descibes" a typical station with the "message center"
being some significant distance away.

Lennie provided us with MOS's for radio mechanic MOS's.

Lennie acknowledges Hans' description as "concise".

Which only further substantiates MY claim that Lennie was never a
military radio operator. Just a mechanic.

> No need. You've showed all 29 and more, plus a junkyard full of beat
> up dodges.

No lies. No dodges.

You insist there's lies, yet when I ask you to prove them, you
just say "they're there"...So there's YOUR "dodge".

Hans had to go back three years to find it, but he found an error
I made.

I owned up to it, acknowledged I was wrong.

I sure am interested to see how you score that a "dodge".

> > > It must really suck to be Steve Robeson/K4YZ/K4CAP/K4MARS.
> >
> > I'm not K4CAP
>
> You've pasted K4CAP to your tagline for years. What changed?

I'm not K4CAP. And it wasn't on my tag line "for years"...It was
only 1 year until I got the gumption to change my Google account.

So...here we have YOU in an "error"...Let's see how YOU handle it.

> and I never was K4MARS...Another manifestation of
> > your overwrought imagination, Brain...???
>
> Idiot, there is no K4MARS amateur allocation. But I thought it was

> cute. Unlike you sucking up the K4CAP callsign for no useful
purpose.

Ohhhhhh...>>>>>>I<<<<<<<< see....You do stuff like that, and it's
"cute"...

And the "purpose" of me getting the CAP callsign was because I
thought I'd like it. I didn't. As the saying goes, "I paid my money
and took my choice..." My choice was to go back to K4YZ.

And what's your interest in it, Brain? Other than making a
meaningless NG argument out of it, that is.....

> > Why are you lying even more in the face of evidence to the
> > contrary, Brain???
>
> Steve, there is no evidence to the contrary. But please continue
your
> multi-state lying spree.

Sure there is.

You've not substantiated a single one of the assertions you've
made and been called on. ARES...??? No answer. Somalia...??? No
answer. Part95/15 devices as "major role"...??? No answer. Who
chased the Techs away...??? No answer.

You are a liar, Brian. It's that simple.

> One day Alec Baldwin will produce a movie
> about you. He'll get Woody Haroldson to act the leading role,
"NATURAL
> BORN LIAR."

Say it loud...say it often...but it still won't be true, Brain.

I, Roger Leo Wiseman, AB8MQ, being of unsound mind
have an offer to make to
others who are like me.

I live at 610 Glen Haven Avenue in Glendale, West
Virginia.

I have a two bedroom house that is situated in a
quiet and quaint part of
West Virginia. My house has 800 square feet of
floor space, has one bathroom
with hot and cold running water and a toilet that
works most of the time.

I am looking for a like-minded roommate who can
use the second bedroom,
which measures eight by ten feet.

The kitchen has a gas stove and a microwave, both
of which worked at the
time of this writing.

If you are interested in sharing my humble home
and can afford $400 per
month rent, let me know. I require only that you
pay cash up front at the
first of each month.

I will not ask for, nor will I look into your
criminal background since I
have one of my own.

Also, don't worry about the local Police. They all
know me so if you see a
squad car parked down the block during the day,
ignore them. The Chief often
stops by just to see how I am doing.

>paper, or overheard by the OPERATORS of ADA, Hans.

Tsk, tsk, tsk. Poor Stevie is OUT of his head again.

To set the record straight, I have to describe the
operating setup at ADA in/around Tokyo, Japan, in
the early 1950s:

"Control" was just outside (old site) Camp Drake NW
of Tokyo. It's major task was as a "torn-tape" TTY
relay (manual) station serving hundreds of TTY circuits
to/from Far East Command Hq at Pershing Heights in
central Tokyo, Army Central Command Hq ("central" being
the center of Army facilities in central Honshu, the
main island of Japan, Camp Zama near Yokohama (a part
of the Central Command and also a large depot)...plus
circuits to USAF Far East near Tokyo (several AFBs)
and the USN base at Yokosuka (pronounce that as
"yo-kuss-kah" with the emphasis on "kuss"), AFRS and
Pacific Stars & Stripes (military newspaper) offices,
a couple of civilian wire services, the American Red
Cross offices. Some of those circuits were to
"message centers" for their respective commands. All
of that was by TTY and each TTY node also had telephone
order-wires which were used to alert the various nodes
(both ways). Control itself was a very small place of
about 20 x 25 feet at the end of the TTY Relay that
occupied one entire floor of the converted warehouse
familiarly known as "Chuo Kogyo." Control had a full
time staff of about 8 for each shift, at least one
Duty Officer with the rest enlisted of E-4 or above.

Control tied in ALL the TTY Relay at RUAP (the TTY node identifier) -and- the radio circuits over ADA -and- did the selection of radio frequencies used for HF. Control always had live voice order-wires in addition to live TTY order-wires to Okinawa, Manila, Honolulu, San Francisco (always referred to as "Frisco") and Seattle. There were handsets on the center console (stand-up telephone-type thing, about six racks wide) which any Control person could pick up and signal the counterpart at those other radio stations. The TTY order-wires had their bells available for signaling.

The Receivers site at Camp Owada, itself about 5 miles NW of Camp Drake, was shared with USAF and had over 400 acres of wire antennas for HF. Those receivers were ALL for RTTY or SSB, the SSB being the original civilian-military-format of 4 voice-grade channels in a 12 KHz bandwidth. Most of the receive radio circuits at Receivers were space-diversity (two antennas each with automatic selection of the best antenna) and the FSK receiving adapters had various types of AFC on their converters separate from the receivers themselves. All the outputs would go to Control at "CK" by wire or via microwave radio relay (backup) through Control and usually to the TTY Tape Relay directly for all TTY. Receivers also had Frequency Standards, a small sub-group which consisted of two working an old General Radio (heterodyne type) two-rack "standard" that both monitored whatever long-distance radio circuit there was and HAD to check the carrier and shift (of RTTY) for each QSY at transmitters. "Standards" were on the TTY order-wire between Control and Transmitters. Standards gave the FINAL approval on a new QSY frequency ordered at Transmittes by Control. That was procedure at each Army radio station at that time.

Transmitters at Camp Tomlinson, NE of Tokyo, (new site) was built on an old airfield and cohabited by two Japanese agricultural test stations and lots of small farms. The old runways had become "streets" for all to use. By agreement with the Japanese government, the U.S. had priority to land use (same at Receivers) but any changes to antennas were always negotiated on-site by a troika of one American representative plus two Japanese from two separate Japanese government agencies. The airfield was approximately 1 x 2 miles (give or take) and had primarily horizontal rhombic and delta-feed dipole wire antennas. ALL of the transmitter radio circuits at Tomlinson were RTTY or SSB, all getting there via microwave radio relay from Control.

The "Crypto" section for ADA/RUAP was also manned by personnel from my Signal Battalion and located in the sub-basement of FEC Hq main building at Pershing Heights in central Tokyo. Crypto folks were all specially-cleared (better than ASA personnel, I was told later) and NEVER "talked shop." I went past the separately-enclosed Crypto room in the sub-basement several times to the small wire terminal (our Battalion manned) but never saw the crypto machinery...the "rotor" machines that were never compromised by anyone until the Pueblo was captured. TTY wire circuits carrying in-clear TTY content were physically separate from "normal" wire lines, could only be "tapped" by physically digging into the soil and through all the concrete supports. The encrypted TTY content appeared as garbled, very garbled.

At Pershing Heights there was a distant blockhouse which contained two 1 KW RTTY transmitters, a PE-95 motor-generator set, and the usual O-5 Exciters and Model 19 TTY. This was one of the backup-in-case-of-total-destruction of the transmitter site. That was checked periodically on a bimonthly basis, never using more than "Fox test" TTY (THE QUICK BROWN FOX JUMPED OVER THE LAZY DOGS BACK, ADA TESTING 1234567890) supplied by Control's three Fox Test generators (mechanical cam-switched small marvels). In addition to that, ADA had about a half dozen AN/GRC-26 huts on trucks which were Field Radio stations with wire antenna kits and own motor-generator tow-behinds...left-overs from the Korean War now in a state of "permanent" Truce, but ready for worst-case emergencies. The LAST "emergency" link (1953 to 1954 only, abandoned after that) was an old AN/GRC-9 so-called portable 25 W output voice or CW set with hand-crank generator. On quarterly tests the "Angry-Nine" was never able to connect with the emergency test net from transmitters due to IM-overload from a quarter Megawatt RF field on HF all around it. :-)

None of the above is "cut-and-paste" from any website. I WAS THERE, saw what I described, did what I described. I was at several of the Central Command "Message Centers" for brief periods but I NEVER SAW ANY "OPERATORS" SITTING WITH RECEIVERS' HEADPHONES ON, WORKING ANY MORSE KEYS LIKE IN THE MOVIES, TV, OR IN OLD QST PICTURES FROM WW2. That includes all the USAF facilities, such as their big comm center at Fuchu or the shared transmitter sites at Funabashi and Tsukishima Island (old site for ADA Transmitters but used by the USAF 16th Communications Squadron). Not even at the Army MARS office at Pershing Heights (two personnel, both WACs). To be honest, the Army MARS office moved to Hardy Barracks by 1955 and had their own transmitter-receiver there with a tri-bander

beam...never saw the interior, only the antenna on its tower. MARS was never attached to my Signal Battalion but some kind of unusual Special Services thing in the organizational charts of the time...they were never integrated into any of the four-layered Emergency Communication plans/priorities I had to know about later as a Supervisory E-5 ("three up and one down" NCO, not a Specialist rank that had been introduced around 1954 in the Army).

The ONLY time I ever saw a "morse key" being used was ADA NCOIC Don Ross trying to use the Angry-Nine during the quarterly "last-ditch-net" tests. Don was an E-6 ("three up and two down"), had both an amateur Extra and commercial First 'Phone and First 'Telegraph license. Ross was generally an "unwarm" personality but was unusually grouchy after each failed Angry-Nine test. :-) That GRC-9 set was depot-stored in late '54 and dropped off the emergency planning. The GRC-26 huts all had manual keys packed with the equipment but those were never used...the TTYs on their internal bench was fired up for regular operational testing. An Angry-26 could do RTTY and voice communications simultaneously, via FSK on the built-in Exciter and AM through the legendary BC-610 transmitter (out of Hallicrafters).

Can YOU find any evidence of the antiquated, emotional portrayal of the Lone Morseman OPERATOR of the 1950s or later? Not in the BIG communication facilities. I was THERE, remember, and HAVE the references, the photos, have posted some of them, had them sent to the Pacific Stars & Stripes military newspaper offices with some published. I KNOW some of the people who were there at the same time I was...a civilian employee long retired, now living in California...N2JTV, Gene Rosenbaum, retired from the FAA who worked at ADA when I was there.

>"Sgt. Anderson" was a radio mechanic, not a station operator.

Nope. MOS 281.6, Microwave Radio Relay Operations and Maintenance Supervisor (the little decimal-six denoted that). I was assigned to Fixed Station Transmitter operations and maintenance due to a deferred installation of microwave facilities. IN service, one gets assigned and DOES THE JOB (or winds up way out in some unpleasant place if failure happens). I DID THE JOB.

NOWHERE on any TO&E (Table of Organization and Equipment) was there any "radio mechanic" specialty...not then, not later. NOWHERE in the Central Command OR in any military facility in the Kanto Plains area was there ANY "operator" at a single station making like the classic headphone-

wearing morseman beeping away at DX locations. NO HAM-STYLE "operators." This was a "Big Business" professional radio communications facility handling nearly a quarter million TTY messages a month just through ADA/RUAP...way back in 1955...fifty years ago.

Are there any references to all that? Absolutely yes, although obscure. There's no glamour, no romance, no emotional tie-in to the brave, noble single morseman saving the world or his ship or whatever as he is described in the let's-all-cheer-for-ham-radio a la QST and ARRL.

Were there any such "operators" using CW? Of course there were...on USN ships, on long-flying USAF aircraft, one or a few persons per ship/vehicle...even on long, over-water civilian air carriers and civilian ships...in 1955. That went AWAY. Air carriers dropped the navigator-morseman combo specialty when single-channel SSB voice was available (thanks to SAC and Collins Radio for showing how)...they've been long retired. Civilian shipping went for higher-speed data via different "TORs" and voice on HF SSB for the long runs (VHF voice in harbor, coastal areas), plus the adoption (worldwide) of GMDSS for international distress and safety alerting. The Army dropped any morseman training long ago for ANY communications...they run the single U.S. government facility involving morse cognition at Fort Huachuca, AZ... not only the Army Military Intelligence School and Hq but also the Hq of Army MARS.

> Nice try, though.

Awwww...you poor thing...you NEVER got the assignment opportunity to work REAL communications in the militry. So, you have to mean-mouth any and all who did. That's not patriotic, that's not even the Marines' Way. You don't want to accept ANY criticism of any kind. Tsk. Offhand, I'd call you - to your face - just a poor schmuck with too much Envy with resulting HATRED of all who DID SOMETHING.

Maybe that's in The Amateur's Code of 2005? Must be. You are a glaring portrayal of all that should NOT be in a hobby activity...rude, crude, blued...dissing all that dare speak back at you. Tsk, tsk, tsk.

Tsk, tsk, tsk. Hans Brakob described the MILITARY
communications system quite correctly...as did I.

>> >perform "QSY"'s when directed. I know that flies in the face of
your
>> >beliefs, but reality doesn't much care what you believe.
>
>> Quite true. Concise description.
>
> So...Lennie's been telling us all along that he was an "operator"
>at ADA...Hans "descibes" a typical station with the "message center"
>being some significant distance away.

That was true, correct, how it was, and how it mostly is
now with the exception of HF *not* being used for long-haul
military communications. Now the "message center" in the
Army is set up alongside one of various Signal Corps ground
satellite terminals...or alongside one of various Signal
Corps Troposcatter terminals...or alongside one of the various
Signal Corps multi-channel data terminals. All of those
mobile and self-contained.

The morsemen in the military have long ago departed the
scene. There MIGHT be an M.I. Intercept specialist
listening in during an ELINT exercise but that is about it.

Boomers and Sharks (missle submarines and hunter-killer submarines to you landlubbers) get their Alerts via VLF which are transmitting specially-encrypted DATA. That is all automatic, enough to let the sub commander raise the boat to deploy sat antennas or whatever else they use for the REAL messages...which are still encrypted DATA.

What Hans described is concisely how the Army organized their communications...in Okinawa, in Seoul, in Pusan, in Manila, in the caves of Hawaii (AHA), outside of San Francisco (AGA), outside of Seattle, outside of Anchorage Alaska...to name a few. In documentation, I have the map of the 1960's TTY network worldwide with the locations marked clearly...and in PUBLIC disclosure BY the U.S. Army.

> Lennie provided us with MOS's for radio mechanic MOS's.

Tsk, tsk, tsk. A LIE.

I've lost track of Brian Burke's LIE Count on little Stevie but certainly that is one of Stevie's LIES.

I've described my MOS, that of Fixed Station Transmitter Operators-Maintainers, that of Field Radio Operators-Maintainers. None of them are "mechanics." I have given the links to the Army's own MOS web-page which gives concise descriptions of ALL Military Occupation Specialties. The only "mechanic" there seems to be on vehicles.

> Lennie acknowledges Hans' description as "concise".

Correct.

> Which only further substantiates MY claim that Lennie was never a
>military radio operator. Just a mechanic.

Tsk, tsk, tsk. There was NEVER any "radio mechanic" MOS given out in the U.S. Army since WW2.

The closest to that is the RAF's "artificer" title for avionics specialists.

Transmitters and receivers tuning HF are called "radios." Those must be kept operating when higher command says they must operate.

Message content at major and medium scale TTY communications nodes are NOT sent/received by individual "operators" but rather through MANY who operate the communications network.

When message traffic reaches a quarter million per month, it is just too much for dozens, hundreds of single operator handling and the delay in routing becomes intolerable. The Army found that out prior to WW2 at WAR (Washington Army

Radio) and increased the TTY network even before the USA
was in WW2. "Torn-tape" TTY relay using chadless p-tape
printing allows a TTY Relay operator to simply read the
message header and to physically move it to the destination
TTY reader and send it. Duplicate received tapes can be
punched as needed if for multiple destinations.

<snip>

> Only your mistruths are lies, Lennie...the rest is just fantasy.

Tsk, tsk, tsk.

You say Hans "lies." You say I "lie." By extension, you
must say the United States Army "lies" and the Pacific
Stars & Stripes military newspaper "lies." Everyone who
is not accepting Stevie Robeson "lies!"

"Fantasy?" I was THERE, doing what I said, even had my
picture taken doing some of it, have documentation from
Army sources, one of which has been posted on the web
(I've given the link in here). I have references in the
form of textbooks, one of which is the "Collins Sideband
Book" (familiar name) on the communications system. The
archives of the Army Communicator bulletins (at the Fort
Gordon website) show how communications was done, the
organization, the duties. Fort Gordon is the Signal
School home as well as the Signal Corps center. They
know what consitutes an "operator" of radio equipment.
Stevie Robeson doesn't agree on "operator." Stevie ought
to write the Army and "correct" them. Let Jimmie Noserve
"correct" Donnie Rumsfeld. :-)

Stevie Robeson NEVER did any BIG military communications.
Never experienced it, never worked in it, did only the
MARS thing with "operators" in his concept of "one radio,
one station, one message at a time" headphone-wearing,
key pounding morseman fashion? :-)

I did it for three years, brevet in at least three other
MOSs, all involving OPERATIONS...all the while RESPONSIBLE
for my part in GETTING THE MESSAGE THROUGH. I did.
We did. In a professional manner.

Hans Brakob did that and MORE for a longer time than you
could. Since he doesn't accept you as any "authority"
you call him a "LIAR."

Everyone "LIES" and "FANTASIES" except Stevie. Sigh.

That's a common mental deviation right there. Psych 101
teaches it. No doctorate required to know or recognize it.

Get some mental help. Get a good dentist, too...let
him fix up your teeth so you can actually smile in those
photos. Your medical plan cover that?

ZOE and QRT.

How generous. How do you propose running your blood through a
lie-detector test?

Wouldn't it be easier to post the required MARS documentation? The
required "7 hostile actions" documentation?

Guess not because there is no documentation, it didn't happen.

> And I am sure you find the idea that anyone might want to
> communicate with your other family members "creepy"....

All kinds of people communicate with my family. You are not one of
them.

I find you creepy. Stay away from my family.

Poor Gopher face, he always acknowledges he is too stupid to
pass the Extra exam. Of course, if he was able to do something
in life, he'd pass it because they used the same questions from
the old Advanced question pool on it. Roger took the retest, and
still upgraded to Extra, while you still havfe an obsolete
license. I bet you couldn't pass it if YOU had to retake your
tests...
So you think the Extra is a "status symbol?" hmm, I wonder how
the thousands of Extras licensed think of that opinion? Sounds
like "sour grapes" on your part, because you know deep down
inside you couldn't pass it.

Poor Lardass Davies, over 10 years a no code tech, he can't pass
simple 5 wpm code, nor can he pass the General theory exam.
I bet if you were intelligent enough to learn it, tubby, you be
the first one crying about someone
wanting to get rid of the requirement. Your just fat and lazy

and don't want to do the tough
things in life. That is why you are a 31 year old obese pizza
driver instead of doing something productive in your life. If
you can't even commit to learning morse, then you will always be
a fat pathetic loser. The fact is, you want affirmative action
for it, and so you wait to see if they downgrade the
requirements to no morse at all.

YOU have the homosexual innuendo, Brain. That's why I worry about
you and small children who are not your own.

> You can stop both at any time. I encourage you to do so.

Stop yourself, Brain. You're the one who is always "fixated" on
"homosexual" themes

> Nurse, heal thyself.

Of what...???

> > Anytime you're in Tennssee you're welcome to stop by and I
will
> > gladly let you watch them draw my blood and follow it through
> > pathology, Brain. Then there will be yet another unfounded
assertion
> > of yours to climb out from behind.
>
> How generous. How do you propose running your blood through a
> lie-detector test?

You're the one making suggestions that I am diverting narcotics
for personal consumption, Brain. I am offering to let you watch them
go step by step through a drug screen test. That is, in a sense, a
"lie detector"...

> Wouldn't it be easier to post the required MARS documentation? The
> required "7 hostile actions" documentation?

You were gien more than enough information, Brain. If I had 20,
sometimes 30 year old documents to show you, I would, just becasue I
know how humiliating it would be to you.

But...You WERE given easily verified facts. You don't seem to
have adequate skills to put them together...

Sucks to be you.

> Guess not because there is no documentation, it didn't happen.

Did happen. You have the information in hand. Why do you insist
that you don't? Everyone here can see you lying, Brain. Why
perpetuate yet ANOTHER mistruth?

> > And I am sure you find the idea that anyone might want to
> > communicate with your other family members "creepy"....
>
> All kinds of people communicate with my family. You are not one of
> them.
>
> I find you creepy. Stay away from my family.

Your family will come to me, Brain...By way of reading what has
transpired in these exchanges. I don't ahve to go within 100,000 miles
of them...It's YOUR words and YOUR actions that they will see.

> > If I had the unsavory reputation that you do, Brain, I
wouldn't
> > want my spouse to know about it either.
>
> So how do you keep it from your spouse?

I don't. She looks over my shoulder from time to time and her
exact words are "Which one of those idiots are you arguing with
now...?!?!"

> > No doubt your kids will find out soon enough, eh...?!?!
> >
> > > Dialing....
> >
> > For help, I hope.
> >
> > Steve, K4YZ
>
> Stay away!

I keep telling you over and over, Brain...I DON'T HAVE TO GET NEAR
YOU! It's >>>YOUR<<< words and actions that your friends, family and
loved ones will see. Probably from YOUR computer in YOUR
house...eventually...

And then they will get to know the same Brain that we have come to
know and...Well..Make fun of...

Steve, K4YZ

No "alleged" to it, Brain.

You've been given dates, times and specifics. Any police
detective would be laughing all the way to court with that much
"evidence", but you can't seem to connect the dots. Need crayons?

Brian...make no mistake...

I can hold my head up. I make mistakes, but I also acknowledge
them when I do and move on.

You do not. THAT is documented. Over and over and over.

You have the specifics of when I was in MARS, the callsigns, where
I was when I had those calls and what I was doing.

YOU, on the other hand, have left a trail of unsubstantiated
claims and assertions that you refuse to either back up with SOME sort
of "proof", admit were just "off the cuff, uninformed opinion", or were
blatantly untruthful.

Sucks to be you. No luck needed here.

Steve, K4YZ

Why is it that you underestimate everyone but yourself?

I know the answer, I just want to hear your answer. Hi!

> > And I'm recalling the extension I gave for you to post
documentation
> of
> > your alledged MARS service. You didn't make my deadline.

> Nothing was alledged. You were given the information necessary
to
> make an informed decision.

I have made an informed decision. Until that time when you post
official documentation, it will remain "alledged."

> You failed to do it. Not my problem.

You failed to do what you demand from others. Your failed your own
test.

> > Sucks to be Robeson.

> Not today it doesn't.

Everyday that you fail to live up to your own words, your own rules,
and your own logic is a Suck Day for Robeson. Best of Luck.

Lennie, keying the transmitter in the course of maintenance or testing, does not make him a "military radio operator".

I obtained a certification as a Suture Tech while doing volunteer EMS at Camp Lester, Okinawa.

Does the fact that I am certified to close wounds per sterile technique make me a surgeon?

> > "Q" signals are NOT used in MILITARY applications
>

What is "havfe"? The Advanced isn't obsolete, it is still a valid
license and it will be until the FCC says differently. Wrong again,
two-test.

You've made more dodges than the Chrysler Corporation!

And you've claimed that you were appointed to a MARS position on
Okinawa. That seems impossible to me because you know little to
nothing about MARS. Now back up your assertion with real
documentation.

Post your letter of appointment.

You're that, too. But I don't want people to call me Capt. Obvious, or
turn me in to the SPCA for beating a dead horse.

> You ARE known as a liar...On RRCB or RRAP, agitator or not.

Only you think that. Meanwhile, you have been proven to be a liar, and
make lying your daily bread.

Glad to hear your motor skills are adequate. No back or neck brace
noted in flight suit photo.

> I make mistakes, but I also acknowledge
> them when I do and move on.

Then why cannot you live up to what you DEMAND from others?

Were those demands mistakes? If so, do take the time to acknowledge
it, apologize for it. The day you start acting like a human being
instead of a complete jackass is the day you'll be treated as a human
being.

> You do not. THAT is documented. Over and over and over.

You do not, documented again and again, over and over. On the surface
it looks like you hold to a double-standard. But when I look deeper,
it gets much, much worse.

> You have the specifics of when I was in MARS, the callsigns,
where
> I was when I had those calls

Silly Gunny, I need to see an authentic letter of appointment. Got
one? (hint: look in that shoebox full of medals.)

> and what I was doing.

As far as what you were doing? Obviously not MARS communications or
you just might know a little something about MARS. Hi!

Now go find that letter of appointment and post it for all to see.

Just a refresher course for all of you!
Seemed like a timely time for it.

ps: I also not that many of the ham radio op's I know
seem to fall into one or more of the below categories! (grin)

Enjoy!

---- cut ----

http://www.kook-watch.net/mdavï¿½is/kooks/kooks.html

What is a kook?

First and foremost, kooks believe -really weird- stuff. But
simply holding weird beliefs isn't enough to make someone a kook.
It's the tactics they use to spread their beliefs that separates
kooks from the merely eccentric. Below is a list of common kook
distinguishing characteristics. The average Usenet kook will
possess at least several of these traits. ï¿½ber Kooks will possess
most or all of them.

a. Kooks make lists of their enemies. Anyone who maintains a list
of enemies is almost certainly a kook. Anyone who appears on one
or more kook enemy lists probably isn't a kook.

b. Kooks are control freaks. Kooks try to moderate the NG and try
to force people to only talk about certain subjects and/or
conduct themselves only in what the kooky wannabe moderator sees
as the correct manner. Kooks will even complain to the ISPs of
other NG posters whose views they don't agree with in an attempt
to have them removed from Usenet.

c. Kooks are paranoid. Most kooks are big believers in
conspiracies large and small. They seem to think everyone is out
to harm them or at least silence them (because they alone know
the truth, (see d). From the mighty New World Order, to various
three letter agencies of the Federal Government to anyone on the
NG who disagrees with them, kooks see enemies everywhere and make
lists of them (see a).

d. Kooks are always right. They have had the absolute "TRUTH"
bestowed upon them by god or the aliens or by the voices in their
heads or whatever. They are utterly convinced that they, and only

they, know the "TRUTH." No matter how many times their beliefs are proven wrong, they continue to cling to them like grim death and will never, EVER admit to being wrong about ANYTHING.

e. KOOKS LIKE TO SHOUT IN ALL CAPS. THEY SEE THEIR MESSAGES AS BEING SO IMPORTANT THAT THEY NEED TO SHOUT THEM OUT. THEY WANT TO MAKE SURE *EVERYONE* NOTICES WHAT THEY HAVE TO SAY.

f. Kooks are obsessed. They are obsessed with certain subjects and certain other users of the NG, even to the point of stalking them. But above all, they are obsessed with spreading their message and keeping it in discussion at all times on their favorite NGs. Kooks rarely let anyone else get in the last word in any discussion that touches even remotely on one of their obsessions.

g. Kooks will create sock puppets and use them to attack their enemies and/or post positive responses to the kook's own posts (since no one else will).

h. Kooks are incapable of intellectual debate. Kooks believe they are in possession of the absolute TRUTH on a given subject or subjects and they are here to share that truth, not debate it. Since kooks are always right and will never ever admit to being wrong (see d), they refuse to debate their beliefs and tolerate no skepticism toward them. To a kook, anyone who disagrees with them MUST be either ignorant, insane or a paid disinformation agent out to discredit them (see c).

i. Kooks don't have a sense of humor, especially in regards to the subjects they are obsessed with. They are always deadly serious about their pet issues and often berate other NG users for not taking them seriously enough. Kooks are perpetual straight men. Their lack of humor is ironically one of the kook's most amusing characteristics.

j. Kooks lie. Kooks lie about their backgrounds, their qualifications, their achievements, their level of education, their experiences, etc., etc. Kooks see their message as being so important that they are willing to do whatever it takes (especially lying) to get that message out and make it look like it came from a credible source, rather than from a mere kooky nobody who can be safely ignored. Kooks however aren't generally smart enough to lie well or be consistent in their lying, so they are easily caught and their lies are often exposed. However, even when presented with absolute proof of lying, a true kook will never admit to it (see 4) and usually either ignore the evidence or claim it was manufactured by some "conspiracy" that is out to discredit them (see c).

k. Kooks tend to be hypocrites. For example, they will rage against others for posting off topic material but still do it

themselves regularly, and they take great offense when someone else points out that they are off topic. When this is pointed out, they will go to great lengths to try to justify *their* off topic posts as being so important that topical considerations are irrelevant. Another example of kook hypocrisy is name calling. A kook will rage against others for name calling but be completely oblivious to their own continual name calling and ad hominem attacks on others. Kooks tend to live by the motto of "Do as I say, not as I do."

l. Kooks don't play well with others. Since kooks are paranoid, always think they are right on every issue, tolerate no skepticism or differing views and always want to be the one in control, kooks just don't get along with other people, not even other kooks. Every kook is an island unto itself of strange beliefs and weird psychoses. Kooks are very lonely people, and it shows.

The homosexual comments are yours, Robeson. Recall your frequent
references to the male genitalia, and to two males as "bunkbuddies,"
"couples," and "wives."

Redirection is impossible. Your comments are archived.

> > You can stop both at any time. I encourage you to do so.
>
> Stop yourself, Brain. You're the one who is always "fixated" on
> "homosexual" themes

I do not make such comments. You do, and it's all archived.

I ask you to stop. Will you?

> > Nurse, heal thyself.

Your words. Why do you run away from your own words when confronted by
them?

You claimed that you wanted to sit down with me and teach me a few
things. If that isn't a desire to become my mentor, I don't know what
is.

Hi! Hi, hi! You worked from "verbal orders?" No dice.

Must have papers! Authentic Papers! Got Papers???

> But you're certainly welcome to follow the information you were given
> and see who the ranking and the next-ranking MARS NCO's were at the

You're certainly welcome to paost papers, if such an appointment ever
happened. At this point, I see no evidence whatsoever.

Unless you can post authentic papers...

If only you had even demonstrated the smallest knowledge of MARS, I
might be able to take your word for it, but that is not the case.

So I must see your papers.

> Where I have been proven wrong on issues, I have corrected the
> error and acknowledged it.
>
> On the other hand, we have you and Lennie and Y E A R S of
> stories not only laid bare, but aggressively defended as "right" even
> when PROVEN wrong. THAT is a lie.

I see it differently.

> And so far, you've not proven that intent.

You claimed to have held a MARS position of authority on Okinawa, but
you demonstrate a huge lack of knowledge of MARS communications.

So what am I to believe?

Papers. Post your papers. Don't have 'em? Didn't happen. Your
words, your rules, your logic.

Are you ready to abandon your core values because they are inconvenient
for you?

> > It's pathetic that you can't live up to your own expectations of
> > others. You're not a straw boss anymore, just a strawman.

you
> try to re-direct, you're still a looooooong way behind being truthful.

No redirection. I've merely asked you to post documentation of your
claims to having held a position of authority in MARS communications on

Okinawa. That wouldn't be necessary if you had shown even the
slightest knowledge of MARS communications...

> > > > > But that's OK....Your kids will read these some day and

Looks different from here.

Just post the papers and I'll believe you. Got papers?

> > > > Hans showed you to be a liar going back a long way. Today's

Go back and reread your subsequent posts. I see a greasy old slant
six.

> Just the opposite of when YOU said ARES was "overblown" and
they'd
> never respond in a true emergency. I provided media releases of
> CURRENT events that disproved your assertion.

My opinion. And it was noted that you couldn't produce a single viable
schedule for the exercise with available volunteers. Too bad. That
kind of made my point.

> And just the opposite of when you insisted that "all the techs
have
> been chased away"... You've not yet answered "who" allegedly chased
> them away and where they went.

My opinion. Been discussed before.

What is not my opinion is your claims to having held a position of authority in MARS on Okinawa. Got papers?

> > > You, on the otherhand, still have not acknowledged your
> misdeeds

It's your turn, Steve. You answer the questions surrounding your assertions. Start with MARS. Got Papers?

> > You fail the test! Your own test! The test you wrote!
>
> I ahven't written any "test", brain, so here we have YOU in a
fable
> again...

The test that you apply to everyone else. Why do you run away from your own demands when those demands are made of you? It would appear that there is a double-standard at work here.

> > > Try again, Brain. You've "proved" that you have the desire
to

YOU are the one who mentions homosexuality, Brain. If you infer
homosexuality becasue I suggest that your political intamacy with two
others here has a familial overtone, then that's YOUR interpretation...

> > > Nurse, heal thyself.
> > >
> > Of what...???

>
> But you've made the claim numerous times (of other people) that if
> authentic documentation is not produced, then the action never
> happened, and the person is forever a liar.

I've asked for information that verifies claims, Brain.

Like the name of the OIC who allegedly gave you permission to
operate in Somalia.

And where those Techs went...

And what substantiates your "ARES is overblown" statement in the
face of federal money being spent on them and "responses" being made
every day.

And what response plans include Part 15/95 devices as "major"
players.

> Is this Robeson Rule no longer valid? If not, why?

There was never a "rule", Brain...And if there was, you never
played by it anyway. You continue to make assinine assertions
unsubstantiated by any fact.

> You have the information in hand. Why do you insist
> > that you don't? Everyone here can see you lying, Brain. Why

Good. Because I am only about 550 miles away. And even if I
COULD be 100K miles away, it will STILL be your words and your actions
that they see...

> > I don't. She looks over my shoulder from time to time and her

Actually, I pretty much leave that to Lennie, although you've
earned it yourself on a couple of occassions.

> > On the other hand, we have you and Lennie and Y E A R S of

>
> I see it differently.

I am sure you do...I am sure you'd like to see ANYTHING that
diverts attention away from your numerous errors in this forum over the
YEARS, Brain.

I made a mistake on "Q" signals in "military" communications.
You've latched on to it although I have already admitted my error.

The problem is you are trying to hide your ample errors behind a
sappling, and it isn't working.

> > And so far, you've not proven that intent.

inconvenient
> for you?

No "core values" abandoned.

I've asked you for details of assertions you've made for
years...ie: just some name of the alleged OIC who gave you "permission"
to operate in Somalia, or some reference that validated your

"unlicensed devices" claim.

You've never offered an iota of verification of ANY form.

And I've never said "Let me see your papers"...That's Lennie's
schtick...

> > > It's pathetic that you can't live up to your own expectations of

My error via "Q" signals does not negate teh rest of my
expereicnes in MARS, Brain.

You have the information.

Either act on it or admit you're a coward.

> Correction: Sucks to be Steven J Robeson/K4YZ/K4CAP/K4MARS(hi!)

Still wrong, Brain. And still 66.6% wrong on callsigns, Amigo!

Not a very good record, now is it?

Steve, K4YZ

5607. RRAP suggestion: Let's all go back to 14.313 again

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-28 13:35:05 UTC
From: dancin chicken <billyrimjobber@arrl.com>
Message-ID: <70a96$4270e69d$d1cc4eef$18724@snip.allthenewsgroups.com>
Source record: 107123

I been reading this amusing sandbox war
going on in rrap for a few weeks on and off now.
It's a safe be that everyone knows the protagonists
the prevaricators and the prickly pears by now.

While it is humorous to see a group of grown (??)
middle-aged, bespectacled, bulbous-beer-bellied
males with ham radio licenses acting like 8 year
olds in a sandbox...it does lack the spontaneity and
the humorous aspect of the great Radio Wars of
days gone by. Y'all know what I mean...

Tell me who in here at rrap could forget the nightly antics
of "The Mike and Judy Show", the ballads sung by
"The Red Panty Man", the endless hours of creative jamming
coming out of Western NC (...and the 'baby crying solution'
with the 'vox thingie' from down the street!) ;)

Remember the BARF Cannonball Song? ("now listen to the
jingle, the jangle and the roar...as-he psychobabbles all day...")
How about helping 'Bathroom Man' clean up the school
restrooms? Remember him? our friend from Phoenix?
And of course, the great one himself KV4FZ who made it
all possible. (Herbie on 313 was truly ham radio's answer
to TV preacher Robert Tilton)

Ahhhh....! Warm memories of days gone by, of a time when
real RADIO FUN ruled the airwaves.

So the question asks: "Why not take this ongoing sandbox war
in rrap (..and rrs) back to 14.313 where it belongs?" Don't you
guys reading this know that there are *hundreds* of ham OP's
out there who long for the humor of the old 14.313? You have
a FANTASTIC opportunity here to revitalize 14313 on the
weekends for the masses to once again to tune into and have a
couple hours of laughs LIVE and ON THE AIR.

Not pecking at a dammed keyboard, but LIVE COMEDY
comming out of the HF radio speakers like it was meant to be!

Think about it guys...your public is waiting and if you build
it they WILL come. (well, something like that anyway)

"cluck-cluck-clucl-buckety-buckety-buck
cock-a DOODLE-doooooo!!!!!"

> > tests...
>
> What is "havfe"?

Looks like a typo. We noticed you dodged the issue, again,
though!
And, nice admission that you couldn't pass a retest if it was
administered to you today.

>The Advanced isn't obsolete, it is still a valid
> license and it will be until the FCC says differently.

Then why don't they issue NEW ones? It's obsolete, regardless if
they let underachievers like you hold on to them and all the
excuses in the world won't cover up the fact you are too lazy
and stupid to get the Extra. Even when they incorporate some of
the Advanced questions from the Advanced question pool on the
exam.

And, Roger still passed his retest and upgraded, while you
desperately cling to an obsolete license!
Sort of like how you clinbg to your obsolete moral code.

> Wrong again, two-test.

http://www.arrl.org/hamradio.html

"The rules for earning an Amateur Radio license vary depending
on which country you live in. In the US, there are three license
levels, or "license classes" (Technician class, General class
and Extra Class). These licenses are granted by the Federal

Communications Commission (FCC)."

Wrong as usual, Gopher face.

From the FCC website
http://wireless.fcc.g
ov/services/amateur/about/operatorclass.html:
Grandfathered Operator Classes

No new Novice, Technician Plus, or Advanced Class amateur service operator licenses will be issued. These licenses, however, may be modified or renewed. Technician Plus class operator licenses will be converted to Technician Class licenses if renewed. Technician Plus class operator licenses will also be converted to Technician Class when modified to show a vanity call sign.

Novice

The Novice Class operator license is for persons who have passed the 5 wpm telegraphy examination, but only the first part of the written examination formerly required for the Technician Class. Privileges include four bands in the HF range, one band in the VHF range (30-300 MHz), and one band in the UHF range (300-3,000 MHz).

Technician Plus

The Technician Plus Class operator license was issued to Technician Class licensees, who, in addition to passing a written examination, also had passed at least a 5wpm telegraphy examination. A Technician Plus Class licensee is authorized the privileges of a Technician Class licensees plus the privileges of a Novice Class licensee.

Advanced

The privileges of an Advanced Class operator license include 275 kHz of additional spectrum in the HF bands.

Hi Kim,

I'm not sure how I missed this. I guess it's because I rarely check USENET anymore, I'm mostly OTA in my spare time. (Which, sadly, isn't much.)

I do agree that there are a multitude of ways folks can enjoy AR. I also believe that the code "impediment" was removed in 1991 (?)

when the No-code Technician class license was created, thus negating the infamous "barrier" argument. Some have said that this is insufficient without HF privies. From a relative newbie's perspective, this is kinda shameless. (I really don't mean to sound inflammatory, but...)

I suppose I'm "old school" but I think privileges are just that, privileges and not rights. I consider it a privilege to be able to access part of the HF spectrum where calls like 3D2NA (Fiji Isles) or 3Z1IARU (Sp. IARU commemorative station) literally "emerge from the ethers," work 'em and subsequently receive their QSL card. Is that for everybody, I suppose not. Many of these calls are not so prevalent on phone though.

I also believe it was a very good thing that the No-code Tech ticket opened AR to many who weren't quite ready to commit themselves to learning the Morse code. However, to ask that all three license classes be made "No-code" is somewhat akin to being given a nice juicy hamburger and then demanding that it be steak, hence kinda shameless.

My original statement stands. There are lots of folks that could be enjoying some serious DX who don't even know how much they'd enjoy it if they would simply focus their energies on rote memorizing 43 sounds rather than complaining about how unfair the code test requirement is.

Anyway, I don't believe it was ever really about the code test. Drop Element 1 completely AND do away with the published Q&A pools, THEN brace for some serious bellyaching. I think the FCC will recognize that too many present licensees support the retention of Element 1 to drop it completely. Look for it to remain for the Extra class ticket.

My $0.02. :-)

Some Jewish hams will not operate the radio on the Sabbath or other
holy days. Others will. It's up to the individual to make the
determination of what one will or will not do on those days. We
don't have a Pope or equivalent to make that determination for us.

I am an educated and practicing Jew (Conservative/Masorti Movement)
and I have no problem working ham radio during those hours where I
am not conducting or attending services in the synagogue or doing
other family-oriented things. It is, after all, the rest and
relaxation which is the object of the Sabbath. It's not "business".
Others may feel differently and that's OK for them as long as they
do not try to impose their interpretation on me.

As far as the British --- no argument from me !!

Yes, and we British (learn to spell if you wish to insult us) got rid of the Nazi's for you.

It's just your turn to be persecuted. Get over it. Regardless which day of the week is chosen, some cult will chose that as their High Holy Day and they will be unable to attend.

Nope, less than 2-1/2 years.

Actually you're guilty of only a modest exaggeration, but if Brian or Len had exaggerated something by a similar ratio you'd have labled them "liars".

I wonder why that is?

If Brian or Lennie had such an error pointed out, there'd be a six month long rant on how licensing in Somalia or how Lennie single handedly passsed 1.2 million messages at ADA in 1953.

I just acknowledged the error when it was shown and moved on.

Do you wonder why THAT is...???

We had this very subject come up not too long ago, and it caused such
acrimony that the item finally worked its way up to the ruling General
San Hedrin Council, of which I am the Chief Scribe. Being uneducated
and from a liberal blue state, I decided that ham radio operation was to
be permitted only by uncircumcised Jews on even days of the month and
then only if family-owned business had first been tended to. Now, if they
work for national corporations, then they were to follow the odd day
schedule, which was first promulgated by Jewish members of the ARRL
in 1934. The thrust of my ruling, which rode in on earlier rulings first
made during The Six Day War in 1967 was for most Hasdic Jews to
not feel as though they were under any particular pressure to operate
their ham radios, if the 31st day of the month fell on a Saturday. As for
me, I prefer freeband operation, where they accept my Jewish
persuasion. Anyway, like I told them at temple last Saturday, y'all just
have a good time. That's the whole point. Oh, and I just elmered
Moshe into ham radio and already he has dxcc. These extra lite hams

just don't appreciate the old days.

73,

Rabbi Phil
Chief, Ruling General San Hedrin Council
Lower Chicago, but sometimes upper right Manhattan

interpretation...

You are the one who puts forth homosexual ideas and situations:

Two men sleeping together as "bunk buddies."

One man taking another man as his "wife."

Constant references to male genitalia in the yiddish word "putz."

You are the one who mentions homosexuality all too frequently. I
merely point it out and ask why.

Why, Brain?

Your stories ARE "obvious" as are your useless attempts to snivvel
out from under your stupid assertions.

As for "dead horses", therin lays one of YOUR "double standards,
Brain...same "catch phrases" over and over again...

> > You ARE known as a liar...On RRCB or RRAP, agitator or not.

You were given the details, Brain.

Far more information than YOU have ever provided us.

> > You've been given dates, times and specifics. Any police
> > detective would be laughing all the way to court with that much
> > "evidence", but you can't seem to connect the dots. Need crayons?
>
> Need authentic letter of appointment. Got one?

Don't need one. Gave you the specifics.

But you don't have the cajones to find out for yourself.

> > I make mistakes, but I also acknowledge
> > them when I do and move on.
>
> Then why cannot you live up to what you DEMAND from others?

I gave you the DETAILS you asked for...then once you saw I was
willing to do that, you changed the parameters...

Sorry, Brain...You ahve the details...Now if there's more you
need, I will post it RIGHT AFTER you answer some of the questions I
ahve put to you for YEARS...

> Were those demands mistakes? If so, do take the time to acknowledge
> it, apologize for it. The day you start acting like a human being
> instead of a complete jack### is the day you'll be treated as a human
> being.

Ahhhhhhhhhhh...Getting into the AngryLennie mode...Out come the
profanities in lieu of any further "rational" discussion. That "civil
discourse" you always make allusion to in others, Brain...?!?!

Uh huh!

> > You do not. THAT is documented. Over and over and over.
>
> You do not, documented again and again, over and over. On the
surface

> Now go find that letter of appointment and post it for all to see.

Waiting on you, Brain...Waiting on you.....

Steve, K4YZ

5637. Todd's Really Lsoing It Now...

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-29 14:16:07 UTC
From: K4YZ <k4yz@aol.com>
Message-ID: <1114784167.277712.207600@z14g2000cwz.googlegroups.com>
Source record: 107153

Ok, as most of you know I'm running an information bulletin on HF, and
it seems that there are some whinny..

"whiney"

little ###hole ham radio operators who are crying here on the internet.

The only oen crying is you, Todd.

They are crying about these bulletins because simply put they don't
have the balls to do anything about it except cry about
it.....booohooo!

No one's crying here, Todd. However if you crank up on HF 24/7,
you'll find out that 99.999% of your critics will be anyone >>BUT<<
RRAP participants.

It seems that I have learned from a few amateur radio operators that
I'm on the FCC Amateur Auxillary list.

Todd...You got your chain jerked and you did the absolutely most
predictable thing....went into knee jerk mode.

Yeah right, a ####ing group that has no real concept of freedom of
speech.

More of us have actually been responsible for GIVING you that
right, Todd...And you just abuse it and make a mockery of it.

Read some good civics books.

"Freedom of Speech" was NEVER intended to allow foul, profane,
mentally deranged persons such as yourself be a public nuisance.

"Freedom of Speech" was intended to (A) ensure the freedom of an
open and unencumbered media, and to allow the rank-and-file citizen to
participate in his/her chosen religion and form of government.

You make a mockery of it.

The reason I'm supposable...

"supposedly"

on this list is because of these whinny amateur operator (and we know
who they are, they can be found on rec.radio.amateur.policy) simply
because they live out it the bum#### outback hillsides and don't have
the mental capacity to read, expecially the FCC rules.

We, including me, read the rules just fine.

YOU don't like the idea that your "target audience" finds you to be illiterate, ill mannered, foul mouthed and bascially an annoying shadow of what an "Amateur" ought to be...

So for those ####ing hillybillies that can't read let me break it down for you.

If they can't read or write, how would they know what it is you're about to say...???

So go gather your wife/sister so she sit by and read it too you, since women from where you are are a hell of lot smarter and she can explain it to you! you ####ing inbred mother####er!!

Always with a sharp wit and silver tongue, eh, Todd...?!?!

So manly...so strong...NOT!

So in other words it is up to the control operator to determine what goes through his or hir...

"her"...

radio, not some dumb###es on some newsgroup on the internet! It not my fault if some slimy little weasel want to use a national organization like the ###HOLE RADIO RELAY LEAGUE (ARRL) and the FCC to supress someone speech because he is a die hard communist.

Todd, you claim to be some champion of free speech, yet you are constantly railing agains the ARRL...An organization that has not said ONE word about you or your idiotic shows.

Not a ONE of the people, myeself included, has alleged to speak on behalf of the League.

So why do you keep insisting that the ARRL is somehow trying to suppress your "free speech", when it's so blatantly clear that the organization could care less about Todd McDaugherty...????

Since I've acquired (2) Alinco DX-70 transceivers and (2) Ameritron AL-82 Amplifiers, I've decided to choose two frequencies on 20 meters (3 khz either side of toads show) and have a 24/7 news service warning other amateurs about the toad (freedom of speech). Since I hate the ARRL so much, I'll rebroadcast all of their bulletins for amateurs that may have missed when the ARRL first broadcast them. Frequencies pending on toads choice of frequency. I hope toad gets a female from Taylorville to help him/her/it run the show, they'd have to be smarter them him/her/it, you can't get much dumber!

> FCC, didn't you, Gopher face? BWHAHAHAHAHAHAHA!!!!!!!!

Yes, indeed I did wogie, back in about 1962. You see (this is sorta technical so you may need to get the 5th grader next door to explain it to you wogie), I did receive a letter from the FCC about interference to a television set across the street. At that time, some televisions used a 21 mhz intermediate frequency, and every time I operated on 15 meters (that is around 21 mhz in case you didn't know) I would get into this television's IF and cause interfernece. The owner filed a complaint and the FCC did send me a letter to respond in 10 days of the situation. I did respond and explained the problem, also stating I would not operate on 15 meters, as a courtesy to the set owner, during her favorite TV viewing hours. The FCC sent the set owner a letter stating the problem was hers, not mine and I did have the right to operate my station at any time and she should be appreciative of the fact I volunteered not to operate during certain hours. Only letter I ever received from the FCC, end or story.

Never had to retest like wogie because of violating the rules, not even once, much less twice.
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHAHAHAHAH!!!!!!!!!!!!!!!!

Bet wogie couldn't pass even the General exam, much less the Advance or Extra if he had to take them when they were real exams, not at some license give-away VE session where he got his Extra-lite.

>
> If Brian or Lennie had such an error pointed out, there'd be a
six
>month long rant on how licensing in Somalia or how Lennie single
>handedly passsed 1.2 million messages at ADA in 1953.

1. Brian had simply mentioned he did some ham radio
from Somalia when he was on active duty, assigned
there. I saw no "discussion of licensing IN Somalia."
I did see a lot of name-calling and general personal
insults directed ON Brian by yourself and Das Kolonel.
Both of you, plus Jimmie Noserve, had tried to pass
yourselves off as "experts" on amateur radio licensing
in trying to INFER that Brian was "breaking the law"
by "not having the 'authorization.'" You know NOT
of such "authorization" and none of the three of you
have ANY authority on that of any kind.

2. I've never claimed credit for "single-handedly passing
1.2 million" anything. What I stated was an
APPROXIMATION of the number of message I was
RESPONSIBLE FOR TRANSMISSION as an OPERATING TEAM
LEADER...not in 1953 but rather late 1954 when I had
the rank (E-5) to BE an Operating Team Leader. It is
obvious to any rational mind that NO ONE PERSON could
possibly transmit 220 thousand messages a month over
a single radio station. That takes teamwork and ALL

on the team MUST do their part.

3. Saying you can read the future is itself a LIE. You
are neither Saint nor Savant With Prescience. Ergo,
you CANNOT say such things as "there'd be a six
month rant" by anyone on anything, especially when
you cannot get your IMAGINED activities by others
factual.

> I just acknowledged the error when it was shown and moved on.

That is (probably) the BIGGEST LIE of Robeson. Robeson
tries and tries and tries and tries to turn around ANY
accusation by misdirection, personal insult of others, and
general accusation of misdeeds by his accusers.

1. As an example, when pointed out to Robeson that the
Department of Defense does indeed DIRECT MARS, was
given the exact web link to that DIRECTIVE, spent over
two weeks of messaging AVOIDING his mistake in saying
"MARS >>IS<< amateur radio." Robeson could have simply
acknoledged that DIRECTIVE's existance and shut up on
the subject. He did NOT. If Robeson ever said so, he
hid that "acknowledgement" in a smokescreen of verbiage
(mostly garbiage) which still attempted to misdirect
the subject AND managed to level personal insults on
his accusers. There was NO "moving on" but a long,
long, protracted (by the Angle of Dearth) message
exchange where his very real ERROR was NEVER admitted.

2. This newsgroup has been turned into a personal battle-
ground of Robeson's own doing. It has become a cess-
pool of insults, invective, rationalizations leveled
by Robeson in an attempt to show Robeson never, ever
made any mistake...all mistakes are (in Robeson's
output) done by OTHERS. One needs only to look at all
the message thread titles CREATED BY ROBESON where he
practices his ugly invective storm und rang on all
who will not agree with him.

> Do you wonder why THAT is...???

Nobody need "wonder" about Robeson's appearance in messages
here. He acts the textbook sociopath, fighting against all
who disagree with him in the slightest. Further, his output
of insults has the (again, textbook) flavor of "progression."
In "progression" he has tried to accuse his accusers of
doing the THE SAME MISDEEDS THAT ROBESON DOES. Robeson says
he "holds a mirror up to a person" but actually he is only
looking at himself in that mirror. Robeson describes
himself, not his accusers. [elementary Psychology 101 and
102 once required courses for a California EE degree]

Someday this newsgroup - if it survives - may actually discuss POLICY in amateur radio. This week there have been some ventures into that. However, in the main content of this cesspool cum newsgroup, most of the topics and the continuing battle of Robeson against everyone else. :-[

I've never seen anyone ask about rear area Army radio stations in
the 50's, Lennie, but you sure do let us know about it.
have ANY authority on that of any kind.
=
> 2. I've never claimed credit for "single-handedly passing
> 1.2 million" anything.

Your INITIAL claim, before everyone with a grade school mathematics
education put the numbers back in your face was that YOU were
responsible for this feat.

You only changed your story to "team" after a week of being hit
over the head with your silliness.

> What I stated was an
> APPROXIMATION of the number of message I was

> RESPONSIBLE FOR TRANSMISSION as an OPERATING TEAM
> LEADER...not in 1953 but rather late 1954 when I had

> on the team MUST do their part.

If could have been in ANY time era, Lennie...Your INITIAL "story"
was that YOU were responsible for this feat. "Teamwork" didn't enter
the picture until days later.

Nice try, though.

> 3. Saying you can read the future is itself a LIE.

I never said I could, Lennie.

> > I just acknowledged the error when it was shown and moved on.
>
> That is (probably) the BIGGEST LIE of Robeson. Robeson

You're the one with the misdirection, Lennie.

I NEVER claimed that MARS was under anyone's direction other than
DoD.

I DID say that the same SPIRIT of AMATEUR RADIO was what made MARS
what it is.

> Robeson could have simply
> acknoledged that DIRECTIVE's existance and shut up on

The examiner lauded Rogie in that despite years heaped upon years of abuse

of rectal intrusions by his buddies, Rogie's rectum is amazingly still functioning.
The Examiner commented that it is rather surprising that Rogie can sustain such a vast amount of "intake" while still being able to "output" from the same cavity.
This is, in short, proof positive that Rogie can "talk out his ass" while simultaneously "taking it in the ass."
This also explains Rogie's inability to spell well. It is nearly impossible to sound out words when the Lavender Lads are probing Rogie's Back Door. (it disrupts his concentration)

Bi Lingual.
1. able to speak two languages.
2. spoken in two languages.
3. Roger Wiseman. Able to speak from an oral and anal cavity simultaneously.

5670. Here's Your Answer, Todd....

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-30 13:35:02 UTC
From: K4YZ <k4yz@aol.com>
Message-ID: <1114868102.236810.254210@l41g2000cwc.googlegroups.com>
Source record: 107184

A couple of points, Todd...

QUOTE:

He gets my ISP to boot me the newsgroup, if he had a problem he should of went to google it their system not consolidated. It is also my humble opinion don't know @@@@ about free speech.....the little #####er don't understand that the real concept of free speech, no instead he gives us the nazi version of free speech.

UNQUOTE

Todd, >>MY<< free speech was to ask you over and over to stop being profane, obnoxious and abusive in public. NO LAW in the United States REQUIRES me to tolerate being abused in a public forum.

And please don't give me the "If you don't want to read it..." silliness. If people let themsleves be pushed around by every creep that thought that it was their "right" to be a bully or public potty mouth this would be a very sad place to live indeed.

Sorry you don't agree.

There is a very painful and delicate balance between the lattitude permitted by what we call "free speech" and where your "right" to be abusive in public stops.

Unfortunately, even in the United States, there has to be limits to ALL things if people are going to live in a productive and (relatively) peaceful society.

You just can't have this many people with disparate ideas living together unless there is a certain amount of tolerance AND a certain amount of restraint.

I asked you (others asked you) over and over to watch your mouth and tone it down. You didn't. You got what you deserved.

And I was serving the very same Constitution that you so flagrantly abuse before you reached puberty, Todd. I know a bit more about it than you.

QUOTE:

One thing more I would like to know from that ###hole what "wanton violation of federal regulation" am I suppose to be promoting??? then again coming from a ####ing liar.....

UNQUOTE

Todd, You've bragged about your "pirate" operations over and over
and have stated you'd do it again.

Operation of any type of RF radiator without a license that
doesn't fall within the few license-free categories (certain subparts
of Part 95 and Part 15) is a violation of federal law.

It really is THAT simple.

Enjoy life from the sidelines...There's nothing more to say to you
except see ya later...most likely under "enforcement actions".

Steve, K4YZ

Someone has to do it...poor Stevie NEVER did anything
close to such HF communications...as an amateur or
anything else.

Stevie fails to get the point: A half century ago,
the MAJOR message load throughout the U.S. military
was by teleprinter, NOT morse code. Way higher than
90% of ALL message "traffic" in the military. A HALF
CENTURY AGO.

Perhaps nearly a quarter million messages a MONTH is
not enough traffic in your fevered imagination? Tsk.
That kind of traffic was done by the third-largest
Army station in ACAN (later STARCOM, later the DCS
or Defense Communications System)...using the old
60 WPM rate teleprinters. "WAR" (actually RUEP at
Fort Detrick) handled over a MILLION messages per
month.

>> 2. I've never claimed credit for "single-handedly passing
>> 1.2 million" anything.
>
> Your INITIAL claim, before everyone with a grade school
mathematics
>education put the numbers back in your face was that YOU were

>responsible for this feat.

Tsk, tsk, tsk. You still don't understand what the word APPROXIMATION means. :-)

Neither transmitters nor receivers personnel kept a count of the messages going and coming...we kept the radio equipment OPERATING...most circuits being 24/7. Traffic Analysis group at Control did the tallying, primarily for administrative purposes and to gauge the loading on the many and various radio paths to the rest of the network. No more than about four, two in Control (one being the Duty Officer on shift) and two in the TTY Relay section.

OK, let's do an APPROXIMATION of the numbers based on very brief data that appeared in the Pacific Stars & Stripes military newspaper of 1955 (exact issue not known, not that it matters except to certain pedantic literalist morsemen)...that being 220,000 messages a month average in 1955. Based on a 30 day month, that works out to about 7333 messages a day average... which is about 2444 messages (average) per 8-hour shift...or 306 messages an hour (average) or 5 messages a minute (average)...all day, all night, seven days a week, 52 weeks a year...continuous traffic...stopped only for about 3 hours during a solar storm some time in late 1955 (neither receivers nor transmitters shut down, were on-line and waiting but it gave the TTY Relay section a nice break time).

By the way, there's a nice mnemonic in "220" which is also the APPROXIMATE number of teleprinters in the TTY Relay section floor handling all the TTY in/out of RUEP (the node identifier for Tokyo at the time).

My active duty time in the 8235th Army Unit (the "other" identifier for my Signal Battalion) was three years. So, given that I was actively responsible for my part in handling all that traffic (none of us did it all on our own) then, IF and only IF the 220 thousand per month was an average for all three years, a total of message traffic through ADA/RUEP was APPROXIMATELY 7.92 MILLION! An average PER YEAR would be 2.64 million. Now, if I were only directly, intimately, hands-on like involved for 8 hours per day AVERAGE that works out to a "mere" 880 thousand per year... except I was there for three years so that AVERAGE APPROXIMATE ESTIMATE (give or take) jumps back to 2.64 MILLION. [I do hope I haven't taxed your 16 neurons excessively on this so far...]

As to this "1.2 million" figure, that would be WRONG
IF and only IF TAKEN LITERALLY...IT HAS TO BE MORE!
My AVERAGE APPROXIMATE ESTIMATE was being very kind
to your one-op, one-transceiver amateur minds in
taking that 2.6 million down to roughly half. There
were some duties that involved simple maintenance,
testing, administrative duties, a couple of quick
equipment courses, etc., etc., that did NOT involve
DIRECT, HANDS-ON RESPONSIBILITY for keeping the
motto of GETTING THE MESSAGE THROUGH "live." For
example, in a month of duty exchange spent in Control
(to relieve another E-5 who was sick) my ON-LINE
RESPONSIBILITY was for a GREATER NUMBER than the
ones I ESTIMATED.

An EXACT tally is impossible. None of that was a
requirement. The only requirement was ABSOLUTE:
GET THE MESSAGES THROUGH. WE did. All of us in
our unit.

> You only changed your story to "team" after a week of being hit
>over the head with your silliness.

I used the term "team" for understanding by those
who have NOT been in that kind of communications.
WE used the term "trick chief" to denote a team
leader for operations and maintenance on a shift.
ADA transmitters had four teams working in a curious
12-day cycle of three days on each shift followed
by three days off. "Trick chiefs" were usually
E-5s with an E-4 as Assistant "trick chief."

>> the rank (E-5) to BE an Operating Team Leader. It is
>> obvious to any rational mind that NO ONE PERSON could
>> possibly transmit 220 thousand messages a month over
>> a single radio station. That takes teamwork and ALL
>> on the team MUST do their part.
>
> If could have been in ANY time era, Lennie...Your INITIAL "story"
>was that YOU were responsible for this feat. "Teamwork" didn't enter
>the picture until days later.

Tsk, tsk, tsk. TEAMWORK was NECESSARY a half century
ago, always has been, still is (at least in USA and
USAF and USN military communications). The U.S.
Military is entirely PROFESSIONAL...not a bunch of
amateurs having fun in a hobby activity.

>> 3. Saying you can read the future is itself a LIE.
>
> I never said I could, Lennie.

Then why do you WRITE "what would be?" You don't
KNOW that your imaginings will take place.

>> > I just acknowledged the error when it was shown and moved on.
>>
>> That is (probably) the BIGGEST LIE of Robeson. Robeson
>> tries and tries and tries and tries to turn around ANY
>> accusation by misdirection, personal insult of others, and
>> general accusation of misdeeds by his accusers.
>
> Ahhhhhhhhhh....I see....Saying that I realized I made a mistake
and
>accepting that fact is "misdirection"...

Misdirection, personal insult of others, and a general
accusation of misdeeds by accusers. Google archives
are packed with your examples of NOT "acknowledging an
error and moving on!" :-)

> I NEVER claimed that MARS was under anyone's direction other than
>DoD.
>
> I DID say that the same SPIRIT of AMATEUR RADIO was what made
MARS
>what it is.

Bullshit squared. What Robeson wrote was -

"Sorry, Hans, MARS >>IS<< amateur radio."

The only "spirit" there is unwilling to come out in
the light of day. :-) MARS was "made what it is"
by the United States Army prior to World War 2...a
grandiose public relations thing "to get radio
amateurs [of the early 30s] involved with Army
radio communications." [from Army history as I
originally pointed out] After World War 2, the
USAF joined with USA and adopted the acronym of
MILITARY Affiliate Radio System. Note that
"amateur" does NOT appear in that name.

Civilian radio amateurs were NOT very active in
the pre-WW2 MARS (few volunteers who did not
contribute as much as the Army founders hoped).
Civilian radio amateurs were active in the post-
WW2 MARS, helping the morale effort of a generally
peacetime military scattered across the globe
through messages and "phone patches" stateside.
That dwindled after the "end" of the Vietnam War.
Today's military enjoys a much more DIRECT route
of communications through the DSN and Internet.

It's unfortunate (for the U.S. military) that
certain amateur radio publications have made

much more than reality of the "contributions"
to the "military" for so long...they have
brainwashed too many amateurs into thinking
they are the heart and soul of MARS. Amateurs
are NOT the heart and soul. Some volunteers
(not all) USE their volunteerism as a perverted
badge of herosim/patriotism as if they "serve"
the nation. The DoD still runs/directs/operates
MARS...and NOT ON the amateur radio bands.

> Leonard H. Anderson >>IS<
> And putz....

Poor baby. Robeson just can't get through a
few minutes without insulting an "opponent."

Robeson CANNOT acknowledge that some have much
more experience IN radio communications than
he ever had. Rather than find out anything of
the various communications systems or organizations
he winds up doing PERSONAL INSULTS in lieu of
discussion on a SUBJECT. That's Robeson's
sickness demonstrated in here against all of his
opponents.

Robeson is the role model of today's amateur
extra?

Dear Doctor Phil:

I have been experiencing muscle twitching and spasms all over my body for a few years now. It started in my left eye and then my right. At first, I would notice it after I sent anonymous email, jammed 20 meters or thought about Lloyd Davies.

Then it started to do it on a more frequent basis. Then I began noticing small twitches in my arms, then my back, then in my face. By the end of the week I felt them going off every few seconds, randomly, from head to toe. I have gone to Doctor Stagger Lee, had EMG, and they found nothing! They said my head is empty.

I admit I suffer from anxiety over Lloyd Davies, so I decided to try Zoloft to see if this would stop the spasms.

So far it hasn't helped. I don't sleep well, and have other mental problems and ill feelings.

I am wondering if anyone else has had this mania or could give me the name of someone who can help me. I need help, and I need it now.

Roger Wiseman

"Lloyd" <lloyd@no.spammmmm> wrote in message
news:87017833.2458789@tarrnews.net...
And in those days it came to pass that the FCC warriors were sorely
bored by a long period of inactivity. Malaise and disinterest had
settled upon the Gettysburg office personnel like some great, grey
disease.

Fortunately, one of their number - known as Sir Riley of Hollingsworth
- was able to rally morale and bring life back to the office. He said
unto the others "Let us go out and retest. Let us retest Woger
Wiseman," and the others saw that it was good and rejoiced.

Boredom was dispelled, and the Gettysburg office returned to its
normal infighting, backbiting, and political intrigue.

And so it came to pass that Woger Wiseman was retested on a whim and
not because of anything he himself may have done. In the process, he
saved the FCC's Gettysburg office.

All praise and honor be unto Woger Wiseman.

Amen.

....

Good one! Of course I am LMAO at Roger's expense.

Spoken like a true control-freak.

Fortunately the US Constitution which we are blessed to live under places limits on very FEW things, as opposed to the "there has to be limits to ALL things" mindset often found in the "Constitutions" of petty dictators who have the need to "regulate" their society.

"As it is an ancient truth that freedom cannot be legislated into existence, so
it is no less obvious that freedom cannot be censored into existence."
-- Dwight David Eisenhower (1890-1969), 34th US President

"Our liberty depends on the freedom of speech and that cannot be limited without
being lost."
-- Thomas Jefferson (1743-1826), 3rd US President

The only valid limitation of free speech under our Constitution is your
individual right not to listen.

Wrong crackhead.

I won't be drinking tonight because I am low on money this week plus
battle star gallactica will be on soon right after scooby doo.

BWHAHAHAHAHA..He watches "Battlestar Galactica" and "scooby doo
cartoons!" No wonder he can't get laid! BWHAHAHAHAHAHAHAHAHA!!!!!!!!

If you say so, Steve.

Personally I live life and pursue freedom to the fullest. Sometimes it isn't cozy, but that's the price of liberty. If you want "cozy" you'll have to sacrifice your freedoms --- I'm not into that kind of sacrifice, and so far our beloved Constitution hasn't been repealed.

"Congress shall make no law.... abridging the freedom of speech...."

Roger doesn't have long hair, Porky. You lose again.
And what is the thing you have with grease? Did it start with your
drunken abusive daddy coming home drunk and sodomizing you? He greased
you up like a pig, didn't he?

> middle-aged dork who was kicked off of both Altopia and COTSE!

Says the 31 year old bald, obese fat fucking dork who can't even get a
pity fuck!
And who got kicked off off AOL of all places.

Oh, the IRONY!

In a practical sense there are de facto limits. One is perfectly free to commit slander and libel. It's not illegal and one cannot go to jail for it. Yet people CAN be held finanicially liable for the effects of their slander, etc. This liability for the effects of one's "free speech" are a limit even though it is not censorship.

There can be a PRICE for exercising free speech, but there is no LIMIT.

"Congress shall make no law.... abridging the freedom of speech...."
--Amendment I, US Constitution

A limit is unconstitutional on it's face, and imposing a limit CAN put you in
jail.

73, de Hans, K0HB
